2.	<i>Dates of releases</i> .....	4
3.	<i>Issues Fixed and Released in Production for Period of Reference</i> .....	5

## **1. Period of Reference**

The incident fixes deployed on SIS production environment detailed in this Release Note document were performed on January 23rd, 2018

## **2. Dates of releases**

The Maintenance Release covered in this document was deployed on January 23rd, 2018

Issues Fixed and Released in Production for Period of Reference

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.11.3	8578070	Minor	PAX Billing history Screen	<p>Area: ISWEB</p> <p>Issue: Upon click of button 'Clear' available in the Invoice Search section of screen 'Passenger Billing History and Correspondence', the system sets the value of field 'Billing Code' to blank.</p> <p>When a value is provided in all other search criteria fields except 'Billing Code' and if search is performed, the system is throwing an unexpected error.</p> <p>Corrective Action:</p> <p>The code changes have been done to fix this issue. With this fix, upon click of button 'Clear', the system will set value of field 'Billing Code' to "All".</p>
1.11.3	8578080	Minor	UATP Payable screen	<p>Area: ISWEB</p> <p>Issue: The search criteria field 'Billing Year/Month' of screen 'UATP Payables Invoice Search' is mandatory. However, if search is performed without providing valid Billing Year/Month in this field i.e. by selecting value "Please Select", the system is not performing mandatory check on this field and no error is displayed.</p> <p>Corrective Action:</p> <p>The code changes have been done to fix this issue. The system will now perform mandatory check on this field and will throw appropriate error if a valid value is not provided.</p>

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.11.3	8578088	Minor	'BVC Details' report	<p>Area: ISWEB</p> <p>Issue: The issue is applicable to report 'BVC Details'. The report should be generated as per the criteria defined by the user. However, no records are fetched if a valid value is provided in the field 'Agreement Indicator Validated' (even if such record exists in database).</p> <p>Corrective Action: The code changes have been done to fix this issue. With this fix the report will be generated correctly as per the criteria provided by the user.</p>
1.11.3	8582416	Minor	"Passenger Name" in PDF listing Ground Handling	<p>Area: ISWEB</p> <p>Issue: There was an issue in customized listing generated as per "MISC Customized Listings-Layout Definition MLD9". This layout is applicable for Customized PDF Listings generated for Charge Category 'Ground Handling' and for following Charge Codes:</p> <ol style="list-style-type: none"> <li>1. Departure Stamps</li> <li>2. Immigration Fines</li> <li>3. Lounge</li> <li>4. STPC</li> </ol> <p>Corrective Action: The code has been fixed to show correct spelling of column header 'Passenger Name' applicable for all above Sub-Listings created for the above Charge Code(s) of charge category 'Ground Handling'.</p>

Deployed in Release Number	SalesForce Issue Number	SalesForce Priority	Revised Issue Summary	Release Note Communication
1.11.3	8582416	Minor	SIS Password Reset	<p>Area: ISWEB</p> <p>Issue: Following issue identified related to password reset link shared with user,</p> <p><u>Issue#1:</u> When a user is attempting to reset a password using Forgot Password functionality and if maximum limits to send emails to the user with password reset link have reached, the user will not receive password reset link via email. However, if user further attempts to reset the password after the maximum limit, the system was making password reset link sent to the user via last password reset email as invalid.</p> <p><u>Issue#2:</u> Password reset link expiry time is not getting updated with every new attempt made from forgot password. For example, the user has attempted password reset using forgot password functionality at 12:00 P.M. but user did not reset the password. This link should expire after 48hrs from this time. However, the user again attempts to reset the password at 3:00 P.M. The system will send a new email with new link, the system should set the expire time of this link after 48hrs from the time it was generated but this was not getting updated.</p> <p><u>Issue#3:</u> The maximum attempts a user can make to reset the password within a certain time frame from forgot password functionality is limited. The system internally maintains how many times user has attempted to reset password and with every attempt it increases this count. This count should be increased only if user is attempting a password reset by using forgot password functionality. However, the system was increasing this count even when reset password is attempted from screen 'Manage Users'.</p>

1.11.3	8582416	Minor	SIS Password Reset	<p>Corrective Action:</p> <p><u>Fix for Issue#1:</u></p> <p>The link send via last mail for reset password to user will be valid till it is expired</p> <p><u>Fix for Issue#2:</u></p> <p>Password reset link expiry time will update as per the every new attempt made from forgot password functionality.</p> <p><u>Fix for Issue#3:</u></p> <p>The system will update count of attempts made to reset the password only if it is attempted from forgot password functionality but not from screen Manage Users.</p>
