## **Update from Canada**

Date: 3rd May 2023

Innovation Science and Economic Development (ISED), Canada's spectrum regulator, has published its decisions concerning frequency spectrum adjacent to the Radio Altimeter band: <a href="Decision on a Non-Competitive Local Licensing Framework">Decision on a Non-Competitive Local Licensing Framework</a>

ISED will develop appropriate interference mitigation measures on NCL licensed operations in the 3900 MHz band to protect radio altimeters in the 4200-4400 MHz band.
