

- Digital Identity (e.g. Passport)
- Other documents (e.g. Visa, health certificate)

Approval to travel notification

- Digital identity
- Approval to travel notification

Journey Details / Confirmation of readiness to travel

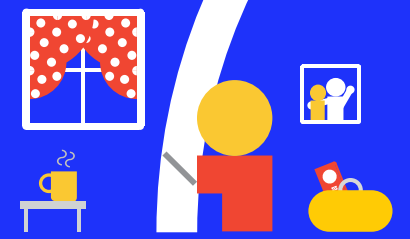

**Digitalization of admissibility**

### 2. Get approval

Share your information with the destination country from your digital wallet and you can be issued a notification, 'Approval to Travel' by the government and save it to the wallet.

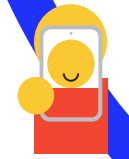

### 3. Ready to fly

Closer to departure, send your digital identity and the Approval to Travel notification to the airline. The airline will confirm your readiness to travel, and you can save journey details in your wallet.

### 1. Preparation for trip

Create your digital identity, prepare other required documents such as visa, and store them in your digital wallet.

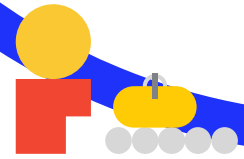

- Live Biometric Face Image
- Journey Details Information

Contactless process prepared

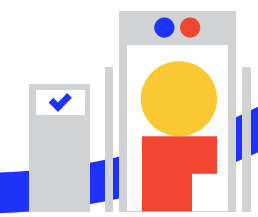

### 4. Share face image

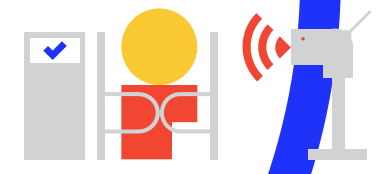

Share your live biometric face image and journey details with airline and/or airport so that they can prepare for a contactless process for you.

### 5. Bag drop

### 6. Security check

### 8. Boarding

### 7. Border control\*

### Contactless travel

Move through touchpoints at the airport by simply showing your face without the need to show physical documents.

\*Border control is out of One ID standards scope and passengers may be required to show their physical passport by the authority
