### New Tabs

Create your own tabs to facilitate comparing content, or simply to keep certain sections on hand. Rename custom tabs for convenience.

Mark up pages in your tabs with favorites, annotations and highlights to create versions of the content tailored to your needs.

### Favorites/Bookmarks

Bookmark/Tag frequently referenced passages and sections for quick and easy access. Create a streamlined view of the manual by filtering to show only tagged sections.

NA

### Annotations

Mark up the manual with your own comments, stamps or highlighted text, and add file attachments to customize the content to your unique processes.

NA

### Navigation & Links

Content is organized and conveniently accessed in a rich table of contents. Related/supporting content is easily and quickly referenced via hyperlinks.

Page numbering matches that of the printed version of the manual, making working with the two simple and fast.

### Dynamic Grid

NA

Customize the grid section to make information work for you best. Filter and sort content, adjust column ordering, visibility and grouping. Create and print information summaries of grid items, for use outside the IATA application.

### Search

Search across the entire document to find the information you need quickly.

Search for keywords in the grid section, or across the rest of the product content via the Search tab.

### Supporting Documents / Toolbox

Some IATA ePublications include additional documents relevant to the product. The documents open external to the IATA ePublication and can be saved, copied, printed.

### System Requirements

Microsoft Windows 10, 8.1, 8, 7, Vista, XP sp3 - Microsoft .NET Framework 2.0

Microsoft Access Database Engine 2007
