

CASSLINK

SIMPLIFYING THE BUSINESS OF AIR CARGO

Moving Forward in Billing Settlement

It is time to move into a world of automation and simplicity. Welcome to CASSLink.

CASSLink is an advanced, global e-billing solution; an innovative web-based data processing and customer management system for the interaction and exchange of billing information between cargo airlines and their agents.

Innovation is the key to moving our industry forward. IATA's Cargo Accounts Settlement Systems (CASS) was designed to be an efficient, cost-effective and streamlined settlement service provider of choice.

It operates through CASSLink, to replace the problem of the traditional manual billing process with an online solution tailored to business needs; offering the flexibility to receive your CASSLink reports from the following three formats: PDF, HOT (.txt format), or XLS spreadsheet.

Over 500 airlines and their accredited General Sales and Service Agents (GSSA) representatives are already optioning to use CASSLink.

Benefits

- Airline data input, including file validation
- Advance billing reconciliation through daily "transaction view"
- Global system access
- Customized output options
- Credit monitoring / risk warning (CICS)

Special Features include

- On-line correction module
- Customized tax solutions
- GSSA specialized features
- User level control of system access
- Consolidation / multi branch / multi location flexibility
- AWB Stock Management System
- Courier Billing Voucher processing
- Separate CASSLink Import Billing System

By choosing CASS you are already on your way to simplifying the billing process. Optimize your time and effort even further by choosing the CASSLink system to settle your CASS Billing - free for all IATA accredited agents! Non-IATA agents can join at a cost determined locally.
