

## IATA Safety Information Exchange (SIE) Workshop

**Date:** Monday, 24 April 2017

**Time:** 1730-1830 / **Location:** TBA

**(Seats are limited.** Registration is first come, first served)

<b>Target Group</b>	Airline Safety Managers and Directors, Regulators, ANSPs
<b>Workshop Objectives</b>	During this highly interactive workshop you will learn more about SIE, including the issues with sharing information, as well as the benefits. This includes a review of how IATA leverages the Global Aviation Data Management (GADM) exchange program and the value of participation. We will share with you our latest developments, achievements and vision for the future.
<b>Summary</b>	<div data-bbox="521 842 704 1024"></div> <div data-bbox="841 856 1008 1010"></div> <div data-bbox="1125 852 1295 1003"></div> <p>Global Aviation Data Management (GADM) is a portfolio of IATA safety data programs integrating several sources of operational data received from different IATA data gathering initiatives. GADM's goal is to provide the industry with comprehensive cross-database analysis and to support a proactive data-driven approach for trend analysis and predictive risk mitigation. Through its four key data areas - Accident Data, FDX, GDDB and STEADES, GADM is positioned to support the industry safety initiatives and to identify potential opportunities for efficiency gains for industry.</p> <p>The workshop objectives include:</p> <ol style="list-style-type: none"><li>1) An understanding of Safety Information Sharing activity issues</li><li>2) A review of the benefits of participation in SIE, including GADM</li><li>3) Examples of how the information is actually shared and what tangible benefits can be achieved</li></ol>
