

Airport Certification and Standards

Classroom and In-Company Course (5 days/40 hours)

Keep your aerodrome facilities up-to-standard, meeting the latest certification requirements.

Gain detailed knowledge on aerodrome operator obligations in order to assess your facility's level of compliance. Learn how to recommend structural changes and improve day-to-day operations.

Objectives

- Review key topics in the Manual on the Certification of Aerodromes
- Gain a clear understanding of a certification regulatory system, certification model regulations and procedures
- Identify and measure the impacts of the certification requirements on the operations of an aerodrome.
- Understand and fulfill the respective roles and responsibilities of the aerodrome operator and the regulator
- Learn aerodrome operator obligations to ICAO: Annex 14, emergency response plan, safety management system and aerodrome manual
- Put theories into practice through a course integration exercise

Target audience

- Aerodrome Operators
- Airside personnel
- CAA personnel
- Compliance Inspectors
- Airport Planners

Key topics

- Standards and Requirements
 - ICAO Annex 14
 - ICAO Aerodrome certification requirements
 - Aerodrome Manual
 - Aeronautical Information Publications (AIPs)
- Operations
 - Apron safety management and AVOTP
 - Emergency response
 - Aerodrome inspection
- Safety Standards
 - Introduction to Safety Management Systems (SMS)
 - Operational safety during construction

Certificate awarded

An **IATA Certificate** is awarded upon successful completion of the course and final examination.

This course can also be applied toward an **IATA Diploma**:

- [Advanced Airport Operations](#)
