

Aviation Environmental Performance Consulting

The aviation industry has dramatically improved its environmental performance, but more remains to be done. IATA Consulting assists airlines, governments and industry stakeholders in developing and implementing comprehensive environmental policies, standards and guidelines to promote environmental sustainability and in identifying cost-effective ways to improve environmental performance in the aviation sector.

HOW CAN IATA CONSULTING HELP?

Our team of multidisciplinary experts has in-depth expertise in addressing environmental performance challenges faced by airlines, governments and stakeholders in the air transport industry. IATA Consulting assists clients in developing solutions to improve their environmental footprint by drawing from best global industry practices. Our experts will assist clients in identifying, prioritizing and focusing resources on adopting the right measures to achieve environmental performance targets in a cost-effective manner.

AREAS OF EXPERTISE

IATA | **Consulting.**

IATA ENVIRONMENTAL ASSESSMENT (IEnvA) PROGRAM

IEnvA is an environmental management and evaluation system designed to independently assess and improve the environmental performance of an airline. IEnvA is a voluntary program built on the core principles of improving airline environmental performance management. IATA Consulting assists airlines in preparation for the IEnvA program by providing in-house expert advice in all areas of airline environmental performance management including corporate activities, flight operations, ground handling operations and MRO.
