The passenger rejection initiative is endorsed by the Financial Committee to reduce the number of unnecessary passenger rejection memos in the industry. The IBSOPS WG intends to achieve an industry-wide target of reducing the number of rejection memos by 32% by 2020. The IBSOPS WG and SIS Operations Team have already undertaken several actions to reduce the number of passenger rejections. The purpose of this report is to track the trend of passenger rejection memos in SIS and provide a comparative analysis of the rejection memo counts of 2017 versus the counts of the base year 2015. All values in this report exclude ACH to ACH billings (SMI-A). Also, the report covers Sampling and Non-Sampling analysis separately.

1. Global Non-Sampling Analysis

Total Rejection Memo Count and USD Value per Year

Comparison of Prime Billing Counts, Rejection Memo Counts and Rejection Memo Values

	2017	2016	2015	% change 2017 vs 2015
Prime Billings	143,807,432	133,004,194	124,965,120	15%
RM Count	12,044,715	12,049,036	12,333,719	-2%
RM USD Amount (Mill)	\$ 1,293.40	\$ 1,414.87	\$ 1,729.95	-25%*

^{*}The decrease in USD values is partly due to the decrease in FIM rejections, but as well due to lower rejection amounts in Source Code 4 rejections.

Total Prime Billings Count by Month (2015 - 2017)

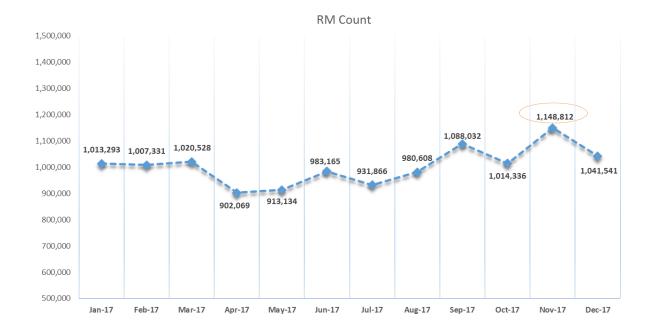

The below graph shows the total counts of non-sampling prime billings per month for the past 3 years.

The prime billings are following a seasonal pattern with the highest counts in August.

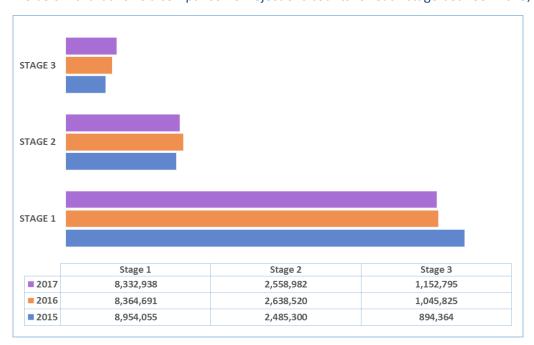

Total Rejection Memo Count by Month - 2017

The below graph shows the total count of non-sampling rejection memos per month for 2017 November had the highest rejection memo count of 2017.

Total Rejection Memo Count by Stage

The below chart shows a comparison of rejections counts for each stage between 2015, 2016 and 2017.

In comparison to the base year **2015**:

- Stage 1 counts have decreased by 7%
- ➤ Stage 2 counts have increased by **3%** ★
- Stage 3 counts have increased by 29% 1

Total Rejection Memo Count - Split by Quarter

2. Rejection Reduction Progress

In 2015 the IBSOPS working group was tasked to reduce the number of rejections by 32% in 5 years (by 2020). The reduction is applied on the rejection rate:

Rejection Rate =
$$\frac{Sum\ of\ Rejection\ Memos\ of\ Past\ 12\ months}{Sum\ of\ Prime\ Billings\ of\ Past\ 12\ months} \times 100\%$$

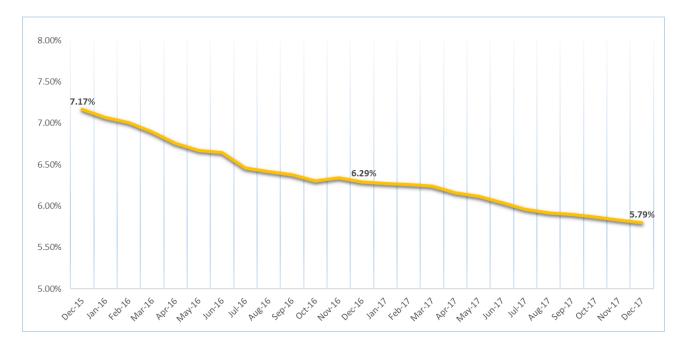

By the end of 2017, there was a 15% decrease in comparison to the base year 2015.

	2015	2016	2017	% change 2017 vs 2015
Rejection Rate	9.87%	9.06%	8.38%	-15%

Stage 1 Analysis - Estimated Percentage of Rejected Prime Billings

The chart below illustrates the trend of estimated percentage of rejected prime billings. The percentage is calculated by dividing the sum of 1st stage rejections of the previous 12 months by the sum of prime billings for the same period of time (formula shown below).

Based on this calculation, approximately 5.79% of the prime billings in 2017 were rejected, a decrease in comparison to 7.17% of rejected prime billings in 2015.

 $Estimated \% of rejected prime billings = \frac{Sum \ of \ Stage \ 1 \ RMs \ of \ past \ 12 \ months}{Sum \ of \ Prime \ Billings \ of \ past \ 12 \ months} \times 100\%$

Stage 2 & 3 Analysis - Estimated Percentage of re-rejected Stage 1 and Stage 2 Rejections

The percentage of 1^{st} stage rejections which are re-rejected is estimated by dividing the sum of 2^{nd} stage rejections of the previous 12 months by the sum of 1^{st} stage rejections for the same period of time. The calculated percentages are plotted in the graph below and show a decline in 2017 in comparison to 2016. Approximately 30.71% of the Stage 1 rejection in 2017 were rejected back 2^{nd} stage.

The percentage of 2nd stage rejections which are rejected back 3rd stage is calculated in a similar way (formulas shown below) and also plotted in the below chart with an increasing trend in 2017. Approximately 40.05% of the 2nd stage rejections in 2017 were rejected back 3rd stage.

Estimated % of rejected Stage 1 RMs = $\frac{Sum \ of \ Stage \ 2 \ RMs \ of \ past \ 12 \ months}{Sum \ of \ Stage \ 1 \ RMs \ of \ past \ 12 \ months} \times 100\%$

Estimated % of rejected Stage 2 RMs = $\frac{Sum \ of \ Stage \ 3 \ RMs \ of \ past \ 12 \ months}{Sum \ of \ Stage \ 2 \ RMs \ of \ past \ 12 \ months} \times 100\%$
