

5th IATA CARGO CLAIMS & LOSS PREVENTION CONFERENCE

Dallas, USA, 03 - 05 November 2009

The IATA Cargo Claims and Loss Prevention Conference is a must-attend event for anyone with an interest in cost-effective processing of air cargo claims. It is the only conference of its kind which addresses the special needs of a very important, yet oft neglected industry niche. In these extremely challenging times, this conference can help prevent loss of precious revenue by promoting practical, workable solutions and best practices for quick and efficient processing and resolution of air cargo claims. It is an excellent opportunity for gathering first hand information on effective management of air cargo claims and exchanging ideas with other professionals in the field.

KEEP CARGO CLAIMS
FROM TURNING
INTO
YOUR CARGO
PROBLEMS

Key topics include:

Claims and Legal issues with a focus on Latin America, Claims involving special cargoes, Interline claims, Experts' advice, Claims involving surface transport providers, Third party liability, Best practices in Loss Prevention, hidden costs of a claim, Liability in the paper-free environment (e-AWB), Claims involving U.S. domestic air transport, etc.

Who should attend:

It is beneficial for all stakeholders involved including airline claims and operations personnel, risk and insurance managers, freight forwarders, shippers, ground handlers, loss adjusters, aviation liability lawyers etc.
