## Validation changes due to upcoming SIS Release 1.10

Several changes with impact on the SIS validation and record structures will be deployed with the upcoming SIS Release 1.10. A Major Release 1.10 Scope Document was prepared to give participants an overview of the changes going into the release. The full suite of SIS technical documentation had been updated to reflect the changes and was published on the SIS website under the Technical Documentation page.

Please pay special attention to these changes as they might impact your billings, causing the files to fail validation:

- Mandatory Reason Remarks for PAX/CGO rejections (CMP 697);
- Improved validation on the use of reason code 1A for PAX rejections (CMP 704);
- Mandatory Remarks for certain reason codes for PAX/ CGO Billing Memos and Credit Memos (CMP 705);
- Restriction on Multiple PAX Sampling Form Cs for the same Provisional Month (CMP 701);
- Mandatory RFIC/RFISC information for EMD rejections (CMP 694);
- Summarized Taxes and VATs for MISC IS-XML (CMP 693).

Also, please note the provision of dedicated Source Codes for billing of exchanges/refunds of frequent flier coupons (CMP 699) and PAX BM rejections (CMP 698).
