Issues Fixed and Released in Production for Period of Reference

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.10.4	7779902	Minor	Runways Chargecode , TypeOfWeight in LID	Area: IS WEB MISC Issue: This issue exists in the detailed validation of MISC and UATP IS-XML files. If a validation error was detected for a dynamic field of Line Item Detail record, and a previous Line Item Detail record existed without the same field, the same error was thrown for both Line Item Detail records. During QA verification, we found one more issue as below. When multiple occurrences of a group are provided at Line Item Detail and if more than one occurrence of a group contains an invalid value for a particular field then the validation report was showing only one error that is for the last occurrence of a field, it should show all fields in error Corrective Action: The code has been fixed: To indicate errors only for Line Item Detail records where the validation error actually occurred. To throw error for each field that failed validation

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.10.4	7971882	Minor	Upcoming milestones (local time) displays incorrectly	Area: IS WEB Issue: There was a query from a user in India mentioning that the local time was shown incorrectly in the Upcoming milestones grid. IATA SIS Ops team too got to see on their screen that the local time was showing PST(Pacific Standard Time) instead of EST. On investigation, it was detected that this bug surfaced due to the security fixes change as the local time zone parameter was not getting populated properly which resulted in the reported error. Corrective Action: We have modified the code now to display the local time getting displayed in Upcoming milestone grid as per the Local time zone. After this fix, local time as per the user's current time zone will be displayed accordingly.
1.10.4	7993946	Minor	Validation Report for Payment Status Update file - data reported with double quotes	Area: IS WEB Issue: There was an issue in the Validation Report generated for Payment Status Update file. The values of all fields printed in this report were enclosed within quotation marks (" "). The value of the field should be included in quotes only when it contains a comma (,). Corrective Action The code changes have been done to include value of a field in quotation marks only when it contains a comma in it

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.10.4	8032858	Minor	DS issues in existing code	Area: IS WEB Issue: Corrections are required in current DS process in following three scenarios, - Currently, when DS is required by Debtor, Legal Invoice Format of Creditor country is defined as XML and Legal Invoice Format of Debtor Country is defined as PDF, the format of Legal Invoice Sent to DS Provider for Digital Signature is PDF instead the format sent should be XML. - Currently, when DS is required by Debtor, Legal Invoice Format of Creditor country is defined as PDF and Legal Invoice Format of Debtor Country is defined as XML, the format of Legal Invoice Sent to DS Provider for Digital Signature is XML instead the format sent should be PDF - Currently, when DS is required by Both Creditor and Debtor, Legal Invoice Format of Creditor country is defined as PDF and Legal Invoice Format of Debtor Country is defined XML, the format of Legal Invoice Sent to DS Provider for Digital Signature is XML instead the format sent should be PDF. Corrective Action: We have modified the code to fix this issue as defined below: - When DS is required by Debtor, Legal Invoice Format of Creditor country is defined as XML and Legal Invoice Format of Debtor Country is defined as PDF. The format of Legal Invoice sent to DS Provider for Digital Signature would be XML. - When DS is required by Debtor, Legal Invoice Format of Creditor country is defined as PDF and Legal Invoice Format of Debtor Country is defined as XML. The format of Legal Invoice sent to DS Provider for Digital Signature would be PDF. - When DS is required by Both Creditor and Debtor, Legal Invoice Format of Creditor country is defined as PDF and Legal Invoice Format of Debtor Country is defined XML. The format of Legal Invoice sent to DS Provider for Digital Signature would be PDF.

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.10.4	8047299	Minor	Updating sub division in location ID gives error	Area: IS WEB Issue: The values populated in Member Profile field 'Subdivision Name' should belong to Country of that particular location. This is working correctly when a new location is created but when an existing location (other than "Main") is modified, field 'New Value' of future update popup populates subdivisions of the country of location "Main". Instead, it should populate subdivisions belonging to the country of that location Corrective Action: The code changes have been done to fix this issue when an existing location is modified. After this **fix,** field 'New Value' should correctly populate subdivision names i.e. belonging to location country.
