

IATA Integrated Management Solutions (IMX) Workshop

Date: Tuesday, 25 April 2017

Time: 1730-1830 / **Location:** TBA

(Seats are limited. Registration is first come, first served)

Target Group	<ul style="list-style-type: none">- Airlines- Ground Service Providers- Other Aviation Organizations implementing Quality and/or Safety Management System
Workshop Objectives	<p>Through this workshop you will discover the emerging IATA product which has been developed with the aim to promote and support implementation of the Quality and Safety data management with the focus on the aviation businesses.</p> <p>This presentation will introduce you to the main modules and key features of the IMX, such as audit and finding management, including use of preloaded IOSA and ISAGO checklists, production of an IOSA conformance report, safety reporting tools, hazard log, as well as regulatory compliance capabilities of the system.</p> <p>It will also provide a short overview of some other useful features in IMX, such as offline auditing and reporting, statistics, documentation and supplier management and many more.</p>  <p>At the same time you will receive direct feedback from IMX users, the reasons they opted for this solution and the benefits they get from it. This session will allow you to hear real-world business cases and help to understand how IMX could compliment your management system.</p>
Summary	<p>The IMX software offers airlines and ground service providers a simple yet efficient and cost-effective quality and safety management solution that has been developed entirely with what Airline needs in mind.</p>
