IATA CARGO SOLUTIONS

STANDARDS ▪ EXPERTISE ▪ INSIGHT ▪ NETWORK

The air cargo industry transports goods worth more than $6.4 trillion annually. This represents 35% of the total world trade value! To better serve this critical economic linchpin, we've combined eight essential services for air cargo into IATA Cargo Solutions. With 70 years in the business, nobody understands air cargo better than we do.

IATA CARGO SOLUTIONS

SMART SOLUTIONS, BETTER BUSINESS

IATA's close engagement with the air cargo industry stakeholders and every level of the commercial airline community gives us extraordinary experience to provide effective air cargo solutions. With our recognized standards, expertise, insight and network, you are sure to find the answers you are looking for.

IATA Publications

IATA is your trusted source for air cargo information and regulations. We have a strong repository of reference products covering every aspect of air cargo operations. For the latest industry standards you can rely upon daily, newsletters and special reports, go to **www.iata.org/publications**

Dangerous Goods Regulations (DGR)

The IATA DGR is the industry-trusted source to help you prepare and document dangerous goods shipments. Used by the world's airlines for over 50 years, the DGR is the most complete, up-to-date, and user-friendly reference in the industry. **www.iata.org/dgr**

Lithium Battery Shipping Guidelines (LBSG)

Lithium batteries are dangerous goods, and can pose a safety risk if not prepared in compliance with transport regulations. The IATA LBSG has everything you need to safely and efficiently prepare lithium battery shipments in compliance with international air transport regulations. **www.iata.org/lbsg**

Live Animals Regulations (LAR)

The global standard and essential guide for transporting animals by air in a safe, humane and cost-effective manner. The IATA LAR is a must for transporting animals humanely and in compliance with airline regulations and animal welfare standards. **www.iata.org/lar**

Unit Load Device Regulations (ULDR)

A comprehensive reference for all segments of the air cargo industry, the IATA ULDR is the foundation for improved aircraft operations and safety. The ULDR contains all the technical and operational specifications and regulatory or airline requirements applicable to ULD operations. **www.iata.org/uldr**

Temperature Control Regulations (TCR)

The global standard for the safe transportation of healthcare products by air, the IATA TCR is an all-inclusive guide designed to facilitate the proper transport of temperature-sensitive pharmaceutical products. The TCR has the most current practices for packaging, labelling, handling and shipping perishable healthcare products. **www.iata.org/tcr**

Perishable Cargo Regulations (PCR)

The PCR provides access to the most efficient practices for the transport of perishable cargo and an integral tool to achieve cost savings and avoiding delays by guaranteeing your shipments are problem-free and compliant with international and local regulations. **www.iata.org/pcr**

Cargo-XML Toolkit

This toolkit offers next-generation standards for electronic messaging in the air cargo industry. It uses XML standards that bring uniformity, clarity, accuracy and economy to the electronic exchange of information in the air cargo industry. It is the go-to source for technical experts developing open and flexible XML applications. **www.iata.org/cargoxml-toolkit**

IATA Training

The IATA Training and Development Institute (ITDI) has an unparalleled track-record in helping thousands of air cargo professionals stay at the top of their game. We offer the industry's most dynamic and innovative training solutions for every aspect of air cargo operations, including on-time performance, team management and business planning.

Air cargo operations can be very complex. Precision delivery and safety rely on how well air cargo professionals are trained. Taught by industry experts, our courses focus on industry best practices. We offer quality training solutions in a range of convenient formats and venues to respond to the diverse learning needs of the industry. Featured courses include:

- Live Animals Regulations (LAR)
- Unit Load Device (ULD) Regulations
- Cargo Business Development for Airports
- Dangerous Goods Regulations (DGR) - Initial - Category 3
- Dangerous Goods Regulations (DGR) - Initial - Category 6
- Professional Skills for DGR Instructors
- Infectious Substance Transport
- Shipping Lithium Batteries by Air

IATA Business Intelligence

Good decisions are founded on good business intelligence. Understanding your competitors, your customers and the market landscape can be very powerful.

CargoIS

CargoIS provides a true picture of market dynamics and strategic decision support for sales and marketing, revenue management, network planning and more! It provides a full range of tools to support you in making the right decisions!

CargoIS is the only air cargo intelligence solution based on actual transaction data. IATA's CargoIS is fueled by millions of air waybills, representing the activity of airlines and freight forwarders on thousands of trade lanes. With CargoIS, you get the most reliable market intelligence possible!

For more information or to request a free trial, visit **www.iata.org/cargois**

IATA Consulting

IATA Consulting will help you optimize operations, safety, security, improve customer service, reduce costs, increase profitability, plan better and give employees the guidance they need. We offer tailor-made solutions for all stakeholders in the supply chain. IATA Consulting caters to businesses of all sizes, and offers solutions for every stage of development – from maximizing cargo aircraft parking and warehouse planning to market research, forecasting and capacity optimization. Our goal is to ensure that air cargo becomes the most productive and efficient mode of transportation: **www.iata.org/consulting**

Focus on executing innovative concepts for air cargo:

- Cargo traffic forecasting
- Air Service development
- Operational efficiency and regulatory compliance
- Infrastructure planning and development
- Infectious Substance Transport

Center of Excellence for Independent Validator for Pharmaceutical Handling (CEIV Pharma)

IATA created a Center of Excellence for Independent Validators (CEIV) in Pharmaceutical Logistics with the aim of helping the industry to improve the transport and handling of pharmaceutical products to meet the requirements of shippers and manufacturers. Independent Validators will assess your cool chain processes/facilities and guarantee that they comply with applicable regulations, international standards, including IATA temperature control standards. **www.iata.org/ceiv-pharma**

IATA Compliance Solutions

In a rapidly changing global air cargo environment, staying up-to-date with the latest rates, rules and regulations is critical to success. The Air Cargo Tariff and Rules (TACT) provides air cargo professionals with the comprehensive information they require to efficiently transport air cargo worldwide. For more information, visit **www.iata.org/tact**

TACT Data
A customizable TACT rates and/or rules data feed, TACT Data simplifies your work. The files can be easily integrated into any in-house computer system to ensure on-demand availability of accurate rates and rules information across your organization.

TACT Net Rates Distribution
Air cargo rates made fast and easy. Our TACT Net Rates Distribution solution allows your air cargo net rates to be managed in a fully automated, centralized and secure online environment. Automatically distribute your rates, surcharges, and more to your forwarders and cargo agents, fully consolidated for their convenience. Forwarders receive the net rates from airlines in a standardized format and can easily manage and distribute the information internally. This efficient solution increases rate accuracy and speed to market. Get the right rate to the right place at the right time!

TACT AutoCheck
Your single source for automated air cargo compliance, TACT AutoCheck eliminates manual checks of shipment documentation. Let TACT validate compliance with rules for your shipments. You'll receive an automatic alert if problems are found. Save time and trouble, and avoid costly mistakes with TACT AutoCheck.

IATA Industry Events

IATA conferences, exhibitions and industry meetings provide organizations active in air transport with an essential arena for insight, discussion and cooperation on new technologies, industry-related issues and networking opportunities.

Cargo Claims and Loss Prevention Conference

IATA Strategic Partnerships

Raise your profile with potential new clients and position your company as a supplier of choice to the air cargo supply chain. Be part of an exclusive community with privileged access to key decision-makers and industry gatherings.

The IATA Strategic Partnerships program is your opportunity to have a stake in shaping the air transportation industry's future. The program allows you to contribute to the development of innovative solutions to industry challenges and priorities. Get an insider's view of the industry's strategic plans and play a role in their implementation.

IATA Standard-Setting Groups

Participate in IATA's standard-setting groups and help develop future industry standards, resolutions and recommended practices that will solve challenges and bring benefits to the air cargo industry.
