The Fast Travel Programme was created to drive projects that provide a range of self-service options to meet growing customer demands, continue to reduce industry costs, improve efficiency of airport infrastructure and enhance customer service.

The Fast Travel Programme currently covers six projects:

- Check-In: covering existing three self-service check-in channels (kiosk, web and mobile) with a special focus on Mobile Services and NFC technology.
- Bags Ready to Go: Self-Service Baggage Process including self-tagging and bag drop.
- Document Check: Self-Service Document Check.
- Flight Re-Booking: Self-service irregular operations recovery.
- Self-Boarding: Fully automated boarding gates and self-scanning options
- Bag Recovery: Self-service claim registration

The objective of the Fast Travel Working group is to develop global standards to facilitate global implementation for each of the covered area. The working group will:

- Develop sound business cases demonstrating industry wide cost savings for each project.
- Develop standards for each area of process.
- Liaise with other standard making bodies such as A4A and ACI.
- Encourage 'harmonised' implementation of these processes by developing relevant Recommended Practices and Implementation Guides.
- Engage with regulatory bodies such as the TSA and EU Commission

Suppliers with solutions linking to Passenger Experience Process Steps 3-4-5-6-8-10-11 and 13 should join this group
