ATTACHMENT A—PRICING SCHEDULE

The Service will be run on an operational cost-recovery basis, and the fees are subject to adjustment to ensure that operational costs are recovered. The prices below are effective 01 April 2026 and reflect the current best estimate of the charges necessary to operate the SIS Solution on a cost-recovery basis. As more information is made available to IATA about the estimated and actual use of the Service, prices will be adjusted in order to maintain neutral revenue. The annual accounts of the SIS operations covering the actual and planned cost and revenues will be shared with the SG in a timely manner.

1. BASIS OF CHARGING–ANNUAL SIS FLAT FEE

The SIS Annual Fee will be charged to every SIS participant from the date of signature of the agreement at the following rates:

The charging band for new ICH or ACH participants will be Band 1, re-assessed quarterly on an annualised volume basis until twelve months history is available.

In all other cases, the charges will be re-assessed on an annualised basis each quarter and adjusted in arrears if the annualised total (or prorated equivalent) has exceeded or fallen below the threshold used.

2. BASIS OF CHARGING–SIS TRANSACTION FEES

When using the SIS service, transaction fees will be charged for each submission of a transaction or record by the billing participant or its agent. The amount paid per transaction depends upon the total Service transaction fees paid by the Participant in the previous quarter and will fall into one of the following categories:

$0	$4,999
$5,000	$14,999

Additional Notes on the Service Transaction Fees:

- For the purposes of determining the proper category, fees will only take into account the Service transactional charges and not any annual fee paid.
- Digital signature charges may be payable by both the billing and billed Participant based on their selections.
- Supporting Document charges are based on the stored document size (documents are stored unzipped), not the transmitted document size (documents are transmitted zipped).
- Where twelve months of data is not available, the Base charging band will be applied, and re-assessed quarterly on an annualised volume basis until twelve months history is available.
- **Effective January 2018** - Rejection Memo, Billing Memo and Credit Memo charges are based on the count of memo coupon/AWB breakdowns instead of RM/BM/CM memo counts.
- A&A fees are **not** included in the above figures and will be charged separately by A&A. The "Value Determination" and "Auto-billing" features of Integrated Settlement require the storage option from A&A.

[1] The charge for auto-billing request does not include the invoice and prime coupons that are then submitted on the carrier's behalf; those are charged additionally at the described rates.
