Issues Fixed and Released in Production for Period of Reference

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.4.8	4132415	Major	RM BM CM reports not working	Area: IS-WEB/Reports/RM BM CM Report Issue: The RM BM CM Summary report was not providing any results at screen level Corrective Action: To fix this performance issue, we have modified the approach. This report will no longer be generated immediately. Once user requests the report, they will get an email with a URL where he or she can retrieve directly the report generated offline . As another alternative the user can also directly download the report using the Download option offered at screen level
1.4.8	4370193	Trivial	Aligning sorting logic between CGO/UATP and PAX/MISC in Billing History Screen	Area: IS-WEB/Billing History Screen Issue: In Cargo and UATP screens, sorting billing history is based on the concatenated value of the currency code amount. It should be based on amount only. Corrective Action: Code has been modified as per PAX & MISC screens where now the sorting on billing history search screen will be based on amount (without using the currency code)

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.4.8	4453039	Minor	Member Profile issue on Internet Explorer 11	Area: IS-WEB/Member Profile Issue: When user tried to edit the location tab in the member profile for the Country field, the future update fields were not visible in IE 11. Corrective Action: Now users will be able to see and edit the future updated fields on the Location tab of the member profile if using IE 11.
1.4.8	4455567	Minor	Extending search results for PAX/MISC Billing History and Payables screen up to 500 records per page	Area: IS-WEB/Billing History Issue: Currently, on PAX and MISC 'Billing History' and 'Payable' screens user can able view up-to 200 records maximum per page. Due to this limitation, user was unable to initiate a Correspondence on Rejection Memos where count was greater than 200 records at the Billing History screen. Corrective Action: We have now increased the number of records you can view at once to 500. User can select any one of these options [5, 10, 20, 50, 100, 150, and 500] records per page

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.4.8	4453213	Major	Duplicate Billing Memo	Area: Validation/Billing Memo Issue: System was not checking duplicate BM whenever multiple BM was raised in a file against one correspondence Corrective Action: In past a fix has been implemented for duplicate BM issue for parallel processing of BM files. But one scenario was missed where multiple BM's are submitted in one file against one correspondence. We have fixed this particular scenario now in all billing categories.
1.4.8	4499500	Major	Audit trail Issue	Area: IS-WEB Billing History and Correspondence Issue: Member was not able to view the data of audit trail for Cargo Rejection Stage 2. This issue occurred due to a specific condition missing when the RM/BM/CM Indicator was set to "None Corrective Action: This "None" condition was now added for RM/BM/CM/ indicator".
