

## ➤ The Air Cargo Tariff

# ADAPT TO THRIVE IN AN EVER-CHANGING CARGO INDUSTRY

**TACT** is the definitive industry source for global air cargo regulations, rules of carriage and general rate information, enabling accurate and timely decisions all along the cargo supply chain. Obtain essential information on the rates and rules governing the transport of air cargo. TACT data contains all the information needed to complete day-to-day air cargo transactions.

**TACT Rules** give you access to general industry information and regulations, the latest key information on country regulations (airport, import/export) and the latest about carrier rules of carriage.

**TACT Rates** give you access to the most current industry, carrier and pre-constructed rates.

## Benefit from IATA TACT solutions

- Attain global reach with TACT's worldwide distribution network
- Airlines, become more visible to freight forwarders and increase your market value
- Freight forwarders, make decisions more efficiently, enabling you to offer more competitive pricing and services
- Improve cost-efficiency in cargo handling, as well as administrative procedures
- Airlines, forwarders, agents, brokers, customs authorities, and airports, stay current with up-to-date industry regulations

## TACT Data rates and rules are highly valued by global airlines, forwarders, agents, brokers, customs authorities, and airports.

**TACT Airline Participation** TACT is not just a guide to the whole cargo industry; it is also a communications tool that enables airlines to pursue cost-efficiency in cargo handling as well as administrative procedures. It features standardised and industry-specific information applicable to sectors such as insurance, transport of perishable goods, live animals, valuables, etc. With customisable product features and a worldwide distribution network, TACT is the most effective tool for any airline to distribute their vital cargo information.

**TACT Online** Clients can subscribe to this online web based service and access all TACT information in real-time format, accessing rates and rules information along with schedules, powered by our partner Innovata. This data is the most current information, updated every month with bulletins of changes (unlike the manuals, which are updated every three months).

**TACT Data Rules** contain general industry rules information, country import and export regulations and carrier rules of transportation. TACT Data Rules can be supplied in three different formats: MIF, XML or PDF, and can be easily integrated within your corporate network. This allows the end-user to work in their own environment with tailor-made information. Additionally, TACT Rules (general sections 1 - 5) have been translated into Spanish, French and Italian. Available in PDF format or hardcopy.

**TACT Data Rates** is a database in ASCII extract format containing the air cargo rates and charges, which can be implemented in many different ways. The database is in a 80-character layout or 150 (80/150 characters each line) and will be in CRLF (carriage return and line feed). Depending on what you need, you can purchase the data as follows:

- Worldwide rates (from all origins to all destinations worldwide export/import)
- Rates to and from one country (i.e. Italy to worldwide and from worldwide to Italy export/import)
- Rates from country to worldwide (i.e. from Germany to worldwide export)
