Memorandum

DISH REVISION 23 Update Bulletin 2020/1

NOTICE OF CORRECTION
17 AUGUST 2020

The following editorial correction has been identified for the implementation of DISH Revision 23 Update Bulletin 2020/1. The DISH23 Update Bulletin 2020/1 publication is corrected and the revised version is posted on the DISH and BDISG websites as well as the BDISG Extranet and Standard Setting Workspace (SSW). This change has also been reflected under Summary of Changes within the publication.

DISH Appendix G—Card Authentication Information
Section 2.1 "CA" MasterCard–3DS and Additional Card Payment Information Reference Table (TDSD)

Amendment to the Mastercard 3DS and Additional Card Payment Information Reference Table for the Program Protocol attribute, Directory Server Transaction ID start position, Filler attribute and start position as reflected and highlighted below;

△ Section 2.1 "CA" MasterCard–3DS and Additional Card Payment Information Reference Table (TDSD)

Element Description	Attribute	Start
Point-of-Service Entry Mode	3 N	1
Card Sequence Number	3 N	4
Electronic Commerce Indicators	3 N	7
POS Terminal Attendance	1 N	10
POS Terminal Location	1 N	11
POS Cardholder Presence	1 AN	12
POS Card Presence	1 N	13
POS Card Capture Capabilities	1 N	14
POS Transaction Status	1 N	15
POS Transaction Security	1 N	16
Cardholder-Activated Terminal Level	1 N	17
POS Card Data Terminal Input Capability Indicator	1 N	18
