General

1. IS-Web Browser Compatibility

IS-Web will only be supported in the following web browsers:

- **Internet Explorer** – Versions 7.0 and newer
- **Mozilla Firefox** – Versions 4.0 and 5.0

Please note that only the above browsers are fully compatible, IS-WEB may also be used in other browsers. However, SIS Operations cannot guarantee the full compatibility of these web interfaces and therefore will not be able to support queries related to them.

Passenger Module

1. Passenger Module

1.1 Overview of Passenger

Passenger module is used for managing flight coupons. In the Passenger module you can

- Create Prime Billing/Invoice
- Create Rejection Memo
- Create Billing Memo
- Create Credit Note
- Manage Invoices
- Create Sampling Forms (C, D/E, F, XF)
- Manage Sampling Forms (C, D/E, F, XF)
- Create Correspondence
- Manage Correspondence

Creating an Invoice: Invoices are of two types:

Non-Sampling Invoices are:

1. Prime Billing
2. Rejection Memo
3. Billing Memo
4. Credit Memo

Sampling invoices are:

1. Form C
2. Form D/E
3. Form F
4. Form XF

Different types of Non Sampling Invoices are as follows:

Prime Billing: It is a non sampling Invoice billed to another carrier airline. It can be created in two different ways using Receivables submenu.

1. Using new invoice header.
See also: Creating Non Sampling Invoice Header
2. Using existing invoice header
See also: Searching Invoice

Rejection Memo: It is a non sampling invoice created to reject certain coupon values in a Billing. It can be created in three different ways:

1. Using Receivables submenu.
 - a. Using new invoice header.
See also: Creating a Rejection Memo
 - b. Using existing header.
See also: Searching an Invoice
2. Using Payables submenu.
3. Using Billing History submenu.

Billing Memo: It is a non sampling invoice created after the billed member gets "Authority to Bill" after the Correspondence cycles between the two entities over.

1. Creating through Receivables.
 - a. Creating using new invoice header.
 - b. Creating using existing header.
2. Creating through Billing History.

Credit Memo: The value of a Credit Note is always negative. Credit Note can be created in three different ways:

1. Using Receivables submenu.
 - a. Using new invoice header.
 - b. Using existing header.
2. Using Payables submenu.
3. Using Billing History submenu.

Description of Sampling Invoices types is as follows:

Form C: Form C can be created using Receivables submenu.

1. Using new invoice header.
See also: Process of Creating Form C
2. Using existing invoice header.
See also: Searching an Invoice

Form D/E: Form D/E can be created through the Receivables submenu.

1. Using new invoice header.
2. Using existing invoice header.

Form F: It is the second stage rejection memo for sampling Form D/E. Form F can be created in two different ways:

1. Using Receivables submenu.
 - a. Using new invoice header.
 - b. Using existing header.
2. Using Payables submenu.

Form XF: It is the third stage rejection memo for sampling Form F. Form F can be created in two different ways:

1. Using Receivables submenu.
 - a. Using new invoice header.
 - b. Using existing header.
2. Using Payables submenu

Correspondence: Correspondence through Billing History and Correspondence can be

1. Initiated
2. Managed

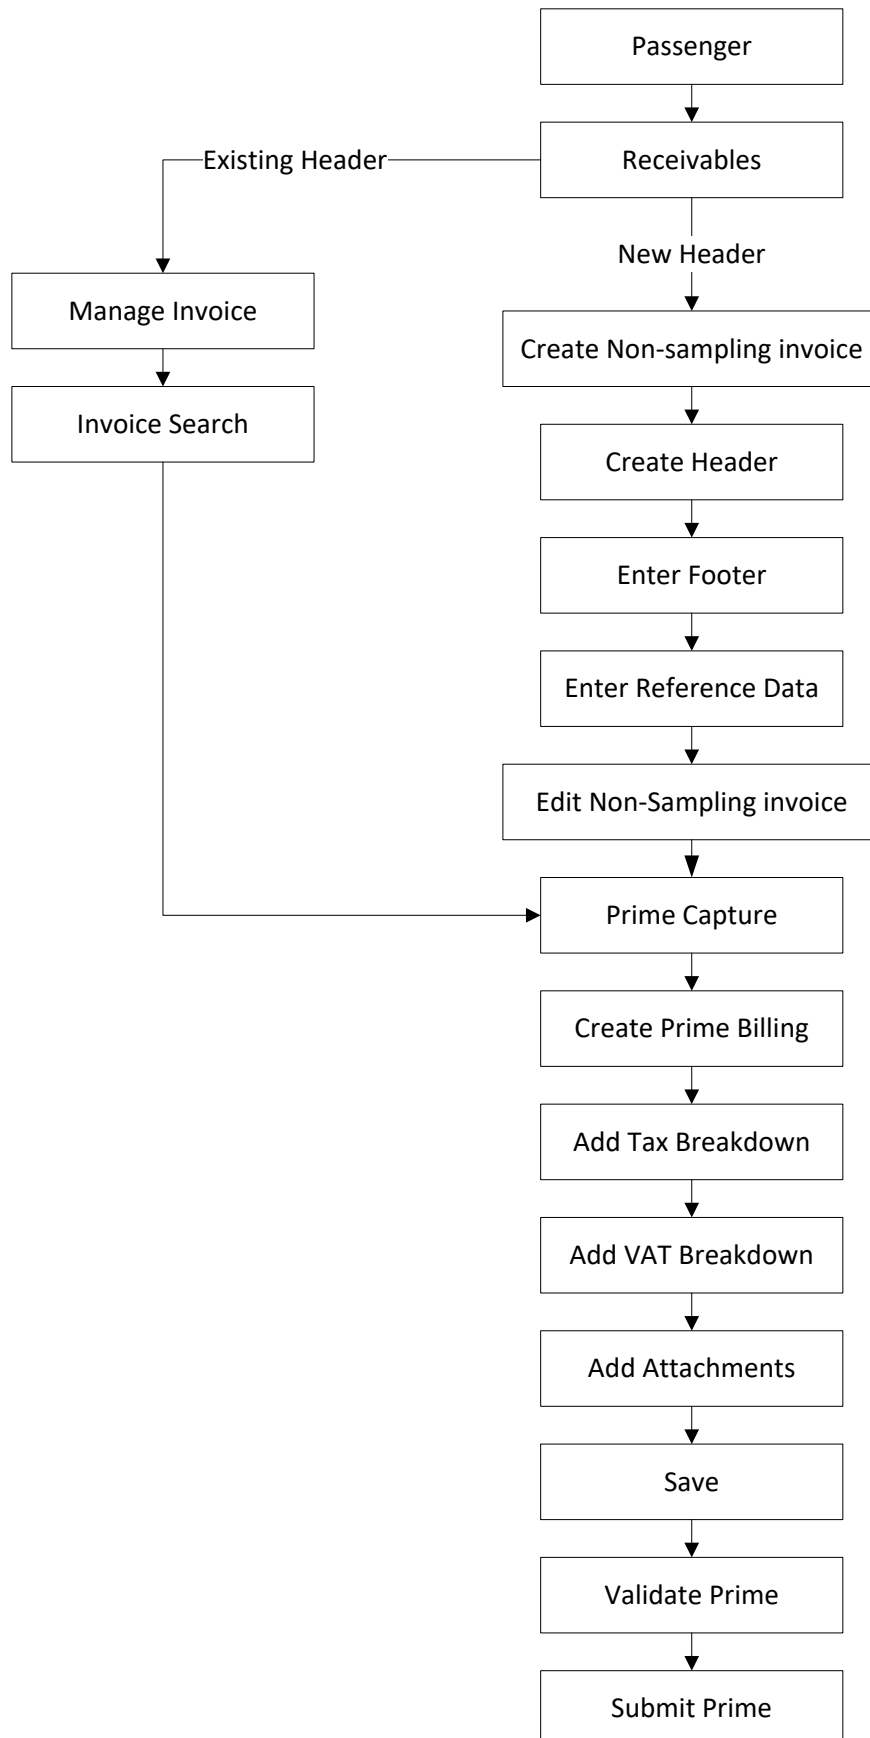

Audit Trail: Audit trail can be viewed using Billing History and Correspondence submenu. Audit trail can also be printed using ALT+PrntScr.

1.2 Working with Non- Sampling Invoices

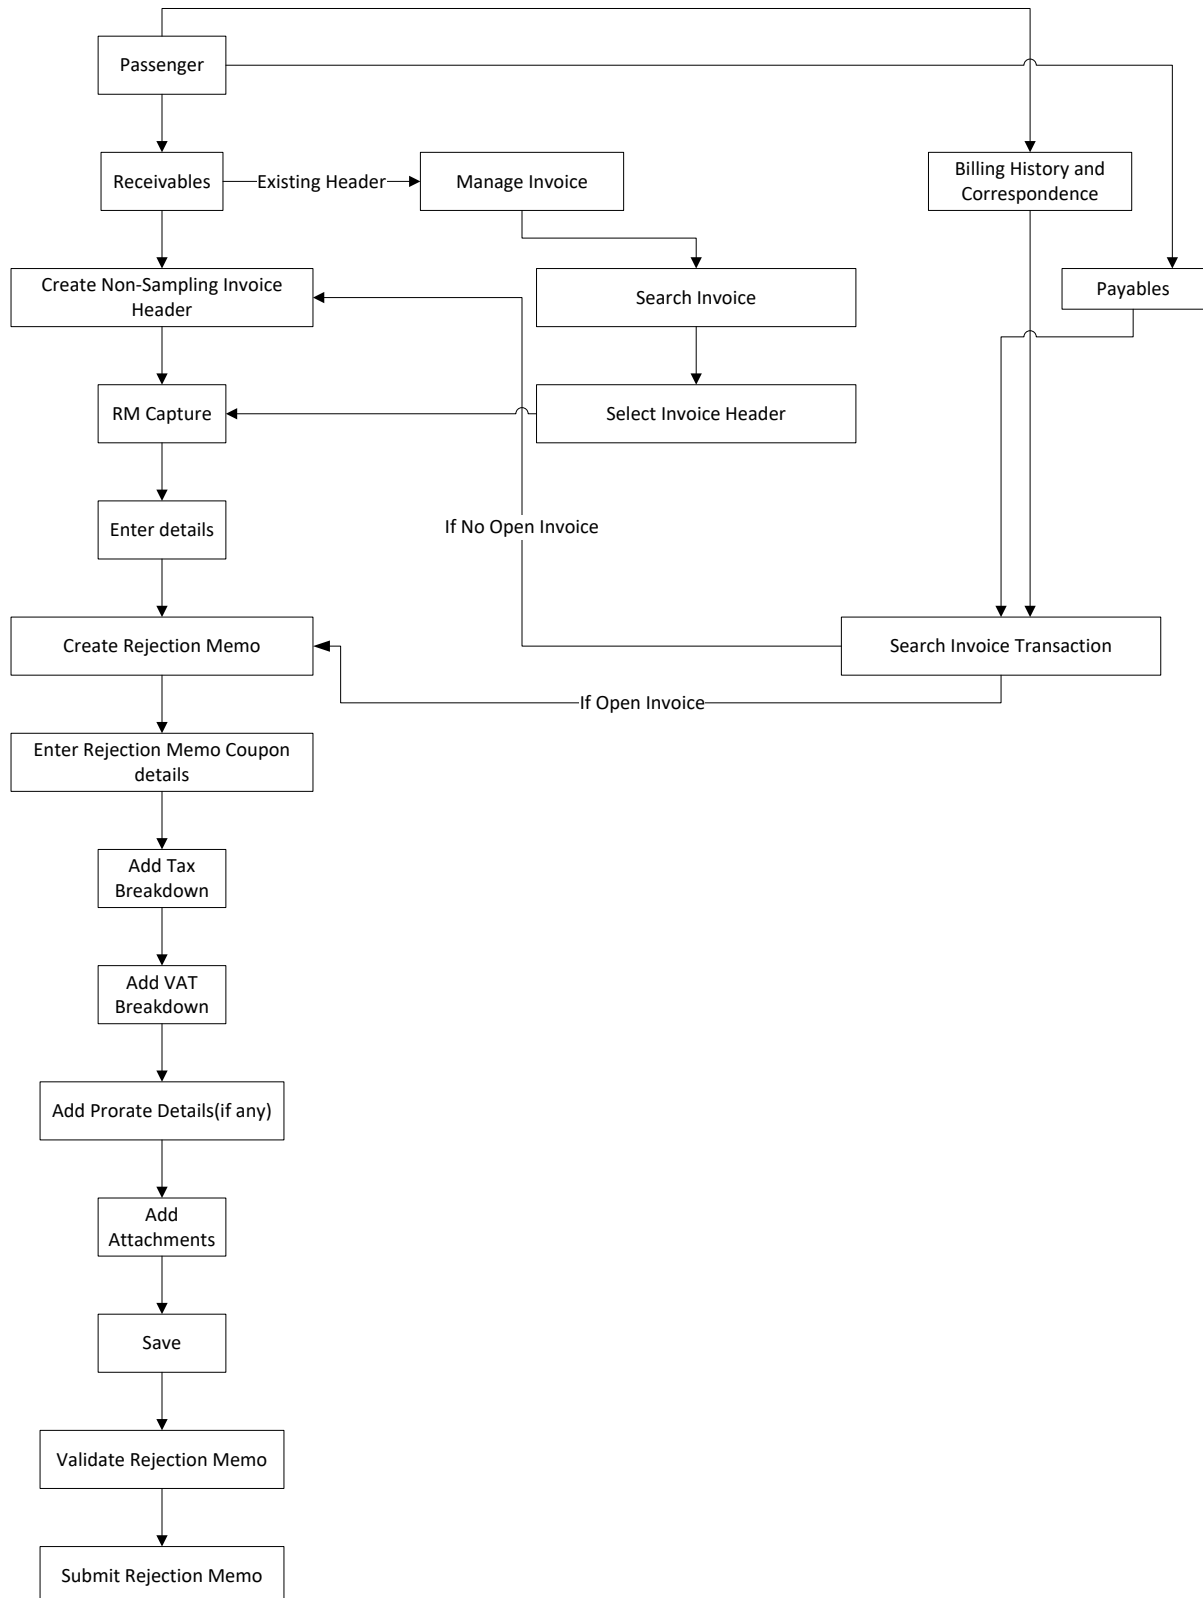

1.2.1 Processes for Non-Sampling Invoices

- Creating a Prime Billing
- Creating a Rejection Memo
- Creating a Billing Memo

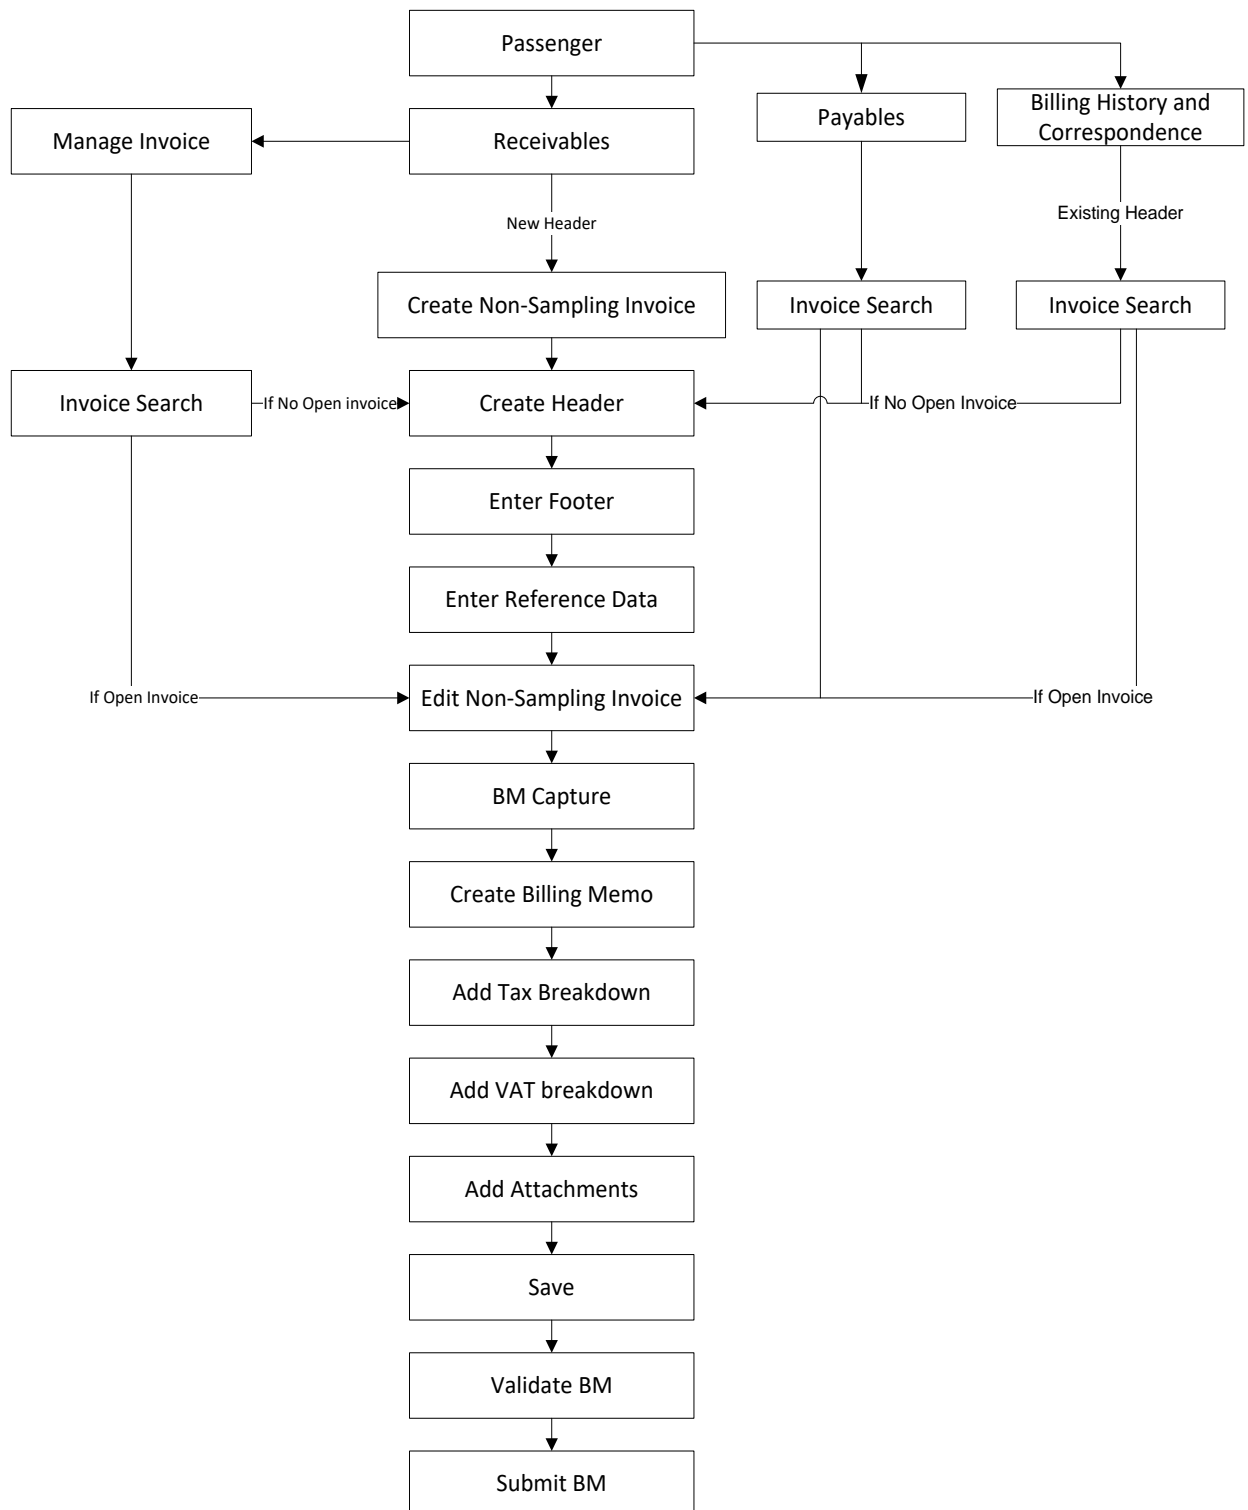

Creating a Prime Billing

Creating a Rejection Memo

Creating a Billing Memo

1.2.2 Creating Invoice Header

To create a **Non-Sampling Invoice Header**, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** submenu.
3. Click **Create Non-Sampling Invoice** option.
4. The **Create Non-Sampling Invoice** screen is displayed.

Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key.
- A grayed field by default is auto populated with the data already present in the system or with data calculated at the invoice.

Fields	Descriptions	Remarks
*Billed Member	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways
*Invoice Number	Unique alphanumeric ID that identifies the invoice.	<p>The Invoice Number could be up-to ten characters (English letters and numbers only)</p> <p>For example, WI1234</p> <ul style="list-style-type: none"> • Spaces and special characters (#, *, @, ~, - etc.) should not be used. • Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when

Fields	Descriptions	Remarks
		<p>performing duplicate checks.</p> <ul style="list-style-type: none"> Should not be duplicated by the billing airline within a calendar year.
*Invoice Date	It is the date of the invoice.	<ul style="list-style-type: none"> Shows the date on which invoice header is created. Automatically updated to the date on which invoice is successfully submitted. Cannot be edited or modified by the users.
*Billing Year/Month/Period	The Clearance Period of the invoice (Year, Month and Period)	<p>For Example, Period 3 of April-2013 is represented as 2013-Apr-3</p> <p>The periods displayed are as follows:</p> <ul style="list-style-type: none"> The current open period (default value). The next 4 (future) periods; this may pertain to the next month also. The previous closed period (if the late submission window is open in either of the clearing houses). <p>Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate, but does not find it for the future month, it will result in an error while saving the data.</p>
Billing Member's Location ID	Unique alphanumeric code that identifies member's location as per the member profile.	<p>It generates the legal reference data for the Member.</p> <p>Default location is the MAIN Location.</p> <ul style="list-style-type: none"> Default location can be changed by selecting the desired location from the list. Click Billing Member's

Fields	Descriptions	Remarks
		<p>Location ID to change any reference data for the Member.</p> <ul style="list-style-type: none"> The header can be saved without reference data, by selecting the blank value at the top of the list. However it should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.
Billed Member's Location ID	Unique alphanumeric code that identifies member's location as per the member profile.	<p>It generates the legal reference data for the Member.</p> <p>Default location is the MAIN Location.</p> <ul style="list-style-type: none"> Default location can be changed by selecting the desired location from the list. Click Billed Member's Location ID to change any reference data for the Member. The header can be saved without reference data, by selecting the blank value at the top of the list. However it should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.
*Settlement Method	It is the Settlement Method of the invoice.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> I: Settlement via ICH <ul style="list-style-type: none"> Applicable when both billing and billed members are ICH members Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member)

Fields	Descriptions	Remarks
		<ul style="list-style-type: none"> ▪ A: Settlement via ACH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ACH members. • If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Passenger billings via the ICH; then ACH cannot be used. ▪ M: Settlement via ACH using RAM Rule <ul style="list-style-type: none"> • Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) • Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. ▪ B: Bilateral Settlement (direct settlement between members not involving any clearing house). <ul style="list-style-type: none"> • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rule as appropriate. □ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement □ A/I/M/X can be changed to Bilateral if required. □ A can be changed to M if required. <p>When settlement is not</p>

Fields	Descriptions	Remarks
		<p>possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p> <p>Note:</p> <p>In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method billing or billed member</p>
*Currency of Listing/Evaluation	It is the currency in which the transactions are listed.	-
*Currency of Billing	It is the currency of billing of the invoice.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> ▪ When Settlement Method is I: <ul style="list-style-type: none"> • If both Billing/Billed airlines are in Zone A; value should be GBP. • If both the Billing & Billed airlines are in Zone D; value should be EUR. • If both Billing/Billed airlines are in Zone B, value should be USD. • If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. ▪ When Settlement Method is ACH using RAM Rule (ACH Inter-clearance Billings); value should be USD. ▪ When Settlement Method is M (ACH member billing ACH member based on RAM rule); value should be as per currencies allowed by ACH.. ▪ When Settlement Method is A value should be as per

Fields	Descriptions	Remarks
		<p>currencies allowed by ACH..</p> <ul style="list-style-type: none"> When Settlement Method is B it can be any currency. When Settlement is X it can be any currency. <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another member, the settlement method will be considered as that of the final parent member of billing or billed member.</p>
Listing Evaluation to Billing Rate	It is the Exchange Rate applicable for the Currency of Listing with reference to the Currency of Billing (dividing rate).	<p>For example, If Currency of Listing/Evaluation is THB and Currency of Billing is USD; the Listing Evaluation to Billing Rate would be 30.208039.</p> <ul style="list-style-type: none"> When Settlement Method is ICH/ACH using RAM Rule/ACH, Listing Evaluation to Billing Rate will be generated automatically with the Five Day Rate by the system and cannot be edited or modified. When Settlement Method is Bilateral, the value should be entered by the user. It should not be zero or a negative value. This field is mandatory for Settlement Method via ICH using Special Agreement; the value should be entered by the user. It should not be zero or negative value.
Digital Signature	It is a flag indicating whether digital signature is required or not.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> N: No Y: Yes D: Default (as per profile settings) <p>If digital signature requirement indicate an 'N' as per profile settings, it should not be changed to "Y".</p>
Invoice Template Language	It indicates Invoice Template	-

Fields	Descriptions	Remarks
	Language	
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-

The procedure for Creating a Non-Sampling Invoice Header is as follows:

- Enter the following details
 - **Billed Member**
 - **Invoice Number**
 - **Invoice Date**
 - **Billing Year/Month/Period**
 - **Billing Member's Location ID**
 - **Billed Member's Location ID**
 - **Settlement Method**
 - **Currency of Listing/Evaluation**
 - **Currency of Billing**
 - **Listing Evaluation to Billing Rate**
 - **Digital Signature**
 - **Invoice Template Language**
 - **CH Agreement Indicator**
 - **CH Due Date**
- Click **Save** Invoice.
- The **Edit Non-Sampling Invoice** screen is displayed with the confirmation that the invoice header is created successfully.

1.2.4 Creating Prime Billing

To create a **Non-Sampling Invoice**, the steps are as follows:

1. Create Invoice Header.
2. Click **Prime Capture** button located at the end of the screen.
3. The **Create Prime Billing** screen is displayed.

Fields	Description	Remarks
Prime Billing Details		
*Source Code	It is the Source Code of the transaction.	Should be a valid Source Code as published by the industry.
*Batch Number	It is the Batch Sequence Number of the transaction.	<p>The combination of Batch Number and Sequence Number should not be repeated within an invoice.</p> <p>It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.</p>

Fields	Description	Remarks
*Sequence Number	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Issuing Airline	It is the accounting code of the issuing airline that bills the coupon.	Should be a valid accounting code. For Example, 221 for WI (Wings Airways).
*Coupon Number	It is the coupon number of the document.	9 can be selected for billing of FIMs without a coupon number.
*Ticket/FIM Number	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	-
*Check Digit	It is the check digit of the coupon.	Valid values are 0/1/2/3/4/5/6/9.
Coupon Gross Value	It is the fare value of the coupon.	Should be a positive value. Maximum number of decimal places allowed is 2.

Fields	Description	Remarks
ISC	It is the Interline Service Charge applicable on the coupon.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> ▪ Percentage ▪ Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible; you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90,95,96), the validation will be performed depending on the value of ISC %. ○ If the 'ISC %' is non-zero then the 'ISC Amount' should be non-zero ○ If the 'ISC %' is zero then the 'ISC Amount' should be zero ○ If the 'ISC %' is a positive value then the 'ISC Amount' should be a positive value ○ If the 'ISC %' is a negative value then the 'ISC Amount' should be a negative value. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
Tax Amount	It is the total interlineable TFCs (taxes, fees and charges) applicable on the coupon.	This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter tax breakdown data, click Tax Breakdown .
Handling Fee Type	Select a valid value when Handling Fees apply for the coupon.	Valid values are as follows: <ul style="list-style-type: none"> • Agency • Company • SATO • Others
Handling Fee Amount	It is the Handling Fee Amount applicable on the coupon.	Since this is a deductible, you need to ensure that a negative value is entered (For example, -5.00). Maximum number of decimal places allowed is two.
Other Commission	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	Other Commission consists of 2 fields: <ul style="list-style-type: none"> ▪ Percentage ▪ Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible; you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
UATP	It is the UATP discount applicable on the coupon.	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
VAT Amount	It is the total VAT amount applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click VAT Breakdown.</p>

Fields	Description	Remarks
Coupon Total Amount	It is the total amount of the coupon.	<p>Total amount is calculated by the system and is not editable. It is the sum of the following fields taking into consideration whether the values are positive or negative:</p> <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount
Surcharge Amt. (included within fare)	It is the surcharge amount included in the Coupon Gross Value (Fare).	<p>The value entered here is for information purposes only. It is not validated and has no impact on the calculation of the Coupon Total Amount.</p> <p>Maximum number of decimal places allowed is two.</p>
*Currency Adjustment Indicator	It is the base currency used while evaluating the value of the coupon.	Should be a valid ISO Alpha Currency Code.
E-Ticket Indicator	It is the Electronic ticket indicator.	<p>The check box is selected by default indicating that the billed coupon belongs to an E-Ticket.</p> <p>If the check box is not selected, it indicates paper tickets/documents.</p>
ESAC	It is the electronic settlement authorization code.	<p>ESAC is applicable for E-Tickets only.</p> <ul style="list-style-type: none"> • It is not a mandatory field. • This field will be enabled only when E-Ticket Indicator is checked.
Airline Flight Designator	It is the designator code of the operating carrier's flight; except for Block Space flights where this will be of the marketing carrier's flight code.	<p>It is mandatory field for Source Codes 1 and 14.</p> <ul style="list-style-type: none"> • By default, the designator of the billing airline is populated; and it can be modified. • Should be a valid designator. • For example, SI (for SIS Airways).
Flight Number	It is the number of the operating carrier's flight; except for Block Space flights where this will be the number of the marketing carrier's flight.	It is mandatory for Source Codes 1 and 14.

Fields	Description	Remarks
Flight Date	It is the departure date of the flight.	<p>It is mandatory for Source Codes 1 and 14.</p> <p>The flight date month & year should not be greater/later than the Billing Month/Year mentioned in the invoice in which the coupon is billed. For example:</p> <ul style="list-style-type: none"> Flight Date = 03-Jul-2015; Billing Year/Month/Period mentioned in the invoice = 2015-Jul-P1; Result: Pass Flight Date = 03-Jul-2015; Billing Year/Month/Period mentioned in the invoice = 2015-Jun-P4; Result: Error Flight Date = 03-Jul-2015; Billing Year/Month/Period mentioned in the invoice = 2015-Oct-P3; Result: Pass Flight Date = 03-Jul-2015; Billing Year/Month/Period mentioned in the invoice = 2014-Oct-P3; Result: Error Note that this validation is applicable only for Source code 1 and 14
From Airport	It is the origin city/airport of the coupon.	<p>It is mandatory for Source Codes 1 and 14.</p> <p>It should be a valid IATA city or airport code.</p>
To Airport	It is the destination city/airport of the coupon.	<p>It is mandatory for Source Codes 1 and 14.</p> <p>It should be a valid IATA city or airport code.</p>
Cabin Class	It is the cabin class in which the uplifted coupon was serviced.	--
Filing Reference	It is the Filing Reference for bilateral data exchange.	--

Fields	Description	Remarks
Agreement Indicator	It is the Agreement Indicator.	<p>This is an optional field</p> <p>□ Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows:</p> <ul style="list-style-type: none"> • I - First & Final Attachment I transactions • J - First & Final Attachment J transactions • K - NFP Non Final transactions • W - Switched Own Prorate transactions requiring AIA Value Confirmation • V - Switched Own Prorate transactions not requiring AIA Value Confirmation • T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>
Original PMI	It is the Original Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> • Should be "N" if 'Agreement Indicator' is "I", "J" or "K". • Should be "O" if 'Agreement Indicator' is "W", "V" or "T". • Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Prorate Methodology	It is the methodology used to evaluate the prorate value.	<p>Would also be used by non NFP users. Content could be for example, SF3 (SPA, Fixed Rate, Territory 3 travel), and so on.</p> <p>No fixed codes; definition up to the carriers on a bilateral / alliance basis.</p>
Reason Code	To exchange data on a bilateral basis.	--
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis

Fields	Description	Remarks
Reference Field 1	It is a reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1'
Reference Field 2	It is a reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1'
Reference Field 3	It is a reusable field for different types of billing scenarios.	-
Reference Field 4	It is a reusable field for different types of billing scenarios.	-
Reference Field 5	It is a reusable field for different types of billing scenarios.	-
Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	This field is automatically set by the system <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.

Button	Description	Remarks
Save and Add New	Click Save and Add New to save the coupon data and add data for a new coupon.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.

Button	Description	Remarks
Save and Duplicate	Click Save and Duplicate to save the coupon data and capture another coupon with identical data.	<p>After data of the current coupon is successfully saved, the same screen with is offered to the user for capturing the next identical coupon, using data from the saved coupon.</p> <ul style="list-style-type: none"> The following are not copied from the coupon successfully saved: <ul style="list-style-type: none"> <input type="checkbox"/> Coupon Number <input type="checkbox"/> Ticket/FIM Number <input type="checkbox"/> ESAC <input type="checkbox"/> Attachments Changes are made to the following fields: <ul style="list-style-type: none"> <input type="checkbox"/> Ticket/FIM Number (the last 3 digits are removed) <input type="checkbox"/> Check Digit (value is changed to 9) <input type="checkbox"/> Sequence Number is incremented by 1. Tax and VAT breakdown data are also copied.
Save and Back to Overview	Click Save and Back to Overview to save the coupon data and go to the Prime Billing Coupon List screen.	After data of the current coupon is successfully saved, the Prime Billing Coupon List screen is displayed.
Back	Click Back to go to the Prime Billing Coupon List screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

The procedure to add a Prime Coupon is as follows:

- Enter the following details
 - **Source Code**
 - **Batch Number**
 - **Sequence Number**
 - **The field Issuing Airline is generated automatically.**
 - **Coupon Number**
 - **Ticket/FIM Number**
 - **Check Digit**
 - **Coupon Gross Value**
 - **ISC**
 - **Tax Amount**
 - **Handling Fee Type**
 - **Handling Fee Amount**
 - **Other Commission**
 - **UATP**

- VAT Amount
- Coupon Total Amount
- Surcharge Amount (included within Fare)
- Currency Adjustment Indicator
- E-Ticket Indicator
- ESAC
- Airline Flight Designator
- Flight Number
- Flight Date
- From Airport
- To Airport
- Cabin Class
- Filing Reference
- Agreement Indicator
- Original PMI
- Prorate Methodology
- Reason Code
- Airline Own Use
- Reference fields 1-5

2. Click **Attachment** to add supporting documents.

3. Click **Save and Back to Overview** to save the details entered. The **Prime List** screen is displayed.
The details for the coupon entered are displayed.

1.2.6 Editing the Prime Billing

To edit the Prime Billing, the steps are as follows:

1. Search the Invoice.
2. Select the prime billing to be edited from the list displayed in the **Search Results** section.
3. Click  to edit the prime billing.
4. The **Prime Billing List** screen is displayed.
5. Select the prime coupon to be edited from the list displayed in the **Prime Billing Coupon List** section.
6. Click  to edit the coupon.
7. The **Edit Prime Billing** screen is displayed.

The screenshot shows the 'Edit Prime Billing' screen in the SIS Air system. The header includes the IATA logo and navigation tabs like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is divided into several sections:

- Header Details:** Includes fields for Billed Member (WI-221), Billing Period (Jan 2012 P4), Settlement Method (ICH), Invoice Number (sispr2907), Billing Code (NS), Listing Amount (USD 395.00), Listing/Evaluation to Billing Rate (1.00000), and Billing Amount (USD 395.00).
- Prime Billing Details:** Contains fields for Source Code (1), Batch Number (3245), Sequence Number (4536), Issuing Airline (221), Coupon Number (1), Ticket/FIM Number (4576), Check Digit (9), Coupon Gross Value (500.00), Handling Fee Amount (-10.00), Other Commission (-10.00), UATP (-10.00), VAT Amount (5.00), and Coupon Total Amount (395.00).
- Flight Details:** Includes Airline Flight Designator (SI), Flight Number (297), Flight Date (21-Jul-11), From Airport (JFK), To Airport (MUM), Cabin Class, and Filing Reference.
- Agreement and Reference Fields:** Includes Agreement Indicator, Original PMT, Prorate Methodology, Reason Code, Airline Own Use, and various Reference Fields (1-5).
- Attachment Indicator:** A dropdown menu set to 'No'.

At the bottom, there are four buttons: 'Save and Add New', 'Save and Duplicate', 'Save and Back to Overview', and 'Back'.

The fields displayed are same as described in the **Creating Prime Billing**.

The procedure to edit a prime billing is as follows:

1. Edit the details for the fields.
2. Click **Save and Add New** to save the edited details and add new coupon details.

OR

Click **Save and Duplicate** to save the coupon data and capture another coupon with identical data.

OR

Click **Save and Back to Overview** to save the coupon data and go to the **Prime Billing Coupon List** screen.

1.2.7 Creating a Rejection Memo

To create a **Rejection Memo**, the steps are as follows:

1. Create Invoice Header.
2. Click **RM Capture** button displayed at the end of the page.
3. The **Create Rejection Memo** screen is displayed.

Fields	Description	Remarks
*Batch Number	It is the Batch Sequence Number of the transaction.	<p>The combination of Batch Number and Sequence Number should not be repeated within an invoice.</p> <p>It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.</p>
*Sequence Number	It is the Sequence Number within a batch of the transaction.	<p>The combination of Batch Number and Sequence Number should not be repeated within an invoice.</p> <p>It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.</p>
*Source code	It is the Source Code of the transaction.	<p>Should be a valid Source Code as published by the industry</p> <p>When RM is initiated from billing history or payables screens and the rejected transaction had a non-bilateral Source Code, this will be set automatically to the appropriate value (e.g. when an RM stage 2 with Source Code 5 is rejected, it will be set as 6).</p> <p>Click here to refer source code validations</p>
*Rejection Memo Stage	It is the stage (1, 2, and 3) of the rejection Memo.	<p>When RM is initiated from billing history or payables screens, this will be set automatically and should not be changed</p> <p>When RM is captured afresh and it has a non-bilateral Source Code, this will be set automatically to the appropriate value and cannot be changed (For example, stage 1 for Source Code 4, stage 3 for Source Code 46 and so on).</p>
*Rejection Memo Number	It is the alpha-numeric Rejection Memo number.	-

Fields	Description	Remarks
*Reason Code	It is the Reason Code for rejection.	<p>Should be a valid Reason Code as published by the industry</p> <ul style="list-style-type: none"> The Reason Code will determine whether coupon breakdown is mandatory. Note when 1A is provided, details of one coupon should be provided and not more than one. The Reason Code will determine which kinds of amounts can contain differences. For example, Tax differences should not be billed when Reason Code is 1B.
Our Reference	It is used to exchange data on a bilateral basis.	-
*Your Invoice Number	It is the number of the invoice that contained the transaction being rejected	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Your Rejection Memo Number	It is applicable for RM stages 2 and 3, and pertains to the RM being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed
*Your Billing Year	It is the billing year, month and period of the invoice that contained the transaction being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
*Your Billing Month	It is the billing year, month and period of the invoice that contained the transaction being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
*Your Billing Period	It is the billing year, month and period of the invoice that contained the transaction being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
FIM/BM/CM Indicator	It is an indication whether the rejected transaction was a FIM, Billing Memo or Credit Memo.	<p>Select None if the rejected transaction is not a FIM, Billing Memo or Credit Memo</p> <p>When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.</p>

Fields	Description	Remarks
FIM/Billing Memo Number	It is the number of the FIM/Billing Memo/Credit Memo if 'FIM/BM/CM Indicator' indicates FIM/BM/CM.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
FIM Coupon Number	It is the coupon number of the FIM if 'FIM/BM/CM Indicator' indicates FIM.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Reason Remarks	It is the reason text for rejection.	-
Gross	It is the gross amount of the coupon for the Rejection Memo .	Gross is divided into three categories: <ul style="list-style-type: none"> • Billed: It is the value which is being rejected. • Accepted: It is the accepted value for the coupon. • Difference: It is generated automatically by the system based on the difference between the Billed and the Accepted value.
Tax	It is the Tax for the coupon.	This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter tax breakdown data, click Tax Breakdown .

Fields	Description	Remarks
ISC	It is the Interline Service Charge applicable on the coupon.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 91, 92, 93), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
UATP	It is the UATP discount applicable on the coupon.	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 91, 92, 93), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Handling Fee	It is the Handling Fee applicable for the coupon.	<p>Since this is a deductible, you need to ensure that a negative value is entered (For example, -5.00).</p> <p>Maximum number of decimal places allowed is two.</p>

Fields	Description	Remarks
Other Commission	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	<p>Other Commission consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
VAT	It is the total VAT amount applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click VAT Breakdown.</p>
Total Net Rejected Amount	It is the total rejected amount.	It is the total of Gross amount and Tax and VAT and ISC and UATP and Handling Fee and Other Commission .
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	<p>This field is automatically set by the system</p> <ul style="list-style-type: none"> • Will be set to Yes if one or more attachments are added to the transaction. • Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) • Click Attachment to add/remove attachments.
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis.

Note:

- In case of RM stage 2 and RM stage 3, for all billed/allowed amounts (i.e.Gross, Tax, ISC, UATP, Handling Fee, Other Commission and VAT), the amounts should match the accepted amount from the previous rejection after currency conversion.
- **Source Code Validations**
 - A Stage 1 RM billed with Source Code 4 can be rejected only by a Stage 2 RM having Source Code 5
 - A Stage 2 RM billed with Source Code 5 can be rejected only by a Stage 3 RM having Source Code 6
 - A prime FIM billed with Source Code 14 can be rejected only by a Stage 1 RM having Source Code 44
 - A Stage 1 RM billed with Source Code 44 can be rejected only by a Stage 2 RM having Source Code 45
 - A Stage 2 RM billed with Source Code 45 can be rejected only by a Stage 3 RM having Source Code 46
 - A Stage 1 RM billed with Source Code 91 can be rejected only by a Stage 2 RM having Source Code 92
 - A Stage 2 RM billed with Source Code 92 can be rejected only by a Stage 3 RM having Source Code 93

Buttons	Description	Remarks
Save	Click Save to save the Rejection Memo details entered.	After data of the current coupon is successfully saved, the RM Listing screen is displayed where the details of the added coupon are displayed.
Save and Add New	Click Save and Add New to save the data and add data for a new coupon.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.
Validate Linking Details	Click Validate Linking Details to check if there are any errors for the supporting documents attached.	The system checks if the mandatory field values are entered. If certain field values are missing, system gives a Validation error code.
Back	Click Back to go to previous screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user. Note: When you create a Rejection Memo using an existing header (Searching an Invoice), the Back button is Back To Invoice Search .

The procedure for creating a Rejection Memo is as follows:

1. Enter the following details:
 - **Batch Number**
 - **Sequence Number**
 - **Rejection Memo Stage** will be generated automatically by the system
 - **Source Code**
 - **Reason Code**
 - **Our Reference**
 - **Your Invoice Number**
 - **Your Rejection Memo Number**

- **Your Billing Year**
 - **Your Billing Month**
 - **Your Billing Period**
 - **FIM/BM/CM Indicator**
 - **FIM/Billing Memo Number**
 - **FIM Coupon Number**
 - These fields will be generated automatically by the system for rejection stage two and three.
 - **Reason Remarks**
2. Click **Attachment** to add attachments.
 3. Click **Save Rejection Memo**.
 4. The **Create Rejection Memo Coupon** screen is displayed. You can add a Rejection Memo coupon.

The procedure for validating linking details is as follows:

1. Enter the following details:
 - **Batch Number**
 - **Sequence Number**
 - **Rejection Memo Stage** will be generated automatically by the system.
 - **Source Code**
 - **Reason Code**
 - **Our Reference**
 - **Your Invoice Number**
 - **Your Rejection Memo Number**
 - **Your Billing Year**
 - **Your Billing Month**
 - **Your Billing Period**
 - **FIM/BM/CM Indicator**
 - **FIM/Billing Memo Number**
 - **FIM Coupon Number**
 - These fields will be generated automatically by the system for rejection stage two and three.
 2. Click **Validate Linking Details**.
 3. If all the system checks are validated for the invoice then the Invoice is marked as **Ready for Submission** else for any error in validation checks **Validation Errors** screen is displayed.
- For more information please refer to **Validating an Invoice**.

Sections	Description	Remarks
Header Details	It displays the details of the header.	Details for the following fields is displayed <ul style="list-style-type: none"> • Billed Member • Billing Period • Settlement Method • Invoice Number • Billing Code • Listing Amount • Listing valuation to Billing Rate • Billing Amount • Invoice Status
Rejection Memo Data Capture	It displays the details of the coupons added for the Rejection Memo .	Fields are described below.
Rejection Memo Coupon List	It displays the details of the coupons added for the Rejection Memo .	Gives a summary of the coupons added to the Rejection Memo . The user can select the Action for the coupon displayed in the Rejection Memo List section.

Fields	Description	Remarks
*Ticket Issuing Airline	It is the accounting code of the issuing airline that bills the coupon.	Should be a valid accounting code. For Example, 221 for WI (Wings Airways)
*Coupon Number	It is the coupon number of the document.	9 can be selected for billing of FIMs without a coupon number.
*Ticket/Document Number	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	-
*Check Digit	It is the check digit of the coupon.	Valid values are 0/1/2/3/4/5/6/9.
From Airport of Coupon	It is the origin city/airport of the coupon.	It is mandatory for Source Codes 1 and 14. Should be a valid IATA city or airport code.
To Airport of Coupon	It is the destination city/airport of the coupon.	It is mandatory for Source Codes 1 and 14. Should be a valid IATA city or airport code.
Settlement Authorization Code	It is the Settlement Authorization Code.	Enter valid authorization code.

Fields	Description	Remarks
Agreement Indicator-Supplied	It is the Agreement Indicator.	<p>This is an optional field</p> <p>□ Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows:</p> <ul style="list-style-type: none"> • I - First & Final Attachment I transactions • J - First & Final Attachment J transactions • K - NFP Non Final transactions • W - Switched Own Prorate transactions requiring AIA Value Confirmation • V - Switched Own Prorate transactions not requiring AIA Value Confirmation • T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>
Agreement Indicator-Validated	It is the Agreement Indicator.	<p>This is an optional field</p> <p>□ Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows:</p> <ul style="list-style-type: none"> • I - First & Final Attachment I transactions • J - First & Final Attachment J transactions • K - NFP Non Final transactions • W - Switched Own Prorate transactions requiring AIA Value Confirmation • V - Switched Own Prorate transactions not requiring AIA Value Confirmation • T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>
Original PMI	It is the Original Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> • Should be "N" if 'Agreement Indicator' is "I", "J" or "K". • Should be "O" if 'Agreement Indicator' is "W", "V" or "T". • Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).

Fields	Description	Remarks
Validated PMI	It is the Validated Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Gross	It is the fare value of the coupon.	<p>Gross is divided into three categories:</p> <ul style="list-style-type: none"> Billed: It is the value which is being rejected. Accepted: It is the accepted value for the coupon. Difference: It is generated automatically by the system based on the difference between the Billed and the Accepted value.
Tax	It is the total interlineable TFCs (taxes, fees and charges) applicable on the coupon.	<p>It is divided into three categories Billed, Accepted, Difference.</p> <ul style="list-style-type: none"> This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter tax breakdown data, click Tax Breakdown.

Fields	Description	Remarks
ISC	It is the Interline Service Charge applicable on the coupon.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> □ Percentage □ Amount <ul style="list-style-type: none"> • It is divided into three categories Billed percentage, Accepted percentage, Difference amount. • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 91, 92, 93), the validation will be performed depending on the value of ISC %. <ul style="list-style-type: none"> ○ If the 'ISC %' is non-zero then the 'ISC Amount' should be non-zero ○ If the 'ISC %' is zero then the 'ISC Amount' should be zero ○ If the 'ISC %' is a positive value then the 'ISC Amount' should be a positive value ○ If the 'ISC %' is a negative value then the 'ISC Amount' should be a negative value. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
UATP	It is the UATP discount applicable on the coupon.	<p>It is divided into three categories Billed, Accepted, Difference.</p> <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 91, 92, 93), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Handling Fee	It is the amount of Handling Fee applicable on the coupon.	<p>It is divided into three categories Billed, Accepted, Difference.</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative value is entered (For example, - 5.00). • Maximum number of decimal places allowed is two.

Fields	Description	Remarks
Other Commission	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	<p>Other Commission consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • It is divided into three categories Billed, Accepted, Difference. • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
VAT	It is the total VAT amount applicable on the coupon.	<p>It is divided into three categories Billed, Accepted, Difference.</p> <ul style="list-style-type: none"> • This total amount cannot be entered directly. It will be derived from the breakdown data entered. • To enter tax breakdown data, click VAT Breakdown.
Net Rejected Amount	It is the total amount of the coupon.	<p>Total amount is calculated by the system and is not editable. It is the sum of the following fields taking into consideration whether the values are positive or negative:</p> <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount
Reason Code	To exchange data on a bilateral basis	-
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis

Fields	Description	Remarks
Reference Field 1	It is a reusable field for different types of billing scenarios.	<p>Mandatory in case of EMD Prime billings (Source Code 23).</p> <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1' <p>For EMD Rejections</p> <ul style="list-style-type: none"> Value of Reference field 1 should be valid RFIC code
Reference Field 2	It is a reusable field for different types of billing scenarios.	<p>Mandatory in case of EMD Prime billings (Source Code 23).</p> <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1' <p>For EMD Rejections</p> <ul style="list-style-type: none"> Value of Reference field 2 should be valid RFISC code for the RFIC code provided in 'Reference Field 1'
Reference Field 3	It is a reusable field for different types of billing scenarios.	-
Reference Field 4	It is a reusable field for different types of billing scenarios.	-
Reference Field 5	It is a reusable field for different types of billing scenarios.	-
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	<p>This field is automatically set by the system</p> <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.
Prorate Slip	Click to enter the details for proration.	<p>The Add/Edit Prorate Slip Details screen is displayed.</p> <p>Enter the proration details and click Save.</p>

Note:

- In case of Non-Sampling RM stage 1:
 - For all billed/allowed amounts (i.e.Gross, Tax, ISC, UATP, Handling Fee, Other Commission and VAT), the amounts should match the billed amount from the rejected coupon after currency conversion.
- In case of Sampling Form F:

- For all billed/allowed amounts (i.e.Gross, Tax, ISC, UATP, Handling Fee, Other Commission and VAT); the amounts should match the evaluated amount from the rejected Form D coupon.

Buttons	Description	Remarks
Save and Add New	Click Save and Add New to save the coupon data and add data for a new coupon.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.
Save and Duplicate	Click Save and Duplicate to save the coupon data and capture another coupon with identical data.	<p>After data of the current coupon is successfully saved, the same screen with is offered to the user for capturing the next identical coupon, using data from the saved coupon.</p> <ul style="list-style-type: none"> • The following are not copied from the coupon successfully saved: <ul style="list-style-type: none"> <input type="checkbox"/> Coupon Number <input type="checkbox"/> Ticket/FIM Number <input type="checkbox"/> ESAC <input type="checkbox"/> Attachments • Changes are made to the following fields: <ul style="list-style-type: none"> <input type="checkbox"/> Ticket/FIM Number (the last 3 digits are removed) <input type="checkbox"/> Check Digit (value is changed to 9) <input type="checkbox"/> Sequence Number is incremented by 1. • Tax and VAT breakdown data are also copied.
Save and Back to Overview	Click Save and Back to Overview to save the coupon data and go to the Prime Billing Coupon List screen.	After data of the current coupon is successfully saved, the Prime Billing Coupon List screen will be displayed.
Back	Click Back to go back to previous screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

Note: Billed: It is the value which is being rejected.

Accepted: It is the accepted value for the coupon.

Difference: It is generated automatically by the system based on the difference between the Billed and the Accepted value.

The procedure to add coupon details to a Rejection Memo are as follows:

1. Enter the following details
 - Billed **Gross**, Accepted **Gross**.
The Gross Difference will be generated automatically.
 - Billed **Tax**, Accepted **Tax**.
The Tax Difference will be generated automatically.
 - Billed **ISC**, Accepted **ISC**.
The ISC Difference will be generated automatically.
 - Billed **UATP**, Accepted **UATP**.
The UATP Difference will be generated automatically.

- Billed **Handling Fee**, Accepted **Handling Fee**.
The Handling Fee Difference will be generated automatically.
 - Billed **Other Commission**, Accepted **Other Commission**.
The Other Commission Difference will be generated automatically.
 - Billed **VAT**, Accepted **VAT**.
The VAT Difference will be generated automatically.
The **Net Rejected Amount** will be generated automatically.
 - Click Attachment to insert attachments for the coupon.
2. Click **Save**.
3. The details of the coupon are displayed in the **Rejection Memo Coupon List** section.

Note:

- Airlines receiving rejections will have the ability to add Coupons to the next rejection stage under certain conditions/scenarios.
- This is applicable for Non-Sampling rejections only
- Additional coupons can be added under the following circumstances:
 - For Stage 2 RMs, when the rejected Stage 1 RM does not contain any coupons
 - For Stage 3 RMs, when the rejected Stage 2 RM does not contain any coupons
 - For Stage 2 RMs having Source Code 45 (FIM rejections). It does not matter if the rejected Stage 1 RM has any coupons or not
 - For Stage 3 RMs having Source Code 46 (FIM rejections). It does not matter if the rejected Stage 2 RM has any coupons or not

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
Billing Memo Details		
*Batch Number	It is the Batch Sequence Number of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.

Fields	Description	Remarks
*Sequence Number	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Source code	It is the Source Code of the transaction.	Should be a valid Source Code as published by the industry.
*Billing Memo Number	It is the alpha-numeric Billing Memo Number .	-
*Reason Code	The Reason Code for Billing Memo.	Should be a valid Reason Code as published by the industry The Reason Code will determine whether coupon breakdown is mandatory. Note: When 8C is provided, details of the coupon should be provided.
Our Reference	To exchange data on a bilateral basis.	-
Your Invoice Number	The number of the invoice that contained the transaction.	When BM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Your Billing Year	The billing year, month and period of the invoice that contained the transaction.	When BM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Your Billing Month	The billing year, month and period of the invoice that contained the transaction being rejected.	When BM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Your Billing Period	The billing year, month and period of the invoice that contained the transaction being rejected.	When BM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Correspondence Reference Number	It indicates the Correspondence Number for which the Billing Memo is issued.	At the end of the correspondence cycle, the Billed Member gives "Authority to Bill" to the Billing member . Only then is the Billing Memo issued.
FIM Number	The number of the FIM.	It should be a valid number as per IATA standards.
FIM Coupon Number	The coupon number of the FIM.	When BM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.

Fields	Description	Remarks
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	<p>This field is automatically set by the system</p> <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis.
Remarks	It is a brief description provided by the Billing Member for the invoice.	Any comments or reason for raising the Billing Memo can be stated here.
Total Gross Amount	It is the fare value of the coupon.	<p>Should be a positive value.</p> <p>Maximum number of decimal places allowed is 2.</p>
Total ISC Amount	It is the Interline Service Charge applicable on the coupon.	<p>Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived.</p> <ul style="list-style-type: none"> It is possible to modify the derived amount. When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 94), no validation will be performed on the amount. Maximum number of decimal places allowed for percentage is three. Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
Total Other Commission Amount	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	<p>Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived.</p> <ul style="list-style-type: none"> • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Total UATP Amount	It is the UATP discount applicable on the coupon.	<p>Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived.</p> <ul style="list-style-type: none"> • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 94), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Total Handling Fee Amount	It is the Handling Fee Amount applicable on the coupon.	<p>Since this is a deductible, you need to ensure that a negative value is entered (For example, -5.00).</p> <p>Maximum number of decimal places allowed is two.</p>
Total Tax Amount	It is the total interlineable TFCs (taxes, fees and charges) applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click Tax Breakdown.</p>
Total VAT Amount	It is the total VAT amount applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click VAT Breakdown.</p>

Fields	Description	Remarks
Net Billed Amount	It is the total amount of the coupon.	<p>Total amount is calculated by the system and is not editable. It is the sum of the following fields taking into consideration whether the values are positive or negative:</p> <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount

Button	Description	Remarks
Save	Click Save to save the Billing Memo details entered.	After data entered is successfully saved, the Create Billing Memo Coupon screen is displayed where the details for the coupon can be added.
Back	Click Back to go to the Prime Billing Coupon List screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

The procedure for creating a Billing Memo is as follows:

1. Enter the following details:

- **Batch No.**
- **Sequence No.**
- **Source Code**
- **Billing Memo Number**
- **Reason Code**
- **Our Reference**
- **Your Invoice Number**
- **Your Billing Year**
- **Your Billing Month**
- **Your Billing Period**
- **Correspondence Ref. Number**
- **FIM Number**
- **FIM Coupon Number**
- Click **Attachment** to attach any supporting documents.
- **Airline Own Use**
- **Remarks**
- **Total Gross Amount**
- **Total ISC Amount**
- **Total Other Commission Amount**
- **Total UATP Amount**
- **Total Handling Fee Amount**
- **Total Tax Amount**
- **Total VAT Amount**
- The **Net Billed Amount** will be generated automatically.

2. Click **Save**.

3. The **Billing Memo List** screen is displayed. The details entered for the coupon are displayed.

1.2.13 Adding a Billing Memo Coupon

To add a Billing Memo Coupon, the steps are as follows:

1. Create Billing Memo.

Fields	Description	Remarks
Billing Memo Coupon Details		
*Ticket Issuing Airline	It is the accounting code of the issuing airline that bills the coupon.	Should be a valid accounting code. For Example, 221 for WI (Wings Airways)
*Coupon Number	It is the coupon number of the document.	9 can be selected for billing of FIMs without a coupon number.
*Ticket/Document No	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	-
*Check Digit	It is the check digit of the coupon.	Valid values are 0/1/2/3/4/5/6/9.

Fields	Description	Remarks
E-Ticket Indicator	It is the Electronic ticket indicator.	The check box is selected by default indicating that the billed coupon belongs to an E-Ticket. If the check box is not selected, it indicates paper tickets/documents.
ESAC	It is the electronic settlement authorization code.	ESAC is applicable for E-Tickets only. <ul style="list-style-type: none"> • It is not a mandatory field. • This field will be enabled only when E-Ticket Indicator is checked.
Gross Amount	It is the fare value of the coupon.	Should be a positive value. Maximum number of decimal places allowed is 2.

Fields	Description	Remarks
ISC	It is the Interline Service Charge applicable on the coupon.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 94), the validation will be performed depending on the value of ISC %. <ul style="list-style-type: none"> ○ If the 'ISC %' is non-zero then the 'ISC Amount' should be non-zero ○ If the 'ISC %' is zero then the 'ISC Amount' should be zero ○ If the 'ISC %' is a positive value then the 'ISC Amount' should be a positive value ○ If the 'ISC %' is a negative value then the 'ISC Amount' should be a negative value. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Tax Amount	It is the total interlineable TFCs (taxes, fees and charges) applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click Tax Breakdown.</p>

Fields	Description	Remarks
Handling Fee	It is the Handling Fee Amount applicable on the coupon.	Since this is a deductible, you need to ensure that a negative value is entered (For example, -5.00). Maximum number of decimal places allowed is two.
Other Commission	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	<p>Other Commission consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
UATP	It is the UATP discount applicable on the coupon.	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 94), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
VAT Amount	It is the total VAT amount applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click VAT Breakdown.</p>
Currency Adjustment Indicator	It is the base currency used while evaluating the value of the coupon.	Should be a valid ISO Alpha Currency Code.
Net Billed Amount	It is the total amount of the coupon.	<p>Total amount is calculated by the system and is not editable. It is the sum of the following fields taking into consideration whether the values are positive or negative:</p> <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount

Fields	Description	Remarks
Airline Flight Designator	It is the designator code of the operating carrier's flight; except for Block Space flights where this will be of the marketing carrier's flight code.	It is mandatory field for Source Codes 1 and 14. <ul style="list-style-type: none"> By default, the designator of the billing airline is populated; and it can be modified. Should be a valid designator. For example, SI (for SIS Airways).
Flight Number	It is the number of the operating carrier's flight; except for Block Space flights where this will be the number of the marketing carrier's flight.	It is mandatory for Source Codes 1 and 14.
Flight Date	It is the departure date of the flight.	It is mandatory for Source Codes 1 and 14.
From Airport	It is the origin city/airport of the coupon	It is mandatory for Source Codes 1 and 14. Should be a valid IATA city or airport code.
To Airport	It is the destination city/airport of the coupon.	It is mandatory for Source Codes 1 and 14. Should be a valid IATA city or airport code.
Cabin Class	It is the cabin class in which the uplifted coupon was serviced.	-
Agreement Indicator	It is the Agreement Indicator.	This is an optional field <input type="checkbox"/> Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> I - First & Final Attachment I transactions J - First & Final Attachment J transactions K - NFP Non Final transactions W - Switched Own Prorate transactions requiring AIA Value Confirmation V - Switched Own Prorate transactions not requiring AIA Value Confirmation T - Stored Own Prorate transactions No validations are performed on bilateral 2 character values.

Fields	Description	Remarks
Original PMI	It is the Original Pricing Method Indicator.	This field should be blank if Agreement Indicator is blank. Exception: <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Validated PMI	It is the Validated Pricing Method Indicator.	This field should be blank if Agreement Indicator is blank. Exception: <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Prorate Methodology	It is the methodology used to evaluate the prorate value.	Would also be used by non NFP users. Content could be for example, SF3 (SPA, Fixed Rate, Territory 3 travel), and so on. No fixed codes; definition up to the carriers on a bilateral / alliance basis.
Reason Code	To exchange data on a bilateral basis.	-
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis.
Reference Field 1	It is a reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1'
Reference Field 2	It is a reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1'

Fields	Description	Remarks
Reference Field 3	It is a reusable field for different types of billing scenarios.	-
Reference Field 4	It is a reusable field for different types of billing scenarios.	-
Reference Field 5	It is a reusable field for different types of billing scenarios.	-
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	<p>This field is automatically set by the system</p> <ul style="list-style-type: none"> • Will be set to Yes if one or more attachments are added to the transaction. • Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) • Click Attachment to add/remove attachments.
Prorate Slip	Click to enter the details for proration.	<p>The Add/Edit Prorate Slip Details screen is displayed.</p> <p>Enter the proration details and click Save.</p>

Buttons	Description	Remarks
Save and Add New	Click Save and Add New to save the coupon data and add data for a new coupon.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.
Save and Duplicate	Click Save and Duplicate to save the coupon data and capture another coupon with identical data.	<p>After data of the current coupon is successfully saved, the same screen with is offered to the user for capturing the next identical coupon, using data from the saved coupon.</p> <ul style="list-style-type: none"> The following are not copied from the coupon successfully saved: <ul style="list-style-type: none"> <input type="checkbox"/> Coupon Number <input type="checkbox"/> Ticket/FIM Number <input type="checkbox"/> ESAC <input type="checkbox"/> Attachments Changes are made to the following fields: <ul style="list-style-type: none"> <input type="checkbox"/> Ticket/FIM Number (the last 3 digits are removed) <input type="checkbox"/> Check Digit (value is changed to 9) <input type="checkbox"/> Sequence Number is incremented by 1 Tax and VAT breakdown data are also copied.
Save and Back to Overview	Click Save and Back to Overview to save the coupon data and go to the Prime Billing Coupon List screen.	After data of the current coupon is successfully saved, the Prime Billing Coupon List screen will be displayed.
Back	Click Back to go to the Prime Billing Coupon List screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

The procedure for adding a Billing Memo coupon is as follows:

- Enter the following details:
 - Ticket Issuing Airline**
 - Coupon Number**
 - Ticket/Document No**
 - Check Digit**
 - E-Ticket Indicator**
 - ESAC**
 - Gross Amount**
 - ISC**
 - Tax Amount**
 - Handling Fee**
 - Other Commission**
 - UATP**
 - VAT Amount**
 - Currency Adjustment Indicator**
 - Net Billed Amount**

- Airline Flight Designator
 - Flight Number
 - Flight Date
 - From Airport
 - To Airport
 - Cabin Class
 - Agreement Indicator
 - Original PMI
 - Validated PMI
 - Prorate Methodology
 - Reason Code
 - Airline Own Use
 - Reference Field 1-5
2. Click **Attachment** to insert supporting documents.
 3. Click **Save**. The **Billing Memo List** screen is displayed.

1.2.15 Editing the Billing Memo

To edit the Billing memo, the steps are as follows:

1. Search the Invoice.
2. Select the billing memo to be edited from the list displayed in the **Search Results** section.
3. Click  to edit the Billing memo.
4. The **Billing Memo List** screen is displayed.
5. Select the BM coupon to be edited from the list displayed in the **Billing Memo List** section.
6. Click  to edit the coupon.
7. The **Edit Billing Memo** screen is displayed.

The screenshot shows the 'Edit Billing Memo' screen in the SIS Air system. The header includes the IATA logo and navigation tabs like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is divided into several sections:

- Header Details:** Contains fields for Billed Member (WI-221), Billing Period (Jan 2012 P1), Settlement Method (ICH), Invoice Number (sis2), Billing Code (NS), Listing Amount (USD 514.80), Listing/Evaluation to Billing Rate (1.00000), and Billing Amount (USD 514.80). Invoice Status is Open.
- Billing Memo Details:** Includes Batch No. (1121), Sequence No. (1121), Source Code (70), Billing Memo Number (121), Reason Code (ISC), and Our Reference.
- Your Invoice Number:** A text input field.
- Your Billing Year:** A dropdown menu with 'Please Select'.
- Your Billing Month:** A dropdown menu with 'Please Select'.
- Your Billing Period:** A dropdown menu with 'Please Select'.
- Correspondence Ref. Number:** A text input field.
- FIM Number:** A text input field.
- FIM Coupon Number:** A text input field.
- Attachment Indicator:** A dropdown menu with 'No' and 'Attachment'.
- Airline Own Use:** A text input field.
- Remarks:** A large text area for additional notes.
- Totals:** A section with various amounts: Total Gross Amount (500.00), Total ISC Amount (-10.00), Total Other Commission Amount (-10.00), Total UATP Amount (-10.00), Total Handling Fee Amount (-10.00), Total Tax Amount (50.00), Total VAT Amount (4.80), and Net Billed Amount (514.80). There is a link for 'VAT Breakdown'.
- Buttons:** Save, Save and Add New, Add Billing Memo Coupon, and Back.
- Billing Memo Coupon List:** A table with columns: Actions, Tkt. Issuing Arln, Ticket/Doc. No., Coupon No., From, To, Gross Fare Value, ISC Amt., Other Comm. Amt., UATP Amt., Handling Fee Amt., Tax Amt., VAT Amt., and Net Billed Amount. The table is currently empty.
- Page Navigation:** Shows 'Page 0 of 1' and a search bar.

The fields displayed are same as described in the **Creating Billing Memo**.

The procedure to edit a Billing memo is as follows:

1. Edit the details for the fields.
2. Click **Save** to save the edited details.

OR

Click **Save and Add New** to save the edited details and add new coupon details.

OR

Click **Add Billing Memo Coupon** to add a coupon to the Billing Memo.

OR

Click **Back** to go back to the **Billing Memo List** screen.

1.2.16 Editing Billing Memo Coupon

To edit a Billing memo coupon, the steps are as follows:

1. **Edit the Billing Memo.**
2. Select the coupon from the list displayed in the **Billing Memo Coupon List** section on the **Edit Billing Memo** screen.
3. Click  to edit the coupon.
4. The **Edit Billing Memo Coupon** screen is displayed.

*Settlement Method	It is the Settlement Method of the invoice.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> ▪ When Settlement Method is ICH: <ul style="list-style-type: none"> • If both Billing/Billed airlines are in Zone A; value should be GBP. • If both Billing & Billed Airline are in Zone D; value should be EUR. • If both Billing/Billed airlines are in Zone B, value should be USD. • If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. ▪ When Settlement Method is ACH using RAM Rule (ACH Inter-clearance Billings); value should be USD. ▪ When Settlement Method is ACH using RAM Rule (ACH member billing ACH member based on RAM rule); value should be USD or CAD. ▪ When Settlement Method is ACH value should be USD or CAD. <p>When Settlement Method is Bilateral it can be any currency.</p> <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method</p>

Fields	Description	Remarks
*Billing Year/Month/Period	The Clearance Period of the invoice (Year, Month and Period)	<p>For Example, Period 3 of April-2013 is represented as 2013-Apr-3</p> <p>The periods displayed are as follows:</p> <ul style="list-style-type: none"> • The current open period (default value). • The next 4 (future) periods; this may pertain to the next month also. • The previous closed period (if the late submission window is open in either of the clearing houses). • Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate; but does not find it for the future month, it will result in an error while saving the data.
*Currency of Listing/Evaluation	It is the currency in which the transactions are listed.	-

Fields	Description	Remarks
*Currency of Billing	It is the currency of billing of the invoice.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> When Settlement Method is ICH: <ul style="list-style-type: none"> If both Billing/Billed airlines are in Zone A; value should be GBP. If both Billing & Billed Airline are in Zone D; value should be EUR. If both Billing/Billed airlines are in Zone B, value should be USD. If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. When Settlement Method is ACH using RAM Rule (ACH Inter-clearance Billings); value should be USD. When Settlement Method is ACH using RAM Rule (ACH member billing ACH member based on RAM rule); value should be USD or CAD. When Settlement Method is ACH value should be USD or CAD. <p>When Settlement Method is Bilateral it can be any currency.</p> <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH Zone of the parent member will be considered for determination / validation of Settlement Method</p>
Listing Evaluation to Billing Rate	It is the Exchange Rate applicable for the Currency of Listing with reference to the Currency of Billing (dividing rate).	<p>For example, If Currency of Listing/Evaluation is THB and Currency of Billing is USD; the Listing Evaluation to Billing Rate would be 30.208039.</p> <ul style="list-style-type: none"> When Settlement Method is ICH/ACH using RAM Rule/ACH, Listing Evaluation to Billing Rate will be generated automatically with the Five Day Rate by the system and cannot be edited or modified. When Settlement Method is Bilateral, the value should be entered by the user. It should not be zero or a negative value.

Fields	Description	Remarks
Digital Signature	It is a flag indicating whether digital signature is required or not.	<p>Valid value are as follows:</p> <ul style="list-style-type: none"> • N: No • Y: Yes • D: Default (as per profile settings) <p>If digital signature requirements indicate a N as per profile settings, it should not be changed to Y.</p>

The procedure for creating a Sampling Form F Header is as follows:

- Enter the following details:
 - **Billed Member**
 - **Invoice Number**
 - **Invoice Date**
 - **Provisional Billing Month**
 - **Sampling Constant**
 - **Billing Member's Location ID**
 - **Billed Member's Location ID**
 - **Settlement Method**
 - **Billing Year/Month/Period**
 - **Currency of Listing/Evaluation**
 - **Currency of Billing**
 - **Listing Evaluation to Billing Rate**
 - **Digital Signature**
- Click **Save Header**.
- The **Edit Non-Sampling Invoice** screen is displayed with the confirmation that the Form F Header is created successfully.

1.3.6 Creating Form C

To create a **Sampling Form C Header**, the steps are as follows:

1. **Create Form C Header.**

2. Click **Add Form C Item** button located at the end of the page.
3. The **Create Sampling Form C Coupon** screen is displayed.

Fields	Description	Remarks
Header Details	It displays the details listed while creating Form C Header.	It displays following <ul style="list-style-type: none"> • Provisional Billing Month • Provisional Billing Member • Billing Code • Total Gross Amount/ALF
Form C Coupon Details		
*Source Code	It is the Source Code of the transaction.	Should be a valid Source Code as published by the industry. It is a two digit numeric code. It should always be 51: Source Code for Sampling Form C.
Tkt. Iss. Arln	It is the accounting code of the issuing airline that bills the coupon.	Should be a valid accounting code. For Example, 221 for WI (Wings Airways)
*Cpn.No.	It is the coupon number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	9 can be selected for billing of FIMs without a coupon number.
*Tkt. /Doc No.	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	Should be a valid TKT/Doc No.
*Prov.Inv.No.	Provisional Invoice Number. Unique alphanumeric code that identifies the invoice.	The Invoice Number could be up-to ten characters (English letters and numbers only) For example, WI1234 <ul style="list-style-type: none"> • Spaces and special characters (#, *, @, ~, - etc.) should not be used. • Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when performing duplicate checks. • Should not be duplicated by the billing airline within a calendar year.
*Batch No.	It is the Batch Sequence Number of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.

Fields	Description	Remarks
*Sequence No.	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
Currency of Listing/Evaluation	It is the currency in which the transactions are listed.	-
Gross Amount/ALF	It is the fare value of the coupon.	Should be a positive value. Maximum number of decimal places allowed is 2.
Electronic Ticket Indicator	It is the Electronic ticket indicator.	The check box is selected by default indicating that the billed coupon belongs to an E-Ticket. If the check box is not selected, it indicates paper tickets/documents.
Agreement Indicator-Supplied	It is the Agreement Indicator.	This is an optional field <ul style="list-style-type: none"> Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> I - First & Final Attachment I transactions J - First & Final Attachment J transactions K - NFP Non Final transactions W - Switched Own Prorate transactions requiring AIA Value Confirmation V - Switched Own Prorate transactions not requiring AIA Value Confirmation T - Stored Own Prorate transactions No validations are performed on bilateral 2 character values.

Fields	Description	Remarks
Agreement Indicator-Validated	It is the Validated Agreement Indicator.	<p>This is an optional field</p> <ul style="list-style-type: none"> Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> I - First & Final Attachment I transactions J - First & Final Attachment J transactions K - NFP Non Final transactions W - Switched Own Prorate transactions requiring AIA Value Confirmation V - Switched Own Prorate transactions not requiring AIA Value Confirmation T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>
Original PMI	It is the Original Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Validated PMI	It is the Validated Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).

Fields	Description	Remarks
*Rejection Reason Code	The Reason Code for rejection.	Should be a valid Reason Code as published by the industry The Reason Code will determine whether coupon breakdown is mandatory. Note when 3A is provided, details of one coupon should be provided and not more than one.
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	This field is automatically set by the system <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.
Remarks	It is a brief description provided by the Billing Member for the Form C.	Any comments or reason for raising the rejection can be stated here.

Buttons	Description	Remarks
Save and Add New	Click Save and Add New to save the coupon data and add data for a new coupon.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.
Back	Click Back to go to the previous screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

The procedure to add a coupon to Form C is as follows:

1. **Source Code** is generated automatically.
2. Enter the following details:
 - **Tkt. Iss. Arln**
 - **Coupon Number**
 - **Tkt. Doc. No.**
 - **Prov. Inv. No**
 - **Batch Number**
 - **Sequence Number**
 - **Currency of Listing/Evaluation is generated automatically**
 - **Gross Amount/ALF**
 - **Select the Electronic Ticket Indicator**
 - **Agreement Indicator- Supplied**
 - **Agreement Indicator- Validated**
 - **Original PMI**
 - **Validated PMI**
 - **Rejection Reason Code**
 - **Click Attachments to attach supporting documents**
 - **Remarks**
3. Click **Save and Add New** to add new coupon details to the same Form.

4. The Create Sampling Form C coupon is displayed with the confirmation that the Form C coupon is created successfully.

Fields	Description	Remarks
Header Details	It displays the details listed while creating Form D Header.	It displays details for following fields <ul style="list-style-type: none"> • Billed Member • Billing Period • Settlement Method • Invoice Number • Provisional Billing Month • Listing Amount • Listing Evaluation to Billing Rate • Billing Amount • Invoice Status • Billing Code
Form D Details		
*Source Code	It is the Source Code of the transaction.	Should be a valid Source Code as published by the industry. <ul style="list-style-type: none"> • It is a two digit numeric code. • It should always be 54: Source Code for Sampling Form D.
*Ticket Issuing Airline	It is the accounting code of the issuing airline that bills the coupon.	Should be a valid accounting code. For Example, 221 for WI (Wings Airways).
*Coupon Number	It is the coupon number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	9 can be selected for billing of FIMs without a coupon number.
*Ticket/Document Number	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	Should be a valid TKT/Doc No.
*Provisional Invoice Number	Provisional Invoice Number. Unique alphanumeric code that identifies the invoice.	The Invoice Number could be up-to ten characters (English letters and numbers only) For example, WI1234 <ul style="list-style-type: none"> • Spaces and special characters (#, *, @, ~, - etc.) should not be used. • Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when performing duplicate checks. • Should not be duplicated by the billing airline within a calendar year.
*Batch Number of Provisional Invoice	It is the Batch Number of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.

Fields	Description	Remarks
*Sequence Number of Prov. Invoice	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
Currency of Listing/Evaluation	It is the currency in which the transactions are listed.	-
*Provisional Gross Amount/ALF	It is the gross amount of the coupon for Form C .	It is the base amount for the coupon excluding Tax, Vat, Handling Fee Type, ISC, and UATP.
Evaluated Gross Amount	It is the total fare value of the coupons.	Should be a positive value. Maximum number of decimal places allowed is 2.
Evaluated ISC	It is the total Interline Service Charge applicable for the coupons.	ISC consists of 2 fields: <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 90), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
Evaluated Tax Amount	It is the total Tax for the coupons.	This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter tax breakdown data, click Tax Breakdown .
Evaluated Handling Fee Amount	It is the total Handling Fee applicable for the coupons.	Since this is a deductible, you need to ensure that a negative value is entered (For example, -5.00). Maximum number of decimal places allowed is two.
Evaluated Other Commission	It is the total Other Commission (Super-Commission or Code Share Commission) applicable for the coupons.	Other Commission consists of 2 fields: <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
Evaluated UATP	It is the total UATP discount applicable for the coupons.	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 90), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Evaluated VAT Amount	It is the total VAT amount applicable for the coupons.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click VAT Breakdown.</p>
*Evaluated Net Amount	It is the total amount for the coupons.	<p>It should be equal to the sum of Evaluated Gross Amount and Evaluated ISC Amount and Evaluated Other Commission Amount and Evaluated UATP Amount and Evaluated Handling Fee Amount and Evaluated Tax Amount and Evaluated VAT Amount.</p>

Fields	Description	Remarks
Agreement Indicator-Supplied	It is the Agreement Indicator.	<p>This is an optional field</p> <ul style="list-style-type: none"> Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> I - First & Final Attachment I transactions J - First & Final Attachment J transactions K - NFP Non Final transactions W - Switched Own Prorate transactions requiring AIA Value Confirmation V - Switched Own Prorate transactions not requiring AIA Value Confirmation T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>
Agreement Indicator-Validated	It is the Agreement Indicator.	<p>This is an optional field</p> <ul style="list-style-type: none"> Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> I - First & Final Attachment I transactions J - First & Final Attachment J transactions K - NFP Non Final transactions W - Switched Own Prorate transactions requiring AIA Value Confirmation V - Switched Own Prorate transactions not requiring AIA Value Confirmation T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>

Fields	Description	Remarks
Original PMI	It is the Original Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank.</p> <p>Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Validated PMI	It is the Validated Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank.</p> <p>Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Prorate Methodology	It is the methodology used to evaluate the prorate value.	<p>Would also be used by non NFP users. Content could be for example, SF3 (SPA, Fixed Rate, Territory 3 travel), and so on.</p> <p>No fixed codes; definition up to the carriers on a bilateral / alliance basis.</p>
Reason Code	To exchange data on a bilateral basis	-
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis.
Reference Field 1	It is a reusable field for different types of billing scenarios.	<p>Mandatory in case of EMD billings (Source Code 23).</p> <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in Reference Field 1.

Fields	Description	Remarks
Reference Field 2	It is a reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in Reference Field 1.
Reference Field 3	It is a reusable field for different types of billing scenarios.	-
Reference Field 4	It is a reusable field for different types of billing scenarios.	-
Reference Field 5	It is a reusable field for different types of billing scenarios.	-
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	This field is automatically set by the system <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.

Buttons	Description	Remarks
Save and Add New	Click Save and Add New to save the details entered for the coupon and add new coupon details.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.

Buttons	Description	Remarks
Save and Duplicate	Click Save and Duplicate to save the coupon data and capture another coupon with identical data.	<p>After data of the current coupon is successfully saved, the same screen with is offered to the user for capturing the next identical coupon, using data from the saved coupon.</p> <ul style="list-style-type: none"> The following are not copied from the coupon successfully saved: <ul style="list-style-type: none"> Coupon Number Ticket/FIM Number ESAC Attachments Changes are made to the following fields: <ul style="list-style-type: none"> Ticket/FIM Number (the last 3 digits are removed) Check Digit (value is changed to 9) Sequence Number is incremented by 1 Tax and VAT breakdown data are also copied.
Save and Back to Overview	Click Save and Back to Overview to save the coupon data and go to the Edit Form D/E screen.	After data of the current coupon is successfully saved, the Edit Form D/E screen will be displayed.
Back	Click Back to go to the Edit Form D/E screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

[Return to Top](#)

1.3.13 Provisional Invoice Record

Fields	Description	Remarks
Provisional Invoice Record Details		
*Provisional Invoice Number	Provisional Invoice Number. Unique alphanumeric code that identifies the invoice.	The Invoice Number could be up-to ten characters (English letters and numbers only) For example, W1234 <ul style="list-style-type: none"> Spaces and special characters (#, *, @, ~, - etc.) should not be used. Letters are case insensitive. For example, w1234 will be considered equal to W1234 when performing duplicate checks. Should not be duplicated by the billing airline within a calendar year.
*Provisional Invoice Date	It is the date of the Provisional invoice.	Shows the date on which invoice header is created. <ul style="list-style-type: none"> Automatically updated to the date on which invoice is successfully submitted. Cannot be edited or modified by the users.

Fields	Description	Remarks
*Provisional Billing Period Number	The Clearance Period of the invoice(Year, Month and Period)	<p>For Example, Period 3 of April-2013 is represented as 2013-Apr-3</p> <p>The periods displayed are as follows:</p> <ul style="list-style-type: none"> • The current open period (default value). • The next 4 (future) periods; this may pertain to the next month also. • The previous closed period (if the late submission window is open in either of the clearing houses). <p>Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate; but does not find it for the future month, it will result in an error while saving the data.</p>
*Provisional Invoice Listing Currency	It is the currency in which the transactions are listed.	-
*Provisional Listing to Billing Rate	It is the Exchange Rate applicable for the Currency of Listing with reference to the Currency of Billing (dividing rate).	<p>For example, If Currency of Listing/Evaluation is THB and Currency of Billing is USD; the Listing Evaluation to Billing Rate would be 30.208039.</p> <ul style="list-style-type: none"> • When Settlement Method is ICH/ACH using RAM Rule/ACH, Listing Evaluation to Billing Rate will be generated automatically with the Five Day Rate by the system and cannot be edited or modified. • When Settlement Method is Bilateral, the value should be entered by the user. It should not be zero or a negative value.
*Prov. Invoice Amount in Billing Currency	It is the total amount for the coupons.	<p>Total amount is calculated by the system and is not editable. It is the sum of the following fields taking into consideration whether the values are positive or negative:</p> <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount

Fields	Description	Remarks
*Provisional Invoice List	Displays the details of the Provisional Invoice.	<p>Details displayed include:</p> <ul style="list-style-type: none"> • Provisional Invoice Number • Provisional Invoice Date • Provisional Billing Period No. • Listing Currency • Listing Amount • Exchange Rate • Billing Amount

Buttons	Description	Remarks
Save	Click Save to save the details entered for the Provisional Invoice Records.	The details entered will be displayed in the Provisional Invoice List section.
Back	Click Back to go to back to previous screen.	<p>If there are any unsaved changes/additions on the screen, a warning will be provided to the user.</p> <p>The Edit Form D/E screen is displayed.</p> <p>The details for Form E can be added.</p>

Fields	Description	Remarks
Header Details	It displays the details listed while creating Form C Header.	It displays the following details <ul style="list-style-type: none"> • Billed Member • Billing Period • Settlement Method • Invoice Number • Provisional Billing Month • Listing Amount • Listing Evaluation to Billing Rate • Billing Amount • Invoice Status • Billing Code
Form E Details		
Universe Amounts		
*Gross Total of Universe	It indicates the total value of all the coupons lifted for sampling.	Should be a positive value. Maximum number of decimal places allowed is 2.

Fields	Description	Remarks
*Gross Total of Form C	It indicates the gross value of Form C.	Should be a positive value. Maximum number of decimal places allowed is 2.
*Universe Adjusted Gross Amount	It indicates the total gross amount to be adjusted for the entire sampling coupons.	It is generated automatically.
Sampling Constant Calculation		
*Gross Total Of Sample	It indicates the total value of all the coupons lifted for sampling.	Should be a positive value. Maximum number of decimal places allowed is 2.
*Gross Total of Form C Sample Coupon	It indicates the gross total of Form C.	Should be a positive value. Maximum number of decimal places allowed is 2.
*Sample Adjusted Gross Amount	It indicates the amount to be adjusted for the gross amount of the sample.	It is generated automatically. The value generated is the difference between Gross Total of Sample and Gross Total of Form C Coupon.
*Sampling Constant	The value is equal to Gross Total of Sample divided by Sample Adjusted Gross Amount.	It is generated automatically. <ul style="list-style-type: none"> It is constant with 3 decimal places. Modification of sampling constant will result change in Total Net Rejected Amount.
*Total of Form D Amounts X Sampling Constant	It displays the values added for Form D.	All the listed fields are generated automatically. <ul style="list-style-type: none"> Gross ISC Other commission UATP Handling Fee TAX VAT Net Amount due in Currency of Listing Net Amount due in Currency of Billing
Form B total Amount		
Gross	It is the total fare value of the coupons.	Should be a positive value. Maximum number of decimal places allowed is 2.

Fields	Description	Remarks
ISC	It is the Interline Service Charge applicable on the coupon.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 90), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Other Commission	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	<p>Other Commission consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
UATP	It is the UATP discount applicable on the coupon.	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 90), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Handling Fee	It is the Handling Fee applicable on the coupon.	<p>Since this is a deductible, you need to ensure that a negative value is entered (For example,-5.00).</p> <p>Maximum number of decimal places allowed is two.</p>
Tax	It is the total interlineable TFCs (taxes, fees and charges) applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click Tax Breakdown.</p>
VAT	It is the total calculated VAT .	<p>VAT specifications are as per location of the Billing Member.</p> <p>It is generated automatically with the amount described in the VAT Breakdown.</p>

Fields	Description	Remarks
*Total Amount	It is the total amount of the coupons.	Total amount is calculated by the system and is not editable. It is the sum of the following fields taking into consideration whether the values are positive or negative: <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount
Net Adjustment		
*Net Billed Credit Amount	It Indicates the net amount to be billed.	The value is generated automatically.
*Number Of Billing Records	It indicates the total number of records.	The value is generated automatically. Should be equal to sum of No of Billing Record of all Source Code Total records within the Invoice.

Buttons	Description	Remarks
Save	Click Save to save the details entered for Form E.	After data entered is successfully saved, the Edit Form E screen is displayed where the details of the added coupon are displayed.
Back	Click Back to go to previous screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.
Validate Invoice	Click Validate Invoice to check the form for any validation errors.	The system checks if the mandatory field values are entered. If certain field values are missing, system gives a Validation error code.

The procedure to create Sampling Form D/E is as follows:
Form D/E is created in three stages.

Stage 1: Creating Form D

Stage 2: Creating Provisional Invoice

Stage 3: Creating Form E

Stage 1: Creating Form D

1. Enter the following details:

- **Ticket Issuing Airline**
- **Coupon Number**
- **Ticket/Document Number**
- **Provisional Invoice Number**
- **Batch Number of Prov. Invoice**

- Sequence Number of Prov. Invoice
- Provisional Gross/ALF Amount
- Evaluated Gross Amount
- Evaluated ISC
- Evaluated Tax Amount
- Evaluated Handling Fee Amount
- Evaluated Other Commission
- Evaluated UATP
- Evaluated VAT Amount
- Evaluated Net Amount is generated automatically
- Agreement Indicator – Supplied
- Agreement Indicator – Validated
- Original PMI
- Validated PMI
- Prorate Methodology
- Reason Code
- Airline Own Use
- Reference Field 1-5

2. Click **Attachment** to attach supporting document
3. Click **Save and Back to Overview**.
4. The **Edit Form D/E screen** is displayed with the confirmation that the Form D is created successfully.

Stage 2: Creating Provisional Invoice

1. Enter the following details:
 - **Provisional Invoice Number**
 - **Provisional Invoice Date**
 - **Provisional Billing Period Number**
 - **Provisional Invoice Listing Currency**
 - **Provisional Listing to Billing Rate**
 - **Provisional Invoice Amount in Billing Currency** will be generated automatically.
2. Click **Save**. The details added will be displayed in the Provisional Invoice List section.
3. Click **Back**. The Edit Form D/E is displayed.

Stage 3: Creating Form E

1. Enter the following details:
 - **Gross Total of Universe**
 - **Gross Total of Form C**
 - **Universe Adjusted Gross Amount will be generated automatically**
 - **Form B Total Amounts**
 - **Gross**
 - **ISC**
 - **Other Commission**
 - **UATP**
 - **Handling Fee**
 - **Tax**
 - **VAT**
 - **Total Amount** will be generated automatically
2. The **Net Adjustment** will be generated automatically.
3. Click **Save**. The **Edit Form E** screen is displayed with the confirmation that Form E is created successfully.

1.3.15 Editing Form D/E Header

To Edit Sampling Form D/E Header, the steps are as follows:

1. Search the Form D/E.
2. Select the Form D/E from the list displayed in the **Search Results** section.
3. Click .
4. The **Edit Sampling Form D/E** screen is displayed.

The sections, fields and buttons displayed are as explained in the following table.

Sections	Description	Remarks
Header Details	Displays the details for the Form D/E Header.	<p>The details for the following fields are displayed:</p> <ul style="list-style-type: none"> • Billing Year/Month/Period • Provisional Billing Month • Billing Member's Location ID • Billed Member • Billed Member's Location ID • Settlement Method • Invoice Number • Invoice Date • Currency of Listing/Evaluation • Currency of Billing • Listing Evaluation/Billing Rate • Digital Signature
Summary List	Displays the details of Form D/E.	<p>The details for the following fields are displayed:</p> <ul style="list-style-type: none"> • No. of Billing Records • Total Gross Value • Total ISC Amt. • Total Other Commission • Total UATP Amt. • Total Handling Fee Amt. • Total Tax Amt. • Total VAT Amt. • Net Total
Form D List	Displays the details for the Form D Coupon.	<p>The details for the following fields are displayed:</p> <ul style="list-style-type: none"> • Prov.Inv.No.No. • Prov. Inv. Batch No. • Prov. Inv. Seq. No. • Tkt. Issuing Airline • Tkt. /Doc. No. • Coupon Number • E- Ticket Indicator • Gross Amount/ALF • Reason Code • Reason Description

Buttons	Description	Remarks
Save Form D/E Header	Click Save Form D/E Header to save the details edited for the header fields.	The fields listed cannot be edited: <ul style="list-style-type: none"> • Billed Member • Invoice Date • Provisional Billing Month • Settlement Method • Currency of Listing/Evaluation • Currency of Billing • Listing/Evaluation to Billing Rate
Add Form D Item	Click Add Form D Item to add a new coupon to Form D.	The Create Form D screen is displayed. You can add the details for the Form D.
Form E Details	Click Form E Details to add/edit the Form E details.	The Edit Form E screen is displayed. The details for Form E can be added.
Provisional Invoice (s)	Click Provisional Invoice (s) to add the details for the Provisional Invoice.	The Provisional Invoice Records screen is displayed. Add the details for the Provisional Invoice.
Invoice VAT	Click Invoice VAT to add VAT to the invoice.	The Form E VAT Capture screen is displayed. Add the VAT Details to the Form D/E.
Validate Invoice	Click Validate Invoice to validate the Invoice for linking details.	A message is displayed on the screen indicating successful validation. Any validation errors for the Form D/E are displayed in the Validation Errors section located at the end of the screen. Note: Validation Errors section is displayed only if the Form D/E fails the Validation checks.
Back to Manage Invoice	Click Back to Manage Invoice to go back to Invoice Search screen.	-

The procedure to Edit Form D/E Header is as follows:

- You can edit the following details:
 - **Billing Year/Month/Period.**
 - **Location ID of Billed Member** or **Location ID of Billing Member.**
 - **Invoice Number**
- Click **Save Form D/E Header**.

Fields	Description	Remarks
Rejection Memo Data Capture		
*Batch Number	It is the Batch Sequence Number of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Sequence Number	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.

Fields	Description	Remarks
*Source code	It is the Source Code of the transaction.	The default source code for Sampling Form F is 55. <ul style="list-style-type: none"> When RM is initiated from billing history or payables screens and the rejected transaction had a non-bilateral Source Code, this will be set automatically to the appropriate value. For example, when an RM stage 2 with Source Code 5 is rejected, it will be set as 6.
*Rejection Memo Number	It is the alpha-numeric Rejection Memo number.	-
*Reason Code	The Reason Code for rejection.	Should be a valid Reason Code as published by the industry <ul style="list-style-type: none"> The Reason Code will determine whether coupon breakdown is mandatory. Note when 1A is provided, details of one coupon should be provided and not more than one. The Reason Code will determine which kinds of amounts can contain differences. For Example, Tax differences should not be billed when Reason Code is 1B.
Our Reference	It is used to exchange data on a bilateral basis.	-
*Your Invoice Number	The number of the invoice that contained the transaction being rejected	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
Your Rejection Memo Number	Applicable for RM stages 2 and 3, and pertains to the RM being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
*Your Billing Year	The billing year, month and period of the invoice that contained the transaction being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
*Your Billing Month	The billing year, month and period of the invoice that contained the transaction being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.
*Your Billing Period	The billing year, month and period of the invoice that contained the transaction being rejected.	When RM is initiated from billing history or payables screens, this will be set automatically to the appropriate value and should not be changed.

Fields	Description	Remarks
Reason Remarks	It is the reason text for rejection.	-
Gross	It is the gross amount of the coupon for the Rejection Memo .	<p>Gross is divided into three categories:</p> <ul style="list-style-type: none"> • Billed: It is the value which is being rejected. • Accepted: It is the accepted value for the coupon. • Difference: It is generated automatically by the system based on the difference between the Billed and the Accepted value.
Tax	It is the Tax for the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click Tax Breakdown.</p>
ISC	It is the Interline Service Charge applicable on the coupon.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> □ Percentage □ Amount • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -9.000) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 55), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.

Fields	Description	Remarks
UATP	It is the UATP discount applicable on the coupon.	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -1.750) so that a negative value is derived. • It is possible to modify the derived amount. • When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 1, 2), validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount. • When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 55), no validation will be performed on the amount. • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
Handling Fee	It is the Handling Fee applicable for the coupon.	<p>Since this is a deductible, you need to ensure that a negative value is entered (For example, -5.00).</p> <p>Maximum number of decimal places allowed is two.</p>

Fields	Description	Remarks
Other Commission	It is the Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.	<p>Other Commission consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). • Since this is a deductible, you need to ensure that a negative percentage is entered (For example, -3.000) so that a negative value is derived. • It is possible to modify the derived amount. • No validations are performed on the amount • Maximum number of decimal places allowed for percentage is three. • Maximum number of decimal places allowed for amount is two.
VAT	It is the total VAT amount applicable on the coupon.	<p>This total amount cannot be entered directly. It will be derived from the breakdown data entered.</p> <p>To enter tax breakdown data, click VAT Breakdown.</p>
Total Net Rejected Amount	It is the total rejected amount.	<p>It is generated automatically.</p> <p>It is the total of Gross amount and Tax and VAT and ISC and UATP and Handling Fee and Other Commission.</p>
Sampling Constant	The value is equal to Gross Total of Sample divided by Sample Adjusted Gross Amount.	<p>It is generated automatically.</p> <ul style="list-style-type: none"> • It is constant with 3 decimal places. • Modification of sampling constant will result change in Total Net Rejected Amount.
Net Reject Amount after Sampling Constant	It is the total rejected amount.	<p>It is the Total Net Rejected Amount is multiplied by the Sampling Constant.</p> <ul style="list-style-type: none"> • This amount is then deducted from the Total Net Rejected Amount. • This is the Net Reject Amount after Sampling Constant. • Modification of sampling constant will result change in Total Net Rejected Amount.

Fields	Description	Remarks
*Attachment Indicator	It indicates whether any supporting documents (attachments) have been added to the transaction.	<p>This field is automatically set by the system</p> <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis.

Buttons	Description	Remarks
Save Rejection Memo	Click Save Rejection Memo to save the Rejection Memo details entered.	After data of the current coupon is successfully saved, the RM Listing screen is displayed where the details of the added coupon are displayed.
Back	Click Back to go to previous screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

Note: Billed: It is the value which is being rejected.

Accepted: It is the accepted value for the coupon.

Difference: It is generated automatically by the system based on the difference between the Billed and the Accepted value.

The procedure for creating a Sampling Form F is as follows:

1. Enter the following details:

- Batch Number
- Sequence Number
- The Source Code will be generated automatically by the system
- Rejection Memo Number
- Reason Code
- Our Reference
- Your Invoice Number
- Your Rejection Memo Number
- Your Billing Year
- Your Billing Month
- Your Billing Period
- Reason Remarks
- Enter the **Billed Gross, Accepted Gross**. The **Gross Difference** will be generated automatically.
- Enter the **Billed Tax, Accepted Tax**. The **Tax Difference** will be generated automatically.
- Enter the **Billed ISC, Accepted ISC**. The **ISC Difference** will be generated automatically.
- Enter the **Billed UATP, Accepted UATP**. The **UATP Difference** will be generated automatically.
- Enter the **Billed Handling Fee, Accepted Handling Fee**. The **Handling Fee Difference** will be generated automatically.
- Enter the **Billed Other Commission, Accepted Other Commission**. The **Other Commission Difference** will be generated automatically.

- Enter the **Billed VAT, Accepted VAT**. The **VAT Difference** will be generated automatically.
 - The **Net Rejected Amount** will be generated automatically.
2. Click **Attachment** to insert attachments for the coupon.
 3. Click **Save Rejection Memo**.
 4. The **Edit Rejection Memo** screen is displayed with the confirmation that the Form XF is created successfully.
You can also add a coupon for the Rejection Memo.

1.3.23 Editing Form XF

To edit the Form XF, the steps are as follows:

1. **Search the Form XF.**
 2. Select the Form F to be edited from the list displayed in the **Search Results** section.
 3. Click  to edit the Form XF.
 4. The **Edit Form XF** screen is displayed.
 5. Select the Form XF coupon to be edited from the list displayed in the **Form XF Rejection Memo List** section.
 6. Click  to edit the coupon.
 7. The **Edit Rejection Memo** screen is displayed.
- For more information please refer topic: **Editing the Rejection Memo.**

1.3.24 Editing Form XF Coupon

To edit a Form XF coupon, the steps are as follows:

1. **Edit the Rejection Memo.**
2. Select the coupon from the list displayed in the **Rejection Memo Coupon List** section on the **Edit Rejection Memo** screen.
3. Click  to edit the coupon.
4. The **Edit Rejection Memo Coupon** screen is displayed.

For more information please refer topic: **Editing the Rejection Memo**.

1.3.25 Searching Sampling Form C

Sampling Form C can be searched using

- [Receivables submenu](#)
- [Payables submenu](#)

1.3.25.1 Searching Form C using Receivables submenu

To search a **Sampling Form C**, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** submenu.
3. Click **Manage Sampling Form C** option.
4. The **Sampling Form C Search** screen will be displayed.

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
*Provisional Billing Month	It indicates the Month for which Form C is generated.	Default format is YYYY- <ul style="list-style-type: none"> • For example, 2011-APR • Provisional Billing Month can be different from the Billing Year/Month/Period.
Provisional Billing Member	It is the combination of designator, accounting code and commercial name of the billed member.	Unique alphanumeric code that identifies the member's location in the Member Profile. <ul style="list-style-type: none"> • It is the ID of the member who generates the invoice to be sent. • For example, • WI-023-Wings Airways

Fields	Description	Remarks
Status	It indicates the Status of the selected invoice.	Default value should be one of the following <ul style="list-style-type: none"> • Open • Ready for Submission • Submission • Processing Complete • Presented

Buttons	Description	Remarks
	Click Edit to edit the selected invoice.	It is used to add details to the invoice header.
	Click Validate to check the selected invoice for validations.	It is used for checking the invoice for validation checks. For example, checking File Naming Conventions, Duplicate Invoices, Missing data in the Invoice and so on.
	Click Delete to delete the selected Invoice.	It is used for deleting expired, overdue or incorrect invoices.
Submit Selected Form C	Click Submit Selected Form C to submit the selected invoices to the clearing houses for the settlement.	Invoices can be submitted only after the validation checks are cleared.

The procedure to Search a Sampling Form C is as follows:

- Enter the following details:
 - **Provisional Billing Month.**
 - **Provisional Billing Member.**
 - Select the **Status** of the invoice.
- Click **Search** to search an **Invoice**.
- The result is displayed in the **Search Result** window.
All the fields marked (*) are mandatory for searching an invoice.

- Creating a Credit Note

Creating a Credit Note

1.4.2 Creating Credit Note Header

To create a **Non-Sampling Credit Note**, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** submenu.
3. Click **Create Non-Sampling Credit Note** option.
4. The **Create Non-Sampling Credit Note** screen will be displayed.

Fields	Description	Remarks
*Billed Member	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways
*Credit Note Number	Unique alphanumeric ID that identifies the Credit Note.	<p>The Credit Note Number could be up to ten characters (English letters and numbers only)</p> <p>For example, WI1234</p> <ul style="list-style-type: none"> • Spaces and special characters (#, *, @, ~, - etc.) should not be used. • Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when performing duplicate checks. • Should not be duplicated by the billing airline within a calendar year.

Fields	Description	Remarks
*Credit Note Date	It is the date of the credit note	Shows the date on which Credit Note Header is created. <ul style="list-style-type: none"> Automatically updated to the date on which invoice is successfully submitted. Cannot be edited or modified by the users.
*Billing Year/Month/Period	The Clearance Period of the invoice (Year, Month and Period)	For example, Period 3 of April-2013 is represented as 2013-Apr-3: The periods displayed are as follows: <ul style="list-style-type: none"> The current open period (default value) The next 4 (future) periods; which may pertain to the next month also The previous closed period (if the late submission window is open in either of the clearing houses). Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate ; but does not find it for the future month, it will result in an error while saving the data.
Billing Member's Location ID	Unique alphanumeric code that identifies member's location as per the member profile	It generates the legal reference data for the member. Default location is the Main location. <ul style="list-style-type: none"> Default location can be changed by selecting the desired location from the list. If reference data is required to be captured without using a location code, the blank value at the top of the list should be selected and reference data needs to be entered in the reference data dialog. The reference data dialog can be opened by clicking Billing Member's Location ID above this field. The header can be saved without reference data; by selecting the blank value at the top of the list. However it should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.

Fields	Description	Remarks
Billed Member's Location ID	Unique alphanumeric code that identifies member's location as per the member profile.	<p>The legal reference data is populated based on this.</p> <ul style="list-style-type: none"> • Default location selected is MAIN. • Default location can be changed by selecting the desired location from the list. • If reference data is required to be captured without using a location code, the blank value at the top of the list should be selected and reference data needs to be entered in the reference data dialog. • The reference data dialog can be opened by clicking Billed Member's Location ID above this field. • The header can be saved without reference data; by selecting the blank value at the top of the list. However it should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.

Fields	Description	Remarks
*Settlement Method	It is the Settlement Method of the Credit Note.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> ▪ A: Settlement via ACH ▪ Applicable when both billing and billed members are ACH members ▪ If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Passenger billings via the ICH; then A cannot be used. ▪ M: Settlement via ACH using RAM rule ▪ Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) ▪ Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rules ▪ I: Settlement via ICH ▪ Applicable when both billing and billed members are ICH members ▪ Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member). ▪ B: Bilateral Settlement (direct settlement between members not involving any clearing house) <ul style="list-style-type: none"> • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as A/I/M as appropriate. ▪ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement ▪ A/I/M/X can be changed to B if required. ▪ A can be changed to M if required. <p>When settlement is not possible via a clearing house, the default value will be set as B. It should not be changed to any other value.</p>
		<p>Note:</p> <p>In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method billing or billed member</p>

Fields	Description	Remarks
*Currency of Listing/Evaluation	The currency in which the transactions are listed.	-
*Currency of Billing	The currency of billing of the invoice.	<ul style="list-style-type: none"> When Settlement Method is "I" <ul style="list-style-type: none"> If both Billing/Billed airlines are in Zone A; value should be GBP. If both the Billing & Billed Airlines are in Zone D; value should be EUR. If both Billing/Billed airlines in Zone B, value should be USD. If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. When Settlement Method is ACH using RAM Rule (ACH Inter-clearance Billings); value should be USD. When Settlement Method is "M" (ACH member billing ACH member based on RAM rule); value should be as per currencies allowed by ACH.. When Settlement Method is "A"; value should be as per currencies allowed by ACH.. When Settlement Method is "B"; it can be any currency. When Settlement "X"; it can be any currency. <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Settlement Method will be considered as that of the final parent member of billing or billed member.</p>
Listing/Evaluation to Billing Rate	It is the Exchange Rate applicable for the Currency of Listing with reference to the Currency of Billing (dividing rate).	<p>For example: If Currency of Listing/Evaluation is THB and Currency of Billing is USD; the Listing Evaluation to Billing Rate would be 30.208039</p> <ul style="list-style-type: none"> When Settlement Method is I/M/A, this field will be populated with the Five Day Rate by the system and cannot be edited or modified. When Settlement Method is B, the value should be entered by the user. It should not be zero or a negative value. This field is mandatory for Settlement Method via ICH using Special Agreement; the value should be entered by the user. It should not be zero or negative value.

Fields	Description	Remarks
Digital Signature	A flag indicating whether digital signature is required or not.	Valid value are as follows: <ul style="list-style-type: none"> • N: No • Y: Yes • D: Default (as per profile settings) If digital signature requirements indicate a 'No' as per profile settings, it should not be changed to "Y".
Invoice Template Language	It indicates Invoice Template Language	-
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-

The procedure to create a Non-Sampling Credit Note is as follows:

1. Enter all the following details:

- **Billed Member**
- **Credit Note Number**
- **Credit Note Date**
- **Billing Year/Month/Period**
- **Billing Member's Location ID**
- **Billed Member's Location ID**
- **Settlement Method**
- **Currency of Listing/Evaluation**
- **Currency of Billing**
- **Listing/Evaluation to Billing Rate**
- **Digital Signature**
- **Invoice Template Language**
- **CH Agreement Indicator**
- **CH Due Date**

2. Click **Save** Credit Note.

3. The **Edit Non-Sampling Credit Note** screen is displayed with the confirmation that the Credit Note Header is created successfully.

It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Source Code	The Source Code of the transaction.	Should be a valid Source Code as published by the industry.
*Credit Memo Number	It is the alpha-numeric Credit Memo number.	Should be unique number within each billed airline in the billing period.
Reason Code	To exchange data on a bilateral basis	-
Our Reference	To exchange data on bilateral basis.	-
Your Invoice Number	Unique alphanumeric ID that identifies the member in the Member Profile	Invoice Number for which credit memo is generated.

Fields	Description	Remarks
Your Billing Year	It is the Year for which invoice is generated.	It should be generated automatically if Invoice number is provided.
Your Billing Month	It is the Month for which invoice is generated	It should be generated automatically if Invoice number is provided.
Your Billing Period	It is the Period for which invoice is generated	It should be generated automatically if Invoice number is provided.
Correspondence Ref Number	.Unique number which identifies if credit memo is related to correspondence	It links the credit memo based on Authority to Bill or expiry of correspondence case. <ul style="list-style-type: none"> • Should match the audit trail information maintained in SIS. • Should be auto populated if reason code is 6A or 6B.
FIM Number	It is the number of the FIM.	It should be valid number as per IATA specifications.
FIM Coupon Number	The coupon number of the FIM.	9 can be selected for billing of FIMs without a coupon number.
Attachment Indicator	It indicates if the Credit Memo has supporting documents attached.	Valid values are <ul style="list-style-type: none"> • Y: Supporting attachments to be provided. • N: No supporting attachments to be provided. • P: Pending (in case of future dated submissions when the supporting attachments details are not known).
Air Line Own Use	To exchange data on a bilateral basis	-
Remarks	Displays brief description provided by the billing member for the Credit Memo.	Reason for creating Credit Memo.
Total Gross Amount	Total gross amount of the coupons for the Credit Memo .	Equal to the sum of Gross amount credited in coupon break down record. <ul style="list-style-type: none"> • Generated automatically if total gross amount credited has a non zero value. • In case of credit memo amount will be reported with a negative sign. For example, a credit of gross amount 100 will be represented with a minus sign.

Fields	Description	Remarks
Total ISC Amount	<p>The Interline Service Charge applicable on the coupon.</p> <p>This consists of 2 fields:</p> <ul style="list-style-type: none"> Percentage Amount 	<p>Equal to the sum of ISC amount credited in coupon break down record.</p> <ul style="list-style-type: none"> Generated automatically if total ISC/commission/UATP amount credited has a non zero value. In case of credit memo amount will be reported with a positive sign. For example, a debit of ISC amount 100 will be represented with a plus sign.
Total Commission Amount	<p>The Other Commission (Super-Commission or Code Share Commission) applicable on the coupon</p> <p>This consists of 2 fields:</p> <ul style="list-style-type: none"> Percentage Amount 	<p>Equal to the sum of commission amount credited in coupon break down record.</p> <ul style="list-style-type: none"> Generated automatically if total commission amount credited has a non zero value. In case of credit memo amount will be reported with a positive sign. For example, a debit of ISC amount 100 will be represented with a plus sign.
Total UATP Amount	Total UATP discount applicable on the coupon	<p>Equal to the sum of UATP amount credited in coupon break down record.</p> <ul style="list-style-type: none"> Generated automatically if total ISC/commission/UATP amount credited has a non zero value. In case of credit memo amount will be reported with a positive sign. For example, a debit of ISC amount 100 will be represented with a plus sign.
Total Handling Fee Amount	It is the total Handling amount of the coupons for the Credit Memo .	<p>It is equal to the sum of handling fee amount credited in coupon breakdown.</p> <ul style="list-style-type: none"> Generated automatically if total handling fee credited has a non zero value. In case of Credit Memos the amount is reported as a positive amount. For example, a debit of handling fee amount 100 will be represented with a plus sign.

Fields	Description	Remarks
Total VAT Amount	It is the total VAT amount of the coupons for the Credit Memo	<p>It is generated automatically if total gross amount credited has a non zero value.</p> <ul style="list-style-type: none"> • If no coupon breakdown exists and if populated with a non-zero value, then credit memo VAT breakdown record needs to be present. • If coupon breakdown record exist then should be equal to the sum of all VAT amount credited in coupon break down record. • In case of Credit Memo the credit of VAT amount will be reported with a negative sign. For example, a credit of VAT amount 100 will be represented with a minus sign.
Net Credited Amount	It is the total amount to be credited.	<p>It should be equal to the sum of net amount credited in coupon breakdown record.</p> <ul style="list-style-type: none"> • Generated automatically if total gross amount credited has a non zero value. • Credit memo amount will be reported with a minus sign. For example, a credit of gross amount 100 will be represented with a minus sign.

The procedure to create a Non-Sampling Credit Note is as follows:

1. Enter the following details:

- **Batch Number**
- **Sequence Number**
- **Source Code**
- **Credit Memo Number**
- **Reason Code**
- **Our Reference**
- **Your Invoice Number**
- **Your Billing Year**
- **Your Billing Month**
- **Your Billing Period**
- **Correspondence Reference Number**
- **FIM Number**
- **FIM Coupon Number**
- Click **Attachment** to attach supporting documents
- **Airline Own Use**
- **Remarks**
- **Total Gross Amount**
- **Total ISC Amount**
- **Total Commission Amount**
- **Total UATP Amount**
- **Total Handling fee Amount**
- **Total VAT Amount**
- **Net Credited Amount** is generated automatically.

2. Click **Save**.

3. The **Edit Credit Memo** screen is displayed with the confirmation that the Credit Memo is created successfully.

[Save and Add New](#) [Save and Duplicate](#) [Save and Back to Overview](#) [Back](#)

Fields	Description	Remarks
*Issuing Airline	Accounting code of the issuing airline of the coupon billed.	Should be a valid accounting code. For example, 221 for WI (Wings Airways).
*Coupon Number	The coupon number of the document.	9 can be selected for billing of FIMs without a coupon number.
*Ticket/Document Number	The document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	-
*Check Digit	The check digit of the coupon.	Valid values are 0/1/2/3/4/5/6/9.
E-Ticket Indicator	Electronic ticket indicator.	The check box is selected by default indicating that the billed coupon belongs to an E-Ticket. If the check box is not selected, it indicates paper tickets/documents.

Fields	Description	Remarks
ESAC	The electronic settlement authorization code.	Applicable for E-Tickets only. <ul style="list-style-type: none"> Not mandatory for E-Tickets. This field will be enabled only when field 'E-Ticket Indicator' is checked.
Coupon Gross Value	The fare value of the coupon.	Should be a negative value. Maximum number of decimal places allowed is 2.
ISC	The Interline Service Charge applicable on the coupon. This consists of 2 fields: <ul style="list-style-type: none"> Percentage Amount 	The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value). <ul style="list-style-type: none"> Since this is a credit memo coupon, you need to ensure that a positive percentage is entered (For example, 9.000) so that a positive value is derived. It is possible to modify the derived amount. When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 90). Validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90). No validation will be performed on the amount Maximum number of decimal places allowed for percentage is 3. Maximum number of decimal places allowed for amount is 2.
Tax Amount	The total interlineable TFCs (taxes, fees and charges) applicable on the coupon.	This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter tax breakdown data, click Tax Breakdown .
Handling Fee Amount	The Handling Fee Amount applicable on the coupon.	Since this is a credit memo coupon, users need to ensure that a positive value is entered (For example, 5.00). Maximum number of decimal places allowed is 2.

Fields	Description	Remarks
Other Commission	<p>The Other Commission (Super-Commission or Code Share Commission) applicable on the coupon.</p> <p>This consists of 2 fields:</p> <ul style="list-style-type: none"> Percentage Amount 	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> Since this is a credit memo coupon, users need to ensure that a positive percentage is entered (For example, 3.000) so that a positive value is derived. It is possible to modify the derived amount. No validations are performed on the amount Maximum number of decimal places allowed for percentage is 3. Maximum number of decimal places allowed for amount is 2.
UATP	<p>The UATP discount applicable on the coupon.</p>	<p>The amount is always derived by applying the percentage entered upon the fare (Coupon Gross Value).</p> <ul style="list-style-type: none"> Since this is a credit memo coupon, you need to ensure that a positive percentage is entered (For example, 1.750) so that a positive value is derived. It is possible to modify the derived amount. When the Source Code does not indicate Frequent Flyer Award/Redemption billings (For example, Source Code 90). Validation will be performed on this amount (when modified) and the variance should be within tolerance as compared to the expected amount When the Source Code indicates Frequent Flyer Award/Redemption billings (For example, Source Code 90). No validation will be performed on the amount Maximum number of decimal places allowed for percentage is 3. Maximum number of decimal places allowed for amount is 2.

Fields	Description	Remarks
VAT Amount	The total VAT amount applicable on the coupon.	This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter VAT breakdown data, click VAT Breakdown .
Net Credited Value	The total amount of the coupon.	This is calculated by the system and is not editable. It is the sum of the following fields considering their positive or negative values: <ul style="list-style-type: none"> • Coupon Gross Value (Fare) • ISC Amount • Tax Amount • Handling Fee Amount • Other Commission Amount • UATP Amount • VAT Amount
Surcharge Amt. (included within fare)	The surcharge amount included in the Coupon Gross Value (Fare).	The value entered here is for information purposes only. It is not validated and has no impact on the calculation of the Coupon Total Amount. Maximum number of decimal places allowed is 2.
*Currency Adjustment Indicator	The base currency used while evaluating the value of the coupon.	Should be a valid ISO Alpha Currency Code
Airline Flight Designator	The designator of the operating carrier's flight; except for Block Space flights where this will be of the marketing carrier's flight.	Mandatory for Source Codes 1 and 14 <ul style="list-style-type: none"> • By default, the designator of the billing airline is populated; and it can be modified • Should be a valid designator • For example, SI (for SIS Airways)
Flight Number	The number of the operating carrier's flight; except for Block Space flights where this will be of the marketing carrier's flight.	Mandatory for Source Codes 1 and 14
Flight Date	The departure date of the flight.	Mandatory for Source Codes 1 and 14
From Airport	The origin city/airport of the coupon.	Mandatory for Source Codes 1 and 14 Should be a valid IATA city or airport code.
To Airport	The destination city/airport of the coupon.	Mandatory for Source Codes 1 and 14 Should be a valid IATA city or airport code.
Cabin Class	The cabin class in which the uplifted coupon was serviced.	-

Fields	Description	Remarks
Filing Reference	Filing Reference for bilateral data exchange.	-
Agreement Indicator	The Agreement Indicator.	<p>This is an optional field Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows:</p> <ul style="list-style-type: none"> • I - First & Final Attachment I transactions • J - First & Final Attachment J transactions • K - NFP Non Final transactions • W - Switched Own Prorate transactions requiring AIA Value Confirmation • V - Switched Own Prorate transactions not requiring AIA Value Confirmation • T - Stored Own Prorate transactions <p>No validations are performed on bilateral 2 character values.</p>
Original PMI	The Original Pricing Method Indicator	<p>This field should be blank if 'Agreement Indicator' is blank. Exception:</p> <ul style="list-style-type: none"> • Value "N" may be provided even if 'Agreement Indicator' is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group). • Should be "N" if 'Agreement Indicator' is "I", "J" or "K". • Should be "O" if 'Agreement Indicator' is "W", "V" or "T".
Prorate Methodology	Methodology used to evaluate the prorate value. Would also be used by non NFP users. Content could be e.g. SF3 (SPA, Fixed Rate, Territory 3 travel), and so on.	No fixed codes; definition up to the carriers on a bilateral / alliance basis.
Reason Code	To exchange data on a bilateral basis	-
Airline Own Use	To exchange data on a bilateral basis	-

Fields	Description	Remarks
Reference Field 1	Reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). Should contain a valid RFIC.
Reference Field 2	Reusable field for different types of billing scenarios.	Mandatory in case of EMD billings (Source Code 23). <ul style="list-style-type: none"> Should contain a valid RFISC The RFISC should be related to the RFIC provided in 'Reference Field 1'.
Reference Field 3	Reusable field for different types of billing scenarios.	-
Reference Field 4	Reusable field for different types of billing scenarios.	-
Reference Field 5	Reusable field for different types of billing scenarios.	-
Attachment Indicator	Indicates whether any supporting documents (attachments) have been added to the transaction.	This field is automatically set by the system. <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.

Button	Description	Remarks
Save and Add New	Click Save and Add New to save the coupon data and add data for a new coupon.	After data of the current coupon is successfully saved, the same screen with blank fields is offered to the user for capturing the next coupon.

Button	Description	Remarks
Save and Duplicate	Click Save and Duplicate to save the coupon data and capture another coupon with identical data.	<p>After data of the current coupon is successfully saved, the same screen with is offered to the user for capturing the next identical coupon, using data from the saved coupon.</p> <ul style="list-style-type: none"> The following are not copied from the coupon successfully saved: <ul style="list-style-type: none"> <input type="checkbox"/> Coupon Number <input type="checkbox"/> Ticket/FIM Number <input type="checkbox"/> ESAC <input type="checkbox"/> Attachments Changes are made to the following fields: <ul style="list-style-type: none"> <input type="checkbox"/> Ticket/FIM Number (the last 3 digits are removed) <input type="checkbox"/> Check Digit (value is changed to 9) <input type="checkbox"/> Sequence Number is incremented by 1. Tax and VAT breakdown data are also copied.
Save and Back to Overview	Click Save and Back to Overview to save the coupon data and go to the Edit Credit Memo screen.	After data of the current coupon is successfully saved, the Edit Credit Memo screen is displayed.
Back	Click Back to go to the Edit Credit Memo screen.	If there are any unsaved changes/additions on the screen, a warning will be provided to the user.

Initiating Correspondence

Managing Correspondence

1.5.2 Billing History

Using the **Billing History** screen you can,

- [Search an Invoice](#)
- [Search a Correspondence](#)

1.5.2.1 Search an Invoice

To search an invoice, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Billing History and Correspondence** submenu.
3. The **Billing History** screen is displayed.

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
*Billing Type	It indicates the type of billing.	Valid values are as follows: <ul style="list-style-type: none"> • Payables are billing received from other interline partners for a billing period. (This is the default option selected) • Receivables are invoices billed to other interline partners.
Billing Year/month	It is the clearance Year/Month for the invoice.	For example, 2011-Apr. By default the option will be 'Please Select'
Billing Period	The Clearance Period of the invoice (Year, Month and Period).	For example, Period 3 of April-2013 is represented as 2013-Apr-3 The periods displayed are as follows: <ul style="list-style-type: none"> • All (This is the default option selected) • The current open period (default value) • The next 4 (future) periods which may pertain to the next month also • The previous closed period (if the late submission window is open in either of the clearing houses).
Billing Code	It indicates the type of invoice for which the correspondence is generated.	Valid values are as follows <ul style="list-style-type: none"> • All (This is the default option selected) • Non Sample Invoice • Sample Form A/B Invoice • Sample Form C Invoice • Sample Form D/E Invoice • Sample Form F Invoice • Sample Form XF
Member Code	Unique alphanumeric ID that identifies the member in the Member Profile.	For example, WI-221-Wings Airways
Invoice Number	Unique alphanumeric ID that identifies the member in the member profile.	Invoice Number is case insensitive. For example, Credit Note Number ABC12345 and abc12345 are considered to be the same. <ul style="list-style-type: none"> • Should not be duplicated by the billing airline within a calendar year • The Credit Note Number can be maximum ten characters. • Note that hyphen, space, and special characters (#, *, @, ~) are not allowed.
Transaction Type	It indicates the type of invoice for which correspondence is generated.	Types of transactions are <ul style="list-style-type: none"> • All • Prime Billing • Rejection Memo • Billing Memo

Fields	Description	Remarks
		<ul style="list-style-type: none"> Credit Memo
Memo Number	Unique alphanumeric ID that identifies the member in the Member Profile.	It is the Member ID to whom the Invoice is to be sent. For example, WI-023-Wings Airways
Rejection Stage	The stage of the rejection memo (1, 2 or 3)	Valid value is three as correspondence can be initiated only after rejection stage three.
Source Code	It identifies individual transaction	
Reason Code	It indicates the reason for initiating a correspondence.	It is two-digit character code assigned to each credit memo/rejection memo/billing memo.
Issuing Airline	It is the accounting code of the issuing airline that bills the coupon.	Should be a valid accounting code. For example, 221 for WI (Wings Airways)
Document Number	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	-
Coupon Number	It is the coupon number of the document.	9 can be selected for billing of FIMs without a coupon number.

1. Enter the following details in the **Invoice Search Criteria** section

- **Billing Type**
- **Billing Year/Month**
- **Billing Period**
- **Billing Code**
- **Invoice Number**
- **Transaction Type**
- **Memo Number**
- **Rejection Stage**
- **Source Code**
- **Reason Code**
- **Issuing Airline**
- **Document Number**
- **Coupon Number**

2. Click **Search**.

3. List of invoices will be displayed in the **Search Result** section.

Note:

1. The user can perform search based on groups of fields:

- Group 1 (Used for basic search)
 - The following fields will be mandatory:
 - Billing Type (value should be Payables or Receivables)
 - Billing Year/Month (value should not equal Please Select)

- Billing Code (value should not equal 'All')
 - Member Code (non-blank/valid value)
 - Group 2 (Used for searching records based on just a memo number)
 - The following fields will be mandatory:
 - Billing Type (value should be Payables or Receivables)
 - Transaction Type selected as Rejection Memo, Billing Memo or Credit Memo
 - Memo Number (non-blank value)
 - Group 3 (Used for searching records based on just ticket number)
 - The following fields will be mandatory:
 - Billing Type (value should be Payables or Receivables)
 - Transaction Type selected as Prime Coupon
 - Issuing Airline (non-blank/valid numeric value)
 - Document Number (non-blank numeric value)
2. Additional search criteria may be provided in apart from the fields mentioned above

[Top](#)

1.5.2.2 Search a Correspondence

To search a correspondence, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Billing History and Correspondence** submenu.
3. The **Billing History** screen is displayed.

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
*From Date	It is the date of start of correspondence.	The date can be added manually or by choosing a date from the calendar.
*To Date	It is the date of current correspondence.	The date can be added manually or by choosing a date from the calendar
Member Code	Unique alphanumeric ID that identifies the member in the Member Profile.	For example, WI-221-Wings Airways
Correspondence Owner	Name of the person who is initiating the correspondence.	Archived user will not be shown in the dropdown.
Correspondence Initiating Member	It is the member who initiates the correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Self • Other carrier • Either Entity receiving the last rejection invoice is always the initiating entity.
Correspondence Ref No	When a Correspondence is initiated for the first time, SIS generates a unique Correspondence Reference Number. Any subsequent correspondence will continue with the same Correspondence Reference number.	Links the rejection memo/billing memo/ credit memo based on "Authority to Bill" or expiry of correspondence case. Should match the audit trail information maintained in SIS.
*Correspondence Status	It indicates the status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open status indicates that the correspondence is in process. • Closed status indicates that the correspondence is over and final bill has been generated. • Expired indicates when the entity does not respond to the correspondence by the time limit. SIS will not allow any further correspondence reply on correspondences which are marked as expired.

Fields	Description	Remarks
Correspondence Sub Status	It indicates the sub status of the correspondence.	<p>Valid values are:</p> <ul style="list-style-type: none"> • All • Received • Saved • Responded • Ready For Submit • Pending • Billed • Due to Expiry • Pending • Accepted By Correspondence Initiator <p>Note: The values of Correspondence Sub Status will be shown based on selected Correspondence Status</p>
Authority to Bill	It indicates Authority to bill status for correspondence	<p>Valid values are:</p> <ul style="list-style-type: none"> • All • Received for a Higher Amount • Received for Full Amount • Received for a Partial Amount • Received for any Amount • Not Available
Number of Days To Expiry	It indicates the time limit for action.	Each correspondence has a time limit for action to be taken on it. The time limit is governed by the rules of the respective clearing house.
Source Code	The Source Code of the 3 rd stage RM(s) that are linked to the correspondence	

1. Enter the following details in the **Correspondence Search Criteria** section:

- **From Date**
- **To Date**
- **Member Code**
- **Correspondence owner**
- **Correspondence Initiating Member**
- **Correspondence Ref No**
- **Correspondence Status**
- **Correspondence sub status**
- **Authority to Bill**
- **Number of Days to Expiry**
- **Source Code**

2. Click **Search**.

3. The list of Correspondence will be displayed in the **Search Results** section.

[Top](#)

1.5.3 Initiating Correspondence

To initiate correspondence, the steps are as follows:

1. Search the correspondence using the Billing History screen.
2. Select a correspondence (from the **Search Results** section) with the rejection stage displaying three.
3. Click **Show/Create Correspondence** icon in the **Actions** section of **Search Results**.

4. The **View Correspondence** screen is displayed.

The screenshot shows the 'View Correspondence' screen in the SIS (Simplified Invoicing and Settlement) system. The header includes the IATA logo and navigation tabs: Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The user is logged in as Paul Harris. The main content area is titled 'View Correspondence' and shows details for a correspondence between AA-001 and IB-075. The correspondence date is 20-Mar-17, and the reference number is 00010011687. The stage is 2. The subject is 'DISPUTED BILLING'. The correspondence text is visible in a scrollable area, starting with 'Dear Interline Partner, Please find attached for our calculations. * ISC applicable for sector is 7.5% Also SPA applies, see attached SPA copy'. At the bottom, there are buttons for Reply, Download PDF, Attachments, Close Correspondence, and Back.

5. Click **Reply**.

The screenshot shows the 'Create Correspondence' screen in the SIS system. The header is similar to the previous screen, but the user is logged in as Paul Harris. The main content area is titled 'Create Correspondence' and shows details for a new correspondence between AA-001 and IB-075. The correspondence date is 20-Mar-17, and the reference number is 00010011687. The stage is 3. The subject is 'DISPUTED BILLING'. The correspondence text is visible in a scrollable area, starting with 'Dear Interline Partner, Please find attached for our calculations. * ISC applicable for sector is 7.5% Also SPA applies, see attached SPA copy'. At the bottom, there are buttons for Save, Send, Ready to Submit, Attachments, and Back.

The fields and buttons are as described in the following table.

Fields	Description	Remarks
From Member	Entity initiating correspondence.	Entity receiving the last rejection invoice.
To Member	Entity raising the last rejection invoice.	-
Correspondence Date	Current date on which correspondence is initiated.	-
Correspondence Reference Number	Unique number generated by SIS.	When correspondence is initiated for the first time SIS generates unique number. Any subsequent correspondence will continue with the same correspondence reference number.
Correspondence Stage	It indicates number of stages for correspondence.	-
Source Code	The Source Code of the 3 rd stage RM(s) that are linked to the correspondence	
*To E-mail	E-mail ID's of the member as per member profile.	-
Additional E-mail ID(s) pertaining to Initiator	Additional E-mail ID's pertaining to Initiator can be entered.	This can be modified only by the initiator. The information entered here will be inherited when a reply is sent by the Non-Initiator.
Additional E-mail ID(s) pertaining to Non-Initiator	Additional E-mail ID's pertaining to Non-Initiator can be entered.	This can be modified only by the Non-initiator.
Our Reference	To exchange data on bilateral basis.	
Your Reference	-	It is generated automatically. It is valid for subsequent stages of Correspondence.
Amount to be settled	Amount not accepted by the billed member.	-
Authority to Bill	Permission granted by entity to issue an invoice.	Authority to Bill is issued when the entity grants its approval to the other party to Invoice. When such approval is granted the entity specifies the amount for which the approval is provided. The entity receiving the authority can either raise an Invoice for the amount approved or continue with the Correspondence if it doesn't agree with the approval amount.
Correspondence Owner	Name of the person who is initiating the correspondence.	-

Fields	Description	Remarks
Correspondence Status	It indicates status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open status indicates the correspondence is in process. • Close status indicates that the correspondence is over and final bill has been generated. • Expired indicates when the entity does not respond to the correspondence by the time limit. SIS will not allow any further correspondence reply on correspondences which are remarked as expired.
*Subject	It is the subject for the e-mail.	-
*Correspondence Text	Additional details about the correspondence.	Free text to provide additional details about the Correspondence The following formatting options are available <ul style="list-style-type: none"> ○ Bold ○ Italics ○ Underline ○ Strikethrough ○ Subscript ○ Superscript ○ Font Type ○ Font Size ○ Font Color ○ Align ○ Ordered List ○ Unordered List ○ Decrease Indent ○ Increase Indent ○ Quote ○ Insert Horizontal Line ○ Undo ○ Redo ○ Insert Image

Buttons	Description	Remarks
Save	Click Save to save the correspondence and send it on a later date.	Edit correspondence page is displayed with the confirmation that correspondence is created successfully.
Send	Click Send to send the correspondence.	-
Ready to Submit	Click Ready to Submit for the authorized member to submit.	-
Attachment	Click Attachment to attach supporting documents to the correspondence.	-

Buttons	Description	Remarks
Back	Click Back to go back to Billing History screen.	-
Reply	Click Reply to respond to the initiated correspondence.	The Create Correspondence screen is displayed for replying the initiated correspondence.
Close Correspondence	Click on Close Correspondence to close the existing correspondence	Only the Member who initiated a correspondence can close a case Note: Only those correspondences will be closed that are Saved.
Download PDF	Click Download PDF to print the document with correspondence details.	

To Initiate Correspondence, the steps are as follows:

1. Enter the following details in the **Create Correspondence** screen:

- **From Member**
- **To Member**
- **Correspondence Date**
- **Correspondence Reference Number**
- **Correspondence Stage**
- **Source Code**
- **To E-mail**
- Additional E-mail ID(s) pertaining to Initiator
- Additional E-mail ID(s) pertaining to Non-Initiator
- **Our Reference**
- **Your Reference**
- **Amount to be settled**
- **Authority to Bill**
- **Correspondence Owner**
- **Correspondence Status**
- **Subject**
- **Correspondence Text**

2. Click **Save**.

You can later submit the correspondence to the **Billed Member**.

1.5.4 Close a Correspondence

In some cases, the initiator of the correspondence agrees to not pursue a correspondence case anymore. Hence, the initiating member of a correspondence can close the case under certain circumstances. When this happens, the correspondence will be set with status as 'Closed' and with a new sub-status 'Accepted by Correspondence Initiator'.

To close correspondence, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Billing History and Correspondence** submenu.
3. The **Billing History** screen is displayed.
4. Select a correspondence (from the **Search Results** section)

1.7 Working with Supporting Documents

You can:

- Manage the Supporting Documents using Payables and Receivables submenu.
- Correct the Linking Errors for Supporting Documents

1.7.1 Managing the Supporting Document

[Using Receivables submenu](#)

[Using Payables submenu](#)

1.7.1.1 Managing the Supporting Documents Using Receivables submenu

To manage supporting documents, the steps are as follows:

1. Click **Passenger** Menu.
2. Click **Receivables** submenu.
3. Click **Manage Supporting Documents** option.
4. The **Manage Supporting Documents** screen is displayed.

Actions	Type	Billing Period	Billed Member	Invoice No.	Source Code	Batch No	Sequence No	RM/BM/CM No	Tkt./Doc. No	Coupon No	Attachment Indicator Original	No. of Attachments
	Invoice/Credit Note	FEB 2012 P3	W-221	sispr1	1	1657	1657		1122	1	No	0
	Invoice/Credit Note	FEB 2012 P3	W-221	sispr1	4	16578	16578	1121			Yes	1
	Invoice/Credit Note	FEB 2012 P3	W-221	sispr1	74	16575	16575	1123			No	0

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
*Billing Year/Month	The Clearance Month of the invoice (Year, Month).	Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate ; but does not find it for the future month, it will result in an error while saving the data.

Fields	Description	Remarks
*Billing Period	The Clearance Period of the invoice (Year, Month and Period).	For Example, Period 3 of April-2013 is represented as 2013-Apr-3 <ul style="list-style-type: none"> The periods displayed are as follows: The current open period (default value). The next 4 (future) periods; this may pertain to the next month also. The previous closed period (if the late submission window is open in either of the clearing houses).
*Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID to whom the invoice is to be sent. For example, WI-023-Wings Airways
Type	It indicates the type of the invoice.	Valid values are: <ul style="list-style-type: none"> Invoice/Credit Note Form C
Invoice Number	Unique alphanumeric code that identifies the invoice.	The Invoice Number could be ten characters. For example, WI1234 Note: hyphen, space, and special characters (#, *, @, ~) are not allowed.
Source Code	It is the Source Code of the transaction.	Should be a valid Source Code as published by the industry.
Batch Number	The combination of Batch Number and Sequence Number should not be repeated within an invoice.	It is the Batch Sequence Number of the transaction. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
Sequence Number	The combination of Batch Number and Sequence Number should not be repeated within an invoice.	It is the Sequence Number within a batch of the transaction. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
RM/BM/CM Number	It indicates whether the rejected transaction was a Rejection Memo, Billing Memo or Credit Memo	Enter valid RM/BM/CM Number.
Ticket/Doc Number	It is the document number (of the passenger ticket, EBT, MCO, MPD, EMD or FIM).	-
Coupon Number	It is the coupon number of the document.	-

Fields	Description	Remarks
Attachment Indicator - Original	It indicates whether the invoice has a supporting document attached.	Valid values are: <ul style="list-style-type: none"> • Yes • No • Both
Mismatch Cases	Select the check box if there are any mismatched cases.	-

The procedure to add a supporting document is as follows:

1. Search the invoice by entering the details for the fields in the **Search Criteria** section.
2. The results are displayed in the **Search Results** section.
3. Select the invoice from the list displayed in the **Search Results** section, for which you want to add the attachment.
4. Click **Icon Add/Remove**.
5. The **Add/Remove Attachments** screen is displayed.
6. Click **Browse** to search and add the attachment document.
7. The path of the document is displayed in the **File to Upload** field.
8. Click **Submit**.
9. The details of the added document are displayed in the **Attached Files List** section.
10. Click **Close** to exit.
11. A confirmation message is displayed on the **Manage Supporting Documents** screen indicating that the added attachment is uploaded successfully.
12. The **No. of Attachments** for the invoice is changed.

The procedure to delete a supporting document is as follows:

1. Search the invoice by entering the details for the fields in the **Search Criteria** section.
2. The results are displayed in the **Search Results** section.
3. Select the invoice from the list displayed in the **Search Results** section, for which you want to delete the attachment.
4. Click **Icon Add/Remove**.
5. The **Add/Remove Attachments** screen is displayed.
6. Select the attachment from the list displayed in the **Attached Files List** section.
7. Click .
8. The selected attachment is deleted.

[Top](#)

1.7.1.2 Managing the Supporting Documents Using Payables submenu

To manage supporting documents, the steps are as follows:

1. Click **Passenger** Menu.
2. Click **Payables** submenu.
3. Click **Manage Supporting Documents** option.
4. The **Manage Supporting Documents** screen is displayed.

Actions	Type	Billing Period	Billed Member	Invoice No.	Source Code	Batch No	Sequence No	RM/BM/CM No	Tkt./Doc. No	Coupon No	Attachment Indicator	No. of Attachments
	Invoice/Credit Note	FEB 2012 P3	W221	slspr1	1	1657	1657		1122	1	No	0
	Invoice/Credit Note	FEB 2012 P3	W221	slspr1	4	16578	16578	1121			Yes	1
	Invoice/Credit Note	FEB 2012 P3	W221	slspr1	74	16575	16575	1123			No	0

The fields and buttons are as defined in the tables.

Fields	Description	Remarks
*Billing Year/Month	The Clearance Month of the invoice (Year, Month).	Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate ; but does not find it for the future month, it will result in an error while saving the data.

1.8 Correcting the Linking Errors for Supporting Documents

To correct supporting documents linking errors, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** menu.
3. Click **Correcting Supporting Documents Linking Error** option.
4. The **Correcting Supporting Document Linking Error** screen is displayed.

The screenshot shows the SIS Air interface. The top navigation bar includes links for Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is titled 'Correct Supporting Document Linking Errors'. It features a 'Query Criteria' section with fields for Billing Year/Month, Billing Period, Billed Member, Invoice Number, Supporting Document File Name, and Submission Date. Below this is a 'Search Results' table with columns for Actions, Form C (Y/N), Billing Year/Month, Billing Period, Billed Member, Invoice Number, Batch Number, Sequence Number, Breakdown Serial No., and Supporting Document File Name. The table displays one result for 'supporttest.txt'.

The fields are as described in the following table.

Fields	Description	Remarks
Billing Year/Month	It indicates the year and month for which invoice is generated.	The default format is YYYY-MMM For example, 2011-Apr
Billing Period	It indicates the period of the clearance month used for billing.	As the current interline settlement is on a weekly basis, there are 4 periods in a month. The billing period is represented as 01, 02, 03, and 04.
Billed Member	Unique user code that identifies the member in the Member Profile.	It is the member ID to who invoice is sent. For example, WI-023-wings airways.
Invoice Number	Unique alphanumeric code that identifies the member in the Member Profile.	This invoice number indicates the invoice with attachment linking error.
Supporting Document File Name	It is the name of the file from where supporting document was retrieved.	It indicates the path of the attachment.
Submission Date	It indicates the date when invoice was submitted for clearance.	The date will be automatically generated by the system when the Invoice number is entered.

The procedure to correct supporting documents linking errors is as follows:

1. Enter all the details in the above-mentioned fields.
2. Click **Search**.
3. **Search results** will display the invoice details with attachment error.

1.9 Correcting Auto-Billing Invoices

Using this screen, you can make corrections to the Coupon Records of the Auto-Billing Invoices (which are created by IS on behalf of the Billing Member).

Corrections can be of the following nature:

- You can modify the Coupon data or Tax Breakdown data.
- You can delete Coupon data or Tax Breakdown data.

To correct the Auto-Billing Invoices, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** submenu.
3. Click **Correct Auto-Billing Invoices** option.
4. The **Auto-Billing Prime Coupon Search** screen is displayed.

Fields and Buttons are as described in the tables.

- None of the fields (as stated in the table below) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key.
- A grayed field by default is auto populated with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
Billed Member	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways
Daily Revenue Recognition File Date	Select the date from the Calendar displayed.	Coupons added/modified as per the date of reporting in the Daily Revenue Recognition File can be filtered.
Invoice Number	Unique alphanumeric ID that identifies the invoice.	Enter valid Invoice Number .
Source Code	It is the Source Code of the transaction.	Should be a valid Source Code as published by the industry.
Prorate Methodology	It is the methodology used to evaluate the prorate value.	No fixed codes; definition up to the carriers on a bilateral / alliance basis.

Fields	Description	Remarks
Issuing Airline	It is the accounting code of the issuing airline of the ticket.	Should be a valid accounting code. For Example, 221 for WI (Wings Airways).
Ticket Document Number	It is the document number of the passenger ticket.	-
Coupon Number	It is the coupon number of the document.	-

The procedure to correct the Auto-Billing Invoices is as follows:

- Enter the details for the following fields:
 - Billed Member**
 - Daily Revenue Recognition File Date**
 - Invoice Number**
 - Source Code**
 - Prorate Methodology**
 - Issuing Airline**
 - Ticket Document Number**
 - Coupon Number**
- Click **Search**.
- The results are displayed in the **Search Results** section.
- Select the Invoice from the list displayed.
- Click **Edit**.
- The **Edit Prime Billing** screen is displayed.
You can edit the details for the fields.

Note: The following fields **CANNOT** be modified by the user:

- Any header data fields such as **Invoice Number, Billing Member, Billed Member, Billing Period, Currency of Listing, Currency of Billing, Exchange Rate, SMI, Reference data** of either member, **DS flag**.
- From the coupon data screen
 - Issuing Airline**
 - Document Number**
 - Coupon Number**
 - Batch Number**
 - Sequence Number**
 - Source Code**

1.10 Validation Error Correction

You can correct the Validation Error for:

- Invoices
- Credit Note
- Form C

1.10.1 Validation Error Correction for Invoices/Credit Note

You can use the **Validation Error Correction** screen to correct validation errors related to **IS-IDE** or **IS-XML** files. For error data to be visible on the screen (and subsequently corrected), the Invoice or Credit Note status should have status **Error – Correctable**.

To correct the validation errors, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** submenu.
3. Click **Validation Error Correction** option.
4. The **Validation Error Correction** screen is displayed.
5. The **Invoices/Credit Notes** tab is selected by default.

The procedure to search Invoices with validation errors is as follows:

1. Enter the details for the following fields:
 - **Billing Year/Month/Period**
 - **Billed Member**
 - **Invoice Number**
 - **Exception Code**
 - **File Submission Date**
 - **File Name**
2. Click **Search**.
3. The results are displayed in the **Exception Summary** section.

The procedure to update the validation errors is as follows:

1. Select the record to be updated from the list displayed in the **Exception Details** section.
2. Click **Update**.
3. The **Update** screen is displayed.
4. Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

The procedure to correct the Linking Errors is as follows:

1. Select the record from the list displayed in the **Exception Details** section.
2. Click **Correct the Linking Errors**.
3. The **Correct the Linking Errors** screen is displayed.
4. Enter the value for the field to be updated.

Note:

- The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.
- For RM linking errors, linking error correction will not succeed if there is a mismatch on the billed/allowed amounts of the RM

1.10.2 Validation Error Correction for Form C

You can use the **Validation Error Correction** screen to correct validation errors related to **Form C**. For error data to be visible on the screen (and subsequently corrected), the **Form C** status should have status **Error – Correctable**.

To correct the validation errors, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Receivables** submenu.
3. Click **Validation Error Correction** option.
4. The **Validation Error Correction** screen is displayed.
5. Select the **Form C** tab.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Sections/Fields	Description	Remarks
Search Criteria		
*Provisional Billing Year/Month	It indicates the clearance Year/Month of the Invoice/ Correspondence Invoice.	By default it displays the current Year/Month.

Sections/Fields	Description	Remarks
Provisional Billing Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the ID of the member who billed the Provisional Invoice. For example, WI-023-Wings Airways
Exception Code	It is the Exception Code assigned by the system and as received in the detailed validation report.	-
File Submission Date	The UTC date on which the file was submitted in IS.	Select the date from the Date Picker.
File Name	The name of the file.	-
Exception Summary	This section displays the results for the search performed.	The details for the following fields are displayed: <ul style="list-style-type: none"> • Exception Code • Error Description • Provisional Billing Member • File Name • Error Count • Batch Update Allowed

The details for the following fields are displayed: <ul style="list-style-type: none"> • Iss. Airline • Document No. • Coupon No. • Field Name: It is the name of the field where the error has been triggered. • Field Value: It indicates the invalid value that has been entered. <p>By default, the details for the first record in the Exception Summary section are displayed.</p>

Buttons	Description	Remarks
Search	Click Search to search the details for the Form C's with errors.	The results are displayed in the Exception Summary section.
Clear	Click Clear to clear the data in the Search Criteria section.	-

Buttons	Description	Remarks
Update	Click Update to update the errors related to the fields in the record selected.	The Update screen is displayed. Enter the new value for the field. This value is then validated as per the record structure validation. The data is saved when the value entered passes the validations; else you will receive a notification that no changes are done to the existing value. This button is enabled as per the error in the record selected. Note: Click Batch Update if there are similar errors to be corrected within the file to be updated.
Correct Linking Error	Click Correct Linking Error to Correct the linking errors for the record selected.	The Correct Linking Error screen will be displayed. This button is enabled as per the error in the record selected. The fields displayed are as per the record selected (Rejection Invoice, Correspondence Invoice).

The procedure to search Form C with validation errors is as follows:

- Enter the details for the following fields:
 - Provisional Billing Year/Month/Period**
 - Provisional Billing Member**
 - Exception Code**
 - File Submission Date**
 - File Name**
- Click **Search**.
- The results are displayed in the **Exception Summary** section.

The procedure to update the validation errors is as follows:

- Select the record to be updated from the list displayed in the **Exception Details** section.
- Click **Update**.
- The **Update** screen is displayed.
- Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

The procedure to correct the Linking Errors is as follows:

- Select the record from the list displayed in the **Exception Details** section.
- Click **Correct the Linking Errors**.
- The **Correct the Linking Errors** screen is displayed.
- Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

1.11 Downloading Correspondence Reports

Using this screen, you will be able to download the Correspondences (as per the selection criteria) in a PDF format.

To download the correspondences, the steps are as follows:

1. Click **Passenger** menu.
2. Click **Download Correspondences** submenu.
3. The **Correspondence Reports** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
Member Code	Unique alphanumeric code that identifies the member in the Member Profile.	It is the ID of the member with whom correspondence has happened. For example, WI-023-Wings Airways
*From Date	It is the date of start of correspondence.	The date can be added manually or by choosing a date from the calendar.

Fields	Description	Remarks
*To Date	It is the date of current correspondence.	The date can be added manually or by choosing a date from the calendar
Correspondence Initiated By	It indicates the member who initiates the correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Self • Other carrier • Either Entity receiving the last rejection invoice is always the initiating entity.
Correspondence Status	It indicates the status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open • Closed • Expired

*Address Line 1	It is the member's postal address.	The address has to be the member's main office location address. This address can be changed to other office location address of the member.

Fields	Description	Remarks
Address Line 2	It is the member's postal address.	The address has to be the member's main office location address. This address can be changed to other office location address of the member.
Address Line 3	It is the member's postal address.	The address has to be the member's main office location address. This address can be changed to other office location address of the member.
*Country	It indicates the Country Name of the main office location of the member.	Select from the list of Countries provided. The Country Name can be up to 50 alpha numeric characters.
State/Province/Region	It indicates the state in the selected country.	The state list is generated automatically after the country is selected. Select the State/ Province/ Region from the list.
Postal Code	It indicates the Postal Code of the main office location of the member.	The Postal Code can be up to 50 alpha numeric characters.
*City	It indicates the City Name of the main office location of the member.	The City Name can be up to 50 alpha numeric characters.

Note:

- Capture of Billed Member Reference Data capture is based on Location ID only
- The procedure to change the reference data is possible only by selecting a different Location ID

Cargo Module

2. Cargo Module

2.1 Overview of Cargo

In the Cargo Module you can:

- Create Original AWB Billing
- Create Rejection Memo
- Create Billing Memo
- Create Credit Memo
- Search Invoices
- Edit Invoices
- Initiate Correspondence
- Manage Correspondence
- Download invoice in PDF
- Correct Validation Errors in case there are validation errors related to ISIDEC or ISXML files.
- Manage Supporting Documents

Cargo menu has the following submenus:

- **Receivables** has the following options:
 - Manage Invoice
 - Create Invoice
 - Create Credit Note
 - Manage Supporting Documents
 - Validation Error Correction
 - Correct Supporting Documents Linking Errors
- **Billing History and Correspondence**
- **Payables** has the following options:
 - Invoice Search
 - Manage Supporting Documents

Note: Capturing an Invoice with values entered at the Memo Level (RM, BM, CM)

Scenario 1: Memo captured with a reason code that mandates AWB Breakdown

The values entered at the memo level will be replaced with those entered at the Prepaid/ Charge Collect AWB Breakdown level.

Scenario 2: Memo captured with a reason code that does not mandate AWB Breakdown

The values entered at the memo level will be replaced with those entered at the Prepaid/ Charge Collect AWB Breakdown level.

We will discuss about each in detail in the respective topics.

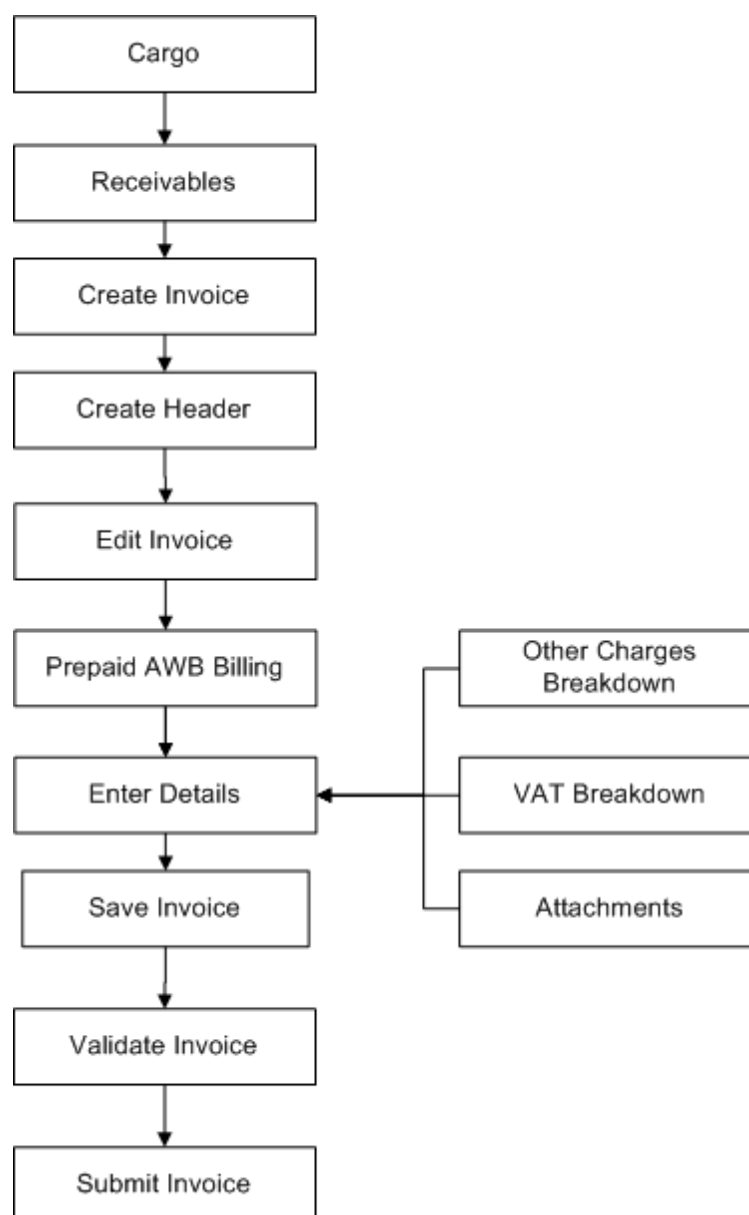

2.2 Creating Invoices

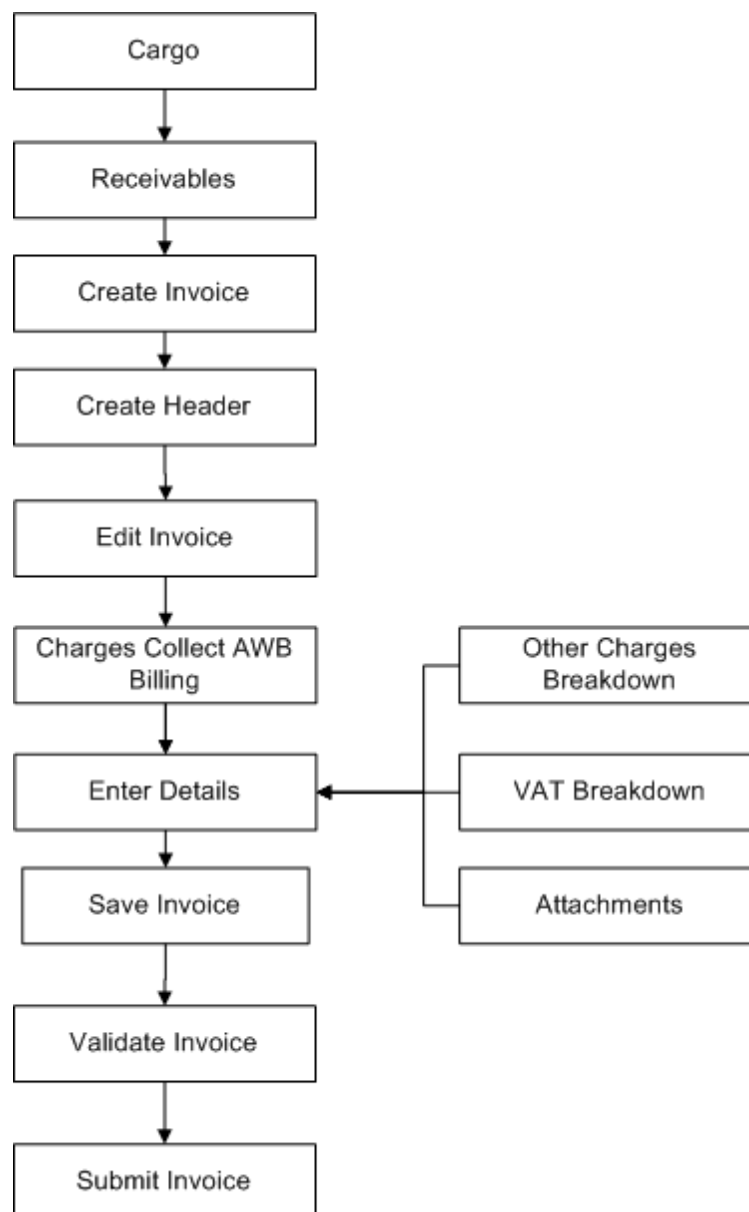

2.2.1 Processes Related to Invoices

Processes for Invoices are as follows:

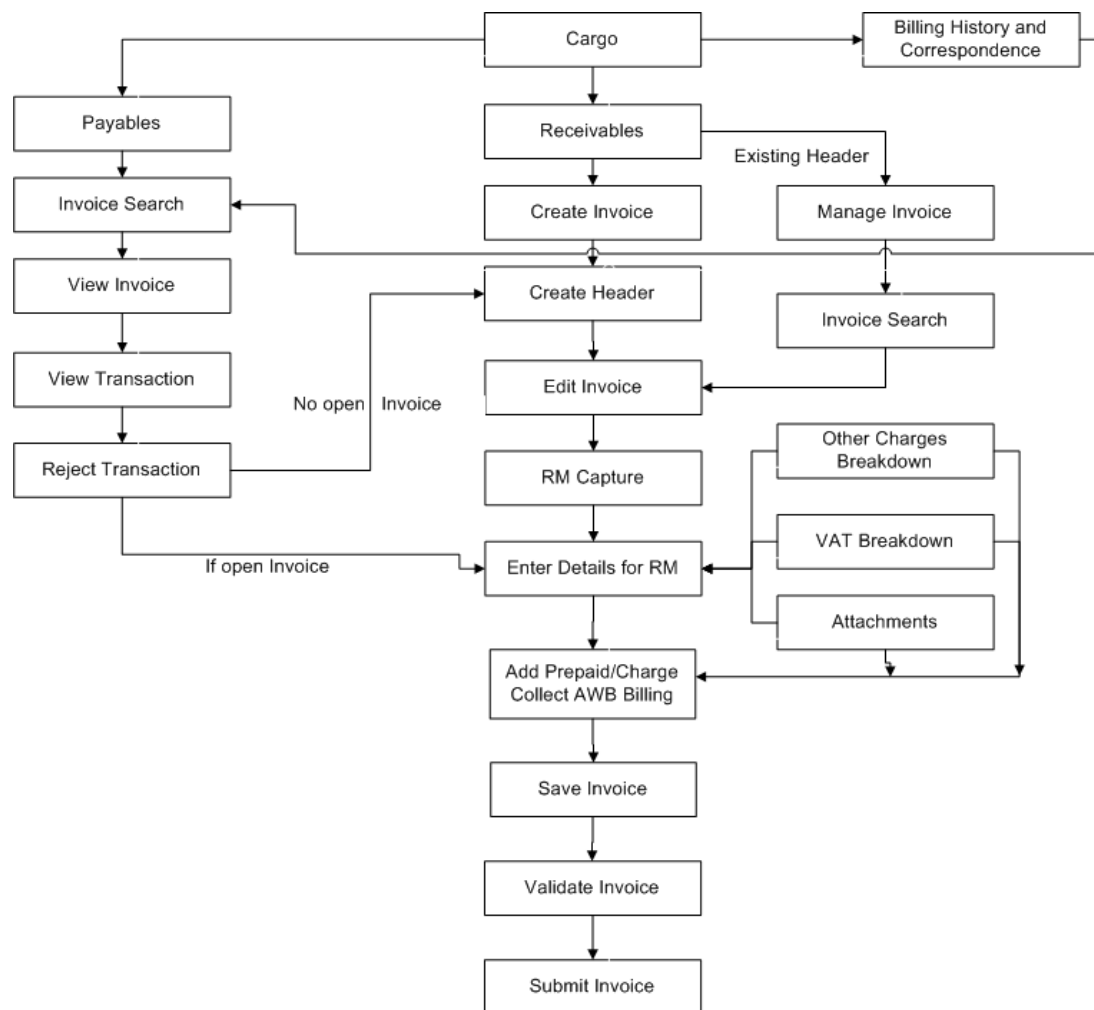

- Creating Prepaid AWB Billing
- Creating Charges Collect AWB Billing
- Creating Rejection Memo
- Creating Billing Memo
- Searching Invoices
- Creating Credit Memo

Creating Prepaid AWB Billing

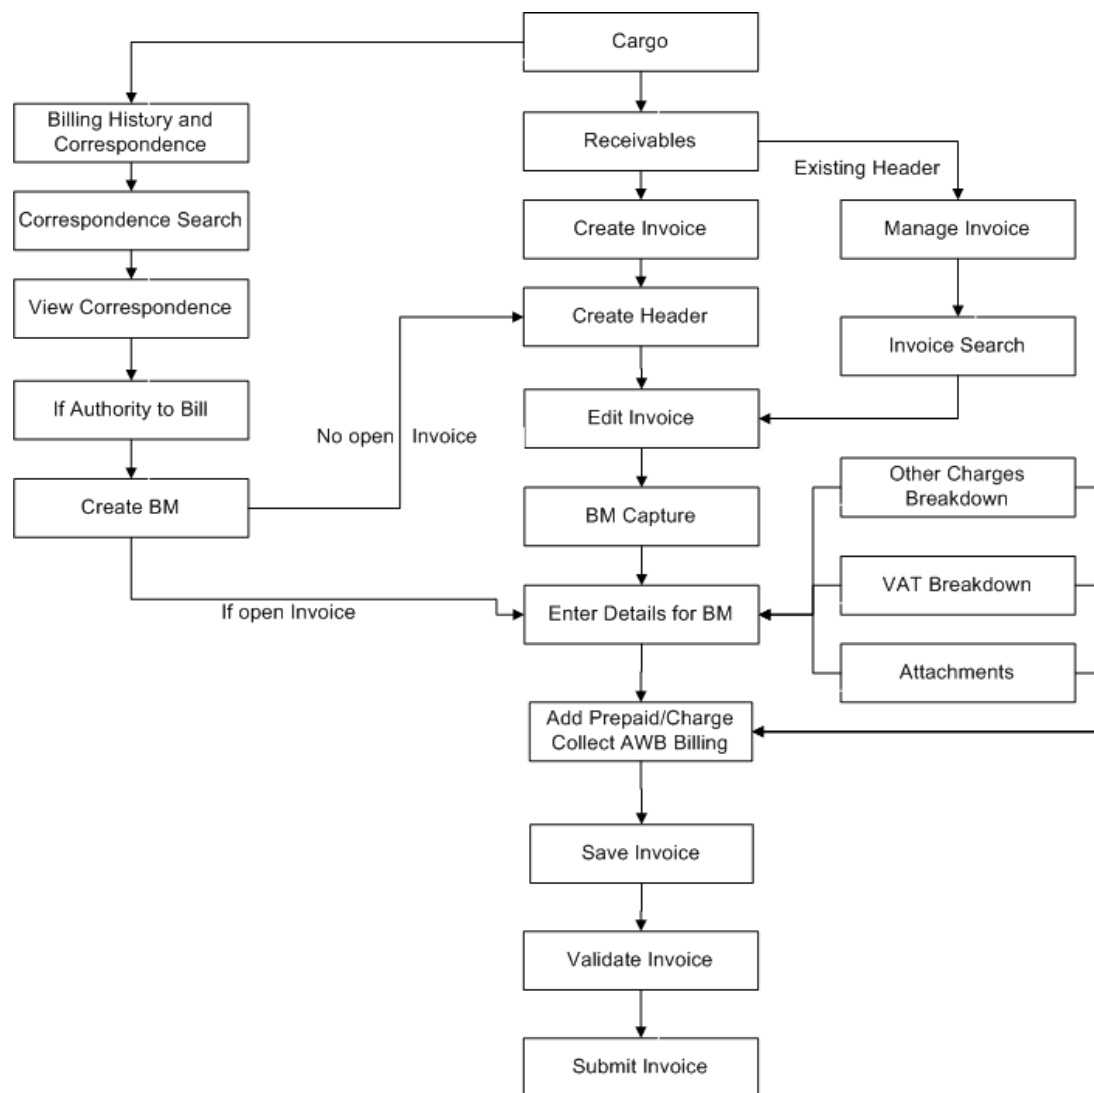

Creating Charges Collect AWB Billing

Searching Invoices

2.2.2 Creating Invoice Header

To create Invoice Header, the steps are as follows:

1. Click **Cargo** menu.
2. Click **Receivables** submenu.
3. Click **Create Invoice** option.
4. The **Create Invoice** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
*Billed Member	It is the combination of designator, prefix/accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways
*Invoice Number	Unique alphanumeric ID that identifies the invoice.	<p>The Invoice Number can be up-to ten characters (English letters and numbers only).</p> <p>For example, WI1234</p> <ul style="list-style-type: none"> • Spaces and special characters (#, *, @, ~, -, and so on) should not be used. • Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when performing duplicate checks. • Should not be duplicated by the

Fields	Description	Remarks
		billing airline within a calendar year.
*Invoice Date	It is the date of the invoice.	<p>It shows the date on which invoice header is created.</p> <ul style="list-style-type: none"> It is automatically updated to the date on which invoice is successfully submitted. Cannot be edited or modified by the users.
*Billing Year/ Month/ Period	The Clearance Period of the invoice (Year, Month and Period).	<p>For Example, Period 3 of April-2013 is represented as 2013-Apr-3</p> <p>The periods displayed are as follows:</p> <ul style="list-style-type: none"> The current open period (default value). The next future period; this may pertain to the next month also. The previous closed period (if the late submission window is open in either of the clearing houses). <p>Note: Selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing to Billing Rate below. If the system needs to populate Listing to Billing Rate, but does not find it for the future month, it will result in an error while saving the data.</p>
Billing Member's Location ID	Unique alphanumeric code that identifies member's location as per the member profile.	<p>It generates the legal reference data for the Member.</p> <p>Default location is the MAIN Location.</p> <ul style="list-style-type: none"> Default location can be changed by selecting the desired location from the list. Click Billing Member's Location ID to change any reference data for the Member. <p>The header can be saved without reference data, by selecting the blank value at the top of the list. However it should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.</p>
Billed Member's Location ID	Unique alphanumeric code that identifies member's location as per the member profile.	<p>It generates the legal reference data for the Member.</p> <p>Default location is the MAIN Location.</p> <ul style="list-style-type: none"> Default location can be changed by selecting the desired location

Fields	Description	Remarks
		<p>from the list.</p> <ul style="list-style-type: none"> Click Billed Member's Location ID to change any reference data for the Member. <p>The header can be saved without reference data, by selecting the blank value at the top of the list. However it should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.</p>
*Settlement Method	It is the Settlement Method of the invoice.	<p>Valid values are as follows:</p> <p><input type="checkbox"/> I: Settlement via ICH</p> <ul style="list-style-type: none"> Applicable when both billing and billed members are ICH members Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member) <p><input type="checkbox"/> A: Settlement via ACH</p> <ul style="list-style-type: none"> Applicable when both billing and billed members are ACH members. If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Cargo billings via the ICH; then A cannot be used. <p><input type="checkbox"/> M: Settlement via ACH using RAM Rule</p> <ul style="list-style-type: none"> Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. <p><input type="checkbox"/> B: Bilateral Settlement (direct settlement between members not involving any clearing house).</p> <ul style="list-style-type: none"> Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rules as appropriate. <p><input type="checkbox"/> X: Settlement via Special ICH Agreement</p> <ul style="list-style-type: none"> Allowed when both Billing Member and Billed Member are ICH members and when they are

Fields	Description	Remarks
		<p>part of a Special ICH Agreement</p> <p><input type="checkbox"/> A/I/M/X can be changed to Bilateral if required.</p> <p><input type="checkbox"/> A can be changed to M if required.</p> <p>When settlement is not possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p> <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method</p>
*Currency of Listing	It is the currency in which the transactions are listed.	-
*Currency of Billing	It is the currency of billing of the invoice.	<p>Valid values are as follows:</p> <p><input type="checkbox"/> When Settlement Method is I:</p> <ul style="list-style-type: none"> • If both Billing/Billed airlines are in Zone A; value should be GBP. • If both the Billing & Billed airlines are in Zone D; value should be EUR. • If both Billing/Billed airlines are in Zone B, value should be USD. • If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. <p>• When Settlement Method is M (ACH Inter-clearance Billings): Value should be USD.</p> <p>• When Settlement Method is M (ACH member billing ACH member based on RAM rule): Value should be as per currencies allowed by ACH..</p> <p>• When Settlement Method is A: Value should be as per currencies allowed by ACH..</p> <p>• When Settlement Method is B: It can be any currency</p> <p>• When Settlement is X it can be any currency</p> <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH</p>

Fields	Description	Remarks
		Zone of the parent member will be considered for determination/validation of Settlement Method
Listing to Billing Rate	It is the Exchange Rate applicable for the Currency of Listing with reference to the Currency of Billing (dividing rate).	<p>For example,</p> <ul style="list-style-type: none"> • If Currency of Listing/Evaluation is THB and Currency of Billing is USD; the Listing Evaluation to Billing Rate would be 30.208039. • When Settlement Method is ICH/ACH using RAM Rule/ACH, Listing to Billing Rate will be generated automatically with the Five Day Rate by the system and cannot be edited or modified. • When Settlement Method is Bilateral, the value should be entered by the user. It should not be zero or a negative value. • This field is mandatory for Settlement Method via ICH using Special Agreement; the value should be entered by the user. It should not be zero or negative value.
Digital Signature	It is a flag indicating whether digital signature is required or not.	<p>Valid value are as follows:</p> <ul style="list-style-type: none"> • N: No • Y: Yes • D: Default (as per profile settings) <p>Note: If digital signature requirement indicate an 'N' as per profile settings, it should not be changed to "Y".</p>
Invoice Template Language	It indicates Invoice Template Language	-
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-

The procedure to create an Invoice Header is as follows:

1. Enter the details for the following fields:

- **Billed Member**
- **Invoice Number**
- **Invoice Date**
- **Billing Year/ Month/ Period**
- **Billing Member's Location ID**
- **Billed Member's Location ID**
- **Settlement Method**

- **Currency of Listing**
 - **Currency of Billing**
 - **Listing to Billing Rate**
 - **Digital Signature**
 - **Invoice Template Language**
 - **CH Agreement Indicator**
 - **CH Due Date**
2. Click **Save Invoice Header**.
 3. The **Edit Invoice** screen is displayed with the confirmation that the Invoice Header is created successfully.

2.2.3 Searching an Invoice/ Credit Note

Invoices/Credit Note can be searched using:

- Receivables submenu.
- Payables submenu.
- Billing History and Correspondence submenu.

2.2.3.1 Searching an Invoice/Credit Note using Receivables submenu

To search an Invoice/Credit Note, the steps are as follows:

1. Click **Cargo** menu.
2. Click **Receivables** submenu.
3. Click **Manage Invoice** option.
4. The **Invoice Search** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
*Billing Year/Month	The Clearance Month of the invoice (Year, Month).	Default value displayed is the current Billing Year/Month .
*Billing Period	The Clearance Period of the invoice (Period).	Default value displayed is the current Billing Period .

Fields	Description	Remarks
Invoice/Credit Note Status	It indicates the status of the Invoice or Credit Note .	Default value is one of the following: <ul style="list-style-type: none"> • All • Open • Ready for submission • Ready for Billing • Claimed • Processing complete • Presented • Validation error-WEB Invoice
Billed Member	It is the unique alphanumeric code that identifies the member in the Member Profile .	It is the member ID to whom the invoice is to be sent. For example, WI-023-Wings Airways.
Invoice/Credit Note Owner	It indicates the name of the person who has created the invoice or credit note.	Archived user will not be shown in the dropdown.
Invoice/Credit Note Number	It is the unique alphanumeric code that identifies the invoice.	The Invoice Number can be ten characters. For example, WI1234. Note: Hyphen, space, and special characters (#, *, @, ~) are not allowed.
SMI	It indicates the method used for settlement of invoices.	Valid value is one of the following: <ul style="list-style-type: none"> • All • ICH • ACH • Bilateral • Adjustments due to Protests • ACH using IATA Rules (MITA) • Pro-Forma Invoice • ICH Special Agreement
File Name	Only for IS-WEB invoices.	You can enter file name to search for the file name.
Submission Method	It is the method of submission for the invoices.	Valid values are: <ul style="list-style-type: none"> • IS-IDECA • IS-XML • IS-WEB Default value displayed is All .

Buttons	Description	Remarks
	Click Edit to edit the selected invoice.	The Edit Invoice/Credit Note screen is displayed. You can edit the details for the invoice.
	Click Validate to check the selected invoice for validations.	It is used for checking the invoice/credit note for validation checks. For example, checking File Naming Conventions, Duplicate Invoices, Missing data in the Invoice and so on.
	Click Delete to delete the selected Invoice.	It is used for deleting expired, overdue or incorrect invoices.
Submit Selected Invoices	Click Submit Selected Invoices to submit the selected invoices to the clearing houses for the settlement.	Invoices can be submitted only after the validation checks are cleared. After the Invoice is submitted the buttons Edit , Validate and Delete change to View , Zip , and PDF as explained in the topic Searching Invoice/Credit Note using Payables submenu.

The procedure to search for an Invoice/Credit Note is as follows:

- Enter the following details:
 - **Billing Year/Month**
 - **Billing Period**
 - **Invoice/Credit Note Status**
 - **Billed Member**
 - **SMI**
 - **File Name**
 - **Submission Method**
 - **Invoice/Credit Note Owner**
 - **Invoice/Credit Note Number**
- Click **Search** to search an **Invoice** or a **Credit Note**.
- The results are displayed in the **Search Result** section.

2.2.3.2 Searching Invoice/Credit Note using Payables submenu

To search an Invoice/Credit Note, the steps are as follows:

1. Click **Cargo** menu.
2. Click **Payables** submenu.
3. Click **Manage Invoice** option.
4. The **Invoice Search** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

2.2.6 Creating Prepaid AWB

To create a Prepaid AWB, the steps are as follows:

1. **Create Invoice Header.**
2. The **Edit Invoice** screen is displayed.
3. Click **Prepaid AWB Capture** located at the end of the **Edit Invoice** screen.
4. The **Capture Prepaid AWB** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
AWB Prepaid Billing Details		
*Batch Number	It is the Batch Sequence Number of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Sequence Number	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.

Fields	Description	Remarks
*Issuing Airline	It is the prefix/accounting code of the issuing airline that bills the AWB.	Should be a valid prefix/accounting code. For Example, 221 for WI (Wings Airways).
*AWB Serial Number & Check Digit	It is the AWB Serial Number and Check Digit.	<p>The number should be 8 characters long. The valid values for the check digit are 0-6 or 9.</p> <ul style="list-style-type: none"> • If the values 7 or 8 are entered, an error message is displayed indicating that the entered check digit does not match the expected check digit. • Select from the option provided to modify the check digit entered or accept the expected check digit calculated by the system. • If 9 is entered as a check digit, an error message is displayed indicating that the entered check digit does not match the expected check digit. • Select from the option provided to continue with 9 or accept the expected check digit calculated by the system.
*AWB Date	It indicates the date of issue of the AWB.	<p>Default format is DD-MMM-YY where</p> <ul style="list-style-type: none"> • DD: Date • MMM: Month • YY: Year <p>Select from the date picker.</p>
Weight Charges	It indicates the weight charges.	-
Valuation Charges	It indicates the valuation charges.	-
ISC	It is the Interline Service Charge applicable on the AWB.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Percentage <input type="checkbox"/> Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the sum of Weight Charges and Valuation Charges. • Since this is a deductible; you need to ensure that a negative percentage is entered (For example, -5.000) so that a negative value is derived. • It is possible to modify the derived amount by modifying the percentage. • Maximum number of decimal places allowed for percentage is three.

Fields	Description	Remarks
Other Charges	It is the total Other Charge amount applicable on the AWB.	<p>The Other Charge breakdown is not mandatory.</p> <ul style="list-style-type: none"> • However, if breakdown is provided; the Other Charge Amount at the AWB Level will be derived (summed) from the breakdown data. • Any value entered at the AWB level will be overwritten by the derived (summed) amount. • It is also possible to provide VAT amounts per Other Charge in the breakdown. • To enter Other Charges breakdown data, click OC Breakdown.
VAT Amount	It is the total VAT amount applicable on the AWB (derived from Other Charges breakdown as well as VAT breakdown).	<p>This total amount cannot be entered directly.</p> <ul style="list-style-type: none"> • It will be derived from the breakdown data entered. • If VAT amount exists in the Other Charge breakdown, then the amount will be shown as an information field in the VAT Breakdown. • To enter VAT Breakdown data, click VAT Breakdown.
AWB Total Amount	It is the AWB Total Amount.	<p>It is the sum of the following fields, taking into consideration positive and negative charges:</p> <ul style="list-style-type: none"> • Weight Charges • Valuation Charges • ISC • Other Charges • VAT Amount
*Origin	It is the origin airport/city code of the shipment.	It should be a valid IATA airport/city code.
*Destination	It is the destination airport/city code of the shipment.	It should be a valid IATA airport/city code.
*From Airport	It is the airport/city code from which the carriage of the shipment was performed by the Billing Member .	It should be a valid IATA airport/city code.
*To Airport (or Point of Transfer)	It is the airport/city code to which the carriage of the shipment was performed by the Billing Member .	It should be a valid IATA airport/city code.

Fields	Description	Remarks
*Date of Carriage (or Transfer)	It indicates the date of carriage.	Default format is DD-MMM-YY where <ul style="list-style-type: none"> • DD: Date • MMM: Month • YY: Year Select the value from the date picker.
*Currency Adjustment Indicator	It is the base currency used while evaluating a prorate value.	Should be a valid ISO Alpha Currency Code.
Billed Weight	It indicates the weight of the shipment.	When the billed weight is entered, indicate whether the weight is in kg or lbs in the KG/LB indicator field.
KG/ LB indicator	It indicates whether the shipment weight is in kg or lbs.	This field should not be blank if the Billed Weight is entered. Valid values are: <ul style="list-style-type: none"> • Blank: If none of the values is selected. • K: kg • L: lbs Note: Select Blank if no value is entered for the Billed Weight .
Proviso/Req/SPA	It indicates whether the proration was done based on Proviso, Requirement or SPA.	It is not a mandatory field. Valid values are: <ul style="list-style-type: none"> • Blank • P: Proviso • R: Requirement • S: SPA Note: Select Blank if none of the values are to be selected.
Prorate%	It indicates the percentage for proration.	-
Part Shipment	It indicates if the billing is done for a part shipment.	-
CCA Indicator	It indicates if the billing is based on Charges Correction Advice.	-
Filing Reference	It is the Filing Reference for bilateral data exchange.	-
Our Reference	It is used to exchange data on a bilateral basis.	-
Reason Code	It is used to exchange data on a bilateral basis.	-
Airline Own Use	It is reserved for Internal use of Airline.	-
Reference Field 1	It is a reusable field for different types of billing scenarios.	-
Reference Field 2	It is a reusable field for different types of billing scenarios.	-
Reference Field 3	It is a reusable field for different types of billing scenarios.	-

Fields	Description	Remarks

2.2.9 Creating Charges Collect AWB

To create a Charges Collect AWB, the steps are as follows:

1. **Create Invoice Header.**
2. Click **Collect AWB Capture** located at the end of the **Edit Invoice** screen.
3. The **Capture Charges Collect AWB** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
AWB Charges Collect Billing Details		
*Batch Number	It is the Batch Sequence Number of the transaction.	<p>The combination of Batch Number and Sequence Number should not be repeated within an invoice.</p> <p>It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.</p>

Fields	Description	Remarks
*Sequence Number	It is the Sequence Number within a batch of the transaction.	<p>The combination of Batch Number and Sequence Number should not be repeated within an invoice.</p> <p>It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.</p>
*Issuing Airline	It is the prefix/accounting code of the issuing airline that bills the AWB.	<p>Should be a valid prefix/accounting code. For Example, 221 for WI (Wings Airways)</p>
*AWB Serial Number & Check Digit	It is the AWB Serial Number and Check Digit.	<p>The number should be 8 characters long. The valid values for the check digit are 0-6 or 9.</p> <ul style="list-style-type: none"> • If the values 7 or 8 are entered, an error message is displayed indicating that the entered check digit does not match the expected check digit. • Select from the option provided to modify the check digit entered or accept the expected check digit calculated by the system. • If 9 is entered as a check digit, an error message is displayed indicating that the entered check digit does not match the expected check digit. • Select from the option provided to continue with 9 or accept the expected check digit calculated by the system.
*AWB Date	It indicates the date of issue of the AWB.	<p>Default format is DD-MMM-YY where</p> <ul style="list-style-type: none"> • DD: Date • MMM: Month • YY: Year <p>Select from the date picker.</p>
Weight Charges	It indicates the weight charges.	-
Valuation Charges	It indicates the valuation charges.	-
Amount Subject to ISC	It indicates the Amount on which ISC is applied.	-

Fields	Description	Remarks
ISC	It is the Interline Service Charge applicable on the AWB.	<p>ISC consists of 2 fields:</p> <ul style="list-style-type: none"> □ Percentage □ Amount <ul style="list-style-type: none"> • The amount is always derived by applying the percentage entered upon the Amount subject to ISC. • Since this is a chargeable amount; you need to ensure that a positive percentage is entered (For example, 5.000) so that a positive value is derived. • It is possible to modify the derived amount by modifying the percentage. • Maximum number of decimal places allowed for percentage is three.
Other Charges	It is the total Other Charge amount applicable on the AWB.	<p>The Other Charge breakdown is not mandatory.</p> <ul style="list-style-type: none"> • However, if breakdown is provided; the Other Charge Amount at the AWB Level will be derived (summed) from the breakdown data. • Any value entered at the AWB level will be overwritten by the derived (summed) amount. • It is also possible to provide VAT amounts per Other Charge in the breakdown. • To enter Other Charges breakdown data, click Other Charges.
VAT Amount	It is the total VAT amount applicable on the AWB (derived from Other Charges breakdown as well as VAT breakdown).	<p>This total amount cannot be entered directly.</p> <ul style="list-style-type: none"> • It will be derived from the breakdown data entered. • If VAT amount exists in the Other Charge breakdown, then the amount will be shown as an information field in the VAT Breakdown. • To enter VAT Breakdown data, click VAT Breakdown.

Fields	Description	Remarks
AWB Total Amount	It is the AWB Total Amount.	It is the sum of the following fields, taking into consideration positive and negative charges: <ul style="list-style-type: none"> • Weight Charges • Valuation Charges • ISC • Other Charges • VAT Amount
*Origin	It is the origin airport/city code of the shipment.	It should be a valid IATA airport/city code.
*Destination	It is the destination airport/city code of the shipment.	It should be a valid IATA airport/city code.
*From Airport	It is the airport/city code from which the carriage of the shipment was performed by the Billing Member .	It should be a valid IATA airport/city code.
*To Airport (or Point of Transfer)	It is the airport/city code to which the carriage of the shipment was performed by the Billing Member .	It should be a valid IATA airport/city code.
*Date of Carriage (or Transfer)	It indicates the date of carriage.	Default format is DD-MMM-YY where <ul style="list-style-type: none"> • DD: Date • MMM: Month • YY: Year Select the value from the date picker.
*Currency Adjustment Indicator	It is the base currency used while evaluating a prorate value.	Should be a valid ISO Alpha Currency Code.
Billed Weight	It indicates the weight of the shipment.	When the billed weight is entered, indicate whether the weight is in kg or lbs in the KG/LB indicator field.
Proviso/Req/SPA	It indicates whether the proration was done based on Proviso, Requirement or SPA.	It is not a mandatory field. Valid values are: <ul style="list-style-type: none"> • Blank • P: Proviso • R: Requirement • S: SPA Note: Select Blank if none of the values are to be selected.
Prorate%	It indicates the percentage for proration.	-

Fields	Description	Remarks
KG/ LB indicator	It indicates whether the shipment weight is in kg or lbs.	<p>This field should not be blank if the Billed Weight is entered.</p> <p>Valid values are:</p> <ul style="list-style-type: none"> Blank: If none of the values is selected. K: kg L: lbs <p>Note: Select Blank if no value is entered for the Billed Weight.</p>
Part Shipment	It indicates if the billing is done for a part shipment.	-
CCA Indicator	It indicates if the billing is based on Charges Correction Advice.	-
Filing Reference	It is the Filing Reference for bilateral data exchange.	-
Our Reference	It is used to exchange data on a bilateral basis.	-
Reason Code	It is used to exchange data on a bilateral basis.	-
Airline Own Use	It is reserved for Internal use of Airline.	-
Reference Field 1	It is a reusable field for different types of billing scenarios.	-
Reference Field 2	It is a reusable field for different types of billing scenarios.	-
Reference Field 3	It is a reusable field for different types of billing scenarios.	-
Reference Field 4	It is a reusable field for different types of billing scenarios.	-
Reference Field 5	It is a reusable field for different types of billing scenarios.	-

ISC	It is the Interline Service Charge applicable on the coupon.	ISC is divided into three categories: <ul style="list-style-type: none"> • Allowed • Accepted • Difference.
Net Reject Amount	It is the total rejected amount.	It is the total of the Difference amounts for Weight Charges and Valuation Charges and Other Charges and VAT Amount and ISC .

Fields/Sections	Description	Remarks
*Attachment Indicator-Original	It indicates whether any supporting documents (attachments) have been added to the transaction.	<p>This field is automatically set by the system.</p> <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed). Click Attachment to add/remove attachments. <p>Default value is NO.</p>
Airline Own Use	It is reserved for Internal use of Airline.	-

Note:

- In case of RM stage 2 and RM stage 3, for all billed/allowed amounts (i.e. Weight Charges, Valuation Charges, Other Charges, VAT Amount, and ISC); the amounts should match the accepted amount from the previous rejection

Buttons	Description	Remarks
Validate Linking Details	Click Validate Linking Details to check if there are any linking errors for the field values entered.	<p>The system checks if the mandatory field values are entered. If certain field values are missing, system gives a Validation error code.</p> <p>Based on the migration history of the Billed Member, the system may not allow further capture of RM details if the linking with the rejected transaction fails.</p>
Save	Click Save to save the Rejection Memo details entered.	After data entered is successfully saved, the Edit Rejection Memo screen is displayed. After saving the memo you can add an Prepaid AWB or an Charges Collect AWB to the RM.
Save and Add New	Click Save and Add New to save the AWB data and add data for a new AWB.	After data of the current AWB is successfully saved, the same screen with blank fields is offered to the user for creating the next AWB.
Back	Click Back to go to the Edit Invoice screen.	<p>A warning message is displayed indicating the unsaved changes, if you click Back prior to saving the field values entered for the AWB.</p> <p>Note: When you search an existing Invoice Header for the RM, this button is Back to Invoice Search. Click Back to Invoice Search to go back to the Invoice Search screen.</p>

The procedure to create a Rejection Memo is as follows:

- Enter the details for the following fields:
 - Batch Number**
 - Sequence Number**

- **Rejection Memo Stage**
 - **Rejection Memo Number**
 - **Reason Code**
 - **Our Reference**
 - **Your Invoice Number**
 - **Your Rejection Memo Number**
 - **Your Billing Year**
 - **Your Billing Month**
 - **Your Billing Period**
 - **BM/CM Indicator**
 - **Your BM/CM Number**
 - **Reason Remarks**
 - **Weight Charges**
 - **Valuation Charge**
 - **Other Charge**
 - **VAT Amount**
 - **ISC**
 - **Airline Own Use**
2. The **Net Reject Amount** is generated automatically.
 3. Click **Attachment** to add supporting documents if any.
 4. Click **Save** to save the details entered. The **Edit Rejection Memo** screen is displayed. The details for the AWB are displayed. Here you can add a **Prepaid AWB** or a **Charges Collect AWB** to the RM.
- Note:** Select from the following options to save the details for the AWB entered.
- **Save**
 - **Save and Add New**
- OR**
- Click **Back** to go to the **Edit Invoice** screen.

Sections/Fields	Description	Remarks
Header Details	It displays the details of the header.	Details for the following fields are displayed <ul style="list-style-type: none"> • Billed Member • Billing Period • Settlement Method • Invoice Number • Listing Amount • Listing/Evaluation to Billing Rate • Billing Amount • Invoice Status • Memo Number
Prepaid AWB		
*AWB Issuing Airline	It is the prefix/accounting code of the issuing airline that bills the AWB.	Should be a valid prefix/accounting code. For Example, 221 for WI (Wings Airways)

Sections/Fields	Description	Remarks
*AWB Serial Number & Check Digit	It is the AWB Serial Number and Check Digit.	<p>The number should be 8 characters long. The valid values for the check digit are 0-6 or 9.</p> <ul style="list-style-type: none"> • If the values 7 or 8 are entered, an error message is displayed indicating that the entered check digit does not match the expected check digit. • Select from the option provided to modify the check digit entered or accept the expected check digit calculated by the system. • If 9 is entered as a check digit, an error message is displayed indicating that the entered check digit does not match the expected check digit. • Select from the option provided to continue with 9 or accept the expected check digit calculated by the system.
*AWB Issuing Date	It indicates the date of issue of the AWB.	<p>Default format is DD-MMM-YY where</p> <ul style="list-style-type: none"> • DD: Date • MMM: Month • YY: Year <p>Select from the date picker.</p>
Consignment Origin	It is the origin airport/city code of the shipment.	It should be a valid IATA airport/city code.
Consignment Destination	It is the destination airport/city code of the shipment.	It should be a valid IATA airport/city code.
*Carriage From	It is the airport/city code from which the carriage of the shipment was performed by the Billing Member .	It should be a valid IATA airport/city code.
*Carriage To	It is the airport/city code to which the carriage of the shipment was performed by the Billing Member .	It should be a valid IATA airport/city code.
*Transfer Date	It indicates the date of carriage.	<p>Default format is DD-MMM-YY where</p> <ul style="list-style-type: none"> • DD: Date • MMM: Month • YY: Year <p>Select the value from the date picker.</p>
Currency Adjustment Indicator	It is the base currency used while evaluating a prorate value.	Should be a valid ISO Alpha Currency Code.

Sections/Fields	Description	Remarks
Billed Weight	It indicates the weight of the shipment.	When the billed weight is entered, indicate whether the weight is in kg or lbs in the KG/LB indicator field.
Proviso/Req/SPA	It indicates whether the proration was done based on Proviso, Requirement or SPA.	It is not a mandatory field. Valid values are: <ul style="list-style-type: none"> • Blank • P: Proviso • R: Requirement • S: SPA Note: Select Blank if none of the values are to be selected.
Prorate%	It indicates the percentage for proration.	-
KG/ LB indicator	It indicates whether the shipment weight is in kg or lbs.	This field should not be blank if the Billed Weight is entered. Valid values are: <ul style="list-style-type: none"> • Blank: If none of the values is selected. • K: kg • L: lbs Note: Select Blank if no value is entered for the Billed Weight .
Part Shipment	It indicates if the billing is done for a part shipment.	-
CCA Indicator	It indicates if the billing is based on Charges Correction Advice.	-
Our Reference	It is used to exchange data on a bilateral basis.	-
Reason Code	It is used to exchange data on a bilateral basis.	-
Reference Field 1	It is a reusable field for different types of billing scenarios.	-
Reference Field 2	It is a reusable field for different types of billing scenarios.	-
Reference Field 3	It is a reusable field for different types of billing scenarios.	-
Reference Field 4	It is a reusable field for different types of billing scenarios.	-
Reference Field 5	It is a reusable field for different types of billing scenarios.	-
Airline Own Use	It is reserved for Internal use of Airline.	-

Sections/Fields	Description	Remarks
Weight Charges	It indicates the weight charges.	<p>Weight Charges are divided into three categories:</p> <ul style="list-style-type: none"> • Billed: It is the value which is being rejected. • Accepted: It is the accepted value for the coupon. • Difference: It is generated automatically by the system based on the difference between the Billed and the Accepted value.
Valuation Charges	It indicates the valuation charges.	<p>Valuation Charges are divided into three categories:</p> <ul style="list-style-type: none"> • Billed • Accepted • Difference
Other Charges	It is the total Other Charge amount applicable on the AWB.	<p>Other Charges are divided into three categories:</p> <ul style="list-style-type: none"> • Billed • Accepted • Difference <p>Click Other Charges to enter Accepted Other Charges breakdown. Breakdown is optional, but if breakdown is provided, then the sum of the breakdown amounts should be equal to the Other Charges Difference.</p>
VAT Amount	It is the total VAT amount applicable on the AWB (derived from Other Charges breakdown as well as VAT breakdown).	<p>VAT Amount is divided into three categories:</p> <ul style="list-style-type: none"> • Billed • Accepted • Difference <p>Click VAT Amount to enter Accepted VAT Amount breakdown. If a non-zero VAT Difference Amount is derived by the system, then the VAT Different Amount should be equal to sum of VAT Amounts from Other Charges Breakdown and VAT Breakdown.</p>
ISC	It is the Interline Service Charge applicable on the AWB.	<p>ISC is divided into three categories:</p> <ul style="list-style-type: none"> • Allowed • Accepted • Difference. <p>The amount is always derived by applying the ISC % entered upon the sum of Weight Charges and Valuation Charges.</p>
Net Reject Amount	It is the total rejected amount.	It is the total of the Difference amounts for Weight Charges and Valuation Charges and Other Charges and VAT Amount and ISC .

Sections/Fields	Description	Remarks
Attachment Indicator-Original	It indicates whether any supporting documents (attachments) are added to the transaction.	<p>This field is automatically set by the system</p> <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed). Click Attachment to add/remove attachments. <p>Default value is NO.</p>
Prorate Ladder	Enter the details for proration.	Click Prorate Ladder to enter details for proration.

Note:

- In case of RM stage 1, for all billed/allowed amounts (i.e. Weight Charges, Valuation Charges, Other Charges, VAT Amount, and ISC); the amounts should match the billed amount from the rejected AWB

Buttons	Description	Remarks
Save and Add New	Click Save and Add New to save the AWB data and add data for a new AWB.	After data of the current AWB is successfully saved, the same screen with blank fields is offered to the user for creating the next AWB.
Save and Duplicate	Click Save and Duplicate to save the AWB data and capture another AWB with identical data.	<p>After data of the current AWB is successfully saved, the same screen is displayed for creating the next identical AWB, with data from the saved AWB.</p> <p>VAT breakdown data and Other Charges data are also copied.</p>
Save and Back to Overview	Click Save and Back to Overview to save the AWB data and go to the AWB Prepaid Billing Records screen.	After data of the current AWB is successfully saved, the AWB Prepaid Billing Records screen is displayed.
Back	Click Back to go to the Edit Rejection Memos screen.	A warning message is displayed indicating the unsaved changes, if you click Back prior to saving the field values entered for the AWB.

The procedure to add a Prepaid AWB to a RM is as follows:

- Enter the details for the following fields:
 - AWB Issuing Airline**
 - AWB Serial Number & Check Digit**
 - AWB Issuing Date**
 - Consignment Origin**
 - Consignment Destination**
 - Carriage From**
 - Carriage To**

- **Transfer Date**
 - **Currency Adjustment Indicator**

2.2.25.3 Viewing an Invoice using Billing History and Correspondence submenu

To view an Invoice, the steps are as follows:

1. Search the Invoice using **Billing History and Correspondence** submenu.
2. Select the transaction to be viewed from the **Search Results** section.
3. Click .
4. The **View (selected Transaction)** screen is displayed.

The screenshot shows the 'View AWB Prepaid Billing' screen in the SIS Air system. The header includes the IATA logo and navigation tabs like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is titled 'View AWB Prepaid Billing' and displays 'Header Details' for a specific transaction. The details include:

- Billed Member:** WI-221
- Billing Period:** Nov 2011 P2
- Settlement Method:** BILATERAL
- Invoice Number:** IN17011
- Listing Amount:** USD 29,726.50
- Listing to Billing Rate:** 1.00000
- Billing Amount:** USD 29,726.50
- Invoice Status:** Ready for Billing

Below the header details, there are sections for 'AWB Prepaid Billing Details' and 'Attachment Indicator'. The 'AWB Prepaid Billing Details' section contains various fields for Batch Number, Sequence Number, Issuing Airline, AWB Serial Number & Check Digit, AWB Date, Weight Charges, Valuation Charges, ISC, Other Charges, VAT Amount, and more. The 'Attachment Indicator' section shows a 'No' status with an 'Attachment' link.

5. The details of the transaction are listed.
6. Click **Back to Billing History** to go back to the **Billing History and Correspondence** screen.

2.2.28 Viewing a Rejection Memo

A Rejection Memo can be viewed using:

- Receivables submenu
- Payables submenu
- Billing History and Correspondence submenu

To view a RM, the steps are as follows:

1. View an Invoice.
2. Click **RM Listing** button located at the end of the screen.
3. The **Rejection Memos** screen is displayed.
4. Select the record to be viewed from the **Rejection Memo List** section.
5. Click .
6. The **View Rejection Memo** screen is displayed.

The screenshot shows the 'View Rejection Memo' screen in the SIS Air application. The header includes the IATA logo and navigation tabs like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is titled 'View Rejection Memo' and contains several sections:

- Header Details:** Displays billed member (WI-221), billing period (Nov 2011 P2), settlement method (BILATERAL), invoice number (IN17011), listing amount (USD 29,726.50), and billing amount (USD 29,726.50).
- Rejection Memo Data Capture:** A form with fields for Batch No., Sequence Number, Rejection Memo Stage, Rejection Memo Number, Reason Code, Our Reference, Your Invoice Number, Your Rejection Memo Number, Your Billing Year, Your Billing Month, Your Billing Period, BM/CM Indicator, and Your BM/CM Number. It also has a Reason Remarks text area.
- Financial Summary:** A table comparing Billed, Accepted, and Difference amounts for Weight Charges, Valuation Charges, Other Charges, VAT Amount, and ISC. It also shows a Net Reject Amount of 0.000.
- Attachment Indicator:** A section for Original and Airline Own Use attachments.
- Rejection Memo AWB List:** A table listing AWB details including Actions, Billing Code, Issuing Airline, AWB Serial No. & Check Digit, AWB Issue Date, Consignment Origin, Consignment Dest., Carriage From, Carriage To, Transfer Date, Weight Charges, Valuation Charges, Other Charges, and ISC Ar.

Note: Fields and Buttons are as explained in the topic **Creating a Rejection Memo**.

7. The details of the memo are displayed in the **Rejection Memo Data Capture** section.
8. The list of **AWB Prepaid Billing** and **AWB Charge Collect Billing** for the **Rejection Memo** is displayed in the **Rejection Memo AWB List**.
9. Click **Back** to go back to the **Rejection Memos** screen.

Note: When the RM is viewed using **Billing History and Correspondence** submenu, the **Back** button is **Back to Billing History**. Click **Back to Billing History** to go back to the **Billing History and Correspondence** screen.

The procedure to view AWB Prepaid Billing is as follows:

1. Select the prepaid billing to be viewed from the list displayed in the **Rejection Memo AWB List** section.
2. Click .
3. The **View Prepaid AWB** screen is displayed. The details for the AWB Prepaid Billing are displayed.
4. Click **Back** to go back to the **View Rejection Memo** screen.

The procedure to view Charges Collect AWB is as follows:

1. Select the Charge Collect billing to be viewed from the list displayed in the **Rejection Memo AWB List** section.
2. Click .
3. The **View Charge Collect AWB** screen is displayed. The details for the **AWB Charge Collect Billing** are displayed.
4. Click **Back** to go back to the **View Rejection Memo** screen.

Fields	Description	Remarks
		should be ensured that reference data is captured before validating the invoice. Otherwise the validation process will result in an error.
*Settlement Method	It is the Settlement Method of the invoice.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> □ I: Settlement via ICH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ICH members • Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member) □ A: Settlement via ACH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ACH members. • If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Cargo billings via the ICH; then A cannot be used. □ M: Settlement via ACH using RAM Rule <ul style="list-style-type: none"> • Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) • Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. □ B: Bilateral Settlement (direct settlement between members not involving any clearing house). <ul style="list-style-type: none"> • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rule as appropriate. □ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement □ A/I/M/X can be changed to Bilateral if required. □ A can be changed to M if required. <p>When settlement is not possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p>

Fields	Description	Remarks
		Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method
*Currency of Listing	It is the currency in which the transactions are listed.	-
*Currency of Billing	It is the currency of billing of the invoice.	Valid values are as follows: ☐ When Settlement Method is I : <ul style="list-style-type: none"> • If both Billing/Billed airlines are in Zone A; value should be GBP. • If both the Billing & Billed airlines are in Zone D; value should be EUR. • If both Billing/Billed airlines are in Zone B, value should be USD. • If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. <ul style="list-style-type: none"> • When Settlement Method is M (ACH Inter-clearance Billings): Value should be USD. • When Settlement Method is M (ACH member billing ACH member based on RAM rule): Value should be as per currencies allowed by ACH.. • When Settlement Method is A: Value should be as per currencies allowed by ACH.. • When Settlement Method is B: It can be any currency. • When Settlement is X it can be any currency Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH Zone of the parent member will be considered for determination/validation of Settlement Method

Fields	Description	Remarks
Listing to Billing Rate	It is the Exchange Rate applicable for the Currency of Listing with reference to the Currency of Billing (dividing rate).	For example, <ul style="list-style-type: none"> • If Currency of Listing/Evaluation is THB and Currency of Billing is USD; the Listing Evaluation to Billing Rate would be 30.208039. • When Settlement Method is ICH/ACH using IATA Rule/ACH, Listing to Billing Rate will be generated automatically with the Five Day Rate by the system and cannot be edited or modified. • When Settlement Method is Bilateral, the value should be entered by the user. It should not be zero or a negative value. • This field is mandatory for Settlement Method via ICH using Special Agreement; the value should be entered by the user. It should not be zero or negative value.
Digital Signature	It is a flag indicating whether digital signature is required or not.	Valid value are as follows: <ul style="list-style-type: none"> • N: No • Y: Yes • D: Default (as per profile settings) Note: If digital signature requirement indicate an 'N' as per profile settings, it should not be changed to "Y".
Invoice Template Language	It indicates Invoice Template Language	-
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-

The procedure to create an Invoice Header is as follows:

1. Enter the details for the following fields:
 - **Billed Member**
 - **Invoice Number**
 - **Invoice Date**
 - **Billing Year/ Month/ Period**
 - **Billing Member's Location ID**
 - **Billed Member's Location ID**
 - **Settlement Method**
 - **Currency of Listing**
 - **Currency of Billing**
 - **Listing to Billing Rate**
 - **Digital Signature**
 - **Invoice Template Language**

- **CH Agreement Indicator**
 - **CH Due Date**
2. Click **Save Credit Note Header**.
 3. The **Edit Cargo Credit Note** screen is displayed with the confirmation that the Credit Note Header is created successfully.

2.3.3 Creating a Credit Memo

To create a Credit Memo, the steps are as follows:

1. **Create the Credit Note Header.**
2. The **Edit Cargo Credit Note** screen is displayed.
3. Click **Create Credit Memo** located at the end of the **Edit Cargo Credit Note** screen.
4. The **Create Credit Memo** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields/Sections	Description	Remarks
Header Details	It displays the details of the header.	Details for the following fields are displayed <ul style="list-style-type: none"> • Billed Member • Billing Period • Settlement Method • Invoice Number • Billing Code • Listing Amount • Listing to Billing Rate • Billing Amount • Invoice Status
Credit Memo Data Capture		

Fields/Sections	Description	Remarks
*Batch Number	It is the Batch Sequence Number of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Sequence Number	It is the Sequence Number within a batch of the transaction.	The combination of Batch Number and Sequence Number should not be repeated within an invoice. It is the responsibility of the billing airline to ensure that batching is done as per industry rules. These rules are not validated by the system.
*Credit Memo Number	It is the alpha-numeric Credit Memo Number .	Should be unique number within each billed airline in the billing period.
*Reason Code	It is the Reason Code for Credit Memo.	Should be a valid Reason Code as published by the industry The Reason Code will determine whether coupon breakdown is mandatory.
Our Reference	It is used to exchange data on a bilateral basis.	-
Your Invoice Number	It indicates the number of the invoice that contained the transaction.	Invoice Number for which credit memo is generated.
Your Billing Year	It indicates the billing year of the invoice that contained the transaction.	It should be generated automatically if Invoice number is provided.
Your Billing Month	It indicates the billing month of the invoice that contained the transaction being rejected.	It should be generated automatically if Invoice number is provided.
Your Billing Period	It indicates the billing period of the invoice that contained the transaction being rejected.	It should be generated automatically if Invoice number is provided.
Attachment Indicator-Original	It indicates whether any supporting documents (attachments) are added to the transaction.	This field is automatically set by the system. <ul style="list-style-type: none"> Will be set to Yes if one or more attachments are added to the transaction. Will be set to No if no attachments are added to the transaction (or when all existing attachments have been removed) Click Attachment to add/remove attachments.
Airline Own Use	It is reserved for Internal use of Airline.	It is used to exchange data on a bilateral basis.
Reason Remarks	It is a brief description provided by the Billing Member for the invoice.	Any comments or reason for raising the Credit Memo can be stated here.

Fields/Sections	Description	Remarks
Total Weight Charges	It indicates the total weight charges.	-
Total Valuation Charges	It indicates the total valuation charges.	-
Total Other Charges	It indicates the total other charges.	-
Total ISC Amount	It indicates the total ISC Amount.	-
Total VAT Amount	It is the total VAT amount applicable on the coupon.	This total amount cannot be entered directly. It will be derived from the breakdown data entered. To enter tax breakdown data, click VAT Breakdown .
Net Credited Amount	It is the total amount of the coupon.	Total amount is calculated by the system; it should be a negative value and the value is not editable. The amount is the sum of the following fields taking into consideration whether the values are positive or negative: <ul style="list-style-type: none"> • Total Weight Charges • Total Valuation Charges • Total Other Charges • Total ISC Amount • Total VAT Amount

Buttons	Description	Remarks
Save	Click Save to save the Credit Memo details entered.	After data entered is successfully saved, the Edit Credit Memo screen is displayed. Here you can add an AWB Prepaid Billing or an AWB Charge Collect Billing to the CM.
Back	Click Back to go to the Edit Invoice screen.	A warning message is displayed indicating the unsaved changes, if you click Back prior to saving the field values entered for the AWB.

The procedure to create an AWB Prepaid Billing is as follows:

1. Enter the details for the following fields:

- **Batch Number**
- **Sequence Number**
- **Credit Memo Number**
- **Reason Code**
- **Our Reference**
- **Your Invoice Number**
- **Your Billing Year**
- **Your Billing Month**
- **Your Billing Period**
- **Airline Own Use**
- **Reason Remarks**
- **Total Weight Charges**
- **Total Valuation Charges**

- **Total Other Charges**
 - **Total ISC Amount**
 - **Total VAT Amount**
2. The **Net Credited Amount** is generated automatically.
 3. Click **Attachment** to add supporting documents if any.
 4. Click **Save** to save the details entered. The **Edit Credit Memo** screen is displayed. The details for the AWB are displayed.

Note: Select from the following options to save the details for the Credit Memo entered.

 - **Save**
- OR
- Click **Back** to go to the **Edit Cargo Credit Note** screen.

Correspondence Owner: ManAnn Gunt Correspondence Status: Open Correspondence Sub Status: Responded

Subject: 00100EL 86029114

Correspondence Text:

We are initiating correspondence in accordance to RAIU Paragraph A10 Chapter 4.2.1.2, as billing exceeded this rejection stage limit. We kindly ask you to give us your authorization to reject QPC01 on the Aug 2016 RA on 30c rejections.

AA maintains billing. AA charges LAX(LUS+P) to QPC(LUS+Q) @ \$1/LU. AA published on class rate-QPR. Chargeable weight of 100kg or 220LBS @ \$1/LU + 12.20 plus \$5.00 DGR fee = \$7.20 due to AA. Please refer to attached invoice (01 copy).

In the event that no response is received within two month time from the date of this correspondence, we shall assume QP accepts our request to enroll in accordance with RAIU chapter A10 para. 6.2.2.4. Your consideration and acceptance for our request will be most appreciated. We are looking forward to receiving your authority to debit USD \$127.38 net in full settlement.

Thank you for your cooperation.

2.4.4 Close a Correspondence

In some cases, the initiator of the correspondence agrees to not pursue a correspondence case anymore. Hence, the initiating member of a correspondence can close the case under certain circumstances. When this happens, the correspondence will be set with status as 'Closed' and with a new sub-status 'Accepted by Correspondence Initiator'.

To close correspondence, the steps are as follows:

1. Click **Cargo** menu.
2. Click **Billing History and Correspondence** submenu.
3. The **Billing History** screen is displayed.
4. Select a correspondence (from the **Search Results** section)

Action	Click  to delete unwanted Other Charge .	-
Other Charge List	It displays the Other Charge details entered in the above mentioned fields.	Displays the details entered for the following fields: <ul style="list-style-type: none"> • Other Charge Code • Other Charge Value • VAT Label • VAT Text • VAT Base Amount • VAT Percentage • VAT Calculated Amount

Note: Providing the VAT information in the **Other Charge Details** is optional. However, if the VAT information is provided then values for all VAT fields must be entered.

The procedure to add Other Charge is as follows:

1. Select **Other Charge Code**.
2. Enter **Other Charge Value**.
3. Enter **VAT Label, VAT Text, VAT Base Amount** and **VAT Percentage**.
4. **VAT Calculated Amount** will be displayed.
5. Click **Add**.
6. The details are displayed in the **Other Charge List** section.
7. Click **Close** to close the **AWB Other Charge** window.

The procedure to delete Other Charge is as follows:

1. Select the Other Charge details displayed in the **Other Charge List** section.
2. Click  to delete the selected Other Charge.
3. The selected Other Charge is deleted.

2.9.3 Attachments

To attach supporting documents, the steps are as follows:

1. Click **Attachment**.
2. The **Add/Remove Attachment** screen is displayed.

Note: Sections, Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Sections/Fields	Description	Remarks
Add Attachment (s)		
File to upload	It displays the path of the file/attachment to be attached.	Click Browse to search for the file/supporting document (from your local drive/network) to be added to the Invoice/Credit Note.
Attached Files List		
Action	Click  to delete unwanted Attachment .	The selected file is deleted from the list.
Attached Files List	It displays the details for the attached file.	Displays the details for the following fields: <ul style="list-style-type: none"> • Sr. No • File Name • File Size (KB) • Upload Link Time Stamp • Uploaded By

The procedure to attach supporting documents is as follows:

1. Click **Browse** to search the file/files to be attached as supporting documents.
2. Details of the attached files will be displayed in the **Attached Files List** window.
3. Click **Close** after all files are attached.

The procedure to delete supporting documents is as follows:

1. Select the files from the list displayed in the **Attached Files List** section.
2. Click  .
3. The selected file is deleted from the list.

The procedure to view supporting documents is as follows:

1. Select the Attachment to be viewed from the list displayed in **Attached Files List** section.
2. Click the **File Name**.
3. The "**Do you want to Open or Save (File Name)**" message is displayed.
4. Click **Open** to view the attachment.
5. The Attachment is displayed on the screen.

2.9.4 Prorate Ladder

To enter details for proration, the steps are as follows:

1. Click **Prorate Ladder** menu.
2. The **Add/Edit Prorate Ladder** screen is displayed.

Add/Edit Prorate Ladder Details

Prorate Ladder Capture

* Prorate Calculate Currency:

USD

* Total Amount:

Fields	Description	Remarks
*Serial Number	It is the serial number for the number of records added to the proration details.	<p>You can delete any record from the list and create a new record with the same serial number.</p> <ul style="list-style-type: none"> • Sorting of the captured records and output to billed member will be based on the increasing order of the number entered here. • It is not necessary to enter sequential numbers. For example, records can be entered with serial numbers such as 10, 20, 30, and 40 and so on, to accommodate easy insertion of new records in between existing records.
*Prorate Factor	It is the prorate factor.	-
*Percent Share	It is the percent share for each record.	-
*Amount	It is amount for each record.	-
Prorate Ladder List	It displays the details of proration added.	<p>Records can be deleted from this list. If any previously entered record needs to be modified, it has to be deleted first and re-entered with the correct data using the same serial number. This will ensure that the record is placed in its appropriate position after re-capture.</p>

Buttons	Description	Remarks
Add	Click Add to add the proration details.	The details added are displayed in the Prorate Ladder List section.
Close	Click Close to exit.	-
	Click Delete to delete the selected record.	Once the record is deleted, you can create a new record with the same serial number.

The procedure to add proration details is as follows:

1. Enter the details for the following fields:
 - **Prorate Calculate Currency**
 - **Total Amount**
 - **From Sector**
 - **To Sector**
 - **Carrier Prefix**
 - **Provisio/Req/Spa**
 - **Serial Number**
 - **Prorate Factor**
 - **Percent Share**
 - **Amount**
2. Click **Save** to save the details entered. The details entered are displayed in the Prorate Ladder List section.
3. Click **Close** to exit.

2.9.5 Billing Member's Reference Data

It displays the contact details of the person for the **Billing Member** as stated in the Member Profile.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
Location ID	It is the Location ID of the Billing Member .	The details displayed are as listed for the member in the Member Profile.
*Company Legal Name	It identifies the Legal Name of the member.	For example, WI-023-Wings Airways In this example, Wings Airways is the Legal Name of the Member.
Tax/VAT Registration#	It is the number required in the legal invoices.	It can be up to 25 alphanumeric characters.
Company Registration ID	It indicates the Registration ID of the member airline with SIS.	It should be as per IATA specifications.
Add. Tax/VAT Registration#	It is the number required in the legal invoices.	It can be up to 25 alphanumeric characters.
*Address Line 1	It is the member's postal address.	The address has to be the member's main office location address. This address can be changed to other office location address of the member.

Fields	Description	Remarks
Address Line 2	It is the member's postal address.	The address has to be the member's main office location address. This address can be changed to other office location address of the member.
Address Line 3	It is the member's postal address.	The address has to be the member's main office location address. This address can be changed to other office location address of the member.
*Country	It indicates the Country Name of the main office location of the member.	Select from the list of Countries provided. The Country Name can be up to 50 alpha numeric characters.
State/Province/Region	It indicates the state/province/region in the selected country.	The state/province/region list is generated automatically after the country is selected. Select the State/ Province/ Region from the list.
Postal Code	It indicates the Postal Code of the main office location of the member.	The Postal Code can be up to 50 alpha numeric characters.
*City	It indicates the City Name of the main office location of the member.	The City Name can be up to 50 alpha numeric characters.
Invoice Footer Information	It indicates the text to be displayed on the invoice for legal reasons.	-

The procedure to change the reference data of the contact is as follows:

1. Click **Clear** to edit the details of the **Location ID** displayed.
2. Edit the details of the contact.
3. Click **OK** to save the details of the contact.
4. The **Invoice Header** screen is displayed.

2.9.6 Billed Member's Reference Data

It displays the contact details of the person for the **Billed Member** as stated in the Member Profile.

3.2.2 Creating Invoice Header

To create an original invoice, click **Miscellaneous** menu and then point to **Receivables** and then click **Create Invoice**. The **Create Miscellaneous Invoice** screen is displayed.

- The fields marked with (*) are mandatory.
- By default, blue field is a drop-down list. The list is displayed only when you type first few letters in the text box or press the down-arrow key on the keyboard.
- By default, grayed field are auto populated with the data already present in the system.

The screenshot shows the 'Create Miscellaneous Invoice' screen in the SIS Air application. The interface includes a top navigation bar with the IATA logo and a menu bar with options like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is titled 'Create Miscellaneous Invoice' and contains several sections for data entry. The 'Invoice Header' section includes fields for Billed Member, Invoice Number, Invoice Date, Charge Category, and Tax Amount. There are also sections for Notes and Additional Details. The bottom of the screen has a 'Save Invoice Header' button.

Field	Description	Remark
*Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	For example, AF-057-Air France.
*Invoice Number	Invoice Number consists of total 10 Alphanumeric characters.	For example, AB12345678 Special characters like hyphen, dot, slash are not allowed. Invoice number will not be case sensitive. For example, Invoice Number 'ab12345678' will be considered as a duplicate invoice if 'AB12345678' has already been submitted.
*Invoice Date	Displays the current date, month and year.	By default, displays the current date, month and year. Please note that invoice date is not greater than the current billing period's closure date.
*Charge Category	Indicates the broad category of charges that can be applied on the invoice.	For example, Engineering.

Field	Description	Remark
Location (Airport/City Code)	Location Code of where service was provided.	<p>A valid IATA Airport/City code or UN Location code. For example, CNY</p> <p>Location Code is always mandatory at either Invoice header level or Line Item level</p> <ul style="list-style-type: none"> • If Location Code is defined at Invoice header level • If Location Code is not defined at Invoice header level, then it should be defined for every Line Item
P.O. Number	Indicates the reference to purchase order, if any.	If there is a reference to any Purchase Order against which the invoice is being raised, you can enter P.O. Number.
*Billing Member's Location ID	Displays the locations of the billing member associated with the user creating or modifying the invoice.	For example, Main-New York-US-USD.
Billed Member's Location ID	Displays the Main location of the billed member.	For example, Main-Mumbai-IN-USD.
Contact of Billing Member	The name of the person/supervisor sending the invoice.	For example, Sam.
Contact of Billed Member	The name of the invoice receiver.	For example, John.

Field	Description	Remark
*Settlement Method	The invoice settlement method.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> □ I: Settlement via ICH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ICH members • Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member) ▪ A: Settlement via ACH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ACH members. • If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Passenger billings via the ICH; then ACH cannot be used. □ M: Settlement via ACH using RAM Rule <ul style="list-style-type: none"> • Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) • Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. ▪ B: Bilateral Settlement (direct settlement between members not involving any clearing house). <ul style="list-style-type: none"> • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rule as appropriate. □ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement □ A/I/M/X can be changed to Bilateral if required. □ A can be changed to M if required.

Field	Description	Remark
		<p>When settlement is not possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p> <p>Note:</p> <p>In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method billing or billed member</p>
*Billing Year/Month/Period	Displays the invoice submission year, month and period.	<p>By default, the current year, month and period is displayed.</p> <ul style="list-style-type: none">• The previously closed period can be selected only if the late submission window is open.• One of the future four billing periods can also be selected if the invoice is to be submitted in the future period.

Field	Description	Remark
*Currency of Billing	Displays the currency code of the billing member	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> When Settlement Method is I: <ul style="list-style-type: none"> If both Billing/Billed airlines are in Zone A; value should be GBP. If both the Billing & Billed airlines are in Zone D; value should be EUR. If both Billing/Billed airlines are in Zone B, value should be USD. If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. When Settlement Method is M (ACH Inter-clearance Billings); value should be USD. When Settlement Method is M (ACH member billing ACH member based on RAM rule); value can be any currency. When Settlement Method is A value can be any currency. When Settlement Method is B it can be any currency. When Settlement is X it can be any currency. <p>Note:</p> <ul style="list-style-type: none"> In case of merger scenarios, where the billing member or billed member is merged into another member, the settlement method will be considered as that of the final parent member of billing or billed member.
TAX Amount	The tax applicable on the entire invoice	It is the sum of the Tax applied at the Invoice Header and Total Tax Amount stated in all Line Items.
VAT Amount	The VAT applicable on the entire invoice	It is the sum of the VAT applied at the Invoice Header and Total VAT Amount stated in all Line Items.
Add/Deduct Charge	The Add/Deduction charge applicable on the entire invoice	It is the sum of the Add/Deduct Charge applied at the Invoice Header and Total Add/Deduct Amount stated in all Line Items.
Total Amount in Billing Currency	Displays the sum of the Line Net Amount and the Tax, VAT and Add/Deduct charge applied at the invoice header.	The value will be calculated by the system and displayed here.

Field	Description	Remark
*Exchange Rate	Displays the FDR of the stated Billing Year Month applicable for the stated Billing and Clearance currencies.	<ul style="list-style-type: none"> The value will be automatically generated for invoices billed using Settlement Method I, A or M. This is optional for the Bilateral Settlement, this will not be auto-populated and will have to be keyed in by the user if required. This field is mandatory for Settlement Method ICH using Special Agreement; the value should be entered by the user. It should not be zero or negative value.
Currency of Clearance	Displays the applicable Clearance Currency as per the zones of the Billing and Billed entities.	<p>By default, displays the applicable Clearance Currency as per the zones of the Billing and Billed entities.</p> <ul style="list-style-type: none"> If settlement method is ACH then system will default the value to USD. This can be changed to any currency as allowed by ACH. When Settlement Method is M; value can be any currency as allowed by ACH. This field is optional when settlement method is Bilateral. When Settlement via ICH using Special Agreement it can be any currency <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH Zone of the parent member will be considered for determination/validation of Settlement Method</p>
Total Amount in Clearance Currency	Displays the value after dividing Amount in Billing Currency by the Exchange Rate.	The value is derived by the system.

Field	Description	Remark
Digital Signature	Displays as per the member profile set up of the billing entity.	Digital Signature is auto displayed as per the Member Profile set-up of the billing entity. <ul style="list-style-type: none"> In case Member Profile states that Digital Signature is required on the submitted invoices, but you don't want a digital signature on the invoice being captured, the value can be changed to No. However, if the Member Profile set up states that Digital Signature is not required or if the countries stated in the Billing & Billed Location ID are not supported for digital signature, then the value of this field can not be changed to Yes.
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-
Invoice Template Language	It indicates Invoice Template Language	-
Total Tax Amount Local Currency Code	Currency code for Total Tax Amount.	It is a drop down field with default value as Please Select .
Total Tax Amount Local	Total tax amount	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.
Local Tax Exchange Rate	Local tax exchange rate.	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.
Payment Details: Fields are enabled only if the settlement method is Bilateral.		
Payment Terms Code	It indicates a code defined for the payment terms.	For example, 15NET, 14 DAYS, and so on.
Payment Due By	Indicates the date by which the payment is due.	Select from the date picker. Enter the no. of days for the payment in the Within Days field.
Get Discount	Indicates the discount % if the payment is made with the due date suggested.	Select from the date picker. Enter the no. of days for the payment in the Within Days field.
Remarks	Enter remarks if any.	-

Field	Description	Remark
Bank Details	It displays the Bank details of the member as listed in the member profile.	Values for the following fields is displayed: <ul style="list-style-type: none"> • Bank Name • IBAN • SWIFT • Bank Code • Branch Code • Bank Account Number • Bank Account Name • Currency Code
Note	Pre-defined list of notes or you can define a specific note different from the available drop down.	For example, Payment Terms.
Note Description	The description of the notes.	For example, Internal Customer Number. Any specific information that is necessary to be stated on the PDF invoice.
Additional Details	Pre-defined list of additional details or you can define a specific detail different from the available drop-down.	Any additional information to be stated that needs to be shown on the PDF.
Additional Details Description	The additional details you may want to enter.	Any additional information that supports the invoice. This information will not be printed on the invoice.

Procedure:

1. Enter **Billed Member**.
2. Enter **Invoice Number**.
3. Select Invoice Date from the date picker.
4. Select applicable **Charge Category**.
5. Enter **Location (Airport/City Code)**.
6. Enter **P.O. Number** (Purchase Order Number).
7. If required, click the hyperlink to view/modify the **Billing Member- Location ID**.
8. If required, click the hyperlink to view/modify the **Billed Member- Location ID**.
9. If required, click the **Contact of Billing Member** hyperlink to add the contact details of the billing member.
10. If required, click the **Contact of Billed Member** hyperlink to add the contact details of the billed member
11. If required, select applicable **Settlement Method** from the drop-down list.
12. If required, select applicable **Billing Year/Month/Period**.
13. If required, select applicable **Currency of Billing**.
14. Enter the **Tax Amount** applicable on the entire invoice.
15. Enter applicable **VAT Amount** on the entire invoice.
16. Enter applicable **Add/Deduct Charge** on the invoice.
17. **Total Amount in Billing Currency** displays the total of the Line Net Amount and the Tax, VAT and Add/Deduct charge applied on the invoice header.
18. The current month **Exchange Rate** as per the Currency of Billing and Currency of Clearance for the stated Billing Year/Month/Period will be auto-populated.
19. If required, select applicable **Currency of Clearance** to change.
20. **Total Amount in Clearance Currency** is the total derived after dividing Amount in Billing Currency by the Exchange Rate.
21. If required, select applicable **Digital Signature** option from the drop-down list.
22. Enter to change the **CH Agreement Indicator**.

23. Change **CH Due Date** from the date picker.
24. Select to change the **Invoice Template Language** from the drop down list.
25. If required, select applicable **Total Tax Amount Local Currency Code** to change.
26. Enter **Total Tax Amount Local**.
27. Enter **Local Tax Exchange Rate**.
28. Enter **Note**.
29. Enter details of the notes in the **Note Description** text box.
30. Enter **Additional Details**.
31. Enter additional details in the **Additional Details Description** text box.
32. Enter **Payment Details** only if settlement method is Bilateral.
33. Click **Save Invoice Header**. A message **Invoice Header created successfully** along with a new **Create Line Item** screen is displayed.

3.2.3 Creating Line Item

After the header is created successfully, the Create Line Item screen is displayed.

The Invoice Header section displays the following fields:

Field	Description
Invoice Number	Displays the number of the invoice.
Invoice Date	Displays the date on which invoice is created.
Billed Member	Displays the Numeric code, alpha code and the commercial name of the billed member.
Charge Category	Displays the name of the Charge Category.
Billing Amount	Displays the invoice amount in Billing Currency.
Invoice Status	Displays the status of the invoice whether Open/Ready For Submission/ Ready for Billing/IS-Web-Validation Error/Submitted.
Billing Period	Displays the billing month period of the invoice.

The following table describes various fields appearing in the Line Item section.

Field	Description	Remarks
Line Item #	Auto generated by the system.	For example, Line Item # 1 will be incremented while adding a new line item.
Charge Code	The list of codes to specify the nature of the service charged.	Only applicable charge codes for the selected Charge Category will be shown.
Location (Airport/City Code)	The location where service was provided.	<p>If there was no location entered in the credit note/invoice header; you should enter a location code.</p> <ul style="list-style-type: none"> Location Code is always mandatory at either Invoice header level or Line Item level If Location Code is defined at Invoice header level, it cannot be defined for any Line Item
P.O. Line Number	Line Item Number in the Purchase Order.	Only enter if the P.O. number is entered in the credit note/ invoice header.
Product ID	Specific code of the product.	Only entered if specific code is applicable.
Charge Code Type	This further defines the Charge Code	<p>This field will appear only for certain Charge Category Charge Code combination.</p> <p>Only applicable charge code types for the selected charge code will be shown.</p>
Description	Description of the service provided.	-
Service Start Date	By default, displays the first day of the Billing Month stated in the credit note/invoice header.	<p>For example, if the Billing Month Year is October 2011, the date 01-October-2011 will be populated here.</p> <ul style="list-style-type: none"> Start Date can not be greater than or equal to the Service End Date. If the line item refers to a specific date on which goods or services were delivered then no service start date is required. If the line item refers to a period during which goods or services were delivered, then the Service Start Date is required and refers to the start date of that period.

Field	Description	Remarks
*Service End Date	By default this will be populated with the last day of the Billing Month stated in the invoice header.	<p>For example, if the Billing Month Year is October 2011, the date 31-October-2011 will be populated here.</p> <ul style="list-style-type: none"> • End Date can not be less than or equal to the Service Start Date. • If the line item refers to a specific date on which goods or services were delivered, then the Service End Date refers to this specific date. • If the line item refers to a period during which goods or services were delivered, then the Service End Date refers to the end date of that period.
Quantity	Quantity of service/products/goods provided.	<p>If you capture a Line Item detail, then the quantity that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> • When the UOM Code, Unit Price, Scaling Factor are the same at all the Line Item Detail Level and the Minimum Quantity Flag is not checked for any of the line details. • In this scenario, the Quantity will be added up at the Line Item level, UOM Code, Unit Price & Scaling Factor will be the same as that in the Line Details. <p>Rule 2</p> <ul style="list-style-type: none"> • When either the UOM Code, Unit Price, Scaling Factor is different or the Minimum Quantity Flag is checked in even one Line Detail. • In this scenario, the Quantity will be 1, UOM Code will be Each and the Unit Price will be equal to the sum of the Line Detail Totals and Scaling Factor will be 1. • This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.

Field	Description	Remarks
*UOM Code	By default, displays Each.	<p>You can change to the applicable unit of measure by selecting the unit of measure from the drop- down list or by typing the first few characters of the unit of measure.</p> <p>For example, Hours, Each, Kilogram and so on.</p> <p>If you capture a Line Item detail, then the unit of measure that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> • When the UOM Code, Unit Price, Scaling Factor are the same at all the Line Item Detail Level and the Minimum Quantity Flag is not checked for any of the line details: • In this scenario, the Unit of measure will be as stated at the Line Item detail level. <p>Rule 2</p> <ul style="list-style-type: none"> • When either the UOM Code, Unit Price, Scaling Factor is different or the Minimum Quantity Flag is checked in even one Line Detail. • In this scenario, the Unit of measure is Each. • This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.

Field	Description	Remarks
*Unit Price	The applicable Unit Price.	<p>If you capture a Line Item detail, then the Unit Price that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> When the UOM Code, Unit Price, Scaling Factor are same for all the related Line Item detail level and the Minimum Quantity Flag is not selected for any Line Item details. In this scenario, the Unit Price will be as stated at the Line Item Detail level. <p>Rule 2</p> <ul style="list-style-type: none"> When either the UOM Code, Unit Price, Scaling Factor is different at even one related Line Item detail level or the Minimum Quantity Flag is selected in even one Line Detail. In this scenario, the Unit Price will be equal to Line Total. This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.

Field	Description	Remarks
Scaling Factor	By default, displays 1 and indicates the number of units.	<p>For example, Unit price is per 1000 tons then the value in Scaling Factor will be '1000'. The default value can be changed as required.</p> <p>If you capture a Line Item detail, then the Unit Price that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> When the UOM Code, Unit Price, Scaling Factor are same for all the related Line Item detail level and the Minimum Quantity Flag is not selected for any Line Item details. In this scenario, the Scaling Factor will be stated at the Line Item detail level. <p>Rule 2</p> <ul style="list-style-type: none"> When either the UOM Code, Unit Price, Scaling Factor is different at even one related Line Item detail level or the Minimum Quantity Flag is selected in even one Line Detail. In this scenario, the Scaling Factor will be 1. This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.
Line Total	Derived as total of Quantity and Unit Price divided by Scaling Factor.	If Minimum Quantity Flag is selected at this level, then the Line Total will not be derived. You will have to enter the total value in this field.
Tax Amount	Derived as the sum of tax applicable on the line item and the related line item details.	This is a derived field.
VAT Amount	Derived as the sum of the VAT applicable on the line item and the related line item details.	This is a derived field.
Add/Deduct Charge	Derived as the sum of the additional/deduction charge applicable on the line item and related line item details.	This is a derived field.
Line Net Total	The total of the Line Total and total Tax total VAT and total Add/Deduct Charge.	This is a derived field.

Field	Description	Remarks
Minimum Quantity Flag	Required only when the charge is a minimum charge for a service provided irrespective of the quantity.	For example, there could be a minimum charge for carrying cargo up to 200 kilograms. In this case, you would need to show the quantity actually carried and the applicable charge. But there is no specific Unit Price for this amount. But since Unit Price is a mandatory field, you will have to indicate a unit price. If the check box is selected, then: <ul style="list-style-type: none"> Line Total will not be derived. It will be mandatory for you to capture this value. The validation of the Unit Price into Quantity divided by the Scaling Factor will not be done.
Total Tax Amount Local Currency Code	Currency code for Total Tax Amount	It is a drop down field with default value as Please Select .
Total Tax Amount Local	Total tax amount	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.
Local Tax Exchange rate	Local tax exchange rate	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.
Total Net Amount Local	Total net amount local	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.
Additional Details	Pre-defined list of additional details or you can define specific details, different from the available drop down.	Any additional information to be stated that needs to be shown on the PDF.
Additional Details Description	The additional details.	Any additional information that supports the invoice. This information will not be printed on the invoice.
Rejection Reason Code	The reason code for rejection as per valid codes defined in the system.	Applicable and mandatory for Miscellaneous Rejection Invoices only. This defines the Reason Code for rejection. Should be a valid code as defined by the industry
Original Line Item	Line item of the rejected invoice.	This is visible only for rejection invoices.

Procedure:

1. **Line Item #** will be auto-generated by the system.
2. Select applicable **Charge Code** from the drop-down list.
3. If required, enter code **Location (Airport/City Code)**.
4. If required, enter **P.O. Line Number**.
5. Enter the specific code in the **Product ID** text box.
6. If required, enter **Original Line item number**.
7. Select **Rejection reason code** from drop down list.
8. Select the applicable **Charge Code Type** from the drop-down list.
9. Enter description text of the service provided in the **Description** text box.

10. Select applicable **Service Start Date** from the date picker.
11. Select applicable **Service End Date** from the date picker.
12. Enter **Quantity** of service/products/goods provided.
13. Select applicable **UOM Code** from the drop-down list.
14. Enter applicable **Unit Price**.
15. Enter applicable **Scaling Factor**.
16. If required, enter the total value in the **Line Total** box.
17. Enter **Tax** applicable on the Line Item being captured.
18. Enter **VAT** applicable on the Line Item being captured.
19. Enter **Add/Deduct Charge** applicable on the Line Item being captured.
20. **Line Net Total** displays the total of Line Total and total Tax, VAT and Add/Deduct Charge.
21. If required, select the **Minimum Quantity Flag** check box.
22. If required, select applicable **Total Tax Amount Local Currency Code** to change.
23. Enter **Total Tax Amount Local**.
24. Enter **Local Tax Exchange Rate**.
25. Enter **Total Net Amount Local**.
26. Enter **Additional Details**.
27. Enter additional details in the **Additional Details Description** text box.
28. Click **Save**. A confirmation message is displayed.

The following table describes the functions of various buttons on the Line Item screen.

Button	Function
Add New Line Item	You can add a new Line Item.
Add Line Item Detail	You can add a Line Item Detail.
Attachments	You can insert attachments.
Back	You can go back to the Credit Note Header.

The Invoice Header section displays the following fields:

Field	Description
Invoice Number	Displays the number of the invoice.
Invoice Date	Displays the date on which invoice is created.
Billed Member	Displays the alphanumeric code and the commercial name of the billed member or airline.

Field	Description
Charge Category	Displays the name of the Charge Category.
Billing Amount	Displays the invoice amount in Billing Currency.
Invoice Status	Displays the status of the invoice whether Open/Ready For Submission/IS-Web Validation error/Ready For Billing/Submitted.
Billing Period	Displays the billing month period of the invoice.

The details of the Line Item for which the Line item detail is being captured are displayed in the Line Item section.

Field	Description
Line Item Number	Displays the Line Item number.
Charge Code	Displays the Charge Code for which the Line Item was captured.
Service Start Date	Displays the start date of the service provided. If the service was provided on a specific date then this will be blank.
Service End Date	Displays the end date of the service provided.
Location Code	Displays the location where service was provided. If the location was captured at the invoice header level then this will be blank.
Quantity	Displays the Quantity.
UOM Code	Displays the unit of measure.
Unit Price	Displays the applicable Unit Price.
Scaling Factor	Displays the scaling factor.
Line total	Displays the sum total of all related Line Detail Totals.
Tax	Displays the sum of Tax applicable at the Line Item and related Line Item Detail levels.
VAT	Displays the sum of VAT applicable at the Line Item and related Line Item Detail levels.
Add/ Deduct Charge	Displays the sum of Additional Charge applicable at the Line Item and related Line Item Detail levels.
Line Net Total	Displays the net total of Line Total, Tax, VAT and Additional Charge.
Description	Displays the description of the service provided.

The following table describes various fields appearing in the Line Item Detail section.

Field	Description	Remarks
Line Item Detail #	Auto generated by the system.	For example, Line Item Detail # 1

Field	Description	Remarks
Service Start Date	The Start Date as stated in the related Line Item level.	<p>You can either select a different date or leave it blank. If there is no Start Date, the auto-populated date should be cleared and the month set as Please Select.</p> <ul style="list-style-type: none"> • If the entered Start Date at this level is lesser than that stated at the related Line Item level, then you will receive a warning message that this date is outside the date range stated at the related Line Item level and to confirm if the date range should be updated at higher level also. You can select a new Start Date or allow the system to update the date range at the higher level. • If the Line Item detail refers to a specific date on which goods or services were delivered, then no start date is required. • If the Line Item detail refers to a period during which goods or services were delivered, then the Start Date is required and refers to the Start date of that period. • If there was no Start Date stated at the related Line Item level, then you cannot edit the start date. • Service Start Date can not be greater than or equal to the Service End Date.
*Service End Date	Displays the End Date as stated in the related Line Item level	<p>If no Start Date stated at the related Line Item level, then you cannot edit End Date.</p> <ul style="list-style-type: none"> • If the End Date entered at this level is greater than that stated at the related Line Item level, then you will receive a warning message that this date is outside the date range stated at the related Line Item level and confirm if the date range should be updated at higher level also. You can select a new End Date or allow the system to update the date range at the higher level. • Service End Date can not be lesser than or equal to the Service Start Date.

Field	Description	Remarks
Product ID	Specific code of the product.	<p>If a Product ID is stated at the line item level, it will auto-populate here. If required, you can also change the product ID or clear it.</p> <ul style="list-style-type: none"> • If different Product ID is entered, you will see warning. • You can continue or undo the changes.
Description	Description of the service provided.	-
Minimum Quantity Flag	Required only when the charge is a minimum charge for a service provided irrespective of the quantity.	<p>For example, there could be a minimum charge for carrying cargo up to 200 kilograms. In this case, you would need to show the quantity actually carried and the applicable charge. But there is no specific Unit Price for this amount. But since Unit Price is a mandatory field, you will have to indicate a unit price.</p> <p>If the check box is selected, then:</p> <ul style="list-style-type: none"> • Line Detail Total will not be derived. It will be mandatory for you to capture this value. • The validation of the Unit Price into Quantity divided by the Scaling Factor will not be done.
*Quantity	Quantity of service/products/goods.	-
*UOM Code	By default, displays Each .	<p>You can select the applicable unit of measure if different.</p> <p>For example, Hour, Kilogram, Liter.</p>
*Unit Price	The applicable Unit Price.	-
Scaling Factor	By default, displays 1 and indicates the number of units for which the unit price is stated.	For example, If Unit Price is for multiple units, Unit price is per 1000 tons then the value in Scaling Factor will be '1000'. The default value can be changed as required.
Line Detail Total	Product of Quantity and Unit Price divided by Scaling Factor.	If Minimum Quantity Flag is selected at this level, then the Line Detail Total will not be derived. You will enter the total value in this field.
Tax Amount	The tax applicable only on the line item detail being captured.	-
VAT Amount	The VAT applicable only on the line item detail being captured.	-
Add/Deduct Charge Name	The additional charge/ deduction that is applicable only on the line item detail being captured.	-
Line Detail Net Total	Total of Line Detail Total and Tax, VAT and Additional Charge on the line detail being captured.	Total is derived by the system.

Procedure:

1. **Line Item Detail Number** is auto-generated by the system.
2. Select applicable Service Start Date from the date picker.
3. Select applicable **Service End Date** from the date picker.
4. If required, enter different **Product ID**.
5. Enter description text of the service provided in the **Description** text box.
6. Enter the quantity of service/ product/ goods provided.
7. If required, select applicable unit of measure from the **UOM Code** drop-down list.
8. Enter applicable **Unit Price**.
9. Enter Scaling Factor.
10. **Line Detail Total** is derived as the total of **Quantity** and **Unit Price**.
11. Enter **Tax** applicable only on the line item detail being captured.
12. Enter **VAT** applicable only on the line item detail being captured.
13. Enter **Add/Deduct Charge** applicable only on the line item detail being captured.
14. Click either of the following buttons described in the table as per required action.
15. Enter the values for the dynamic fields. These fields are valid for certain charge category and charge code combinations. For more information on the dynamic fields please see the related topics.

The following table describes functions of buttons on the Line Item Detail screen.

Button	Description
Save and Add	You can save current capture line item detail screen and open blank Line Item Detail screen.
Save and Duplicate	You can save current Line Item Detail screen and open Line Item screen with pre-populated values from the previous Line Item Detail screen except Service End Date. You need to enter the Service End Date.
Save and Back	You can save current Line Item Detail screen and open Edit Line Item screen. The screen displays the list of line item details.
Back	You will see a warning message regarding unsaved changes on the screen. To continue click Proceed or Cancel to continue with the same screen.

3.3 Editing Invoices

3.3.1 Editing Miscellaneous Invoice

To edit Miscellaneous invoice, search the invoice using **Receivables** submenu. Select the desired invoice and then click edit. The **Edit Miscellaneous Invoice** screen is displayed.

The screenshot displays the 'Edit Miscellaneous Invoice' screen. At the top, there's a navigation bar with 'Passenger', 'Cargo', 'Miscellaneous', 'UATP', 'Reports', 'General', and 'Profile and User Management'. Below this, the 'Edit Miscellaneous Invoice' title is shown. The main form is divided into several sections: 'Invoice Header' with fields for Billed Member, Invoice Number, Invoice Date, Charge Category, and Location; 'Payment Details' with fields for Payment Terms Code, Payment due by, Get discount of, and Remarks; 'Bank Information' with fields for Bank Name, IBAN, SWIFT, Bank Code, Branch Code, Bank Account Number, and Bank Account Name; 'Total Tax Amount' with fields for Local Currency Code, Total Tax Amount Local, and Local Tax Exchange Rate; 'Original Invoice', 'Rejection Invoice', and 'Correspondence Invoice' checkboxes; 'Notes' section with a Note Description field; and 'Additional Details' section with an Additional Details Description field. At the bottom, there's a 'Line Items' table with columns for Actions, Line Item #, Charge Code, Service Start Date, Service End Date, Description, Quantity, UOM Code, Unit Price, Scaling Factor, Line Total, Tax, VAT, and Add/ Deduct Charge. The table shows one line item: '1 Fees' with a charge code of '01-Mar-19' and a description of 'ABC'. Below the table, there's a 'Validate Invoice' button.

Edit Miscellaneous Invoice screen displays the following fields:

Field	Description	Remarks
Billed Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	For example, WI-023-Wings Airways
Invoice Date	Displays the invoice date of the billed invoice.	For example, 09-May-11
Charge Category	Displays the charge category of the invoice.	-

Field	Description	Remarks
Location (Airport/City Code)	The location where service was provided.	<ul style="list-style-type: none"> Location Code is always mandatory at either Invoice header level or Line Item level If Location Code is defined at Invoice header level, it cannot be defined for any Line Item If Location Codes are defined for all Line Items, then it cannot be captured at the header level If Line Items exist, and a Location Code already exists at the header level, it can be modified to another value but cannot be changed to blank
*Billing Member's Location ID	Displays the locations of the billing member associated with the user creating or modifying the invoice.	For example, Main-LONDON-GB-USD.
Billed Member's Location ID	Displays the billed member's MAIN location or the selected Location ID.	For example, Main-MUMBAI-IN-USD.
Contact of Billing Member	The name of the person/supervisor sending the invoice.	For example, Sam
Contact of Billed Member	The name of the invoice receiver.	For example, John
Total Amount in Billing Currency	Displays the sum of the Line Net Amounts and the Tax, VAT and Add/Deduct charge applied on the entire invoice.	-
Exchange Rate	Displays with the FDR of the stated Billing Year Month applicable for the stated Billing and Clearance currencies	For example, 1.14612
Total Amount in Clearance Currency	Displays the value after dividing Amount in Billing Currency by the Exchange Rate.	-
Invoice Owner	Displays the name of the person who created the invoice.	-
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-
Invoice Template Language	It indicates Invoice Template Language	-

Field	Description	Remarks
Total Tax Amount Local Currency Code	Currency code for Total Tax Amount	It is a drop down field with default value as Please Select .
Total Tax Amount Local	Total tax amount	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.
Local Tax Exchange rate	Local tax exchange rate	This is an optional field; this will not be auto-populated and will have to be keyed in by the user if required.

Note: You can edit only enabled fields.

Procedure:

1. If required, edit fields which are enabled.
2. Click **Save Invoice Header**. A confirmation message is displayed.
3. **Line Items** table allows you to edit listed **Line Items**.
4. **Edit Line Item** screen allows you to edit listed **Line Item Details**.

3.3.2 Editing Line Item

Once you create line item detail, you will be directed to Edit Line Item screen.

The Invoice Header section displays the following fields:

Field	Description	Remarks
Invoice Number	Displays the number of the invoice.	For example, AB12345678.
Invoice Date	Displays the selected date for the invoice.	For example, 06-May-11.
Billed Member	Displays the name and code of the billed member.	For example, NW-012-Northwest.
Charge Category	Displays the selected charge category for the invoice.	For example, ATC.
Location (Airport/City Code)	The location where service was provided.	<ul style="list-style-type: none"> Location Code is always mandatory at either Invoice header level or Line Item level If Location Code is defined at Invoice header level, it cannot be defined for any Line Item If Location Code is not defined at the header level, then it should be defined for the Line Item

Field	Description	Remarks
Billing Amount	Displays the applicable billing amount.	-
Invoice Status	Displays the current status of the invoice.	For example, Open.
Billing Period	Displays the billing month/year/period of the invoice.	For example, Apr 2011 P4. Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Exchange Rate. If the system needs to populate Exchange Rate, but does not find it for the future month, it will result in an error while saving the data

Procedure:

1. Select the record from the **Line Item Details** list to edit and then select the check box and click  Edit icon. **Edit Line Item Detail** screen is displayed.
2. If required, edit fields which are enabled.
3. Click **Save Invoice Header**. A confirmation message is displayed.
4. **Line Items** table allows you to edit listed Line Items.
5. **Edit Line Item** screen allows you to edit listed **Line Items**.
6. If required, edit fields which are enabled.
7. Click **Save** and **Back**. The updated details will be saved.

Note: You can only edit fields which are enabled for the edit.

The following table describes various buttons appearing on the Edit Line Item screen.

Button	Description
Save	You can save current edited line item screen.
Add New Line Item	You can add new line item.
Add New Line Item Detail	You can add new line item detail.
Attachments	You can link any supporting documents to the invoice being captured. For example, Ramp Handling Form, Sales and Service Form.
Back	You will be directed to Edit Miscellaneous Invoice screen.

3.3.3 Editing Line Item Detail

On the **Edit Line Item** screen, in Line Item Details table you can edit Line Item Details.

The fields marked with red (*) are mandatory.

The Invoice Header section displays the following fields:

Field	Description	Remarks
Invoice Number	Displays the number of the invoice.	For example, AB12345678
Invoice Date	Displays the selected date for the invoice.	For example, 06-May-11
Billed Member	Displays the name and code of the billed member.	For example, NW-012-Northwest
Charge Category	Displays the selected charge category for the invoice.	For example, ATC
Billing Amount	Displays the applicable billing amount.	-
Invoice Status	Displays the current status of the invoice.	For example, Open
Billing Period	Displays the billing month/year/period of the invoice.	For example, Apr 2011 P4

The Line Item section displays the following fields:

Field	Description	Remarks
Line Item Number	Displays the number of the line item.	For example, 1

Field	Description	Remarks
Charge Code	Displays the applied charge code.	For example, Approach
Service Start Date	Displays the start date of the service when goods or services were delivered.	For example, 01-Apr-11
Service End Date*	Displays the last day of the Billing Month stated in the credit note/invoice header or newly applied end date.	For example, 30-Apr-11
Location Code	Displays the code of the location where service was delivered.	-
Quantity*	Displays the applied quantity of services/goods.	-
UOM Code*	Displays the applied UOM Code.	For example, Each
Unit Price*	Displays the Unit Price.	-
Scaling Factor	Displays the applicable Scaling Factor.	-
Line Total	Displays the Line Total on the entire invoice.	-
Tax	Displays the tax applicable on the line item.	-
VAT	Displays the VAT applicable on the line item.	-
Add/Deduct Charge	Displays the Add/Deduct Charge applicable on the line item.	-
Line Net Total	Displays the total of the Line Total and total Tax, total VAT and total Add/Deduct Charge.	-

Procedure:

1. Select the record from the **Line Item Details** list to edit and then click to select the check box and then click edit icon . **Edit Line Item Detail** screen is displayed.
2. If required, edit fields which are enabled.
3. Click **Save Invoice Header**. A confirmation message displayed
4. **Line Items** table allows you to edit listed **Line Items**.
5. **Edit Line Item Detail** screen allows you to edit listed **Line Item Details**.
6. Click **Save**. The updated details get saved.

The following table describes various buttons appearing on the Edit Line Item Detail screen.

Button	Description
Save and Add	You can save current Edit Line Item Detail screen and open blank Line Item Detail screen.
Save and Duplicate	You can save current Edit Line Item Detail screen and open Line Item screen with pre-populated values from the previous Line Item Detail screen except Service End Date. You need to enter the Service End Date.
Save and Back	You can save current Edit Line Item Detail screen and open Edit Line Item screen. The screen displays the list of line item details.
Back	You will be directed to Edit Line Item screen.

3.4 Rejecting Invoices

In Miscellaneous, you can reject invoices in three ways. This section describes all three ways to reject an invoice.

1. Rejecting Invoice via Receivables.
2. Rejecting Invoice via Billing History and Correspondence.
3. Rejecting Invoice via Payables.

3.4.1 Rejecting Invoice via Receivables

To create rejection invoice via receivables, click **Miscellaneous** tab and then point to **Receivables** and then click **Create Invoice**. The **Create Miscellaneous Invoice** screen is displayed.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press the down-arrow key on the keyboard.

The following table describes various fields appearing on the Create Miscellaneous Invoice screen.

Field	Description	Remarks
*Billed Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	For example, AF-057-Air France
*Invoice Number	Invoice Number consists of total 10 Alphanumeric characters.	For example, AB12345678 Special characters like hyphen, dot, slash and so on are not allowed. Invoice number will not be case sensitive. For example, Invoice Number 'ab12345678' will be considered as a duplicate invoice if 'AB12345678' has already been submitted.
*Invoice Date	Displays the current date, month and year.	By default, displays the current date, month and year. Please ensure that the new date is not greater than the current billing period's closure date.
*Charge Category	Indicates the broad category of charges that can be applied on the invoice	For example, Engineering.
Location (Airport/City Code)	Location Code of where service was provided.	A valid IATA Airport/City code or UN Location code. For example, CNY.
P.O. Number	Indicates the reference to purchase order, if any.	If there is a reference to any Purchase Order against which the Invoice is being raised, you can enter P.O. Number
*Billing Member's Location ID	Displays the locations of the billing member associated with the user creating or modifying the invoice.	For example, Main-New York-US-USD.
Billed Member's Location ID	Displays the Main location of the billed member.	For example, Main-Mumbai-IN-USD.
Contact of Billing Member	The name of the person/supervisor sending the invoice.	For example, Sam.

Field	Description	Remarks
Contact of Billed Member	The name of the invoice receiver.	For example, John.
*Settlement Method	The invoice settlement method.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> □ I: Settlement via ICH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ICH members • Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member) • A: Settlement via ACH • Applicable when both billing and billed members are ACH members. • If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Passenger billings via the ICH; then ACH cannot be used. □ M: Settlement via ACH using RAM Rule <ul style="list-style-type: none"> • Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) • Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. • B: Bilateral Settlement (direct settlement between members not involving any clearing house). • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rule as appropriate. □ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement

Field	Description	Remarks
		<p><input type="checkbox"/> A/I/M/X can be changed to Bilateral if required.</p> <p><input type="checkbox"/> A can be changed to M if required.</p> <p>When settlement is not possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p> <p>Note:</p> <p>In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method billing or billed member</p>
*Billing Year/Month/Period	Displays the invoice submission year, month and period.	<p>By default, the current year, month and period is displayed. You can select the previous closed period if the late submission window is open and you want to submit the invoice in the previous period.</p> <p>One of the future four billing periods can be selected if the invoice is to be submitted in the future period.</p> <p>Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Exchange Rate. If the system needs to populate Exchange Rate, but does not find it for the future month, it will result in an error while saving the data</p>

Field	Description	Remarks
*Currency of Billing	Displays the currency code of the billing member.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> ▪ When Settlement Method is I: <ul style="list-style-type: none"> • If both Billing/Billed airlines are in Zone A; value should be GBP. • If both the Billing & Billed airlines are in Zone D; value should be EUR. • If both Billing/Billed airlines are in Zone B, value should be USD. • If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. ▪ When Settlement Method is M (ACH Inter-clearance Billings); value should be USD. ▪ When Settlement Method is M (ACH member billing ACH member based on RAM rule); value can be any currency. ▪ When Settlement Method is A value can be any currency. ▪ When Settlement Method is B it can be any currency. ▪ When Settlement is X it can be any currency. <p>Note:</p> <ul style="list-style-type: none"> • In case of merger scenarios, where the billing member or billed member is merged into another member, the settlement method will be considered as that of the final parent member of billing or billed member.
TAX Amount	The tax applicable on the entire invoice.	The grayed out field is a derived field. It is the sum of the Tax applied at the Invoice Header and Total Tax Amount stated in all Line Items.
VAT Amount	The VAT applicable on the entire invoice.	The grayed out field is a derived field. It is the sum of the VAT applied at the Invoice Header and Total VAT Amount stated in all Line Items.
Add/Deduct Charge	The Add/Deduction charge applicable on the entire invoice	The grayed out field is a derived field. It is the sum of the Add/Deduct Charge applied at the Invoice Header and Total Add/Deduct Charge Amount stated in all Line Items.

Field	Description	Remarks
Total Amount in Billing Currency	Displays the sum of the Line Net Amount and the Tax, VAT and Add/Deduct charge applied on the invoice header.	The value will be calculated by the system and displayed here.
*Exchange Rate	Displays with the FDR of the stated Billing Year Month applicable for the stated Billing and Clearance currencies.	<ul style="list-style-type: none"> The value will be automatically generated for settlement method I/A/M. This is optional for the Bilateral Settlement, this will not be auto-populated and will have to be keyed in by the user if required. This field is mandatory for Settlement Method ICH using Special Agreement and the value should be entered by the user. It should not be zero or negative value.
Currency of Clearance	Displays the applicable Clearance Currency as per the as per the zones of the Billing and Billed entities.	<p>By default, displays the applicable Clearance Currency as per the as per the zones of the Billing and Billed entities.</p> <ul style="list-style-type: none"> If settlement method is ACH then system will default the value to USD. This can be changed to any currency as allowed by ACH. When Settlement Method is M; value can be any currency as allowed by ACH. This field is optional when settlement method is Bilateral. When Settlement via ICH using Special Agreement it can be any currency. <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH zone of the parent member will be considered for determination/validation of Settlement Method.</p>
Total Amount in Clearance Currency	Displays the value after dividing Amount in Billing Currency by the Exchange Rate	The value is derived by the system.

Field	Description	Remarks
Digital Signature	Displays as per the member profile set up of the billing entity.	Digital Signature is auto displayed as per the Member Profile set-up of the billing entity In case Member Profile states that Digital Signature is required on the submitted invoices, but you don't want a digital signature on the invoice being captured, the value can be changed to No. However, if the Member Profile set-up states that Digital Signature is not required or if the countries stated in the Billing & Billed Location ID are not supported for digital signature, then the value of this field can not be Yes.
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-
Invoice Template Language	It indicates Invoice Template Language	-
Rejection Invoice	Radio Button.	You must click to select the radio button.
Rejected Invoice	The number of the invoice to be rejected.	For example, AB12345678.
Billed In	The Billing Month in which invoice being rejected and submitted for the settlement.	For example, 2011-May.
Period	The period during which the invoice being rejected and submitted for the settlement.	If invoice exists in database, the Period will be auto-populated. The periods displayed are as follows: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4

Field	Description	Remarks
Rejection Stage	This is the rejection stage.	<p>For first rejection, 1 and applied only when the settlement method is ICH or Bilateral.</p> <ul style="list-style-type: none"> If rejection stage 2 is selected, a validation error is displayed on click of Save Invoice if Settlement Method is 'ICH' or 'Bilateral' or 'M -Settlement as per ICH rules'. Rejection Stage 2 should be selected only if Settlement Method is 'ACH'. If invoice exists in database, the Rejection Stage will be auto-populated.
Note	Pre-defined list or you can define a specific note different from the available drop down	For example, Payment Terms.
Note Description	The description of the notes.	<p>For example, Internal Customer Number.</p> <p>Any specific information that is necessary to be stated on the invoice.</p>
Additional Details	Pre-defined list of additional details or you can define specific additional detail different from the available drop down.	Any additional information to be stated that needs to be shown on the PDF.

Procedure:

1. Enter Billed Member.
2. Enter **Invoice Number**.
3. Select **Invoice Date** from the date picker.
4. Select applicable **Charge Category**.
5. Enter **Location (Airport/City Code)**.
6. Enter P.O. Number (Purchase Order Number).
7. If required, click hyperlink to view or modify the **Billing Member- Location ID**.
8. If required, click hyperlink to view/modify the **Billed Member- Location ID**.
9. If required, click **Contact of Billing Member** hyperlink to add the contact details of the billing member.
10. If required, click hyperlink to add the **Contact of Billed Member**.
11. If required, select applicable **Settlement Method** from the drop-down list.
12. If required, select applicable **Billing Year/Month/Period**.
13. If required, select applicable **Currency of Billing**.
14. Enter the applicable **Tax Amount** on the entire invoice.
15. Enter applicable **VAT Amount** on the entire invoice.
16. Enter applicable **Add/Deduct Charge** on the invoice.
17. **Total Amount in Billing Currency** displays the total of the Line Net Amount and the Tax, VAT and Add/Deduct charge applied on the invoice header.
18. The current month Exchange Rate as per the Currency of Billing and Currency of Clearance for the stated Billing Year/Month/Period will be displayed. If required, select applicable **Currency of Clearance** to change.
19. Total Amount in Clearance Currency is the total derived after dividing Amount in Billing Currency by the Exchange Rate.

20. If required, select applicable **Digital Signature** option from the drop-down list.
21. Click Rejection Invoice radio button.
22. Enter **Invoice Number** of the invoice being rejected.
23. If required, select applicable billing month from the **Billed In** drop-down list.
24. If required, select applicable **Period** from the drop-down list.
25. If required, select applicable **Rejection Stage** from the drop-down list.
26. Enter **Note**.
27. Enter details of the notes in the **Note Description** text box.
28. Enter **Additional Details**.
29. Enter additional details in the **Additional Details Description** text box.
30. Enter **Payment Details** only if settlement method is **Bilateral**.
31. Click **Save Invoice Header**. A confirmation message is displayed.

3.5 Working with Correspondence Invoices

In Miscellaneous, you can create correspondence invoices in two ways.

1. Creating Correspondence Invoice via Receivables.
2. Creating Correspondence Invoice via Billing History and Correspondence.

3.5.1 Creating Correspondence Invoice via Receivables

To create correspondence invoice via **Receivables**, click **Miscellaneous** tab and then point to **Receivables** and then click **Create Invoice**. The **Create Miscellaneous Correspondence Invoice** screen is displayed.

- The fields marked with (*) are mandatory.
- By default, blue field is a drop-down list. The list is displayed only when you type first few letters in the text box or press down-arrow key on the Keyboard.
- By default, grayed field is auto populated with the data already present in the system.

The screenshot displays the 'Create Miscellaneous Invoice' interface. At the top, there's a navigation bar with tabs like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The 'Miscellaneous' tab is active. Below the navigation bar, the page title is 'Create Miscellaneous Invoice'. The form is divided into several sections: 'Invoice Header' with fields for Billed Member, Invoice Number, Invoice Date, Charge Category, and Settlement Method; 'Invoice Details' with fields for Billing Member's Location ID, Billed Member's Location ID, Currency of Billing, Currency of Clearance, and Exchange Rate; 'Invoice Status' with radio buttons for Original Invoice, Rejection Invoice, and Correspondence Invoice; 'Notes' with a text area for Note Description; and 'Additional Details' with a text area for Additional Details Description. A 'Save Invoice Header' button is at the bottom left. The footer shows the IATA logo and version information.

Field	Description	Remark
*Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	For example, AF-057-Air France.
*Invoice Number	Invoice Number consists of total 10 Alphanumeric characters.	For example, AB12345678 Special characters like hyphen, dot, slash are not allowed. Invoice number will not be case sensitive. Invoice Number 'ab12345678' will be considered as a duplicate invoice if 'AB12345678' has already been submitted.
*Invoice Date	Displays the current date, month and year.	By default, displays the current date, month and year. Please note that invoice date is not greater than the current billing period's closure date.
*Charge Category	Indicates the broad category of charges that can be applied on the invoice.	For example, Engineering.

Field	Description	Remark
Location (Airport/City Code)	Location Code of where service was provided.	A valid IATA Airport/City code or UN Location code. For example, CNY Please refer the Charge Category and Charge Code combination for which it is mandatory to populate a Location code at either this level or the Line Item level.
P.O. Number	Indicates the reference to purchase order, if any.	If there is a reference to any Purchase Order against which the invoice is being raised, you will enter P.O. Number
*Billing Member's Location ID	Displays the locations of the billing member associated with the user creating or modifying the invoice.	For example, Main-New York-US-USD.
Billed Member's Location ID	Displays the Main location of the billed member.	For example, Main-Mumbai-IN-USD.
Contact of Billing Member	The name of the person/supervisor sending the invoice.	For example, Sam.
Contact of Billed Member	The name of the invoice receiver.	For example, John.

Field	Description	Remark
*Settlement Method	The invoice settlement method.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> □ I: Settlement via ICH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ICH members • Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member) ▪ A: Settlement via ACH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ACH members. • If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Passenger billings via the ICH; then ACH cannot be used. □ M: Settlement via ACH using RAM Rule <ul style="list-style-type: none"> • Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) • Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. ▪ B: Bilateral Settlement (direct settlement between members not involving any clearing house). <ul style="list-style-type: none"> • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rule as appropriate. □ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement □ A/I/M/X can be changed to Bilateral if required. □ A can be changed to M if required.

Field	Description	Remark
		<p>When settlement is not possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p> <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method billing or billed member.</p>
*Billing Year/Month/Period	Displays the invoice submission year, month and period.	<p>By default, the current year, month and period is displayed.</p> <p>The previously closed period can be selected only if the late submission window is open.</p> <p>One of the future four billing periods can also be selected if the invoice is to be submitted in the future period.</p> <p>Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Exchange Rate. If the system needs to populate Exchange Rate, but does not find it for the future month, it will result in an error while saving the data</p>

Field	Description	Remark
*Currency of Billing	Displays the currency code of the billing member.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> When Settlement Method is I: <ul style="list-style-type: none"> If both Billing/Billed airlines are in Zone A; value should be GBP. If both the Billing & Billed airlines are in Zone D; value should be EUR. If both Billing/Billed airlines are in Zone B, value should be USD. If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. When Settlement Method is M (ACH Inter-clearance Billings); value should be USD. When Settlement Method is M (ACH member billing ACH member based on RAM rule); value can be any currency. When Settlement Method is A value can be any currency. When Settlement Method is B it can be any currency. When Settlement is X it can be any currency. <p>Note:</p> <ul style="list-style-type: none"> In case of merger scenarios, where the billing member or billed member is merged into another member, the settlement method will be considered as that of the final parent member of billing or billed member.
TAX Amount	The tax applicable on the entire invoice.	It is the sum of the Tax applied at the Invoice Header and Total Tax Amount stated in all Line Items.
VAT Amount	The VAT applicable on the entire invoice.	It is the sum of the VAT applied at the Invoice Header and Total VAT Amount stated in all Line Items.
Add/Deduct Charge	The Add/Deduction charge applicable on the entire invoice	It is the sum of the Add/Deduct Charge applied at the Invoice Header and Total Add/Deduct Amount stated in all Line Items.
Total Amount in Billing Currency	Displays the sum of the Line Net Amount and the Tax, VAT and Add/Deduct charge applied at the invoice header.	The value will be calculated by the system and displayed here.

Field	Description	Remark
*Exchange Rate	Displays the FDR of the stated Billing Year Month applicable for the stated Billing and Clearance currencies.	<ul style="list-style-type: none"> The value will be automatically generated for settlement method I/A/M. This is optional for the Bilateral Settlement this will not be auto-populated and will have to be keyed in by the user if required. This field is mandatory for Settlement Method ICH using Special Agreement; the value should be entered by the user. It should not be zero or negative value.
Currency of Clearance	Displays the applicable Clearance Currency as per the zones of the Billing and Billed entities.	<p>By default, displays the applicable Clearance Currency as per the zones of the Billing and Billed entities.</p> <ul style="list-style-type: none"> If settlement method is ACH then system will default the value to USD. This can be changed to any currency as allowed by ACH. When Settlement Method is M; value can be any currency as allowed by ACH. This field is optional when settlement method is Bilateral. When Settlement method is ICH Special Agreement it can be any currency. <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH zone of the parent member will be considered for determination/validation of Settlement Method.</p>
Total Amount in Clearance Currency	Displays the value after dividing Amount in Billing Currency by the Exchange Rate.	The value is derived by the system.
Digital Signature	Displays as per the member profile set up of the billing entity.	<p>Digital Signature is auto displayed as per the Member Profile set-up of the billing entity.</p> <p>In case Member Profile states that Digital Signature is required on the submitted invoices, but you don't want a digital signature on the invoice being captured, the value can be changed to No.</p> <p>However, if the Member Profile set-up states that Digital Signature is not required or if the countries stated in the Billing & Billed Location ID are not supported for digital signature, then the value of this field can not be Yes.</p>

Field	Description	Remark
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-
Invoice Template Language	It indicates Invoice Template Language	-
Correspondence Invoice	Radio Button.	You need to click to select the radio button when you create correspondence invoice.
Correspondence Reference #	The reference number of the correspondence against which this invoice is being created.	-
Rejected Invoice #	The number of the rejected invoice.	-
Authority to Bill	Radio Button	This should be selected if the Authority To Bill was granted.
Expired	Radio Button	This should be selected if the Correspondence had expired.
Note	Pre-defined list of notes or you can define a specific note different from the available drop down.	For example, Payment Terms.
Note Description	The description of the notes.	For example, Internal Customer Number XXXXXXXXXX Any specific information that is necessary to be stated on the invoice.
Additional Details	Pre-defined list of additional details or you can define a specific additional detail different from the available drop down.	Any additional information to be stated on the invoice.
Additional Details Description	The additional details.	Any additional information that supports the invoice. This information will not be printed on the invoice.

Procedure:

1. Enter **Billed Member**.
2. Enter **Invoice Number**.
3. Select **Invoice Date** from the date picker.
4. Select applicable **Charge Category**.
5. Enter **Location (Airport/City Code)**.

3.5.3 Close a Correspondence

In some cases, the initiator of the correspondence agrees to not pursue a correspondence case anymore. Hence, the initiating member of a correspondence can close the case under certain circumstances. When this happens, the correspondence will be set with status as 'Closed' and with a new sub-status 'Accepted by Correspondence Initiator'.

To close correspondence, the steps are as follows:

1. Click **Miscellaneous** menu.
2. Click **Billing History and Correspondence** submenu.
3. The **Billing History** screen is displayed.
4. Select an a correspondence (from the **Search Results** section)

6. Click on **Close Correspondence**

3.6 Validating and Submitting Created Invoices/Credit Notes

3.6.1 Validating Invoices/Credit Notes

- To ensure that there are no validation errors, credit note/invoice has to be validated.
- On the main menu, click Miscellaneous tab and then point to Receivables and then click Manage Invoice. Invoice Search screen is displayed.

Field	Description	Remark
*Billing Year/Month	Indicates billing year and month	
*Billing Period	By default, displays the current open period.	For example, 4.
Transaction Type	By default, displays All.	<ul style="list-style-type: none"> All Original Invoice Rejection Invoice Correspondence Invoice Credit Note
Invoice/Credit Note Status	By default, displays All.	Wide range of status types. For example, All, Open, Ready for submission.

Field	Description	Remark
*Billed from Location ID	The Location IDs offered in this List Box will be filtered to those that are associated with the user (Active as well as Inactive).	<ul style="list-style-type: none"> When the 'Location Association Type' of the user is "None" <ul style="list-style-type: none"> The List Box field will NOT offer any Location IDs When the 'Location Association Type' of the user is "All Location IDs" <ul style="list-style-type: none"> The List Box field will offer ALL Active as well as Inactive Location ID(s) of the Billing Member When the 'Location Association Type' of the user is "Specific Location IDs" <ul style="list-style-type: none"> The List Box field will offer only those Location ID(s) of the Billing Member that are associated with the user, whether Active or Inactive
Invoice Number	Invoice Number consists of total 10 Alphanumeric characters.	<p>For example, AB12345678</p> <p>Special characters like hyphen, dot, slash are not allowed.</p>
Charge Category	By default, displays the charge category as All.	Wide range of charge category. For example, Airport, Cargo, Engineering.
Rejection Stage	By default, displays Please Select	1 and 2.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press DOWN-ARROW key on the Keyboard.
- By default the last five Open invoices are displayed in the Search Results table.
- Note that the invoices/credit note in OPEN status can be validated
- Select and open one invoice to be validated

If the invoice to be validated is not listed, enter the following search criteria:

1. Enter Billing Year/Month.
2. Select applicable Billing Period.
3. Enter Transaction Type.
4. Select applicable Invoice/Credit Note Status from the drop-down list.
5. Enter Billed Member.
6. Select name of the owner from the Invoice/Credit Note Owner drop-down list.
7. Enter Invoice/ Credit Note Number.
8. Select applicable SMI from the drop-down list.
9. Select applicable Charge Category from the drop-down list.
10. Enter applicable location code in the Location text box.
11. Enter the File Name.
12. Select applicable Submission Method from the drop-down list.
13. Click Search. The records are displayed in the Search Results table.
14. Select the record/invoice from the search results table to validate and then click validate icon.
15. A confirmation message is displayed.
16. Click OK to confirm. The record gets validated.
17. If successfully validated, a confirmation message is displayed.
18. If not, an error message is displayed.
19. Click the edit icon to view the validation errors.
20. The Edit Miscellaneous Invoice screen is displayed along with the error description at the base of the screen.
21. Rectify the error accordingly and then click Save Invoice.
22. To return to Manage Invoice screen, click Back to Manage Invoice.
23. On successful validation, the invoice status in the search result gets updated to Ready for Submission.
24. Note:
 - d. Once the invoice is validated, validation button changes to Submit button.
 - e. Click respective icons in the search results to edit miscellaneous invoice, validate and delete created invoice from the search results.

3.7 Searching Invoices

In Miscellaneous, you can search specific invoice to edit and make required changes, if any. There are three ways to carry out invoice search.

1. Searching Invoice via Receivables.
2. Searching Invoice/Correspondence via Billing History and Correspondence.
3. Searching Invoice via Payables.

3.7.1 Searching Invoice via Receivables

To search invoices, click **Miscellaneous** menu and then point to **Receivables** and then **Manage Invoice**. **Invoice Search** screen is displayed.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press down-arrow key on the keyboard.
- By default the last five open invoices are displayed in the Search Results table. If the invoice is not listed, enter the search criteria to find the invoice. You can also view previous invoices through pagination control at the bottom of the search results.

3.7.6 Initiating Correspondence

To create correspondence, the steps are as follows:

1. Search the Invoice or **Search the Correspondence**.
2. Select the invoice/correspondence displayed in the **Search Results** section.
3. Click the Initiate Correspondence/ **Show/Create Correspondence** icon for the invoice.
4. The **Correspondence** screen is displayed.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press down-arrow key on the keyboard.
- You can view more correspondences if any through pagination control at the bottom of the **Search Results** table.

The fields and buttons on the **Correspondence** screen are as described in the following tables.

Fields	Description	Remark
From Member	Displays the code of the Airline/Member from whom the correspondence is sent.	For example, AF-157.

Fields	Description	Remark
To Member	Displays the code of the Airline/Member to whom the correspondence is sent.	For example, IB-075.
Correspondence Date	Displays the date on which the correspondence is sent.	For example, 24-Mar-11.
Correspondence Reference Number	Displays the auto-generated correspondence reference number for the created correspondence.	-
Correspondence Stage	Displays the correspondence stage.	-
To E-Mail ID (s)	Displays the E-Mail ID of the member as defined in the Member Profile.	-
Additional E-mail ID(s) pertaining to Initiator	Additional E-mail ID's pertaining to Initiator can be entered.	This can be modified only by the initiator.
Additional E-mail ID(s) pertaining to Non-Initiator	Additional E-mail ID's pertaining to Non-Initiator can be entered.	This can be modified only by the Non-initiator.
Subject	It is the subject for the correspondence.	This can be changed at any stage of the correspondence.
Charge Category	Displays the applied Charge Category.	For example, Ground Handling.
Our Reference	Displays the reference code of the entity sending the correspondence.	-
Your Reference	Displays the reference code of the correspondence sent from the other member/person.	-
Amount To Be Settled	Displays the currency code and the amount to be settled.	If required, you can edit the amount as required.
Authority To Bill	If the check box is selected, indicates that member grants authority to the other member to raise a correspondence invoice for the amount stated in correspondence. If the check box is not selected, indicates that member does not grant the authority.	This check box is disabled when the logged in member is the correspondence initiating member. This means that the member who has raised the first correspondence can not grant authority to bill.

Fields	Description	Remark
Correspondence Text	It indicates additional details about the correspondence.	Free text to provide additional details about the Correspondence The following formatting options are available <ul style="list-style-type: none"> ○ Bold ○ Italics ○ Underline ○ Strikethrough ○ Subscript ○ Superscript ○ Font Type ○ Font Size ○ Font Color ○ Align ○ Ordered List ○ Unordered List ○ Decrease Indent ○ Increase Indent ○ Quote ○ Insert Horizontal Line ○ Undo ○ Redo ○ Insert Image
Correspondence Owner	Displays the name of the correspondence owner.	-
Correspondence Status	Displays the status of the invoice.	For example, Open.
Correspondence Sub Status	Displays the Sub Status of the invoice.	For example, Ready For Submit.

Buttons	Function
Save	You can only save the created correspondence.
Send	You can send the correspondence.
Ready To Submit	You cannot send the correspondence. This button allows keeping the correspondence ready for submission depending on the administration rights given to you.
Attachments	You can link supporting documents, which needs to be linked to the correspondence.
Back	You can go back to the previous screen.

The procedure to create correspondence is as follows:

1. Enter the details for the following fields in the **Correspondence Details** section:

- From Member
- To Member
- Correspondence Date
- Correspondence Reference Number
- Correspondence Stage
- To E-Mail IDs
- Additional E-mail ID(s) pertaining to Initiator
- Additional E-mail ID(s) pertaining to Non-Initiator
- Subject
- Charge Category

- Our Reference
 - Your Reference
 - Amount to be Settled
 - Authority to Bill
 - Correspondence Text
 - Correspondence Owner
 - Correspondence Status
 - Correspondence Sub Status
2. Click Attachments to attach any supporting documents.
 3. Click **Save** to save the correspondence.

Note: Select the appropriate button from **Save**, **Ready to Submit** and **Send**.

Viewing Linked Rejections

The following details are displayed in the Linked Rejections table

Details
Billing Member
Billing Period
Invoice Number

Procedure:

1. Click number in the **Invoice Number** column to view the rejection invoice to which the correspondence is linked.
2. The View Miscellaneous Invoice screen is displayed.
3. You can also view line items.

Viewing Correspondence History

The following details are displayed in the Correspondence History table:

Details
Stage No.
Correspondence Date
Correspondence Amount
No. of Attachments

Procedure:

1. Click number in the **Stage No.** column to view the correspondence. **Correspondence Details** screen is displayed.
2. You can view correspondence details of the selected correspondence stage on this screen.

3.8 Working with Credit Note

1. Create Credit Note Header
2. Add Line Item
3. Add Line Item Detail

3.8.1 Creating Miscellaneous Credit Note Header

When an amount on an invoice has a negative value, the invoice is classified as a credit note and when it is printed, it has the title. Then you create a credit note by following the same procedure that you use to create an ordinary invoice.

To create credit note, click **Miscellaneous** menu and then point to **Receivables** and then click **Create Credit Note**. **Create Miscellaneous Credit Note** screen is displayed.

- The fields marked with (*) are mandatory.
- By default, a blue field is a drop-down list. The list is displayed only when you type first few letters press the down-arrow key on the keyboard.
- By default, a grayed field is a derived or auto populated with the data already present in the system.

The following table describes various fields appearing on the screen.

Field	Description	Remark
*Billed Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	For example, AF-057-Air France.

Field	Description	Remark
*Credit Note Number	Credit Note Number consists of total 10 Alphanumeric characters.	For example, AB12345678. Special characters like hyphen, dot, slash are not allowed. Credit Note number will not be case sensitive for example, Credit Note Number 'ab12345678' will be considered as a duplicate Credit Note if 'AB12345678' has already been submitted.
*Credit Note Date	Displays the current date, month and year.	By default, displays the current date, month and year. Please note that new date is not greater than the current billing period's closure date.
*Charge Category	Indicates the broad category of charges that can be applied on the invoice	For example, Engineering.
Location (Airport/City Code)	Location Code where service was provided.	A valid IATA Airport/City code or UN Location code. For example, CNY. <ul style="list-style-type: none"> Location Code is always mandatory at either Credit Note header level or Line Item level If Location Code is defined at Credit Note header level, it cannot be defined for any Line Item
P.O. Number	Indicates the reference to purchase order, if any.	If there is a reference to any Purchase Order against which the Credit Note is being raised, you will enter P.O. Number.
*Billing Member's Location ID	Displays the locations of the billing member associated with the user creating or modifying the Credit Note.	For example, Main-New York-US-USD.
Billed Member's Location ID	Displays the Main location of the billed member.	For example, Main-Mumbai-IN-USD.
Contact of Billing Member	The name of the person/supervisor sending the credit note.	For example, Sam.
Contact of Billed Member	The name of the credit note receiver.	For example, John.

Field	Description	Remark
*Settlement Method	The credit note settlement method.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> □ I: Settlement via ICH <ul style="list-style-type: none"> • Applicable when both billing and billed members are ICH members • Applicable for ICH Inter-Clearance Billings (ICH member billing ACH member) • A: Settlement via ACH • Applicable when both billing and billed members are ACH members. • If both billing and billed members are dual members; but have indicated in the profile that they will bill each other Passenger billings via the ICH; then ACH cannot be used. □ M: Settlement via ACH using RAM Rule <ul style="list-style-type: none"> • Applicable for ACH Inter-clearance Billings (ACH member billing ICH member) • Applicable for settlement via ACH (ACH member billing ACH member) based on RAM rule. • B: Bilateral Settlement (direct settlement between members not involving any clearing house). • Where settlement is possible via a clearing house (ICH/ACH based on both the members' clearing house membership status), the default value will be set as ACH/ICH/ACH using RAM Rule as appropriate. □ X: Settlement via Special ICH Agreement <ul style="list-style-type: none"> • Allowed when both Billing Member and Billed Member are ICH members and when they are part of a Special ICH Agreement <p>□ A/I/M/X can be changed to Bilateral if required.</p> <p>□ A can be changed to M if required.</p>

Field	Description	Remark
		<p>When settlement is not possible via a clearing house, the default value will be set as Bilateral. It should not be changed to any other value.</p> <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership of the parent member will be considered for determination/validation of Settlement Method billing or billed member</p>
*Billing Year/Month/Period	Displays the credit note submission year, month and period.	<p>By default, the current year, month and period is displayed. You can select the previous closed period if the late submission window is open and you want to submit the credit note in the previous period.</p> <p>One of the future four billing periods can also be selected if the credit note is to be submitted in the future period.</p> <p>Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Exchange Rate. If the system needs to populate Exchange Rate, but does not find it for the future month, it will result in an error while saving the data</p>

Field	Description	Remark
*Currency of Billing	Displays the currency code of the billing member.	<p>Valid values are as follows:</p> <ul style="list-style-type: none"> When Settlement Method is I: If both Billing/Billed airlines are in Zone A; value should be GBP. If both the Billing & Billed airlines are in Zone D; value should be EUR. If both Billing/Billed airlines are in Zone B, value should be USD. If Billing & Billed Airlines are in different ICH zones; or when the Billed Airline is an ACH member (inter-clearance billing); value should be USD. <ul style="list-style-type: none"> When Settlement Method is M (ACH Inter-clearance Billings); value should be USD. When Settlement Method is M (ACH member billing ACH member based on RAM rule); value can be any currency. When Settlement Method is A value can be any currency. When Settlement Method is B it can be any currency. When Settlement is X it can be any currency. <p>Note:</p> <p>In case of merger scenarios, where the billing member or billed member is merged into another member, the settlement method will be considered as that of the final parent member of billing or billed member.</p>
TAX Amount	The tax applicable on the entire credit note.	The grayed out field is a derived field. It is the sum of the Tax applied at the Credit Note Header and Total Tax Amount stated in all Line Items.
VAT Amount	The VAT applicable on the entire credit note.	The grayed out field is a derived field. It is the sum of the VAT applied at the Credit Note Header and Total VAT Amount stated in all Line Items.
Add/Deduct Charge	The Add/Deduction charge applicable on the entire credit note.	The grayed out field is a derived field. It is the sum of the Add/Deduct Charge applied at the Credit Note Header and Total Add/Deduct Charge Amount stated in all Line Items.

Field	Description	Remark
Total Amount in Billing Currency	Displays the sum of the Line Net Amount and the Tax, VAT and Add/Deduct charge.	The value will be derived by the system and displayed.
*Exchange Rate	Displays with the FDR of the stated Billing Year Month applicable for the stated Billing and Clearance currencies.	<ul style="list-style-type: none"> The value will be auto-populated for settlement method I/A/M. This is optional for the Bilateral Settlement this will not be auto-populated and will have to be keyed in by the user if required. This field is mandatory for Settlement Method ICH using Special Agreement and the value should be entered by the user. It should not be zero or negative value.
Currency of Clearance	Displays the applicable Clearance Currency as per the zones of the Billing and Billed entities	<p>By default, displays the applicable Clearance Currency as per the zones of the Billing and Billed entities</p> <ul style="list-style-type: none"> If settlement method is ACH then system will default the value to USD. This can be changed to any currency as allowed by ACH. When Settlement Method is M; value can be any currency as allowed by ACH. This field is optional when settlement method is Bilateral. When Settlement method is ICH using Special Agreement it can be any currency <p>Note: In case of merger scenarios, where the billing member or billed member is merged into another parent member, the Clearing House membership and ICH zone of the parent member will be considered for determination/validation of Settlement Method</p>
Total Amount in Clearance Currency	Displays the value after dividing Amount in Billing Currency by the Exchange Rate.	The value is derived by the system.

Field	Description	Remark
Digital Signature	Displays as per the member profile set up of the billing entity.	If Member Profile states that Digital Signature is required on the invoices submitted, but you do not want a digital signature, you can change the value No. However, if the Member Profile set-up states that Digital Signature is not required or if the countries stated in the Billing & Billed Location ID do not support digital signature, the value cannot be changed to Yes.
CH Agreement Indicator	It indicates the Clearing House Agreement Indicator	-
CH Due Date	It indicates the earliest date on which the Clearing House should settle the Invoice/Credit Note	-

P.O. Line Number	Line Item Number in the Purchase Order.	Enter only if the P.O. number is entered in the credit note header.
Product ID	Specific code of the product.	Only entered if specific code is applicable.
Charge Code Type	This further defines the Charge Code	<p>This field will appear only for certain Charge Category Charge Code combination.</p> <p>Only applicable charge code types for the selected charge code will be shown.</p>
*Description	Description of the service provided.	-

Field	Description	Remark
Service Start Date	By default, displays the first day of the Billing Month stated in the credit note header.	<p>For example, if the Billing Month Year is October 2011, the date 01-October-2011 will be populated here.</p> <ul style="list-style-type: none"> • Start Date cannot be greater than or equal to the Service End Date. • If the line item refers to a specific date on which goods or services were delivered then no service start date is required. • If the line item refers to a period during which goods or services were delivered, then the Service Start Date is required and refers to the start date of that period.
*Service End Date	By default this will be populated with the last day of the Billing Month stated in the credit note header.	<p>For example, if the Billing Month Year is October 2011, the date 31-October-2011 will be populated here.</p> <ul style="list-style-type: none"> • End Date cannot be less than or equal to the Service Start Date. • If the line item refers to a specific date on which goods or services were delivered, then the Service End Date refers to this specific date. • If the line item refers to a period during which goods or services were delivered, then the Service End Date refers to the end date of that period.

Field	Description	Remark
*Quantity	Quantity of service/products/goods provided.	<p>If you capture a Line Item detail, then the quantity that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> When the UOM Code, Unit Price, Scaling Factor are the same at all the Line Item Detail Level and the Minimum Quantity Flag is not checked for any of the line details. In this scenario, the Quantity will be added up at the Line Item level, UOM Code, Unit Price & Scaling Factor will be the same as that in the Line Details. <p>Rule 2</p> <ul style="list-style-type: none"> When either the UOM Code, Unit Price, Scaling Factor is different or the Minimum Quantity Flag is checked in even one Line Detail. In this scenario, the Quantity will be 1, UOM Code will be Each and the Unit Price will be equal to the sum of the Line Detail Totals and Scaling Factor will be 1. This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.

Field	Description	Remark
*UOM Code	By default, displays Each.	<p>You can change to the applicable unit of measure by selecting the unit of measure from the drop- down list or by typing the first few characters of the unit of measure.</p> <p>For example, Hours, Each, Kilogram.</p> <p>If you capture a Line Item detail, then the unit of measure that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> When the UOM Code, Unit Price, Scaling Factor are the same at all the Line Item Detail Level and the Minimum Quantity Flag is not checked for any of the line details: In this scenario, the Unit of measure will be as stated at the Line Item detail level. <p>Rule 2</p> <ul style="list-style-type: none"> When either the UOM Code, Unit Price, Scaling Factor is different or the Minimum Quantity Flag is checked in even one Line Detail. In this scenario, the Unit of measure is Each. This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.

Field	Description	Remark
*Unit Price	The applicable Unit Price.	<p>The rate will be stated in negative for the credit note.</p> <p>If you capture a Line Item detail, then the Unit Price that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> When the UOM Code, Unit Price, Scaling Factor are same for all the related Line Item detail level and the Minimum Quantity Flag is not selected for any Line Item details. In this scenario, the Unit Price will be as stated at the Line Item Detail level. <p>Rule 2</p> <ul style="list-style-type: none"> When either the UOM Code, Unit Price, Scaling Factor is different at even one related Line Item detail level or the Minimum Quantity Flag is selected in even one Line Detail. In this scenario, the Unit Price will be equal to Line Total. This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.

Field	Description	Remark
Scaling Factor	By default, displays 1 and indicates the number of units.	<p>For example, Unit price is per 1000 tons then the value in Scaling Factor will be '1000'. The default value can be changed as required.</p> <p>If you capture a Line Item detail, then the Unit Price that was entered at this level will be over-written with the details provided at the Line Item detail level as per rules stated below:</p> <p>Rule 1</p> <ul style="list-style-type: none"> When the UOM Code, Unit Price, Scaling Factor are same for all the related Line Item detail level and the Minimum Quantity Flag is not selected for any Line Item details. In this scenario, the Scaling Factor will be stated at the Line Item detail level. <p>Rule 2</p> <ul style="list-style-type: none"> When either the UOM Code, Unit Price, Scaling Factor is different at even one related Line Item detail level or the Minimum Quantity Flag is selected in even one Line Detail. In this scenario, the Scaling Factor will be 1. This is not applicable when only single Line Item Detail is captured and Minimum Quantity Flag is checked. In this scenario, values as provided at Line Item Detail should be replicated at Line Item level including value for Minimum Quantity Flag.
Line Total	Derived as total of Quantity and Unit Price divided by Scaling Factor.	<p>If Minimum Quantity Flag is selected at this level, then the Line Total will not be derived. You will have to enter the total value in this field.</p> <p>The value will be negative for a credit note.</p>
Tax Amount	The tax applicable on the line item.	<p>The grayed out field is a derived field. It is the sum of the Tax applied at the Line Item and related Line Item Details.</p>
VAT Amount	The VAT applicable on the line item.	<p>The grayed out field is a derived field. It is the sum of the VAT applied at the Line Item and related Line Item Details.</p>
Add/Deduct Charge	The additional/deduction charge applicable on the line item.	<p>The grayed out field is a derived field. It is the sum of the Add/Deduct Charge applied at the Line Item and related Line Item Details.</p>

Field	Description	Remark
Line Net Total	The total of the Line Total and total Tax total VAT and total Add/Deduct Charge.	This is a derived field.
Minimum Quantity Flag	Required only when the charge is a minimum charge for a service provided irrespective of the quantity.	<p>For example, there could be a minimum charge for carrying cargo up to 200 kilograms. In this case, you would need to show the quantity actually carried and the applicable charge. But there is no specific Unit Price for this amount. But since Unit Price is a mandatory field, you will need to state some value in it.</p> <p>You will select Minimum Quantity Flag check box to indicate that the charge is for a minimum quantity.</p> <p>If the check box is selected, then:</p> <ul style="list-style-type: none"> Line Total will not be derived and it will be mandatory. You will capture this value. The validation that the product of Unit Price and Quantity divided by the Scaling Factor should be equal to the Line Total will not be done.
Additional Details	Pre-defined list of additional details.	Any additional information to be stated on the invoice
Additional Details Description	The additional details.	<p>Any additional information that supports the invoice.</p> <p>This information will not be printed on the invoice.</p>

Procedure:

1. **Line Item #** will be auto-generated by the system.
2. Select applicable **Charge Code** from the drop-down list.
3. If required, enter code **Location (Airport/City Code)**.
4. If required, enter **P.O. Line Number**.
5. Enter any specific code in the **Product ID** text box.
6. Enter description text of the service provided in the **Description** text box.
7. Select applicable **Service Start Date** from the date picker.
8. Select applicable **Service End Date** from the date picker.
9. Enter **Quantity** of service/products/goods provided.
10. Select applicable **UOM Code** from the drop-down list.
11. Enter applicable **Unit Price**.
12. Enter applicable **Scaling Factor**.
13. If required, enter the total value in the **Line Total** box.
14. Enter **Tax** applicable on the **Line Item** being captured.
15. Enter **VAT** applicable on the **Line Item** being captured.
16. Enter **Add/Deduct Charge** applicable on the **Line Item** being captured.
17. **Line Net Total** displays the total of **Line Net Total** and total **Tax, VAT** and **Add/Deduct Charge**.
18. If required, select the **Minimum Quantity Flag** check box.
19. Enter **Additional Details**.
20. Enter additional details in the **Additional Details Description** text box.
21. Click **Save**. A confirmation message is displayed.
22. If required, edit details on the **Edit Line Item** screen.
23. You will not be automatically redirected to **Create Line Item Detail** screen. If you want to add line item detail, click **Add Line Item Detail** button. **Create Line Item Detail** screen is displayed.

The following table describes the functions of various buttons on the Edit Line Item screen.

Button	Description
Save	You can save the created line item details.
Attachments	You can insert attachments.
Back	You can go back to the Credit Note Header.

3.8.3 Adding Line Item Detail

After the Line Item is created successfully, the Create Line Item Detail screen is displayed.

The Invoice Header section displays the following fields:

Field	Description
Credit Note Number	Displays the number of the credit note.
Credit Note Date	Displays the date on which credit note is created.
Billed Member	Displays the alphanumeric code and the commercial name of the billed member or airline.
Charge Category	Displays the name of the Charge Category.
Billing Amount	Displays the invoice amount in Billing Currency.

Field	Description
Credit Note Status	Displays the status of the credit note whether Open/Ready for Submission/ Ready for Billing/IS-Web Validation Error/ Submitted.
Billing Period	Displays the billing month period of the credit note.

The details of the Line Item for which the Line item detail is being captured are displayed in the Line Item section.

Field	Description
Line Item Number	Displays the Line Item number.
Charge Code	Displays the Charge Code for which the Line Item was captured.
Service Start Date	Displays the start date of the service provided. If the service was provided on a specific date then this will be blank.
Service End Date	Displays the end date of the service provided.
Location Code	Displays the location where service was provided. If the location was captured at the invoice header level then this will be blank.
Quantity	Displays the Quantity.
UOM Code	Displays the unit of measure.
Unit Price	Displays the applicable Unit Price.
Scaling Factor	Displays the scaling factor.
Line total	Displays the sum total of all related Line Detail Totals.
Tax	Displays the Tax applicable at the Line Item and related Line Item Detail levels.
VAT	Displays the VAT applicable at the Line Item and related Line Item Detail levels.
Add/ Deduct Charge	Displays the Additional Charge applicable at the Line Item and related Line Item Detail levels.
Line Net Total	Displays the net total of Line Total, Tax, VAT and Additional Charge.
Description	Displays the description of the service provided.

The following table describes various fields appearing in the Line Item Detail section.

Field	Description	Remark
Line Item Detail #	Auto generated by the system.	For example, Line Item Detail # 1. This number will increment when you click Save and Add New or Save and Duplicate or Save and Back on the Line Item Detail capture screen or Add Line Item Detail on the Line Item screen.

Field	Description	Remark
Service Start Date	Displays the Start Date as stated in the related Line Item level.	<p>You can either select a different date or leave it blank. If there is no Start Date, the auto-populated date should be cleared and the month set as Please Select.</p> <ul style="list-style-type: none"> • If the entered Start Date at this level is lesser than stated at the related Line Item level, then you will receive a warning message that this date is outside the date range stated at the related Line Item level and to confirm if the date range should be updated at higher level also. You can select a new Start Date or allow the system to update the date range at the higher level. • If the Line Item detail refers to a specific date on which goods or services were delivered, then no start date is required. If the Line Item detail refers to a period during which goods or services were delivered, then the Start Date is required and refers to the Start date of that period. • If there was no Start Date stated at the related Line Item level, then you cannot edit the start date.
*Service End Date	Displays the End Date as stated in the related Line Item level.	<p>If no Start Date stated at the related Line Item level, then you cannot edit end date.</p> <ul style="list-style-type: none"> • If the End Date entered at this level is greater than that stated at the related Line Item level, then you will receive a warning message that this date is outside the date range stated at the related Line Item level and confirm if the date range should be updated at higher level also. You can select a new End Date or allow the system to update the date range at the higher level. • Service End Date can not be lesser than or equal to the Service Start Date.
Product ID	Specific code of the product.	<p>If a Product ID is stated at the line item level, it will auto-populate here. If required, you can also change the product ID or clear it.</p> <p>If different Product ID is entered, you will see a warning.</p>
Description	Description of the service provided.	-

Field	Description	Remark
*Quantity	Quantity of service/products/goods.	-
*UOM Code	By default, displays Each.	If different, you can select the applicable unit of measure. For example, Hour, Kilogram, Liter.
*Unit Price	The applicable Unit Price.	The rate will be in the negative for a credit note.
Scaling Factor	By default, displays 1 and indicates the number of units for which the unit price is stated.	For example, If Unit Price is for multiple units, Unit price is per 1000 tons then the value in Scaling Factor will be '1000'. The default value can be changed as required.
Line Detail Total	Total of Quantity and Unit Price divided by Scaling Factor.	If Minimum Quantity Flag is selected at this level, then the Line Detail Total will not be derived. You will enter the total value in this field. The value should be negative for a credit note.
Tax Amount	The tax applicable only on the line item detail being captured.	The grayed out field is a derived field. It is the sum of the Tax applied at the Line Item Detail being captured.
VAT Amount	The VAT applicable only on the line item detail being captured.	The grayed out field is a derived field. It is the sum of the VAT applied at the Line Item Detail being captured.
Add/Deduct Charge Name	The additional charge/ deduction that is applicable only on the line item detail being captured	The grayed out field is a derived field. It is the sum of the Add/Deduct Charge applied at the Line Item Detail being captured.
Line Detail Net Total	Total of Line Detail Total and Tax, VAT and Additional Charge on the line detail being captured.	Total is derived by the system.

Procedure:

1. **Line Item Detail Number** is auto-generated by the system.
2. Select applicable **Service Start Date** from the date picker.
3. Select applicable **Service End Date** from the date picker.
4. If required, enter different **Product ID**.
5. Enter description text of the service provided in the **Description** text box.
6. Enter the quantity of service/ product/ goods provided
7. If required, select applicable unit of measure from the **UOM Code** drop-down list.
8. Enter applicable **Unit Price**.
9. Enter **Scaling Factor**.
10. **Line Detail Total** is derived as the product of **Quantity** and **Unit Price** divided by scaling factor.
11. Enter **Tax** applicable only on the line item detail being captured.
12. Enter **VAT** applicable only on the line item detail being captured.
13. Enter **Add/Deduct Charge** applicable only on the line item detail being captured.
14. **Note:** The fields in this section might or might not be visible on the screen. Refer only relevant fields for the stated **Charge Category** and **Charge Code**.
15. Click **Save** and **Back**. **Edit Line Item** screen is displayed.
16. If required, edit fields on the screen.
17. In **Line Item Details** table, you can click edit icon to edit **Line Item Detail** fields.

The following table describes functions of buttons on the Line Item Detail screen.

Field	Description
Save and Add	You can save present capture line item detail screen and open blank Line Item Detail screen.
Save and Duplicate	You can save current Line Item Detail screen and open Line Item screen with pre-populated values from the previous Line Item Detail screen except Service End Date. You need to enter the Service End Date.
Save and Back	You can save current Line Item Detail screen and open Edit Line Item screen. The screen displays the list of line item details.
Back	You will see a warning message regarding unsaved changes on the screen. To continue click Proceed or Cancel to continue with the same screen.

3.9 Working with Supporting Documents

3.9.1 Attaching Supporting Documents

If there are any supporting documents, For example, Ramp Handling Form, Sales and Service Form; that needs to be linked to the invoice being captured, then click Attachments button as required on any of the listed screens.

- **Create Line Item**
- **Edit Line Item**
- **Edit Miscellaneous Invoice**

Adding an attachment:

1. Click **Attachments** button. **Add/ Remove Attachments** screen is displayed.
2. Click **Browse**. **File Upload** window is displayed.
3. Select applicable file to attach and then click **Open**. The file/path is inserted in the **File to upload** box.
4. Click **Submit**. The file gets attached in the **Attached Files List**.
5. If not, an error message is displayed.

Deleting the record from the Attached Files List:

1. Select the record from the list.
2. Click delete icon. A confirmation message is displayed.
3. Click **OK** to confirm. The added record gets deleted.

3.9.2 Correcting Supporting Document Linking Errors

To correct linking errors, click Miscellaneous menu and then Correct Supporting Document Linking Errors. Correct Supporting Document Linking Errors screen is displayed.

- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press the down-arrow key on the keyboard.
- A grayed field by default is auto populated with the data already present in the system.

The following table describes various fields appearing on the screen.

Field	Description	Remark
Year/Month	By default, displays Please Select.	For example, 2011-Jun.
Billing Period	By default, displays All.	Valid values are: <ul style="list-style-type: none"> • All • 1 • 2 • 3 • 4
Billed Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	-
Invoice Number	Invoice Number of which linking errors to correct.	You can exempt this entry if you do not know the invoice number.
Supporting File Name	The name of the supporting file.	You can exempt this entry if you do not know the file name.
Submission Date	The date on which supporting document was linked to the invoice.	For example, 06-May-11.

Procedure:

1. Select applicable **Year/Month**.
2. Select applicable **Billing Period**.
3. Enter **Billed Member**.
4. If required, enter **Invoice Number**.
5. Enter file name in the **Supporting File name** text box.
6. Select applicable **Submission Date** from the date picker.
7. Click **Search**. The search results will be displayed in the Search Results table.
8. Select the record from the list to rectify the error and then click edit icon. Modify Batch Header Information is displayed.
9. Click **Show Mismatched Transactions From BRD** button. Mismatch Transaction from BRD screen is displayed.

The following table describes various fields appearing on the screen.

Field	Description	Remark
Billing Year/Month	By default, displays current billing year and month.	For example, 2011-Jun

Field	Description	Remark
Billing Period	By default, displays current billing period.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
Billed Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	-
Invoice Number	Invoice Number of which linking errors to correct.	You can exempt this entry if you do not know the invoice number.
Charge Category	By default, displays All.	Wide range of charge categories. For example, ATC, Airport, Cargo.
Mismatch Cases	Selecting of this check box displays mismatch cases.	This is checked by default.

Procedure:

1. Select applicable **Billing Year/Month**.
2. Select applicable **Billing Period**.
3. Enter **Billed Member**.
4. Enter **Invoice Number**.
5. Select applicable **Charge Category** from the drop-down list.
6. If required, click to unselect the **Mismatch Cases** check box.
7. Click **Search**. The search results will be displayed in the **Search Results table**.
8. Select the record to update and then click **Update** button.
9. Click **Close** or **X** to exit.
10. In **Modify Batch Header Information** section, click Link. A confirmation message is displayed.

Note: You will see an error message if incorrect/irrelevant details are entered.

Before linking, ensure that invoice status is **Ready for Billing**.

3.9.3 Manage Supporting Documents

- Using Receivables submenu
- Using Payables submenu

3.9.3.1 Managing the Supporting Documents using Receivables submenu

To manage supporting documents, the steps are as follows:

1. Click **Miscellaneous** menu.
2. Click **Receivables** submenu.
3. Click **Manage Supporting Documents** option.
4. The **Manage Supporting Documents** screen is displayed.

The screenshot displays the 'Manage Supporting Documents' interface within the SIS Air application. The top navigation bar includes the IATA logo and user information. The main menu on the left shows 'Miscellaneous' selected, with 'Receivables' and 'Manage Supporting Documents' visible in the submenu. The search criteria section includes fields for Billing Year/Month (2018-Mar), Billing Period (All), Billed Member (TA-202-TACA INTERNATIONAL AIF), Invoice Number, and Charge Category (Please Select). The search results table is currently empty, with columns for Actions, Billing Period, Billed Member, Invoice No., Charge Category, Attachment Indicator Original, and No. of Attachments. The footer contains copyright information and a build number.

Actions	Billing Period	Billed Member	Invoice No.	Charge Category	Attachment Indicator Original	No. of Attachments
---------	----------------	---------------	-------------	-----------------	-------------------------------	--------------------

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
*Billing Year/Month	The Clearance Month of the invoice (Year, Month).	
*Billing Period	The Clearance Period of the invoice (Year, Month and Period).	For Example, Period 3 of April-2013 is represented as 2013-Apr-3 <input type="checkbox"/> The periods displayed are as follows: <input type="checkbox"/> The current open period (default value). <input type="checkbox"/> The next 4 (future) periods; this may pertain to the next month also. <input type="checkbox"/> The previous closed period (if the late submission window is open in either of the clearing houses).
*Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID to whom the invoice is to be sent. For example, WI-023-Wings Airways
Invoice Number	Unique alphanumeric code that identifies the invoice.	The Invoice Number could be ten characters. For example, WI1234 Note: hyphen, space, and special characters (#, *, @, ~) are not allowed.
Charge Category	Indicates the broad category of charges that can be applied on the invoice.	For example, Engineering. Refer topic Charge Category/ Charge Code
Attachment Indicator - Original	It indicates whether the invoice has a supporting document attached.	Valid values are: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Both <input type="checkbox"/> Pending
Mismatch Cases	Select the check box if there are any mismatched cases.	-

The procedure to add a supporting document is as follows:

1. Search the invoice by entering the details for the fields in the **Search Criteria** section.
2. The results are displayed in the **Search Results** section.
3. Select the invoice from the list displayed in the **Search Results** section, for which you want to add the attachment.
4. Click **Icon Add/Remove**.
5. The **Add/Remove Attachments** screen is displayed.
6. Click **Browse** to search and add the attachment document.
7. The path of the document is displayed in the **File to Upload** field.
8. Click **Submit**.
9. The details of the added document are displayed in the **Attached Files List** section.
10. Click **Close** to exit.
11. A confirmation message is displayed on the **Manage Supporting Documents** screen indicating that the added attachment is uploaded successfully.
12. The **No. of Attachments** for the invoice is changed.

The procedure to delete a supporting document is as follows:

1. Search the invoice by entering the details for the fields in the **Search Criteria** section.
2. The results are displayed in the **Search Results** section.
3. Select the invoice from the list displayed in the **Search Results** section, for which you want to delete the attachment.
4. Click . This icon shows a document with a plus sign and a minus sign, indicating the ability to add or remove attachments.
5. The **Add/Remove Attachments** screen is displayed.
6. Select the attachment from the list displayed in the **Attached Files List** section.
7. Click . This icon is a red circle with a white 'X' inside, typically used for deletion.
8. The selected attachment is deleted.

3.9.3.2 Managing the Supporting Documents using Payables submenu

To manage supporting documents, the steps are as follows:

1. Click **Miscellaneous** menu.
2. Click **Payables** submenu.
3. Click **Manage Supporting Documents** option.
4. The **Manage Supporting Documents** screen is displayed.

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
*Billing Year/Month	The Clearance Month of the invoice (Year, Month).	Note that selecting a future month does not guarantee invoice creation. See fields Settlement Method and Listing Evaluation to Billing Rate below. If the system needs to populate Listing Evaluation to Billing Rate ; but does not find it for the future month, it will result in an error while saving the data.
*Billing Period	The Clearance Period of the invoice (Year, Month and Period).	For Example, Period 3 of April-2013 is represented as 2013-Apr-3 <ul style="list-style-type: none"> □ The periods displayed are as follows: □ The current open period (default value). □ The next 4 (future) periods; this may pertain to the next month also. □ The previous closed period (if the late submission window is open in either of the clearing houses).

Fields	Description	Remarks
*Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID to whom the invoice is to be sent. For example, WI-023-Wings Airways
Invoice Number	Unique alphanumeric code that identifies the invoice.	The Invoice Number could be ten characters. For example, WI1234 Note: hyphen, space, and special characters (#, *, @, ~) are not allowed.
Charge Category	Indicates the broad category of charges that can be applied on the invoice.	For example, Engineering. Refer topic Charge Category/ Charge Code
Attachment Indicator - Validated	It indicates whether the invoice has a supporting document attached.	Valid values are: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Both
Mismatch Cases	Select the check box if there are any mismatched cases.	-

The procedure to view the supporting documents is as follows:

1. Search the invoice by entering the details for the fields in the **Search Criteria** section.
2. The results are displayed in the **Search Results** section.
3. Select the invoice from the list displayed in the **Search Results** section, for which you want to view the attachment.
4. Click **View**.
5. The **View Attachments** screen is displayed.
6. Select the attachment from the **Attached Files List** section.
7. The "**Do you want to Open or Save Attachment.txt (File Name)**" message is displayed.
8. Click **Open** to view the attachment.
 - OR**
 - Click **Save** to download the attachment to be viewed later.
 - OR**
 - Click **Cancel** to Exit.

3.10 Downloading Invoices

In Miscellaneous, you can download specific invoices of your choice. There are two standard ways from where you can download the invoices.

1. Download invoice via Receivables.
2. Download invoice via Payables.

3.10.1 Choosing Invoice Download Options via Receivables

To search invoices, click **Miscellaneous** menu and then point to **Receivables** and then **Manage Invoice**. **Invoice Search** screen is displayed.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press the down-arrow key on the keyboard.
- By default the last five open invoices are displayed in the Search Results table. If the invoice is not listed, enter the search criteria to find the invoice. You can also view more invoices through pagination control at the bottom of the search results.

Field	Description	Remark
*Billing Year/Month	By default, displays the current year and month.	For example, 2011-Apr.
*Billing Period	By default, displays the current open period.	For example, 4.
Transaction Type	By default, displays All.	Valid values are: <ul style="list-style-type: none"> • All • Original Invoice • Rejection Invoice • Correspondence Invoice • Credit Note
Invoice/Credit Note Status	By default, displays All.	Wide range of status types. For example, All Open, Ready for submission.
Billed Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	For example, NW-012-Northwest
*Billed from Location ID	The Location IDs offered in this List Box will be filtered to those that are associated with the user (Active as well as Inactive).	<ul style="list-style-type: none"> • When the 'Location Association Type' of the user is "None" <ul style="list-style-type: none"> ▪ The List Box field will NOT offer any Location IDs • When the 'Location Association Type' of the user is "All Location IDs" <ul style="list-style-type: none"> ▪ The List Box field will offer ALL Active as well as Inactive Location ID(s) of the Billing Member • When the 'Location Association Type' of the user is "Specific Location IDs" <ul style="list-style-type: none"> ▪ The List Box field will offer only those Location ID(s) of the Billing Member that are associated with the user, whether Active or Inactive
Invoice/Credit Note Owner	Name of the invoice/credit note owner.	By default, displays All.

Field	Description	Remark
Invoice/Credit Note Number	Number of the respective invoice/credit note.	The Invoice Number should be <ul style="list-style-type: none"> • Maximum 10 characters • No hyphen • No Space • No Special Characters
SMI	By default, displays the SMI as All.	Valid values are: <ul style="list-style-type: none"> • ICH • ACH • Bilateral • R- Adjustments Due to Protest • M- ACH using IATA Rules
Charge Category	By default, displays All.	Wide range of charge list. For example, All, ATC, Airport.
Location	Location Code of where service was provided.	When the location code is entered in search criteria, all invoices where this location code is stated at the invoice header level will be displayed in the Search Results list.
File Name	Name of the respective file.	-
Submission Method	Method of invoice submission.	If the invoice you are searching was captured on IS-Web, select IS-Web. If the invoice was sent as an IS-XML then select IS-XML.

Procedure:

1. Select **Billing Year/Month**.
2. Select applicable **Billing Period**.
3. If required, select **Transaction Type**.
4. Select applicable **Invoice/Credit Note Status** from the drop-down list.
5. If required, enter **Billed Member**.
6. Select name of the owner in the **Invoice/Credit Note Owner** drop-down list.
7. Enter **Invoice/ Credit Note Number**.
8. Select applicable **Charge Category** from the drop-down list.
9. Select applicable **SMI** from the drop-down list.
10. Select applicable **Charge Category** from the drop-down list.
11. Enter applicable location code in the **Location** text box.
12. If required, enter the **File Name**.
13. Select applicable **Submission Method** from the drop-down list.
14. Click **Search**. The record(s) are displayed in the Search Results table.
15. To download invoice, click **Zip icon Choose invoice download options** window is displayed.
16. By default, **E-Invoicing Files** check box is disabled.
17. If you want to download only Listing Report, select the **Listing Report** check box.
18. If you want to download only Supporting Documents, click to select the **Supporting Documents** check box.
19. You can also click **Select All** to choose both the options.
20. Enter applicable .zip file name in the **Enter File Name** text box.
21. Click **Download Invoice**. A message confirmation message is displayed.

3.10.2 Choosing Invoice Download Options via Payables

To search invoice via **Payables**, click **Miscellaneous** menu and then point to **Payables** and then click **Invoice Search**. **Invoice Search** screen is displayed.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you type first few letters in or when you press the down-arrow key on the keyboard.

The following table describes various fields appearing on the screen.

Field	Description	Remark
*Billing Year/Month	By default, displays the previously closed year and month.	For example, 2011-Apr
*Billing Period	By default, displays the previously closed billing period.	For example, 3
Transaction Type	By default, displays All	Valid values are: <ul style="list-style-type: none"> • All • Original Invoice • Rejection Invoice • Correspondence Invoice • Credit Note
Billing Member	Alphanumeric code that uniquely identifies the member in the Member Profile.	For example, NW-012-Northwest
*Billed to Location ID	The Location IDs offered in this List Box will be filtered to those that are associated with the user (Active as well as Inactive).	<ul style="list-style-type: none"> • When the 'Location Association Type' of the user is "None" <ul style="list-style-type: none"> ▪ The List Box field will NOT offer any Location IDs • When the 'Location Association Type' of the user is "All Location IDs" <ul style="list-style-type: none"> ▪ The List Box field will offer ALL Active as well as Inactive Location ID(s) of the Billed Member • When the 'Location Association Type' of the user is "Specific Location IDs" <ul style="list-style-type: none"> ▪ The List Box field will offer only those Location ID(s) of the Billing Member that are associated with the user, whether Active or Inactive
Invoice/Credit Number	Alphanumeric code that uniquely identifies the member in the Member Profile.	For example, AB12345678

Field	Description	Remark
SMI	By default, displays All.	Valid values are: <ul style="list-style-type: none">• All• I - ICH• A - ACH• B - Bilateral• R - Adjustments Due to protest• M - ACH using IATA Rules (MITA)
Charge Category	By default, displays All.	Wide range of charge categories of the invoice. For example, All, ATC, Airport, Cargo.
Location	Location Code of where the service was provided.	When the location code is entered in search criteria, all invoices where this location code is stated at the invoice header level will be displayed in the Search Results list.

Procedure:

1. Select applicable **Billing Year/Month** from the drop-down list.
2. Select applicable **Billing Period** from the drop-down list.
3. Select applicable **Transaction Type** from the drop-down list.
4. If required, enter **Billing Member**.
5. If required, enter **Invoice/Credit Note Number**.
6. Select applicable **SMI** from the drop-down list.
7. Select applicable **Charge Category** from the drop-down list.
8. If required, enter **Location**.
9. Click **Search**. The records are displayed in the Search Results table.
10. To download invoice, click **Zip icon**. **Choose invoice download options** window is displayed.
11. By default, **E-Invoicing Files** check box is disabled.
12. If you want to download only Listing Report, click to select the **Listing Report** check box.
13. If you want to download only Supporting Documents, click to select the **Supporting Documents** check box.
14. You can also click **Select All** to choose both the options.
15. Enter applicable .zip file name in the **Enter File Name** text box.
16. Click **Download Invoice**. A confirmation message is displayed.
17. If required, click **Clear** to clear the entered search criteria.

3.11 Viewing an Invoice

3.11.1 Viewing an Invoice using Invoice Search in Payables submenu

2 options to view an invoice:

- If daily delivery of billing invoices chosen, then invoices delivered on a daily basis will be visible on the new screen till they are presented (i.e. after the closure of the Billing Period)
- Once presented, all invoices will be shown in the Payables screen

Viewing an Invoice involves three steps:

- Viewing Miscellaneous Invoice
- Viewing Line Item
- Viewing Line item Detail

3.11.1.1 Viewing Miscellaneous Invoice

To view an invoice, the steps are as follows:

1. Search the Invoice to be viewed.
2. Select the invoice from the list displayed in the **Search Results** section.
3. Click .
4. The **View Miscellaneous Invoice** screen is displayed.

The screenshot shows the 'View Miscellaneous Invoice' screen in the SIS Air application. The interface includes a top navigation bar with the IATA logo and user information. Below this is a breadcrumb trail: Home >> Miscellaneous >> Payables >> View Miscellaneous Invoice. The main content area is divided into several sections:

- Invoice Header:** Contains fields for Billing Member (XB-E49-Nigerian Airspace Manager), P.O. Number, Settlement Method (ICM), Digital Signature (D: Default), Invoice Number (0091430807), Billing Member's Location ID (Main-Ikeja-Lagos-NG), Billing Year/Month/Period (2015-Oct-2), Total Amount in Billing Currency (172420.800), CH Agreement Indicator, Invoice Date (20-Oct-15), Billed Member's Location ID (Main-London-GB), Currency of Billing (USD-US Dollar), Currency of Clearance (USD), CH Due Date (DD-MMM-YY), Charge Category (ATG), Contact of Billing Member (efb@iata.org), Tax Amount, VAT Amount, Exchange Rate (1.00000), Total Amount in Clearance Currency (172420.800), and Invoice Owner (SYSTEM USER).
- Notes:** Includes a 'Note Description' section with two entries: 'This document has been issued and transmitted by IATA EF Services, 33, Route de Jeneport, 1215 Geneva 15 Airport, on behalf of Nigerian Airspace Management Agency' and 'This invoice will be settled through IATA Clearing House in accordance with your agreement'.
- Additional Details:** Includes a 'Previous Invoice Number' field and an 'Additional Details Description' section with the invoice number 0091430807.
- Attachment Indicator:** Shows 'Original' as 'Yes', 'Validated' as 'No', 'Number of Attachments' as '0', 'IS Validation' as 'No', and 'Suspended Flag' as 'No'.
- Attachments:** A section for viewing and managing attachments.
- Line Items:** A table listing the invoice items with columns for Actions, Line Item #, Charge Code, Service Start Date, Service End Date, Description, Quantity, UOM Code, Unit Price, Scaling Factor, Line Total, Tax, VAT, and Add/Deduct Charge. The table contains three items: 10 Over-flight, 20 Over-flight, and 30 Approach.

At the bottom of the screen, there is a pagination bar showing 'Page 1 of 1' and a 'View 1 - 3 of 3' link. A 'Back to Manage Invoices' button is also present.

- The details for the invoice are displayed.
- Click **Back to Manage Invoice** to go back to the **Invoice Search** screen.

The procedure to View the Line Item is as follows:

1. Select the Line Item from the list displayed in the **Line Items** section.

2. Click .

3. The **View Line Item** screen is displayed.

The details for the Line Item are displayed.

Note:

If Payables Invoices/Credit Notes are searched for then only Presented Invoices/Credit Notes will be visible

Optional Information

- The details for the invoice are displayed.

Viewing an Invoice involves three steps:

- Viewing Miscellaneous Invoice
- Viewing Line Item
- Viewing Line item Detail

Follow the procedure as Explained in **Viewing an Invoice using Invoice Search in Payables submenu**

3.12 Working with Audit Trail

3.12.1 Viewing Audit Trail

To view the Audit trail, the steps are as follows:

1. Search the Invoice.
2. Select the invoice from the list displayed in the **Search Results** section.
3. Click .
4. The **Billing History Audit Trail** screen is displayed.

The screenshot shows the 'Billing History Audit Trail' screen. It includes a navigation bar with 'Passenger', 'Cargo', 'Miscellaneous', 'UATP', 'Reports', 'General', and 'Profile and User Management'. The breadcrumb trail is 'Home >> Miscellaneous >> Billing History >> Audit Trail'. The main content area displays 'Stage 0, Original Invoice' with a table of invoice details. Below this is a table of line items. At the bottom, there are buttons for 'Back', 'Generate PDF', and a checkbox for 'Include Supporting Document(s)'.

Billing Period	Billing Member	Billed Member	Invoice Number	Invoice Date	Charge Category	PO Number	Net Amount
Aug 2011 PI	SI-154-SIS Airways	WI-221-Wings Airways	siin02	08-Aug-11	Engineering		AUD 5,750.000

Line Item #	Charge Code	Description	Quantity	UOM Code	Unit Price	Currency Code	Gross Amount	Tax	VAT	Add/Deduct Charge	Net Amount
1	Handling LM	Handling LM	1	EACH	5,000.0000	AUD	5,000.000	250.000	250.000	250.000	5,750.000

Buttons: Back, Generate PDF, ☐ Include Supporting Document(s)

5. Audit trail is displayed in descending chronological order.
6. Audit trail can be printed.
7. Click **Back** to view audit trail for another invoice or correspondence.

Generate PDF

- The audit trail screens provides an option to download the contents of the screen in PDF format with or without the supporting documents
- At the bottom of the screen, there button 'Generate PDF' will perform this function
- If checkbox 'Include Supporting Documents' is unchecked and this button is pressed, the PDF will be available for download instantly (without the supporting documents)
- If checkbox 'Include Supporting Documents' is checked and this button is pressed, the system will provide a zipped package of the PDF and the supporting documents. This package will not be available instantly. The user who requested for the package will be informed via email once the package is created and made available for download

 Generation of the audit trail package is in progress. You will be notified via email once it is ready for download. [File:MISC-Audit Trail-0-20130918-120918.zip]

3.13 Validation Error Correction

You can use the **Validation Error Correction** screen correct validation errors related to **IS-IDE** or **IS-XML** files. For error data to be visible on the screen (and subsequently corrected), the Invoice or Credit Note status should have status **Error – Correctable**.

3.13.1 Correcting Validation Errors

To correct the Validation Errors, the steps are as follows:

1. Click **Miscellaneous** menu.
2. Click **Receivables** submenu.
3. Click **Validation Error Correction** option.
4. The **Validation Error Correction** screen is displayed.

Note: The Sections/Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Sections/Fields	Description	Remarks
Search Criteria		

Sections/Fields	Description	Remarks
*Billing Year/Month/Period	It indicates the clearance Year/Month/Period of the Invoice/Credit Note/Correspondence Invoice	By default it displays the current Year/Month/Period.
Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the ID of the member to whom the invoice is sent. For example, WI-023-Wings Airways
Invoice Number	Unique alphanumeric code that identifies the invoice.	-
Exception Code	It is the Exception Code assigned by the system and as received in the detailed validation report.	-
File Submission Date	The UTC date on which the file was submitted in IS.	Select the date from the Date Picker.
File Name	The name of the file.	-
Charge Category	It indicates the category of services being billed on an invoice.	Valid values are as follows: <ul style="list-style-type: none"> • ATC • Airport • Cargo • Engineering • Flight Ops • Finance • Ground Handling • IT Services • Mail • Miscellaneous • Partner Alliance • Property • Service Provider
Exception Summary	This section displays the results for the search performed.	The details for the following fields are displayed: <ul style="list-style-type: none"> • Exception Code • Error Description • File Name • Billed Member • Invoice Number • Charge Category • Error Count • Batch Update Allowed

Sections/Fields	Description	Remarks
Exception Details	It displays the details for the Exception when an exception is selected in the Exception Summary section.	<p>The details for the following fields are displayed:</p> <ul style="list-style-type: none"> • Invoice Type • Error Level: For a failed invoice submission, it clearly states the level at which the error has occurred. For example, either at the header, source code, line item/line item details level and so on. • Field Name: It is the name of the field where the error has been triggered. • Field Value: It indicates the invalid value that has been entered. <p>By default, the details for the first record in the Exception Summary section are displayed.</p>

Buttons	Description	Remarks
Search	Click Search to search the details for the invoices with linking errors.	The results are displayed in the Exception Summary section.
Clear	Click Clear to clear the data in the Search Criteria section.	-
Update	Click Update to update the errors related to the fields in the record selected.	<p>The Update screen is displayed. Enter the new value for the field. This value is then validated as per the record structure validation.</p> <p>The data is saved when the value entered passes the validations; else you will receive a notification that no changes are done to the existing value.</p> <p>This button is enabled as per the error in the record selected.</p> <p>Note: Click Batch Update if there are similar errors to be corrected within the file to be updated.</p>
Correct Linking Error	Click Correct Linking Error to Correct the linking errors for the record selected.	<p>The Correct Linking Error screen will be displayed.</p> <p>This button is enabled as per the error in the record selected.</p> <p>The fields displayed are as per the record selected (Rejection Invoice, Correspondence Invoice).</p>

The procedure to search Invoices with validation errors is as follows:

1. Enter the details for the following fields:

- **Billing Year/Month/Period**
- **Billed Member**
- **Invoice Number**
- **Exception Code**
- **File Submission Date**
- **File Name**

- **Charge Category**
- 2. Click **Search**.
- 3. The results are displayed in the **Exception Summary** section.

The procedure to update the validation errors is as follows:

1. Select the record to be updated from the list displayed in the **Exception Details** section.
2. Click **Update**.
3. The **Update** screen is displayed.
4. Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

The procedure to correct the Linking Errors is as follows:

1. Select the record from the list displayed in the **Exception Details** section.
2. Click **Correct the Linking Errors**.
3. The **Correct the Linking Errors** screen is displayed.
4. Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

3.14 Downloading Correspondence Reports

Using this screen, you will be able to download the Correspondences (as per the selection criteria) in a PDF format.

To download the correspondences, the steps are as follows:

1. Click **Miscellaneous** menu.
2. Click **Download Correspondences** submenu.
3. The **Correspondence Reports** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
Member Code	Unique alphanumeric code that identifies the member in the Member Profile.	It is the ID of the member with whom correspondence has happened. For example, WI-023-Wings Airways
*From Date	It is the date of start of correspondence.	The date can be added manually or by choosing a date from the calendar.
*To Date	It is the date of current correspondence.	The date can be added manually or by choosing a date from the calendar
Correspondence Initiated By	It indicates the member who initiates the correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Self • Other carrier • Either Entity receiving the last rejection invoice is always the initiating entity.

Fields	Description	Remarks
Correspondence Status	It indicates the status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open • Closed • Expired
Correspondence Sub Status	It indicates the sub status of the correspondence.	Valid values are: <ul style="list-style-type: none"> • All • Received • Saved • Responded • Ready For Submit • Pending • Billed • Due to Expiry • Accepted By Correspondence Initiator <p>Note: The values of Correspondence Sub Status will be shown based on selected Correspondence Sub Status</p>

Buttons	Description	Remarks
Search	Click Search to search the details for the correspondence.	The results are displayed in the Search Results section.
Clear	Click Clear to clear the data in the Correspondence Search Criteria section.	-
Download All	Click Download All to generate a single zip file containing PDF files for all the correspondence in the Search Results section.	-
Download Selected	Click Download Selected to generate a single zip file containing PDF files for only the selected correspondence/s.	-

The procedure to search for the Correspondence to be downloaded is as follows:

1. Enter the details for the following fields:
 - **Member Code**
 - **From Date**
 - **To Date**
 - **Correspondence Initiated By**
 - **Correspondence Status**
 - **Correspondence Sub Status**
2. Click **Search**.
3. The results are displayed in the **Search Results** section.

The procedure to download all the Correspondence is as follows:

1. Click **Download All/ Download Selected**.
2. The appropriate Correspondences from the **Search Results** section will be downloaded.

3. These correspondences will be zipped and an email notification is sent to the user who made this request with the URL to download this zip file.

Note:

- Supporting Documents that were a part of the correspondence/s will not be provided/ included in the Zip file.

3.15 Common Procedures

3.15.1 Entering Tax Amount

To enter the tax applicable on the entire invoice, line item or line item detail, click the Tax Amount hyperlink. Tax Breakdown capture screen is displayed.

Tax Breakdown

Tax Breakdown Capture

* Tax Name: Please Select

Tax Base Amount:

Tax Percent:

Tax Calculated Amount:

Tax Breakdown List

Action	Sr. No.	Tax Text	Tax Base Amount	Tax Percent	Tax Calculated Amount	Tax Category	Tax Name

Close

- Fields marked with red (*) are mandatory.

The following table describes various fields appearing on the Tax Breakdown screen.

Field	Description	Remark
*Tax Name	The name of the tax. If there is no specific tax name or code, then select only Tax.	<ul style="list-style-type: none"> This is mandatory field and system will not allow user to capture a blank value (i.e. Please Select) in this field.
Tax Base Amount	Amount on which the tax percent is applicable.	Entered if the tax is applicable as a percentage of a base amount.
Tax Percent	Applicable tax percent.	Entered if tax percent applicable.
Tax Calculated Amount	Calculated by the system if Tax base Amount & Tax Percent are populated.	If the tax is a fixed amount and not a percentage of the Base Amount then you can enter the Tax Calculated Amount without entering Base Amount and Tax Percent.
Tax Category	Specific category of tax.	-
Tax Text	Description or remarks of the tax.	For example, Sales tax at 5%.

Entering the tax applicable on the invoice, Line Item or Line Item Detail Level:

- Select **Tax Name** from drop-down list.
- If required, enter **Tax Base Amount**.

3. If required, enter **Tax Percent**.
4. Enter directly or press **Tab** key to get the **Tax Calculated Amount**.
5. Select applicable **Tax Category** from the drop-down list.
6. Enter description or remarks of the Tax in the **Tax Text** box.
7. Click **Add**. The added details get entered in the Tax Breakdown list table.

Deleting the record from the Tax Breakdown list:

If required, you can delete the record from the Tax Breakdown list.

1. Select the record from the list.
2. Click delete icon. A message conformation is displayed.
3. Click **OK** to confirm. The record is deleted.

3.15.2 Entering VAT Amount

To enter the VAT applicable on the entire invoice, click the **VAT Amount** hyperlink on the invoice header. **VAT Breakdown Capture** screen is displayed.

Field	Description	Remark
*VAT Subtype	By default, displays VAT.	-
*VAT Base Amount	The amount on which the VAT Percent is applicable.	-
VAT Percent	The applicable VAT Percent.	-
VAT Calculated Amount	The Calculated VAT Amount according to the VAT Base Amount and VAT Percent.	The amount is derived by the system.
VAT Category	The specific category of VAT.	For example, Standard, Exempt.
Description	Description or Remarks for the VAT.	For example, VAT at 5%

Entering the VAT applicable on the invoice:

1. Select applicable VAT Sub Type.
2. Enter **VAT Base Amount**.
3. Enter **VAT Percent**.
4. Press Tab key to get the **VAT Calculated Amount**.

5. Select applicable **VAT Category** from the drop-down list.
6. Enter description or remarks for the **VAT** in the **Description** text box.
7. Click **Add**. The entered details get added in the **VAT Breakdown list**.
8. Click **Close** or **X** to exit.

Deleting the record from the VAT Breakdown list:

If required, you can delete the record from the VAT Breakdown list.

1. Select the record from the list.
2. Click **Delete**. A confirmation message is displayed.
3. Click **OK** to confirm. The record gets deleted.
4. Click **Close** or **X** to exit.

VAT Derived List: The VAT captured at the Line Item and Line Item Detail levels will be added and displayed in the derived list.

The VAT amount at the lower levels is grouped by the following parameters;

1. VAT Sub-Type
2. VAT Category
3. VAT Text
4. VAT Percent

The following fields are displayed in the VAT Derived List section:

Field	Description
VAT Subtype	Applicable Subtype of the VAT.
VAT Base Amount	The amount on which the VAT Percent is applicable.
VAT Percent	The applicable VAT Percent.
VAT Calculated Amount	The Calculated VAT Amount according to the VAT Base Amount and VAT Percent.
VAT Category	The specific category of VAT.

3.15.3 Entering VAT for Line Item/Line Item Detail

To enter the VAT applicable on the entire invoice, click the **VAT Amount** hyperlink on the invoice header. **VAT Breakdown Capture** screen is displayed.

Field	Description	Remark
*VAT Subtype	By default, displays VAT.	-
*VAT Base Amount	The amount on which the VAT Percent is applicable.	-
VAT Percent	The applicable VAT Percent.	-
VAT Calculated Amount	The Calculated VAT Amount according to the VAT Base Amount and VAT Percent.	The amount is derived by the system.
VAT Category	The specific category of VAT.	For example, Standard, Exempt.
Description	Description or Remarks for the VAT.	For example, VAT at 5%

Entering the VAT applicable on the invoice:

1. Select applicable VAT Sub Type.
2. Enter **VAT Base Amount**.
3. Enter **VAT Percent**.
4. Press Tab key to get the **VAT Calculated Amount**.
5. Select applicable **VAT Category** from the drop-down list.
6. Enter description or remarks for the **VAT** in the **Description** text box.
7. Click **Add**. The entered details get added in the **VAT Breakdown list**.
8. Click **Close** or **X** to exit.

Deleting the record from the VAT Breakdown list:

If required, you can delete the record from the VAT Breakdown list.

1. Select the record from the list.
2. Click **Delete**. A confirmation message is displayed.
3. Click **OK** to confirm. The record gets deleted.
4. Click **Close** or **X** to exit.

3.15.4 Entering Add/Deduct Charge for the Invoice/Credit Note Header

To enter any Additional Charges or Deductions, click the hyperlink **Add/Deduct Charge**. **Add/Deduct Charge** Capture screen is displayed.

Description	Specific remarks for the Contact Type.	Specific remarks for the Contact Type.

Modifying the contact details of Billed Member:

1. Select applicable **Contact Type**.
2. Enter **Contact Value**.
3. Enter **Description**.
4. Click **Add**. The added details get entered in the **Contact Details List**.

Deleting the record from the list:

To delete the record:

1. Select the record from the list.
2. Click delete icon.
3. Click **OK** to confirm. The record is deleted.

3.15.10 Dynamic Fields

Mail Details

Fields	Description
Mail No.	AV Number.
Mail Category	Type of Mail Category.
Mail Class	Type of Mail Class.
Number Of Bags	Number of bags of mail category.
Container No.	If a container has been used the number of the container will be stated here.
Bag No.	Bag number of mail.
Consignment No.	Consignment number of mail.

Aircraft Details

Fields	Description
Aircraft Reg. No:	Registration number of the aircraft with no hyphen between the nationality prefix and the remaining characters.
Max Take off Weight: UOM Code	Maximum weight while take off and UOM Code.
Aircraft Type Code	IATA Aircraft Types.
Aircraft Type Code ICAO	ICAO Aircraft Types
Noise Class	Noise Class.
Weight Factor	Weight related factor used in formula to calculate charges.
Aircraft Type Name	Aircraft Type Name.
Engine Type	Engine Type.
Engine No	Serial number of the engine.
Part No	Number of the part used.
Cabin Class	A class of accommodations on some passenger ships lower than first class and higher than tourist class.
Emission Class	Emission Class.
APU	APU
Airframe	Airframe details.
Landing Gear Left Main	Landing Gear Left Main.
Landing Gear Left Wing	Landing Gear Left Wing.
Landing Gear Nose	Landing Gear Nose.
Landing Gear Right Main	Landing Gear Right Main.
Landing Gear Right Wing	Landing Gear Right Wing.

Fields	Description
MaxSeatCapacity	Maximum Seat Capacity.
ActualSeatConfig	Actual Seat Configuration.
Type Of Weight	Use to define weight type.

Flight Details

Fields	Description
Flight No	Unique flight identifier: Shown in field 7 of the ICAO flight plan consisting of either the aircraft reg. or the flight number (which itself consists of the two or three character airline designator code followed by an up to 4 digit number with optional Quebec single suffix letter).
Flight Date Time	Date-Time allowing identifying the flight the service is related to. Time is optional.
Flight Direction	Flight Direction.
Passenger Count: Type	Count of passengers.
Flight Type Code	IATA service type code that distinguishes the type of flight.
Flight Zone	Zone of the flight.
Simulator No	Used for trainings.
Bag Count: Type	Count of bags.
Flight DateTime Schedule	Flight date time schedule.

Route Details

Fields	Description
Location Code: Type:	Airport Code.
Location Code ICAO: Type	ICAO Airport Code.
Waypoint Code-Type	Waypoint identifying when the service of the flight started (Entry), ended (Exit), or any intermediate waypoint (intermediate).
Country Code	Country Code.
Subdivision Code	Subdivision Code.
Flight Information Region	Flight Information Region.
Latitude	Route points coordinate (latitude).
Longitude	Route points coordinate (longitude).
Route Date Time: Type	Date and Time of the Routing indicating the type of routing; if it is for Entry/Exit or intermediate route.
Distance: UOM Code	Total distance covered with the unit of measure code.
Distance Factor	Distance-related factor used in formula to calculate charges.
Distance Type	Indicates if the distance is measured as Greater Circle or as actual.

Fields	Description
Airspace Corridor Code	Code name of the airspace corridor used by the particular flight; usually required by ATC's.
Route Data: Name	Name of the route.
UTC Offset	GMT Offset time.

Parking Details

Fields	Description
Stand No	Stand Number of the parking.
Stand Type	Stand Type of the parking.
On Stand Date Time	Date and Time when the aircraft was parked.
Off Stand Date Time	Date and Time when the aircraft was removed from parking.

Employee Details

Fields	Description
Staff ID	ID of the Staff.
Staff Name	Name of the Staff.
Staff Fore Name	Fore Name of the Staff.
Staff Surname	Surname of the Staff.
Pass No	Pass number.
Pass Issue Date	Issue date of pass.
Pass Expiry Date	Expiry Date of pass.
Issue Description	Reason for issue.

Area Details

Fields	Description
Area ID	Area ID.
Area Name	Name of Area.
Area Location ID	Location ID of Area.
Area Location Name	Location Name of Area.
Address	Address of Area.
Area Size @UOM Code	Total area of the location/ property.
Area Type	Type of Area.
Agreement Number	Agreement Number.

Desk Gate Details

Fields	Description
Desk ID	Desk ID.
Desk Location Name	Desk Location Name.
Desk Type	Desk Type.

Consumption Details

Fields	Description
Meter ID	Meter ID.
Meter Location Name	Meter Location Name.
Start Reading	The start of the meter reading.
Start Date Time	The date and time when the reading was started.
Start Estimate	Start Estimate.
End Reading	The end of the meter reading.
End Date Time	The date and time when the reading was completed.
End Estimate	End Estimate.
Consumed Units @UOM Code	Number of units consumed with the unit of measure.
Temperature @UOM @Type	Temperature of jet fuel
Density @UOM @Type	Density of jet fuel
Utilisation @Type	Use to define type of utilisation.
Prorate	Prorate
Flight Hours	Use to define flight hours.
Flight Cycles	Used to define flight cycles.

Settlement Details

Fields	Description
Amount: Name:	Amount of deposit/ interest/ instalment/ security/ outstanding etc.
Fare Class	Fare Class.
Settlement Currency Code	Defines the settlement currency.
Local Currency Code	The base currency.
Exchange Rate	The exchange rate used to convert local amount to foreign currency.
Daily Rate	The daily exchange rate.
Call Day Name	The day the payment is received and from which the penalty is calculated.
Due Date Flag	To indicate if a due date is applicable.
Due Date	Date on which payment is due.
Days Overdue	Number of days overdue.
Partial Payments: Number	Payments done partially.
Clearance Period	The period to which the penalty applies.
Interest Rate	The interest rate charge for the payment not made.
Suspended Airline	Numeric Airline Code.
Invoice Ref. Number	Reference number of the invoice.

Service Provider Details

Fields	Description
Member Code	SITA specific member code.
Numeric Customer Code	SITA specific numeric member code.
Product Group	Group of Product.
Product Name	Name of Product.
Activity Date	Date of Activity.
Station Code	Station where service is provided.

Passenger Details

Fields	Description
Passenger Name	Name of the passenger.
Ticket No	Ticket Number.
RelatedFlightNumber	Use to define related flight number.
RelatedFlightDateTime	Use to define related flight time date.
Passenger@Type	Use to define type of passenger.

Other Details

Fields	Description
Contract No.	Contract number on which the invoice is based.
Pool No.	For charge category Engineering, Charge Code Pool.
Receipt No.	To define the aviation fuel delivery receipt number.
Reference No @ Name	To define any reference numbers not defined specifically.
Recipient	For charge category Service Provider.
Mishandling Type	To indicate the type of claim in case of mishandled baggage.

Catering Details

Fields	Description
Meal Type/Name	Type of Meal.
Invoice Op Code	The operational status of the flight.
Invoice Disbursement Date	This is the date invoice has been approved for disbursements.
Service Flight Number	Service Flight Number on the invoice.
Service Flight Date	Service Flight departure Date on the invoice.
Board Flight Date	Date of Flight to which catering is loaded.
Board Flight Number	Flight to which catering is loaded.
Facility	Identifies the Facility from where the catering is provided.
Meal Code	Define a specific Meal code as required by the airline.

Accommodation Details

Fields	Description
RoomCategory @Name	Use to define category of Room
RoomType @Name	To define type of Room used
BedType @Name	Use to define type of bed
NumberOfBed	Total Number of beds
TypeOfStay	Used to define type of Stay
EmployeeType	Used to define type of occupant
VoucherCode	Voucher identification
GuestNo	Number of guest in the room

Car Details

Fields	Description
CarCategory @Name	Category of Car
CarType @Name	Type of Car
CarTransmission @Name	Use to define transmission type of Car
CarAirFuelCondition @Name	Use to define Car Air Fuel Condition

Fuel Details

Fields	Description
Previous Ticket Number	Use to define previous ticket number.
Transaction Date	Use to define transaction date.
Delivery Ticket Number	Use to define delivery ticket number.
Unique Ticket ID	Use to define unique ticket ID.
Ticket Source	Use to define source of ticket.
Ticket Status	Use to define Status of ticket.
Ticket Type	Use to define type of ticket.
Ticket Cancel Operator	Use to define cancel operation of ticket.
Airport Of Delivery Of Ticket	Use to define airport of delivery of ticket.
Bill Of Lading	Use to define loading of bill.
Bill Of Lading Date	Use to define loading date of bill.
Carnet Number	Use to define number of carnet.
Carnet Holder Name	Use to define name of carnet holder.
Company Issued Equipment ID	Use to define company issued equipment id.
Fueling Equipment ID	Use to define equipment id of fueling.
Date Of Delivery Of	Use to define delivery date of ticket.

Fields	Description
Ticket	
Delivery Reference Value @Type	Use to define type of delivery reference value
Midpoint Delivery Date	Use to define midpoint delivery date.
Into Plane Code	Use to define into plane code.
Into Plane Name	Use to define into plane name.
IP Transaction Code	Use to define IP transaction code.
IP Transaction Name	Use to define IP transaction name.
BM Transaction Code	Use to define BM transaction code.
Fueling Type	Use to define fueling type.
Fuel Operation Base	Use to define fuel operation base.
Item Tax Invoice Number	Use to define item tax invoice number.
Product ID Customs	Use to define product ID custom.
Item Reference Local Date Type	Use to define type of item reference local date.
Item Reference GMT Date Type	Use to define type of item reference GNTD.

Pricing Details

Fields	Description
Pricing Element	Use to define pricing element.
Pricing Currency Code	Use to define to pricing currency code.
Exchange Rate	Use to define exchange rate.
Pricing Unit Rate Type	Use to define type of pricing unit rate.
Quantity UOMCode	Use to define Quantity UOM code.
Quantity Flag	Use to define flag of quantity.
Quantity Type	Use to define type of quantity.
Local Amount Currency Code	Use to define local amount currency code.
Tolerance Level Type	Use to define type of tolerance level.
Payment Type	Use to define type of payment.
Conversion Mechanism	Use to define conversion mechanism.

Transportation Details

Fields	Description
Transportation Type	Type of Transportation
Transportation Routing	Use to define routing transportation
Transportation Reference Code	Use to define reference code transportation
Transportation Reference Value	Use to define reference value transportation

Fields	Description
Transportation Amount	Use to define amount transportation
Movement Direction To	Use to define start of movement direction.

3.16 Document Package

3.16.1 Create Document Package

To create document package, click **Miscellaneous** menu and then point to **Receivables** and then click **Create Document Package**. **Create Document Package** screen is displayed.

- The fields marked with (*) are mandatory.
- By default, a blue field is a drop-down list. The list is displayed only when you type first few letters press the down-arrow key on the keyboard.
- By default, a grayed field is a derived or auto populated with the data already present in the system.

The following table describes various fields appearing on the Document Package Details.

Field	Description	Remark
* From Package Date	It is the date of start of package.	The date can be added manually or by choosing a date from the calendar.
* To Package Date	It is the date of current package.	The date can be added manually or by choosing a date from the calendar
Receiving Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID to whom the document package is sent.
Sending Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID from whom the document package is received. For example, WI-023-Wings Airways

Field	Description	Remark
Sent to Location ID	The Location IDs offered in this List Box will be filtered to those that are associated with the user (Active as well as Inactive).	<ul style="list-style-type: none"> When the 'Location Association Type' of the user is "None" <ul style="list-style-type: none"> The List Box field will NOT offer any Location IDs When the 'Location Association Type' of the user is "All Location IDs" <ul style="list-style-type: none"> The List Box field will offer ALL Active as well as Inactive Location ID(s) of the Billing Member When the 'Location Association Type' of the user is "Specific Location IDs" <p>The List Box field will offer only those Location ID(s) of the Billing Member that are associated with the user, whether Active or Inactive</p>
Package Type	It indicates the Package Type.	<p>Valid value is one of the following:</p> <ul style="list-style-type: none"> FOD FTD FTS FXS OPD OTH POD WOD <p>Default value displayed is ALL</p>
Package Number	It indicates the unique Package Number	The Package Number can be up-to four characters.

3.16.2 Search Document Package

To search document package, click **Miscellaneous** menu and then point to **Receivables** and then click **Manage Invoice / Document Package. Search Document Package** screen is displayed.

- The fields marked with (*) are mandatory.
- By default, a blue field is a drop-down list. The list is displayed only when you type first few letters press the down-arrow key on the keyboard.
- By default, a grayed field is a derived or auto populated with the data already present in the system.

The following table describes various fields appearing on the Document Package Details.

Field	Description	Remark
* From Package Date	It displays the From Date for the Document Package.	The current date is displayed by default. To change the date, select from the Date picker.
* To Package Date	It displays the To Date for the File Document Package.	The current date is displayed by default. To change the date, select from the Date picker.
Receiving Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID to whom the document package is sent.
Package Type	It indicates the Package Type.	Valid value is one of the following: <ul style="list-style-type: none"> • FOD • FTD • FTS • FXS • OPD • OTH • POD • WOD Default value displayed is ALL
Package Status	It indicates the Package Status.	Valid value is one of the following: <ul style="list-style-type: none"> • All • Open • Ready for Submission • Ready for Billing • Presented • Validation Error- WEB Invoice

Field	Description	Remark
		<ul style="list-style-type: none"> Error-Non-Correctable On Hold
Sent from Location ID	The Location IDs offered in this List Box will be filtered to those that are associated with the user (Active as well as Inactive).	<ul style="list-style-type: none"> When the 'Location Association Type' of the user is "None" <ul style="list-style-type: none"> The List Box field will NOT offer any Location IDs When the 'Location Association Type' of the user is "All Location IDs" <ul style="list-style-type: none"> The List Box field will offer ALL Active as well as Inactive Location ID(s) of the Billing Member When the 'Location Association Type' of the user is "Specific Location IDs" <p>The List Box field will offer only those Location ID(s) of the Billing Member that are associated with the user, whether Active or Inactive</p>
Package Number	It indicates the unique Package Number	The Package Number can be up-to four characters.
Package Owner	It indicates the name of the person who has created the package.	
Submission Method	It indicates the method of submission of Invoices.	Valid values are: <ul style="list-style-type: none"> ALL IS-WEB Input File Default value displayed is ALL .
File Name	It indicates the name of package file as received in IS.	

Procedure:

1. Enter **From Package Date**.
2. Enter **To Package Date**.
3. Enter **Receiving Member**.
4. Select applicable **Package Type from the drop-down list**.
5. Select applicable **Package Status** from the drop-down list.
6. Select applicable **Sent from Location ID** from the drop-down list.
7. Enter **Package Number**.
8. Select applicable **Package Owner** from the drop-down list.
9. Select applicable **Submission Method** from the drop-down list.
10. Enter the **File Name**.
11. Click **Search**. The records are displayed in the **Search Results** table.
12. If required, click **Clear** to clear the entered document package search criteria.

Buttons	Description	Remarks
---------	-------------	---------

Buttons	Description	Remarks
	Click Edit to edit the details of the Document Package.	The Edit Miscellaneous Document Package screen is displayed as per the package selected.
	Click Validate to validate the document package.	The Document Package screen is displayed with the confirmation that the package is validated successfully.
	Click Delete to delete the select document package record.	The Invoice/Document Package Search screen is displayed with the confirmation that the record is deleted successfully.
Submit Selected Packages	Click Submit Selected Packages to submit the selected packages to the clearing houses for the settlement.	Document package can be submitted only after the validation checks are cleared.

3.17 Disputes

In Miscellaneous, you can create dispute in three ways. This section describes all three ways to create dispute.

1. Create Dispute via Receivables.
2. Create Dispute via Billing History and Correspondence.
3. Create Dispute via Payables.

3.17.1 Create Dispute via Receivables

To create dispute via receivables, click **Miscellaneous** tab and then point to **Receivables** and then click **Manage Invoice/Document Package**.

- Fields marked with red (*) are mandatory.
- A blue field by default is a drop down list. The list is displayed only when you start typing in the given field or when you press the down-arrow key on the keyboard.

4.2 Creating Invoices

4.2.1 Processes Related to Creating Invoices

Creating UATP Invoice:

4.2.2 Creating Invoice Header

To create Invoice Header, the steps are as follows:

1. Click **UATP** menu.
2. Click **Receivables** submenu.
3. Click **Create Invoice** option.
4. The **Create UATP Invoice** screen is displayed.

The screenshot displays the 'Create UATP Invoice' form within the SIS Air application. The form is organized into several sections: 'Invoice Header', 'Payment Details', and 'Notes'. The 'Invoice Header' section contains fields for Billed Member (WI-221-Wings Airways), Invoice Number, Invoice Date (09-Nov-11), Charge Category (UATP), Billing Member's Location ID (Main-London-GB), Billed Member's Location ID (Main-Delhi-IN), Settlement Method (BILATERAL), Billing Year/Month/Period (2011-Nov-1), Currency of Billing, and Total Amount in Billing Currency (0.000). The 'Payment Details' section includes Payment Terms Code, Payment due by date, Get discount of 0.00%, and various bank details like Bank Name, IBAN, SWIFT, Bank Account Number, Bank Account Name, Currency Code, Bank Code, and Branch Code. The 'Notes' section has a Note field and a Note Description field. The form also includes a 'Save Invoice Header' button at the bottom left and a footer with copyright information.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A greyed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
*Billed Member	It is the combination of designator, prefix/accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways

Fields	Description	Remarks
*Invoice Number	Unique alphanumeric ID that identifies the invoice.	<p>The Invoice Number can be up-to ten characters (English letters and numbers only).</p> <p>For example, WI1234</p> <ul style="list-style-type: none"> Spaces and special characters (#, *, @, ~, -, and so on) should not be used. Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when performing duplicate checks. Should not be duplicated by the billing airline within a calendar year across all Billing Categories.
*Invoice Date	It is the date of the invoice.	By default, displays the current date, month and year. Please note that invoice date is not greater than the current billing period's closure date.
*Charge Category	Indicates the category of charges that can be applied on the invoice.	For UATP Module, the only applicable charge category is UATP .

1. Click **UATP** menu.
2. Click **Receivables** submenu.
3. Click **Create Credit Note** option.
4. The **Create UATP Credit Note** screen is displayed.

The screenshot displays the 'Create UATP Credit Note' interface. At the top, there's a navigation bar with 'UATP' and 'Receivables' selected. The main form is divided into several sections: 'Credit Note Header' with fields for Billed Member (WI-221-Wings Airways), Credit Note Number (CR231101), Credit Note Date (23-Nov-11), Charge Category (UATP), Settlement Method (BILATERAL), Billing Year/Month/Period (2011-Nov-3), Currency (USD-US Dollar), and Total Amount (0.000). Below this is the 'Payment Details' section with fields for Payment Terms Code, Payment due by date, Get discount of 0.00%, and Remarks. Further down are fields for Bank Name, IBAN, SWIFT, Bank Code, Branch Code, Bank Account Number, Bank Account Name, and Currency Code. The 'Notes' section has a 'Note' field and a 'Note Description' field. The 'Additional Details' section has an 'Additional Details Description' field. A 'Save Credit Note' button is located at the bottom left.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
*Billed Member	It is the combination of designator, prefix/accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways

4.6.3 Close a Correspondence

In some cases, the initiator of the correspondence agrees to not pursue a correspondence case anymore. Hence, the initiating member of a correspondence can close the case under certain circumstances. When this happens, the correspondence will be set with status as 'Closed' and with a new sub-status 'Accepted by Correspondence Initiator'.

To close correspondence, the steps are as follows:

1. Click **UATP** menu.
2. Click **Billing History and Correspondence** submenu.
3. The **Billing History** screen is displayed.
4. Select a correspondence (from the **Search Results** section)

The screenshot shows the 'Billing History' and 'Correspondence Search Criteria' sections. The 'Billing History' section includes search criteria for Billing Type (Payables), Billing Year / Month (2013-Sep), Billing Period (2), Member Code, and Invoice Number. The 'Correspondence Search Criteria' section includes search criteria for From Date (16-Sep-13), To Date (23-Sep-13), Member Code, Correspondence Owner (All), Correspondence Initiating Member (Self), Correspondence Ref. No., Correspondence Status (All), Correspondence Sub Status (All), Authority To Bill, and Number Of Days To Expiry. The 'Search Result' table shows one result for a transaction on 20-Sep-2013 with a transaction amount of USD 6030.00.

Actions	Transaction Date	Transaction No.	Member Code	Charge Category	Rejection Stage	Correspondence Status	Correspondence Sub Status	Number Of Days To Expiry	Authority To Bill	Transaction Amount
	20-Sep-2013	09320000461	221	UATP	0	Open	Saved	88	NA	USD 6030.00

- Click **Show/Create Correspondence**  icon in the search menu
- The **Edit Correspondence** screen is displayed

The screenshot shows the 'Edit Correspondence' screen. It includes fields for From Member (TA-137), To Member (TT-777), Correspondence Date (30-Mar-15), Correspondence Reference Number (40000000002), and Correspondence Stage (1). It also has fields for To E-Mail ID(s) (Corry@sisair.com), Additional E-Mail ID(s) pertaining to Initiator (demo@sisair.com), and Additional E-Mail ID(s) pertaining to Non-Initiator. There are sections for Charge Category (UATP), Our Reference, Your Reference, Amount To Be Settled (USD 696.76), Authority To Bill, Correspondence Owner (testa), Correspondence Status (Open), and Correspondence Sub Status (Saved). It also has fields for Subject (More information needed) and Correspondence Text (Please support your billing). At the bottom, there are buttons for Save, Send, Ready To Submit, Attachments, Close Correspondence, and Back. Below these buttons are two tables: 'Linked Rejections' and 'Correspondence History'.

Billing Member	Billing Period	Invoice Number
TT-777-SIS Airways	Mar 2015 P1	2RDS2REU04

Stage No.	Correspondence Date	Correspondence Amount	No. of Attachments
1	30-Mar-15	696.76	0

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
--------	-------------	---------

Fields	Description	Remarks
From Member	Entity initiating correspondence.	Entity receiving the last rejection invoice.
To Member	Entity raising the last rejection invoice.	-
Correspondence Date	Current date on which correspondence is initiated.	-
Correspondence Reference Number	Unique number generated by SIS.	When correspondence is initiated for the first time SIS generates unique number. Any subsequent correspondence will continue with the same correspondence reference number.
Correspondence Stage	It indicates number of stages for correspondence.	-
*To E-mail	E-mail ID's of the member as per member profile.	-
Additional E-mail ID(s) pertaining to Initiator	Additional E-mail ID's pertaining to Initiator can be entered.	This can be modified only by the initiator. The information entered here will be inherited when a reply is sent by the Non-Initiator.
Additional E-mail ID(s) pertaining to Non-Initiator	Additional E-mail ID's pertaining to Non-Initiator can be entered.	This can be modified only by the Non-initiator. The information entered here will be inherited when a reply is sent by the Initiator.
Our Reference	To exchange data on bilateral basis.	
Your Reference	-	It s generated automatically. It is valid for subsequent stages of Correspondence.
Amount to be settled	Amount not accepted by the billed member.	-
Authority to Bill	Permission granted by entity to issue an invoice.	Authority to Bill is issued when the entity grants its approval to the other party to Invoice. When such approval is granted the entity specifies the amount for which the approval is provided. The entity receiving the authority can either raise an Invoice for the amount approved or continue with the Correspondence if it doesn't agree with the approval amount.

Fields	Description	Remarks
Correspondence Status	It indicates status of correspondence. 2. Click **Search**.
3. **Search Results** will display the invoice details with attachment error.
4. Select the record from the list displayed in the **Search Results** section. The details of the record are displayed in the **Modify Batch Header Information** section.
5. Click **Show Mismatched Transactions in BRD**. The Mismatch Transaction BRD screen is displayed. Select the record displayed and click **Update** to update the linking.
6. Click **Close** or **X** to exit.
7. In **Modify Batch Header Information** section, click **Link**. A confirmation message is displayed.

Note: You will see an error message if incorrect/irrelevant details are entered.
Before linking, ensure that invoice status is **Ready for Billing**.

4.9 Downloading Invoices

In UATP, you can download specific invoices of your choice. There are two standard ways from where you can download the invoices.

- Download invoice using Receivables submenu.
- Download invoice using Payables submenu.

4.9.1 Choosing Invoice Download Options using Payables submenu

To download the invoices using Payables submenu, the steps are as follows:

1. Search the Invoice using **Payables** submenu.
2. The results are displayed in the **Search Results** section.
3. Select the invoice you want to download from the list displayed.
4. Click .
5. The **Choose Invoice Download Options** screen is displayed.

6. If you want to download only E- Invoicing Files, click to select the **E- Invoicing Files** check box.
7. If you want to download only Listing Report, click to select the **Listing Report** check box.
8. If you want to download only Supporting Documents, click to select the **Supporting Documents** check box.
9. Click **Download Invoice**. A confirmation message is displayed.

Note: You can select all of the options for downloading an invoice. Click **Select All** to select all the options to download an invoice.

4.9.2 Choosing Invoice Download Options using Receivables submenu

To download the invoices using Receivables submenu, the steps are as follows:

1. Search the Invoice using **Receivables** submenu.
2. The results are displayed in the **Search Results** section.
3. Select the invoice you want to download from the list displayed.
4. Click .
5. The **Choose Invoice Download Options** screen is displayed.

6. If you want to download only E- Invoicing Files, click to select the **E- Invoicing Files** check box.
7. If you want to download only Listing Report, click to select the **Listing Report** check box.
8. If you want to download only Supporting Documents, click to select the **Supporting Documents** check box.
9. Click **Download Invoice**. A confirmation message is displayed.

Note: You can select all of the options for downloading an invoice. Click **Select All** to select all the options to download an invoice.

4.10 Correcting Validation Errors

You can use the **Validation Error Correction** screen correct validation errors related to **IS-IDEA** or **IS-XML** files. For error data to be visible on the screen (and subsequently corrected), the Invoice or Credit Note status should have status **Error – Correctable**.

To correct the Validation Errors, the steps are as follows:

1. Click **UATP** menu.
2. Click **Receivables** submenu.
3. Click **Validation Error Correction** option.
4. The **Validation Error Correction** screen is displayed.

Note: The Sections/Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Sections/Fields	Description	Remarks
Search Criteria		
*Billing Year/Month/Period	It indicates the clearance Year/Month/Period of the Invoice/Credit Note/Correspondence Invoice	By default it displays the current Year/Month/Period.
Billed Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the ID of the member to whom the invoice is sent. For example, WI-023-Wings Airways
Invoice Number	Unique alphanumeric code that identifies the invoice.	-

Sections/Fields	Description	Remarks
Exception Code	It is the Exception Code assigned by the system and as received in the detailed validation report.	-
File Submission Date	The UTC date on which the file was submitted in IS.	Select the date from the Date Picker.
File Name	The name of the file.	-
Exception Summary	This section displays the results for the search performed.	<p>The details for the following fields are displayed:</p> <ul style="list-style-type: none"> • Exception Code • Error Description • File Name • Billed Member • Invoice Number • Error Count • Batch Update Allowed
Exception Details	It displays the details for the Exception when an exception is selected in the Exception Summary section.	<p>The details for the following fields are displayed:</p> <ul style="list-style-type: none"> • Invoice Type • Error Level: For a failed invoice submission, it clearly states the level at which the error has occurred. For example, either at the header, source code, line item/line item details level and so on. • Field Name: It is the name of the field where the error has been triggered. • Field Value: It indicates the invalid value that has been entered. <p>By default, the details for the first record in the Exception Summary section are displayed.</p>

Buttons	Description	Remarks
Search	Click Search to search the details for the invoices with linking errors.	The results are displayed in the Exception Summary section.
Clear	Click Clear to clear the data in the Search Criteria section.	-
Update	Click Update to update the errors related to the fields in the record selected.	<p>The Update screen is displayed. Enter the new value for the field. This value is then validated as per the record structure validation.</p> <p>The data is saved when the value entered passes the validations; else you will receive a notification that no changes are done to the existing value.</p> <p>This button is enabled as per the error in the record selected.</p> <p>Note: Click Batch Update if there are similar errors to be corrected within the file to be updated.</p>

Buttons	Description	Remarks
Correct Linking Error	Click Correct Linking Error to Correct the linking errors for the record selected.	The Correct Linking Error screen will be displayed. This button is enabled as per the error in the record selected. The fields displayed are as per the record selected (Rejection Invoice , Correspondence Invoice).

The procedure to search Invoices with validation errors is as follows:

1. Enter the details for the following fields:
 - **Billing Year/Month/Period**
 - **Billed Member**
 - **Invoice Number**
 - **Exception Code**
 - **File Submission Date**
 - **File Name**
2. Click **Search**.
3. The results are displayed in the **Exception Summary** section.

The procedure to update the validation errors is as follows:

1. Select the record to be updated from the list displayed in the **Exception Details** section.
2. Click **Update**.
3. The **Update** screen is displayed.
4. Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

The procedure to correct the Linking Errors is as follows:

1. Select the record from the list displayed in the **Exception Details** section.
2. Click **Correct the Linking Errors**.
3. The **Correct the Linking Errors** screen is displayed.
4. Enter the value for the field to be updated.

Note: The data is saved when the value entered passes the validations. Else you will receive a notification that no changes are done to the existing value.

4.11 Downloading Correspondence Reports

Using this screen, you will be able to download the Correspondences (as per the selection criteria) in a PDF format.

To download the correspondences, the steps are as follows:

1. Click **UATP** menu.
2. Click **Download Correspondences** submenu.
3. The **Correspondence Reports** screen is displayed.

Note: Fields and Buttons are as described in the tables.

- The fields marked with (*) are mandatory.
- Auto-complete fields are identified with blue color. To see all possible values for the field, press the down arrow key on the keyboard.
- A grayed field by default is populated automatically with the data already present in the system or with data calculated at the invoice.

Fields	Description	Remarks
Member Code	Unique alphanumeric code that identifies the member in the Member Profile.	It is the ID of the member with whom correspondence has happened. For example, WI-023-Wings Airways
*From Date	It is the date of start of correspondence.	The date can be added manually or by choosing a date from the calendar.
*To Date	It is the date of current correspondence.	The date can be added manually or by choosing a date from the calendar
Correspondence Initiated By	It indicates the member who initiates the correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Self • Other carrier • Either Entity receiving the last rejection invoice is always the initiating entity.

Fields	Description	Remarks
Correspondence Status	It indicates the status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open • Closed • Expired
Correspondence Sub Status	It indicates the sub status of the correspondence.	Valid values are: <ul style="list-style-type: none"> • All • Received • Saved • Responded • Ready For Submit • Pending • Billed • Due to Expiry • Accepted By Correspondence Initiator <p>Note: The values of Correspondence Sub Status will be shown based on selected Correspondence Sub Status</p>

Buttons	Description	Remarks
Search	Click Search to search the details for the correspondence.	The results are displayed in the Search Results section.
Clear	Click Clear to clear the data in the Correspondence Search Criteria section.	-
Download All	Click Download All to generate a single zip file containing PDF files for all the correspondence in the Search Results section.	-
Download Selected	Click Download Selected to generate a single zip file containing PDF files for only the selected correspondence/s.	-

The procedure to search for the Correspondence to be downloaded is as follows:

1. Enter the details for the following fields:
 - **Member Code**
 - **From Date**
 - **To Date**
 - **Correspondence Initiated By**
 - **Correspondence Status**
 - **Correspondence Sub Status**
2. Click **Search**.
3. The results are displayed in the **Search Results** section.

The procedure to download all the Correspondence is as follows:

1. Click **Download All/ Download Selected**.
2. The appropriate Correspondences from the **Search Results** section will be downloaded.

3. These correspondences will be zipped and an email notification is sent to the user who made this request with the URL to download this zip file.

Note:

- Supporting Documents that were a part of the correspondence/s will not be provided/ included in the Zip file.

4.12 Viewing Invoices/Credit Note

You can view an Invoice using:

- Receivables submenu
- Payables submenu
- Billing history and Correspondence submenu

Viewing an Invoice/Credit Note involves three steps:

- Viewing UATP Invoice/ Credit Note
- Viewing Line Item
- Viewing Line item Detail

4.12.1 Viewing an Invoice/Credit Note using Receivables submenu

To view an Invoice/Credit Note, the steps are as follows:

1. Search the Invoice/Credit Note using **Receivables** submenu.
2. Select the Invoice/Credit note to be viewed from the list displayed in the **Search Results** section.
3. Click .
4. The **View UATP Invoice/ Credit Note** screen is displayed.

The procedure to attach supporting documents is as follows:

1. Click **Browse** to search the file/files to be attached as supporting documents.
2. Details of the attached files will be displayed in the **Attached Files List** window.
3. Click **Close** after all files are attached.

The procedure to delete the attachment from the **Attached Files List** is as follows:

1. Select the attachment from the list displayed in the **Attached Files List** section.
2. Click .
3. The selected attachment is deleted from the list.

4.14.13 Optional Group Fields

- **Desk-Gate Details**

Fields	Description
Desk ID	Desk ID.
Desk Location Name	Desk Location Name.
Desk Type	Desk Type.

- **Area Details**

Fields	Description
Area ID	Area ID.
Area Name	Name of Area.
Area Location ID	Location ID of Area.
Area Location Name	Location Name of Area.
Address Line 1,2,3	Address of Area.
City Name	Name of City.
Subdivision Code	Subdivision Code.
Subdivision Name	Subdivision Name.
Country Code	Country Code.
Country Code ICAO	ICAO Country Code.
Country Name	Country Name. Select from the list.
Postal Code	Postal Code.
Area Size @UOM Code	Total area of the location/ property.
Area Type	Type of Area.
Agreement Number	Agreement Number.

- **Route Details**

Fields	Description
Location Code: Type:	Airport Code.
Location Code ICAO: Type	ICAO Airport Code.
Country Code	Country Code.
Country Code ICAO	ICAO Country Code.
Subdivision Code	Subdivision Code.
Waypoint Code-Type	Waypoint identifying when the service of the flight started (Entry), ended (Exit), or any intermediate waypoint (intermediate).
Flight Information Region	Flight Information Region.
Latitude	Route points coordinate (latitude).
Longitude	Route points coordinate (longitude).
Route Date Time: Type	Date and Time of the Routing indicating the type of routing; if it is for Entry/ Exit or intermediate route.
Distance: UOM Code	Total distance covered with the unit of measure code.
Distance Factor	Distance-related factor used in formula to calculate charges.
Distance Type	Indicates if the distance is measured as Greater Circle or as actual.

Airspace Corridor Code	Code name of the airspace corridor used by the particular flight; usually required by ATC's.
Route Data: Name	Name of the route.

- Aircraft Details**

Fields	Description
Aircraft Reg. No:	Registration number of the aircraft with no hyphen between the nationality prefix and the remaining characters.
Max Take off Weight : UOM Code	Maximum weight while take off and UOM Code.
Weight Factor	Weight related factor used in formula to calculate charges.
Aircraft Type Code	IATA Aircraft Types.
Aircraft Type Code ICAO	ICAO Aircraft Types
Aircraft Type Name	Aircraft Type Name.
Engine Type	Engine Type.
Engine No	Serial number of the engine.
Part No	Number of the part used.
Cabin Class	A class of accommodations on some passenger ships lower than first class and higher than tourist class.
Noise Class	Noise Class.
Emission Class	Emission Class.

- Flight Details**

Fields	Description
Flight No	Unique flight identifier: Shown in field 7 of the ICAO flight plan consisting of either the aircraft reg. or the flight number (which itself consists of the two or three character airline designator code followed by an up to 4 digit number with optional Quebec single suffix letter).
Flight Date Time	Date and/or time of the flight. Time is optional.
Flight Direction	Indicate if the flight is an arrival or departure
Flight Type Code	IATA service type code that distinguishes the type of flight.
Passenger Count: Type	Count of passengers.
Flight Zone	Indicates if the flight is international or domestic.
Simulator No	Used for trainings.
Bag Count: Type	Count of bags.

- Settlement Details**

Fields	Description
Settlement Currency Code	Defines the settlement currency.
Local Currency Code	The base currency.
Exchange Rate	The exchange rate used to convert local amount to foreign currency.
Daily Rate	The daily exchange rate.
Amount: Name:	Amount of deposit/ interest/ instalment/ security/ outstanding etc.
Call Day Name	The day the payment is received and from which the penalty is calculated.
Due Date Flag	To indicate if a due date is applicable.

Fields	Description
Due Date	Date on which payment is due.
Fare Class	Fare Class.
Days Overdue	Number of days overdue.
Partial Payments: Number	Payments done partially.
Clearance Period	The period to which the penalty applies.
Interest Rate	The interest rate charge for the payment not made.
Suspended Airline	Numeric Airline Code.
Invoice Ref. Number	Reference number of the invoice.
Fare Class	Fare Class.

- **Mail Details**

Fields	Description
Mail No.	AV Number.
Mail Category	Type of Mail Category.
Mail Class	Type of Mail Class.
Number Of Bags	Number of bags of mail category.
Container No.	If a container has been used the number of the container will be stated here.
Bag No.	Bag number of mail.
Consignment No.	Consignment number of mail.

- **Consumption Details**

Fields	Description
Meter ID	Meter ID.
Meter Location Name	Meter Location Name.
Start Reading	The start of the meter reading.
Start Date Time	The date and time when the reading was started.
Start Estimate	Start Estimate.
End Reading	The end of the meter reading.
End Date Time	The date and time when the reading was completed.
End Estimate	End Estimate.
Consumed Units @UOM Code	Number of units consumed with the unit of measure.

- **Other Details**

Fields	Description
Contract No.	Contract number on which the invoice is based.
Pool No.	For charge category Engineering, Charge Code Pool.
Receipt No.	To define the aviation fuel delivery receipt number.
Reference No @ Name	To define any reference numbers not defined specifically.
Recipient	For charge category Service Provider.
Mishandling Type	To indicate the type of claim in case of mishandled baggage.

- **Passenger Details**

Fields	Description
Passenger Name	Name of the passenger.
Ticket No	Ticket Number.

- **Employee Details**

Fields	Description
Staff ID	ID of the Staff.
Staff Name	Name of the Staff.
Staff Fore Name	Fore Name of the Staff.
Staff Surname	Surname of the Staff.
Pass No	Pass number.
Pass Issue Date	Issue date of pass.
Pass Expiry Date	Expiry Date of pass.
Issue Description	Reason for issue.

- **Service Provider Details**

Fields	Description
Member Code	SITA specific member code.
Numeric Customer Code	SITA specific numeric member code.
Product Group	Group of Product.
Product Name	Name of Product.
Activity Date	Date of Activity.
Station Code	Station where service is provided.

- **Misc Details**

Fields	Description
Misc Data: This should be used if there is no field in the IS-XML standard that can be used for providing the required data.	
@ Name	The name of the data that is being provided should be stated here. Please note that this attribute is mandatory if the Misc Data node is provided.
@ UOM Code	If there is any unit of Measure code associated with the data value then a value should be provided here. This attribute is optional.

- **UATP Details**

Fields	Description
Signed for Currency Code	This is the code of the local currency when it is different from the invoice currency and the local amount has been converted in the invoice currency.
Signed for Amount	This is the Original Invoice Amount.
Daily exchange Rate	The Daily Exchange Rate used for converting local amount to invoice currency amount.
Original Invoice Number	This is the Original Invoice Number.
Original Invoice Date	This is the date of the Original Invoice.
Rejected Commissions	The amount of commission that is being rejected.
Rejected Invoice No.	It is the invoice number of the ATCAN invoice being rejected.
Rejected Invoice Date	The date of the ATCAN invoice being rejected.
Rejection Reason Code	The reason code indicating the rejection.

- **Parking Details**

Fields	Description
Stand No	Stand Number of the parking.
Stand Type	Stand Type of the parking.
On Stand Date Time	Date and Time when the aircraft was parked.
Off Stand Date Time	Date and Time when the aircraft was removed from parking.

Reports menu has the following submenus:

- Processing Dashboard
- SIS Usage Report
- SIS IS-WEB Usage Report
- Member/Contact Report
- User Permission Report
- IS and CH Calendar Report
- Invoice Deletion Audit Trial Report
- Invoice Reference Data
- Financial Controller
- Passenger
- Cargo
- Miscellaneous
- Download Offline Reports

We will discuss each submenu in detail.

5.2 Managing Processing Dashboard

Using the Processing Dashboard submenu you can:

- View Invoice Status Details
- View File Status Details
- Manage Late Submissions
- Increment the Billing Period
- Download the Processing Dashboard Contents

5.2.1 Viewing Invoice Status Details

To view invoice status, the steps are as follows:

1. Click **Reports** menu.
2. Click **Processing Dashboard** submenu.
3. The **IS Processing Dashboard** screen is displayed.

Note: The list of invoices in the search result is based on the default values selected in the **Search Criteria** and the **Billing Period**. Default values are **Quick Search** and **Current Billing Period**.

The screenshot shows the SIS Air IS Processing Dashboard. At the top, there is a navigation bar with the IATA logo and a welcome message. Below this is a menu bar with options like Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. The main content area is titled 'IS Processing Dashboard' and features a 'Search Criteria' section with radio buttons for 'Quick Search' and 'Detail Search', and a 'Billing Period' dropdown set to 'Current'. A 'Search' button is located below these options. The 'Search Results' section displays a table with columns for Billing Period, SMI, Billing Member, Billing Member Name, Billed Member, Billed Member Name, Invoice Status, Invoice No., Invoice Date, Billing Category, Invoice Curr., Invoice Amount, and Clearing Curr. Two rows of data are visible, both for the period 2020-Jun-03, SMI B, and Billing Member IB-075. The first row shows a status of 'Ready for Billing' with invoice number M9BINL2, dated 27 Aug 2015, for a miscellaneous category, USD currency, and an amount of 2,993,000. The second row shows a similar status with invoice number 075M9BINL1, also dated 27 Aug 2015, for a miscellaneous category, USD currency, and an amount of 2,993,000. Below the table, there is a pagination bar showing 'Page 1 of 1' and 'View 1 - 2 of 2'. At the bottom, there is a status key with icons for Failed, Pending, Successfully Completed, Suspended member, and Late Submission.

Billing Period	SMI	Billing Member	Billing Member Name	Billed Member	Billed Member Name	Invoice Status	Invoice No.	Invoice Date	Billing Category	Invoice Curr.	Invoice Amount	Clearing Curr.
2020-Jun-03	B	IB-075	IBERIA OPERADORA	NZ-086	AIR NEW ZEALAND	Ready for Billing	M9BINL2	27 Aug 2015	Miscellaneous	USD	2,993,000	
2020-Jun-03	B	IB-075	IBERIA OPERADORA	NZ-086	AIR NEW ZEALAND	Ready for Billing	075M9BINL1	27 Aug 2015	Miscellaneous	USD	2,993,000	

Sections	Description	Remarks
Search Criteria	It defines the method to search Invoices.	<p>There are two types of Search Criteria.</p> <ul style="list-style-type: none"> □ Quick Search: It is the default value set for searching an invoice. The list of Receivable Invoices for the Billing Member is displayed in the Search Results section. □ Detail Search: It is an optional search criterion for the invoices. You can search the invoices for <ul style="list-style-type: none"> • Clearance Year • Clearance Month • Period • Billing Member • Billed Member • Clearance Type • Billing Category • Invoice No. • Invoice Status • Submission Method • Daily Delivery Status
Billing Period	It indicates the billing period for searching the invoices.	<p>Options available are:</p> <ul style="list-style-type: none"> • Current • Previous <p>Default value is the current billing period.</p>
Status Key	It is a list of different icons used for the invoice status displayed in the search results section.	<p>Icons used describe the following status for an invoice</p> <ul style="list-style-type: none"> • Failed • Pending • Successfully Completed • Suspended Member • Late Submission

Sections	Description	Remarks
Search Results	It displays a list of invoices based on the Search Criteria selected.	Each search result displays details for the following fields: <ul style="list-style-type: none"> • Billing Period • Settlement Method Indicator • Billing Member • Billing Member Name • Billed Member • Billed Member Name • Invoice Status • Invoice Number • Invoice Date • Billing Category • Invoice Currency • Invoice Amount • Clearance Currency • Clearance Amount • Suspended/Late Submitted • Validation • Value Confirmation • Digital Signature • Settlement File Sent • Presented • Submission Method • Daily Delivery Status

Buttons	Description	Remarks
Mark for Late Submission	Click Mark for Late Submission to mark the selected invoice for late submission.	An invoice can be marked for late submission only if the Validation Status of the invoice is Pending .
Increment Billing Period	Click Increment Billing Period to increase the Billing period of the selected invoice.	The selected invoice can then be submitted in the following Billing Period .
Download	Click Download to download selected invoices.	The details for the list of invoices can be viewed in an Excel sheet or you can save the details to be viewed later.
Delete	Click Delete to delete selected invoices.	-

Note: The results displayed in the **Search Results** section are by default the Receivable Invoices for the **Billing Member**.

The procedure to view the Invoice Details is as follows:

1. Select the Invoice from the **Search Result** section.
2. Click **Invoice Number** for the Invoice.
3. The details for the invoice are displayed in the **Additional Details of Invoice** screen.

Additional Details of Invoice ✕

Invoice No.	It indicates the invoice number (if known)	--
Invoice Status	It indicates the status of the invoice.	Default value is one of the following <ul style="list-style-type: none"> • All • Open • Ready for submission • Ready for Billing • Claimed • Processing complete • Presented • Validation error-WEB Invoice • Error-Correctable • Error-Non-Correctable • On hold • Ready for validations
Submission Method	It indicates the submission method of the invoice	It is a drop down field with default value as All. Other values are: <ul style="list-style-type: none"> • IS-IDECE • IS-XML • IS-WEB • Auto-Billing
Daily Delivery Status	It indicates the status of the daily delivery bilateral files	It is a drop down field with default value as ALL. Other values are: <ul style="list-style-type: none"> • Not Required • Pending • Completed

Brief description of the options listed in the Invoice Status is as follows:

Field	Options	Remarks
-------	---------	---------

Field	Options	Remarks
Invoice Status	All	It indicates that the status of the invoice can be any of the values (Open, Ready for Submission, Ready for Billing, Claimed, Processing Complete, Presented, Validation Error, Error Correctable, Error Non- Correctable, On Hold and Ready for Validations).
	Open	It indicates that the invoice is not yet submitted. Changes if any can be made to the invoice.
	Ready for Submission	After the Validation checks for the invoice are cleared, the status of the invoice changes to Ready for Submission . Note: Invoices/ Credit Note/ Form C can be modified even if it has status Ready for Submission . Upon the first modification the status will revert back to Open .
	Ready for Billing	When the invoice is submitted to the Billed Member, the status of the invoice changes to Ready for Billing . Note: No editing is possible for the invoices once the status is Ready for Billing .
	Claimed	The status of the invoice is marked as Claimed after the settlement is completed for the invoice.
	Processing Complete	The status of the invoice is marked as Processing Complete after the supporting documents are attached and finalized.
	Presented	When the legal invoice is created and is ready for download to the Billed member, the invoice status changes to Presented .
	Validation error-WEB invoice	If the validation checks for the invoice are not cleared, the status of the invoice changes to Validation error-WEB invoice . Details of un-cleared validation checks are reported on the screen. This will enable you to take further corrective action. The validation errors are further classified as Error Correctable and Error Non-Correctable .
	Error-Correctable	If an error can be rectified by the user, it is classified as Error-Correctable .
	Error-Non-Correctable	If an error cannot be rectified by the user, it is classified as Error-Non-Correctable . In such case you will have to delete the invoice in error and resubmit a new invoice.

Field	Options	Remarks
	On Hold	If multiple invoices are uploaded in a single file and some of the invoices are in error; then as per the member profile (Reject on File/ Reject on Invoice) all the other successfully validated invoices are put on hold. The status of the successfully validated invoices is changed to On Hold .
	Ready for Validations	It indicates that the invoice is ready for validation.

The procedure to change the Search Criteria for an invoice is as follows:

1. Select the values for the following fields
 - **Clearance Year**
 - **Clearance Month**
 - **Period**
 - **Billing Member**
 - **Billed Member**
 - **Clearance Type**
 - **Billing Category**
 - **Invoice No.**
 - **Invoice Status**
 - **Submission Method**
 - **Daily Delivery Status**
2. Click **Search**.
3. The results are displayed in the **Search Results** section.

5.2.3 Viewing Billing File Status Details

1. Click **Billing File Status** Tab.

Note: The list of files in the search result is based on the default values selected in the **Search Criteria** and the **Billing Period**. Default values are **Quick Search** and **Current Billing Period**.

Sections	Description	Remarks
Search Criteria	It defines the method to search Invoices.	<p>There are two types of Search Criteria.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Quick Search: It is the default value set for searching an invoice. Download	Click Download to download selected invoices.	The details of the list of files displayed in the Search Results section can be viewed in an Excel sheet or you can save the details to be viewed later.
Delete	Click Delete to delete selected invoices.	-

The procedure to view file status is as follows:

1. Select the file from the **Search Results** section.
2. Click **File Status** for the Invoice.
3. The details for the invoice are displayed in the **Additional Details of File** screen.

Additional Details of File

Invoice Present: 0
Passed Validation: 0
Failed Validation: 0

5.2.4 Changing the Search Criteria for Files

To change the search criteria for the files, the steps are as follows:

1. Select **Detail Search** in the **Search Criteria** section.

The screenshot shows a search criteria form with the following fields and values:

- Clearance Year: 2010
- Clearance Month: Jan
- Period: 1
- Billing Member: SI-154-SIS Airways
- Billing Category: Passenger
- File Format: All
- File Status: All
- File Name: (empty)

A "Search" button is located at the bottom left of the form.

Fields	Description	Remarks
Clearance Year	It is the Clearance Year of the invoice.	Select from the default values <ul style="list-style-type: none"> • The current year • Previous year
Clearance Month	It is the Clearance Month of the invoice.	Select from the default values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Period	It is the Clearance Period of the invoice.	Select from the default values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
Billing Member	It is the combination of designator, accounting code and commercial name of the billed member.	Default is the Self entity. It is generated automatically and cannot be modified.
Billing Category	It indicates the type of invoice.	Valid values are as follows: <ul style="list-style-type: none"> • Passenger • Cargo • Miscellaneous • UATP
File Format	It indicates the type of file.	Valid values are as follows: <ul style="list-style-type: none"> • All • ISIDEC – Inbound • ISXML – Inbound • Form C XML

Fields	Description	Remarks
File Status	It indicates the status of the file.	Default value is one of the following <ul style="list-style-type: none">• All• File Received• Sanity Check Error• Sanity Check Passed Phase 1• Error in Validation• Successfully Validated
File Name	Name of the file through which invoices were submitted.	File name can be entered in full or part.

The procedure to change the Search Criteria for a file is as follows:

1. Select the values for the following fields
 - **Clearance Year**
 - **Clearance Month**
 - **Period**
 - **Billing Category**
 - **File Format**
 - **File Status**
 - **File Name**
2. Click **Search**.
3. The results will be displayed in the **Search Results** section.

5.2.5 Managing Late Submissions

To manage late submissions, the steps are as follows:

1. View Invoice Status Details.
2. Select the Invoice with a **Validation Status** as **Pending** in the **Search Results** section.
3. Click **Mark for Late Submission**.
4. The selected invoice is marked with the **Late Submission** icon as displayed in the **Status Key** section.
5. If the Late Submission window is closed a message window is displayed.

5.2.6 Incrementing the Billing Period

To increment the billing period, the steps are as follows:

1. View Invoice Status Details.
2. Select the Invoice from the **Search Results** section.
3. Click **Increment the Billing Period**.
4. The **Results of Invoice Action** window will be displayed with the **Status** for the invoice.

Results of Invoice Action ✕			
Billing Member Code	Billing Member Name	Invoice No.	Status
SI	SIS Airways	ssisi121	Ignored

5.2.7 Downloading the Processing Dashboard Contents

To download the Processing Dashboard contents, the steps are as follows:

1. View Invoice Status Details.
2. Click **Download** to download the list of invoices displayed in the **Search Results** section.
3. The details for the list of invoices can be viewed in an Excel sheet (CSV) or you can save the details to be viewed later.

5.2.8 Deleting Selected Invoice/Files

To delete the selected invoice, the steps are as follows:

1. View Invoice Status Details.
2. Select the Invoice from the **Search Results** section you want to delete.
3. Click **Delete**.

5.2.9 Viewing Document Package Status

Click **Document Package Status** Tab.

Note: The list of files in the search result is based on the default values selected in the **Search Criteria, From Package Date and To Package Date**.

Sections	Description	Remarks
* From Package Date	It displays the From Date for the Document Package.	The current date is displayed by default. To change the date, select from the Date picker.
* To Package Date	It displays the To Date for the File Document Package.	The current date is displayed by default. To change the date, select from the Date picker.
Sending Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID to whom the package is sent. For example, WI-023-Wings Airways
Receiver Member	Unique alphanumeric code that identifies the member in the Member Profile.	It is the member ID from whom the package is received.

Sections	Description	Remarks
Sent to Location ID	The Location IDs offered in this List Box will be filtered to those that are associated with the user (Active as well as Inactive).	<ul style="list-style-type: none"> When the 'Location Association Type' of the user is "None" <ul style="list-style-type: none"> The List Box field will NOT offer any Location IDs When the 'Location Association Type' of the user is "All Location IDs" <ul style="list-style-type: none"> The List Box field will offer ALL Active as well as Inactive Location ID(s) of the Billing Member When the 'Location Association Type' of the user is "Specific Location IDs" <p>The List Box field will offer only those Location ID(s) of the Billing Member that are associated with the user, whether Active or Inactive</p>
Package Type	It indicates the Package Type.	<p>Valid value is one of the following:</p> <ul style="list-style-type: none"> FOD FTD FTS FXS OPD OTH POD WOD <p>Default value displayed is ALL</p>
Submission Method	It indicates the submission method for the transaction.	<p>Valid values are:</p> <ul style="list-style-type: none"> ALL IS-XML IS-WEB
Package File Status	It indicates the package file status.	<p>Valid values are:</p> <ul style="list-style-type: none"> ALL Sanity Check Error Error In Validation Successfully Validated
Package File Name	It indicates the name of package file as received in IS.	
Document Package Status	It indicates the Package Status.	<p>Valid value is one of the following:</p> <ul style="list-style-type: none"> All Open Ready for Submission Ready for Billing Presented Validation Error- WEB Invoice Error-Non-Correctable On Hold

Sections	Description	Remarks
Search Results	It displays a list of document packages based on the search criteria selected.	Each Search Result displays details for the following fields: <ul style="list-style-type: none"> • Package Date • Sending Member • Receiving Member • Package Number • Package Type • Package File Status • Document Package Status • Submission Method • Validation • Presented

Buttons	Description	Remarks
Search	Click Search to search the packages based on the search criteria.	An invoice can be marked for late submission only if the Validation Status of the invoice is Pending .
Download	Click Download to download selected packages.	The details of the list of files displayed in the Search Results section can be viewed in an Excel sheet or you can save the details to be viewed later.
Delete	Click Delete to delete selected packages.	-

The procedure to view document packages is as follows:

1. Enter **From Package Date**.
2. Enter **To Package Date**.
3. Enter **Sending**.
4. Select applicable **Package Type** from the drop-down list.
5. Select applicable **Package Status** from the drop-down list.
6. Select applicable **Sent from Location ID** from the drop-down list.
7. Enter **Package Number**.
8. Select applicable **Package Owner** from the drop-down list.
9. Select applicable **Submission Method** from the drop-down list.
10. Enter the **File Name**.
11. Click **Search**. The records are displayed in the **Search Results** table.
12. If required, click **Clear** to clear the entered document package search criteria.

5.3 Generating Reference Data Reports

In this topic we will learn how to generate:

- SIS Usage Report
- SIS IS-WEB Usage Report
- Member/Contact Details Report
- User Permission Report
- IS and CH Calendar Report
- Invoice Deletion Audit Log Report
- Invoice Reference Data Report

5.3.1 SIS Usage Report

To generate **SIS Usage Report**, the steps are as follows:

1. Click **Reports** menu.
2. Click **SIS Usage Report** submenu.
3. The **SIS Usage Report Screen** is displayed.

Fields	Description	Remarks
*From Billing Year	It indicates the billing year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years Default value is the Current Year.
*To Billing Year	It indicates the billing year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years Default value is the Current Year.
*From Billing Month	It indicates the billing month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec Default value is the Current Month.

Fields	Description	Remarks
*To Billing Month	It indicates the billing month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec Default value is the Current Month.
*From Period	It indicates the billing period that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4 Default value is the Current Period.
*To Period	It indicates the billing period that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4 Default value is the Current Period.
Download File Format	Allows to download report in two formats: <ul style="list-style-type: none"> • PDF • Excel 	On screen option is not available for this report

The procedure to generate SIS Usage Report is as follows:

- Enter the following details
 - **From Billing Year**
 - **To Billing Year**
 - **From Billing Month**
 - **To Billing Month**
 - **From Period**
 - **To Period**
- In Download File Format, select the format in which report is required to be generated.
- Click **Generate Report**.
- The Report for the selected criteria is displayed.

5.3.2 SIS IS-WEB Usage Report

To generate SIS IS-WEB Usage Report, the steps are as follows:

- Click **Reports** menu.
- Click **SIS IS-WEB Usage Report** submenu.

3. The **SIS IS-WEB Usage Report Screen** is displayed.

Fields	Description	Remarks
*From Billing Year	It indicates the billing year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Year of Current Billing Period • Previous Year Default value for these fields should be set as per the previously closed period.
*To Billing Year	It indicates the billing year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Year of Current Billing Period • Previous Year Default value for these fields should be set as per the previously closed period.
*From Billing Month	It indicates the billing month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec Default value for these fields should be set as per the previously closed period.
*To Billing Month	It indicates the billing month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec Default value for these fields should be set as per the previously closed period.

Fields	Description	Remarks
*From Period	It indicates the billing period that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4 Default value for these fields should be set as per the previously closed period.
*To Period	It indicates the billing period that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4 Default value for these fields should be set as per the previously closed period.

The procedure to generate SIS IS-WEB Usage Report is as follows:

- Enter the following details
 - **From Billing Year**
 - **To Billing Year**
 - **From Billing Month**
 - **To Billing Month**
 - **From Period**
 - **To Period**
- Click **Generate Offline CSV Report**.
- This report will be generated offline and be made available to user in CSV format after it has been created. User will be sent an email containing a link to the zipped CSV file. Alternatively, this report may also be downloaded from screen 'Download Offline Reports' after user receives the email notification."

5.3.3 Member / Contact Details Report

Member Details Report

To generate member details report, the steps are as follows:

- Click **Reports** menu.
- Click **Member/ Contact Report** submenu.
- The **Member and Contact Report** screen is displayed.

Sections/Fields	Description	Remarks
Report Criteria	It indicates the basic criteria for generating report.	Valid values are <ul style="list-style-type: none"> Member Details: It is the default value set for generating report. The report will be generated based on the Member Details and Display Options selected. Contact Details: Select the value to generate the contact detail report.
Member Details		
Member Name	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways Select valid value from the drop- down list.
Country	It indicates the name of the Country of the member.	Select valid value from the list displayed.
ACH	It indicates if the member is an ACH member.	Select the check box to view the result for ACH member.
ICH	It indicates if the member is an ICH member.	Select the check box to view the result for ICH member.
Dual Members	It indicates if the member is an ACH and ICH member.	Select the check box to view the result for Dual member.
Non-CH Members	It indicates if the member is neither an ICH nor ACH member.	Select the check box to view the result for Non- CH member.
IATA Members	It indicates if the member is an IATA member.	Select the check box to view the result for IATA member.
Display Options		
Available Fields	It is a list of fields for which the report is to be generated for the member.	Select the fields from the list. The details of the member will be generated for these fields.

Sections/Fields	Description	Remarks
Selected Fields	It is a list of fields for which the report is to be generated for the member.	The fields selected in the Available Fields will be displayed in the Selected Fields .
Sort On/ Sort Order	It indicates the fields in the Selected Fields .	You can change the Sort Order for each field. Valid values for the Sort Order are <ul style="list-style-type: none"> • Ascending • Descending Default value set is Ascending .

Buttons	Description	Remarks
Include	Click Include to include the selected fields in Sort On/ Sort Order list.	-
Exclude	Click Exclude to exclude the selected fields from Sort On/ Sort Order list.	-
Generate Report	Click Generate Report to view the member details report.	The Member Information window will be displayed with the member details for the selected fields.
>	Click > to include the desired fields in the Selected Fields section.	-
>>	Click >> to include all the fields in the Sort On/ Sort Order section.	-
<	Click < to exclude the desired fields from the Selected Fields section.	-
<<	Click << to exclude all the fields from the Sort On/ Sort Order section.	-
Download	Click Download to download the generated report.	The report can be viewed in an excel sheet or you can save the details to be viewed later.
Exit	Click Exit to close the Member Information window.	-

The procedure to generate Member Details report the procedure is as follows:

- Enter the following details:
 - **Member Name**
 - **Country**
- Select the valid values from the following
 - **ACH Members**
 - **ICH Members**
 - **Dual Members**
 - **Non-CH Members**
 - **IATA Members**
- Select the desired **Available Fields**.
- Click **>**.
- The fields will be displayed in the **Selected Fields**.
- Click **Include**.
- Select the **Sort Order** for each field.
- Click **Generate Report**.
- The **Member Information** screen will be displayed with the details for the **Selected Fields**.

10. Click **Download** to view the result or save it to be viewed later.

5.3.4 IS Contact Details Report

To generate IS contact details report, the steps are as follows:

1. Click **Reports** menu.
2. Click **Member/ Contact Report** submenu.
3. The **Member and Contact Report** screen is displayed.
4. Select **Contact Details** in the **Report Criteria** section.

Sections	Description	Remarks
Report Criteria	It indicates the basic criteria for generating report.	Valid values are <ul style="list-style-type: none"> Member Details: It is the default value set for generating report. The report will be generated based on the Member Details and Display Options selected. Contact Details: Select the value to generate the contact detail report.
Member Details		
Member Name	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways Select valid value from the list displayed.
Country	It indicates the name of the Country of the member.	Select valid value from the list displayed.
ACH	It indicates if the member is an ACH member.	Select the check box to view the result for ACH Member .
ICH	It indicates if the member is an ICH member.	Select the check box to view the result for ICH Member .

Sections	Description	Remarks
Dual Members	It indicates if the member is an ACH and ICH member.	Select the check box to view the result for Dual Member .
Non-CH Members	It indicates if the member is neither an ICH nor ACH member.	Select the check box to view the result for Non- CH Member .
IATA Members	It indicates if the member is an IATA member.	Select the check box to view the result for IATA Member .
Contact Name	It indicates the name of the contact.	The field is valid only after the Member Name is selected.
E-mail	It indicates the E-mail of the contact.	The field is valid only after the Member Name is selected.
Report Display Options		
Tabular Format	It indicates the display option for the report.	If Tabular Format is selected the Contact Information window will be displayed with the report for the desired fields.
Address - Label Format	It indicates the display option for the report.	If Address – Label option is selected the generated report will be displayed in a .PDF format.
Display Options		
Available Fields	It is a list of fields for which the report is to be generated for the member.	Select the fields from the list. The details of the member will be generated for these fields.
Selected Fields	It is a list of fields for which the report is to be generated for the member.	The fields selected in the Available Fields will be displayed in the Selected Fields .
Sort On/ Sort Order	It indicates the fields in the Selected Fields .	You can change the Sort Order for each field. Valid values for the Sort Order are <ul style="list-style-type: none"> • Ascending • Descending Default Value set is Ascending .

Buttons	Description	Remarks
Include	Click Include to include the selected fields in Sort On/ Sort Order list.	-
Exclude	Click Exclude to exclude the selected fields from Sort On/ Sort Order list.	-
Generate Report	Click Generate Report to view the member details report.	The Member Information window will be displayed with the member details for the selected fields.
>	Click > to include the desired fields in the Selected Fields section.	-
>>	Click >> to include all the fields in the Sort On/ Sort Order section.	-
<	Click < to exclude the desired fields from the Selected Fields section.	-
<<	Click << to exclude all the fields from the Sort On/ Sort Order section.	-

Buttons	Description	Remarks
Exit	Click Exit to close the Member Information window.	-

The procedure to generate Contact Details report the procedure is as follows:

- Enter the following details:
 - Member Name**
 - Country**
- Select the valid values from the following
 - ACH Members**
 - ICH Members**
 - Dual Members**
 - Non-CH Members**
 - IATA Members**
 - Contact Name**
 - Contact E-mail**
- Select the appropriate **Report Display** option.
- Select the desired **Available Fields**.
- Click **>**.
- The fields will be displayed in the **Selected Fields**.
- Click **Include**.
- Select the **Sort Order** for each field.
- Click **Generate Report**.
- The **Contact Information** screen will be displayed with the details for the **Selected Fields**.

5.3.5 User Permission Report

To generate User Permission report, the steps are as follows:

- Click **Reports** menu.
- Click **User Permission Report** submenu.
- The **User Permission Report** screen is displayed.

Fields	Description	Remarks
User Name	The user name can be of any user for the selected category.	<ul style="list-style-type: none"> This is a normal/non-auto-complete textbox that is always enabled and it is an optional field If user name is not entered then the application will display the details of all users If user name is entered here then results will be fetched for that particular user.

The procedure to generate User Permission Report is as follows:

- Enter the following details:
 - User Name (optional)**
- Click **Generate Report**.
- The report will be generated for the selected **User Name**.

Results set description:

- User Names will be displayed in rows
- For every user, User Information and Permissions Information will be displayed in columns
 - User Information will comprise 2 columns (i.e. 'Is Active' and 'Is Super User')
 - Permission Information will comprise all permissions applicable for the category of user (whether the user has the permission or not)

- Where permission is available for a user, it will be indicated with a 'Y'. Conversely, when permission is not available, it will be indicated with a blank.
- Sort criteria of rows will be in increasing/ascending order of User Name
- It is possible to export report results in Excel (data only) or PDF format

5.3.6 IS and CH Calendar Report

To generate IS and CH calendar report, the steps are as follows:

1. Click **Reports** menu.
2. Click **IS and CH Calendar Report** submenu.
3. The **IS and CH Calendar Report** screen is displayed.

The screenshot shows the 'IS and CH Calendar Report' screen in the SIS Air application. The top navigation bar includes 'Passenger', 'Cargo', 'Miscellaneous', 'UATP', 'Reports', 'General', and 'Profile and User Management'. The 'Reports' menu is selected. The main content area has a 'Search Criteria' section with three dropdown menus: 'Calendar Year' (set to 2011), 'Calendar Type' (set to IS+ICH+ACH), and 'Time Zone' (set to GMT-05:00 Eastern Time (US & Canada)). A 'Generate Report' button is located below these fields. The footer contains copyright information for IATA 2012 and a build version number.

Fields	Description	Remarks
*Clearance Year	It is the Clearance Year of the invoice.	Select from the valid values <ul style="list-style-type: none"> • The current year • Previous five years
*Calendar Type	It indicates the type of calendar to be viewed.	Valid values are as follows: <ul style="list-style-type: none"> • IS • ICH • ACH • IS + ICH • IS + ACH • ICH + ACH • IS + ICH + ACH
Time Zone	It indicates the time zone for which the report is to be generated.	Select the zone from the list.

The procedure to generate IS and CH Calendar Report is as follows:

1. Enter the following details:
 - **Clearance Year**
 - **Calendar Type**
 - **Time Zone**
2. Click **Generate Report**.
3. The report will be generated for the selected **Time Zone** and the selected **Calendar Type**.

5.3.7 Invoice Deletion Audit Trail Report

This report is used for members to determine details of invoices/credit-notes/Form-Cs deleted by their users.

Note:

- The invoice deletion audit trail report will display all details of invoices/credit-notes/Form-Cs deleted by IS-WEB users along with name of user and time of deletion details based on specified search criteria
- In case of deletion of 'On-Behalf' of invoices/credit-notes, the application will display the details of the transmitter's user who performed the deletion (for e.g. IATA user who deleted MISC CDA invoices, or UATP user who deleted UATP invoices)
- There are certain countries that have legal restrictions over the identity of users that make invoice changes i.e username should not be disclosed:

l. In order to comply with this, an existing profile field 'Hide User Names In Audit Trail' will be used. This field is located in SIS Member Profile screen. User can check/uncheck this field as per their requirement.

m. Based on this profile field the user information will be shown or hidden in the report

To generate Invoice Deletion Audit Trail report, the steps are as follows:

- Click **Reports** menu
- Click **Invoice Deletion Audit Trail Report** submenu
- The **Invoice Deletion Audit Trail Report** screen is displayed.

The screenshot shows the 'Invoice Deletion Audit Trail Report' search criteria form. It includes fields for Billing Category (Passenger), Billing Year (2015), Billing Month (Jan), Billing Period (All), Billed Member (TA-XXXXXXXXXXXX), Invoice Number, Deleted From Date, Deleted To Date, and Deleted By (Username). 5.4 Generating Reports for Financial Controller

In this topic we will learn how to generate

- Interline Billing Summary Report
- Interline Payables Analysis Report
- Suspended Billings Report
- Pending Invoices In Error Report
- Top 10 Interline Partners – Receivables Report
- Top 10 Interline Partners – Payables Report
- Access ICH Web Report
- Access ACH Settlement Reports

5.4.1 Interline Billing Summary

To generate Interline Billing Summary report, the steps are as follows:

1. Click **Reports** menu.
2. Click **Financial Controller** submenu.
3. Click **Interline Billing Summary** option.
4. The **Interline Billing Summary** screen is displayed.

The fields are as explained in the following table.

Fields	Description	Remarks
*Billing Year	It indicates the Billing Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years
*Billing Month	It indicates the Billing Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
*Billing Period	It indicates the Billing Period that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4

Fields	Description	Remarks
Settlement Method	It indicates the Settlement Method used for the transaction.	Valid values are: <ul style="list-style-type: none"> • All • ICH • ACH • ICH & ACH • Bilateral • Adjustments Due to Protests • ACH Using IATA Rules (MITA) • No Settlement (PAX Form C) • ICH Special Agreement
*Currency Code	It indicates the currency to which the transaction is converted.	Select the value from the list displayed.
Member Code	It indicates the name of the billing member.	Enter a few characters or press the down arrow key on your keyboard. Select the member from the list displayed.
Totals Required	Select the check box if you require the Invoice Totals in the report.	-

The procedure to generate the Interline Billing Summary report is as follows:

- Enter the details for the following fields:
 - **Billing Year**
 - **Billing Month**
 - **Billing Period**
 - **Settlement Method**
 - **Currency Code**
 - **Member Code**
 - **Totals Required**
- Click **Generate Report**.
- The report will be generated for the selected values.

Member Code	Member Name	Outward Billing Values Accepted For Settlement					Outward Billing Values Not Accepted For Settlement					Total	Incoming Billing Values Accepted For Settlement					Total	Net Difference
		P	U	C	M		P	U	C	M			P	U	C	M			
991221	WING AIR	0.00	0.00	0.00	0.00		0.00	0.00	0.00	0.00		0.00	0.00	0.00	0.00		0.00	0.00	0.00

5.4.2 Interline Payables Analysis Report

To generate Interline Payables Analysis Report, the steps are as follows:

1. Click **Reports** menu.
2. Click **Financial Controller** submenu.
3. Click Interline **Payables Analysis Report** option.
4. The **Interline Payables Analysis** screen is displayed.

The fields are as explained in the following table.

Fields	Description	Remarks
*Billing Year	It indicates the Billing Year that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • Current Year • Previous Five Years
*Period No	It indicates the billing period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
*Currency	It indicates the currency to which the transaction is converted.	-
Billing Member	It is the member who generates the invoice.	It is the combination of designator, accounting code and commercial name of the billing member.
*Billing Month	It indicates the billing month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec

Fields	Description	Remarks
*Settlement Method	It indicates the Settlement Method used for the transaction.	Valid values are: <ul style="list-style-type: none"> • All • ICH • ACH • ICH and ACH • Bilateral • Adjustment Due to Protests • ACH using IATA Rules (MITA) • No Settlement (PAX Form C) • ICH Special Agreement
*Comparison Period	It indicates whether average net billing value of previous month or previous period should be displayed.	Valid values are: <ul style="list-style-type: none"> • Period • Month
Total Required	It indicates if the report should have the Invoice Total included.	-

The procedure to generate Interline Payables Analysis Report is as follows:

- Enter the following details
 - **Billing Year**
 - **Period No**
 - **Currency**
 - **Billing Member**
 - **Billing Month**
 - **Settlement Method**
 - **Comparison Period**
 - **Total Required**
- Click **Generate Report**.
- The Report for the selected criteria is displayed.

5.5.10 Correspondence Status Report

To generate **Correspondence Status Report for Passenger**, the steps are as follows:

1. Click **Reports** menu.
2. Click **Passenger** submenu.
3. Click **Correspondence Status Report** option.
4. The **Pax: Correspondence Status Report** screen is displayed.

Fields	Description	Remarks
From Date*	It is the date of start of correspondence.	The date can be added by choosing a date from the calendar.
To Date*	It is the date of current correspondence.	The date can be added by choosing a date from the calendar.
Correspondence Ref. No.	When a Correspondence is initiated for the first time, SIS generates a unique Correspondence Reference Number. Any subsequent correspondence will continue with the same Correspondence Reference number.	Links the rejection memo/billing memo/ credit memo based on 'Authority to Bill' or expiry of correspondence case.
Correspondence Initiating Member	It is the member who initiates the correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Self • Other carrier • Either Entity receiving the last rejection invoice is always the initiating entity.
Member Code	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways

Fields	Description	Remarks
Correspondence Status	It indicates status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open status indicates the correspondence is in process. • Close status indicates that the correspondence is over and final bill has been generated. • Expired indicates when the entity does not respond to the correspondence by the time limit. SIS will not allow any further correspondence reply on correspondences which are remarked as expired.
Correspondence Sub Status	It indicates sub status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Received indicates that the entity has received the correspondence sent by other entity. • Saved indicates that the correspondence is been created and saved, not yet submitted. • Responded indicates that the correspondence is been sent to the other member. • Ready for Submit indicates that the correspondence is ready to be submitted to the other member. • Pending indicates that the correspondence is yet to be responded to. • Billed indicates that the correspondence is submitted • Due To Expiry indicates that the correspondence invoice is no more valid after a certain time period (typically 3 months) • Accepted By Correspondence Initiator indicates that the correspondence invoice is closed by the correspondence initiator
Correspondence Stage	It indicates number of stages for correspondence.	It is generated automatically by the system.
Expiring in (no. of days)	It indicates the time limit for action.	Each correspondence has a time limit for action to be taken on it. The time limit is governed by the rules of the respective clearing house.

5.5.11 BVC (Billing Value Confirmation) Details Report

To generate **BVC Details** report, the steps are as follows:

1. Click **Reports** menu.
2. Click **Passenger** submenu.
3. Click **BVC Details** option.
4. The **BVC Details** screen is displayed.

The screenshot shows the 'BVC Details' report generation interface. It includes a navigation bar with 'Passenger', 'Cargo', 'Miscellaneous', 'UATP', 'Reports', 'General', and 'Profile and User Management'. The 'Reports' menu is selected. The 'BVC Details' section has a 'Search Criteria' area with the following fields:

- Clearance Month*: Jun (dropdown)
- Period No.*: 1 (dropdown)
- Billing Year*: 2011 (dropdown)
- Billing Airline: (text input)
- Billed Airline: (text input)
- Validated PMI: (text input)
- Agreement Indicator - Supplied: (text input)
- Agreement Indicator - Validated: (text input)
- ATPCO Reason Code: (text input)

A 'Generate Report' button is located at the bottom left of the search criteria area. The footer shows '© 2012 International Air Transport Association. All rights reserved.' and 'Build: VersionNumber | DB: SISE1'.

Fields	Description	Remarks
Clearance Month*	It indicates the Clearance Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Period No. *	It indicates the Clearance Period that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
Billing Year*	It indicates the Clearance Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years
Billing Airline	It is the combination of designator, accounting code and commercial name of the billed member.	It is the member ID who generates the invoice to be sent. For example, WI-023-Wings Airways
Billed Airline	It is the combination of designator, accounting code and commercial name of the billed member.	It is the member ID who receives the invoice.

Fields	Description	Remarks
Invoice Number	Unique alphanumeric ID that identifies the invoice.	<p>The Invoice Number could be up-to ten characters (English letters and numbers only)</p> <p>For example, WI1234</p> <ul style="list-style-type: none"> Spaces and special characters (#, *, @, ~, - etc.) should not be used. Letters are case insensitive. For example, wi1234 will be considered equal to WI1234 when performing duplicate checks. Should not be duplicated by the billing airline within a calendar year.
Issuing Airline	It is the accounting code of the issuing airline that bills the coupon.	<p>Should be a valid accounting code.</p> <p>For Example, 221 for WI (Wings Airways)</p>
Original PMI	It is the Original Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).
Validated PMI	It is the Validated Pricing Method Indicator.	<p>This field should be blank if Agreement Indicator is blank. Exception:</p> <ul style="list-style-type: none"> Should be "N" if 'Agreement Indicator' is "I", "J" or "K". Should be "O" if 'Agreement Indicator' is "W", "V" or "T". Value N may be provided even if Agreement Indicator is blank. This exception will be allowed for some months after go-live of SIS, and the date of removal of this exception will be decided by the IATA RAWG (Revenue Accounting Working Group).

Fields	Description	Remarks
Agreement Indicator – Supplied	It is the Agreement Indicator.	<ul style="list-style-type: none"> ☐ This is an optional field. ☐ Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> • I - First & Final Attachment I transactions • J - First & Final Attachment J transactions • K - NFP Non Final transactions • W - Switched Own Prorate transactions requiring AIA Value Confirmation • V - Switched Own Prorate transactions not requiring AIA Value Confirmation • T - Stored Own Prorate transactions
Agreement Indicator - Validated	It is the Agreement Indicator.	<ul style="list-style-type: none"> ☐ This is an optional field. ☐ Where a single character value is provided, it must be valid as per industry specifications. Valid values are as follows: <ul style="list-style-type: none"> • I - First & Final Attachment I transactions • J - First & Final Attachment J transactions • K - NFP Non Final transactions • W - Switched Own Prorate transactions requiring AIA Value Confirmation • V - Switched Own Prorate transactions not requiring AIA Value Confirmation • T - Stored Own Prorate transactions
ATPCO Reason Code	Enter valid ATPCO reason Code.	-

The procedure to generate BVC Details report is as follows:

1. Enter the following details:

- **Clearance Month**
- **Period No.**
- **Billing Year**
- **Billing Airline**
- **Billed Airline**
- **Invoice Number**
- **Issuing Airline**
- **Original PMI**
- **Validated PMI**
- **Agreement Indicator – Supplied**
- **Agreement Indicator – Validated**
- **ATPCO Reason Code**

2. Click **Generate Report**.

3. The report will be displayed for the selected values.

5.5.12 Non-Sampling RM Analysis Comparision to Industry – IATA RAM Rules

To generate **Non-Sampling RM Analysis Comparision to Industry – IATA RAM Rules** report, the steps are as follows:

1. Click **Reports** menu.
2. Click **Passenger** submenu.
3. Click **Non-Sampling RM Analysis Comparision to Industry – IATA RAM Rules** option.
4. The **Non-Sampling RM Analysis Comparision to Industry – IATA RAM Rules** report is displayed.

PAX Rejection Memo Memo Reduction Industry Initiative

American Airlines(AA-001)
February 2019 Analysis

Method of measuring progress on the volume of rejections raised:

To obtain an estimate of the percentage of prime billings rejected during a given period of time (either by or to AA-001), the following method is used.

- The ratio of the sum of 1st stage rejections for the previous 12 months to the sum of prime billings of the previous 12 months:

$$\text{Estimated \% of rejected prime billings} = \frac{\text{Sum of Stage 1 RMs of past 12 months}}{\text{Sum of Prime billings of past 12 months}} \times 100 \%$$

The estimated percentage of 1st stage rejections which are re-rejected and the estimated percentage of 2nd stage rejections which are re-rejected are calculated in a similar way:

$$\text{Estimated \% of rejected Stage 1 RMs} = \frac{\text{Sum of Stage 2 RMs of past 12 months}}{\text{Sum of Stage 1 RMs of past 12 months}} \times 100 \%$$

$$\text{Estimated \% of rejected Stage 2 RMs} = \frac{\text{Sum of Stage 3 RMs of past 12 months}}{\text{Sum of Stage 2 RMs of past 12 months}} \times 100 \%$$

Notes:

- All Sampling data are excluded from this analysis.
- All SMI-A (Settlement through ACH using ACH rules) data are excluded from this analysis.

25-03-2019

1

Case 1: Rejections received by American Airlines		
Fields	Description	Remark
Comparison Chart	It indicates the Comparison Chart between member and global trends.	-
Comparison Table	It indicates the Comparison Table between the current year and previous year.	-
Top 5 Airlines	It indicates the Top 5 Airlines raising rejections against particular airlines.	-
Reason Code for Analysis	It shows the Top 4 reason codes used to raise stage 1 rejections against report generating Member for the current year.	-

Case 2: Rejections Raised by American Airlines		
Fields	Description	Remark
Comparison Chart	It indicates the Comparison Chart between member and global trends.	-
Comparison Table	It indicates the Comparison Table between the current year and previous year.	-
Top 5 Airlines	It indicates the Top 5 Airlines raising rejections against particular airlines.	-
Reason Code for Analysis	It shows the Top 4 reason codes of all 1st stage rejections raised by report generating member.	-

Generating Cargo Module Reports

In this topic we will learn how to generate:

- Receivables- Cargo Submission Overview Report
- Receivables- Interline Billing Summary Report
- Receivables- Rejection Analysis Report
- Receivables- RM BM CM Summary Report
- Receivables- Supporting Documents Mismatch Report
- Payables- Cargo Submission Overview Report
- Payables- Interline Billing Summary Report
- Payables- Rejection Analysis Report
- Payables- RM BM CM Summary Report
- RM-BM-CM Details Report
- Correspondence Status Report

5.5.13 Cargo Submission Overview - Receivables

To generate Submission Overview - Receivables report, the steps are as follows:

1. Click **Reports** menu.
2. Click **Cargo** submenu.
3. Click **Receivables** option.
4. Click **Cargo Submission Overview** option.
5. The **Cargo Submission Overview - Report for Receivables** screen is displayed.

The fields are as explained in the following table.

Fields	Description	Remarks
Billing Year From*	It indicates the Billing Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years
Billing Month From*	It indicates the Billing Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Period No. From	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4

Fields	Description	Remarks
Billing Year To*	It indicates the Billing Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years
Billing Month To*	It indicates the Billing Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Period No. To	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
Billing Entity	It is the combination of designator, accounting code and commercial name of the billed member.	Type in a few characters or press the down arrow key on your keyboard. Select the member from the list displayed.
Settlement Method	It indicates the Settlement Method used for the transaction.	Valid values are: <ul style="list-style-type: none"> • All • ICH • ACH • ICH & ACH • Bilateral • Adjustments Due to Protests • ACH Using IATA Rules (MITA) • No Settlement (PAX Form C) • ICH Special Agreement
Output	It indicates the type of output to be included in the report.	Valid values are: <ul style="list-style-type: none"> • Only Sub Totals • Only Invoice Totals • Subtotals and Invoice Totals

The procedure to generate Cargo Submission Overview - Report for Receivables is as follows:

1. Enter the details for the following fields:

- **Billing Year From**
- **Billing Month From**
- **Period No. From**
- **Billing Year To**
- **Billing Month To**
- **Period No. To**

- Billed Entity
 - Settlement Method
 - Output
2. Click **Generate Report**.
 3. The report for the selected values will be generated.

5.5.14 Receivables Interline Summary

To generate Payables Interline Summary, the steps are as follows:

1. Click **Reports** menu.
2. Click **Cargo** submenu.
3. Click **Receivables Interline Summary** option.
4. The **Receivables Interline Billing Summary** s displayed.

The screenshot shows the SIS Air web application interface. At the top, there's a navigation bar with the IATA logo and user information. Below it, a breadcrumb trail reads: Home >> Reports >> Cargo >> Receivable - Interline Billing Summary. The main heading is 'Receivables - Interline Billing Summary'. Underneath, there's a 'Search Criteria' section with several dropdown menus: 'Billing Year From' (set to 2011), 'Billing Year To' (set to 2011), 'Billing Month From' (set to Nov), 'Billing Month To' (set to Nov), 'Billing Period From' (set to 1), 'Billing Period To' (set to 4), 'Billing Entity Code' (empty), 'Settlement Method' (set to All), and 'Currency Code' (set to USD). A 'Generate Report' button is located below these fields. At the bottom of the page, there's a small copyright notice: '© 2012 International Air Transport Association. All rights reserved.' and a build version string: 'Build: VersionNumber | DB: SIS/TE'.

The fields are as explained in the following table.

Fields	Description	Remarks
*Billing Year From	It indicates the Billing Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years
*Billing Month From	It indicates the Billing Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Billing Period From	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
*Billing Year To	It indicates the Billing Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years

Fields	Description	Remarks
*Billing Month To	It indicates the Billing Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Billing Period To	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4
Billing Entity Code	It is the combination of designator, accounting code and commercial name of the billed member.	Type in a few characters or press the down arrow key on your keyboard. Select the member from the list displayed.
*Settlement Method	It indicates the Settlement Method used for the transaction.	Valid values are: <ul style="list-style-type: none"> • All • ICH • ACH • ICH & ACH • Bilateral • Adjustments Due to Protests • ACH Using IATA Rules (MITA) • No Settlement (PAX Form C) • ICH Special Agreement
*Currency Code	It indicates the currency for the transaction.	Select the value from the list displayed.

The procedure to generate the Receivables Interline Billing Summary report is as follows:

- Enter the details for the following fields:
 - **Clearance Year**
 - **Clearance Month**
 - **Period No.**
 - **Settlement Method Indicator**
 - **Currency Code**
 - **Entity Name**
 - **Totals Required**
- Click **Generate Report**.
- The report will be generated for the selected values.

Correspondence Stage	It indicates number of stages for correspondence.	It is generated automatically by the system.
Expiring in (no. of days)	It indicates the time limit for action.	Each correspondence has a time limit for action to be taken on it. The time limit is governed by the rules of the respective clearing house.

Fields	Description	Remarks
Show only Authority to Bill Cases	It indicates to generate report for correspondence with permission granted by entity to issue an invoice.	Authority to Bill is issued when the entity grants its approval to the other party to Invoice. When such approval is granted the entity specifies the amount for which the approval is provided. The entity receiving the authority can either raise an Invoice for the amount approved or continue with the Correspondence if it doesn't agree with the approval amount.

The procedure to generate Correspondence Status Report is as follows:

1. Enter the details for the following fields:
 - **From Date**
 - **To Date**
 - **Correspondence Ref. No.**
 - **Correspondence Initiating Member**
 - **Member Code**
 - **Correspondence Status**
 - **Correspondence Sub Status**
 - **Correspondence Stage**
 - **Expiring in (no. of days)**
 - **Show only Authority to Bill Cases**
2. Click **Generate Report**.
3. The report for the selected values will be generated.

5.6 Generating Miscellaneous Module Reports

In this topic we will learn how to generate:

- Receivables Supporting Documents Mismatch Report
- Receivables Invoice Summary Report
- Receivables Charge Code Report
- Payables Invoice Summary Report
- Payables Charge Code Report
- Correspondence Status Report

5.6.1 Receivables Supporting Documents Mismatch Report

To generate **Receivables Supporting Documents Mismatch Report for Miscellaneous**, the steps are as follows:

1. Click **Reports** menu
2. Click **Miscellaneous** submenu
3. Click **Receivables Supporting Documents Mismatch Report** option
4. The **Receivables Supporting Documents Mismatch Report** screen is displayed

The fields are as explained in the following table.

Fields	Description	Remarks
*Billing Year	It indicates the Billing Year that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Current Year • Previous Five Years
*Billing Month	It indicates the Billing Month that contained the transaction.	Select from the valid values <ul style="list-style-type: none"> • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Period No	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4

Fields	Description	Remarks
Settlement Method Indicator	It indicates the Settlement Method used for the transaction.	Valid values are: <ul style="list-style-type: none"> • All • ICH • ACH • ICH & ACH • Bilateral • Adjustments Due to Protests • ACH Using IATA Rules (MITA) • ICH Special Agreement
Billing Member Code	It is the combination of designator, accounting code and commercial name of the billed member.	Type in a few characters or press the down arrow key on your keyboard. Select the member from the list displayed.
Invoice No.	It is the unique alphanumeric ID that identifies the invoice.	The Invoice Number could be up-to ten characters

The procedure to generate Receivables Invoice Summary Report is as follows:

1. Enter the details for the following fields:
 - **Billing Month**
 - **Period No.**
 - **Billing Year**
 - **Settlement Method Indicator**
 - **Invoice No.**
 - **Billing Member Code**
2. Click **Generate Report**.
3. The report for the selected values will be generated.

Miscellaneous: Correspondence status report

Search Criteria

Correspondence Ref. No.:
From Date: 29-Jan-15
To Date: 29-Jan-15
Corr. Initiating Member: Self
Member Code: TA-XXXXXXXXXXXX-Test#

Charge Category: Please Select
Correspondence Status: All
Correspondence Sub Status: All
Correspondence Stage: =
Expiring In (no of days):
Show only Authority to bill cases:

Generate Report

Fields	Description	Remarks
From Date*	It is the date of start of correspondence.	The date can be added by choosing a date from the calendar.
To Date*	It is the date of current correspondence.	The date can be added by choosing a date from the calendar
Correspondence Ref. No.	When a Correspondence is initiated for the first time, SIS generates a unique Correspondence Reference Number. Any subsequent correspondence will continue with the same Correspondence Reference number.	Links the rejection memo/billing memo/ credit memo based on 'Authority to Bill' or expiry of correspondence case.

Fields	Description	Remarks
Correspondence Initiating Member	It is the member who initiates the correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Self • Other carrier • Either Entity receiving the last rejection invoice is always the initiating entity.
Member Code	It is the combination of designator, accounting code and commercial name of the billed member.	For example, WI-221-Wings Airways
Charge Category	It indicates the category of services being billed on an invoice.	Valid values are as follows: <ul style="list-style-type: none"> • ATC • Airport • Cargo • Engineering • Flight Ops • Finance • Ground Handling • IT Services • Mail • Miscellaneous • Partner Alliance • Property • Service Provider
Correspondence Status	It indicates status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Open status indicates the correspondence is in process. • Close status indicates that the correspondence is over and final bill has been generated. • Expired indicates when the entity does not respond to the correspondence by the time limit. SIS will not allow any further correspondence reply on correspondences which are remarked as expired.

Fields	Description	Remarks
Correspondence Sub Status	It indicates sub status of correspondence.	Valid values are as follows: <ul style="list-style-type: none"> • Received indicates that the entity has received the correspondence sent by other entity. • Saved indicates that the correspondence is been created and saved, not yet submitted. • Responded indicates that the correspondence is been sent to the other member. • Ready for Submit indicates that the correspondence is ready to be submitted to the other member. • Pending indicates that the correspondence is yet to be responded to. • Billed indicates that the correspondence is submitted • Due To Expiry indicates that the correspondence invoice is no more valid after a certain time period (typically 3 months) • Accepted By Correspondence Initiator indicates that the correspondence invoice is closed by the correspondence initiator
Correspondence Stage	It indicates number of stages for correspondence.	It is generated automatically by the system.
Expiring in (no. of days)	It indicates the time limit for action.	Each correspondence has a time limit for action to be taken on it. The time limit is governed by the rules of the respective clearing house.
Show only Authority to Bill Cases	It indicates to generate report for correspondence with permission granted by entity to issue an invoice.	Authority to Bill is issued when the entity grants its approval to the other party to Invoice. When such approval is granted the entity specifies the amount for which the approval is provided. The entity receiving the authority can either raise an Invoice for the amount approved or continue with the Correspondence if it doesn't agree with the approval amount.

The procedure to generate Correspondence Status Report is as follows:

1. Enter the details for the following fields:

- **From Date**
- **To Date**
- **Correspondence Ref. No.**
- **Correspondence Initiating Member**

- **Member Code**
 - **Charge Category**
 - **Correspondence Status**
 - **Correspondence Sub Status**
 - **Correspondence Stage**
 - **Expiring in (no. of days)**
 - **Show only Authority to Bill Cases**
2. Click **Generate Report**.
 3. The report for the selected values will be generated.

General Module

5.7 General Module

5.7.1 Introduction to General Module

In this Module you can:

- Upload a file
- Download a file
- Manage Suspended Invoices
- Access ICH Protest and Adjustment Screen
- Search and Retrieve Legal Archive
- Download Retrieved Invoices

General menu has the following submenus:

- **File Management**
- **Managing Suspended Invoices**
- **ICH Protest and Adjustment**
- **Legal Archive Retrieval**

The **File Management** submenu has the following options:

- Upload File
- Download File

We will learn about each submenu in detail in the following topics.

5.7.2 Managing Files

The File Management Menu has the following options:

- Upload File
- Download File

5.7.2.1 Uploading a File

To upload a file, the steps are as follows:

1. Click **General** menu.
2. Click **File Management** submenu.
3. Click **Upload File** option.
4. The **Upload File** screen is displayed.

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
File Name	It indicates the details for the file to be uploaded.	All files to be uploaded must be in a compressed format with a .zip extension.
Search Criteria		
*File Submission From Date	It indicates the From Date for File submission.	Default value displayed is Today's Date. To change the Date, select from the date picker.
*File Submission To Date	It indicates the To Date for the File submission.	Default value displayed is Today's Date. To change the Date select from the date picker.
Billing Period	It indicates the Billing Period.	Valid values are: <ul style="list-style-type: none"> • 1 • 2 • 3 • 4

Fields	Description	Remarks
Billing Month	It indicates the Billing Month that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • All • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
Billing Year	It indicates the Billing Year that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • Current Billing Year • Previous Four Years
File Type	It indicates the type of the file that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • Form C XML • ISIDEC - Inbound • ISXML - Inbound • SupportingDOC
File Name	It indicates the name of the file.	The file name must be with a .zip extension.

Buttons	Description	Remarks
Browse	Click Browse to select the file to be uploaded.	The name of the file to be uploaded will be displayed in the File Name field.
Submit	Click Submit to upload the selected file.	-
Search	Click Search to search the file as per the field values in the Search Criteria section.	The results are displayed in the Search Results section.

The procedure to upload file is as follows:

1. Click **Browse** to search for the file to be uploaded.
2. The **Choose File to Upload** window is displayed.
3. Select the **Folder and the File name** in the **Choose File to Upload** window.
4. Click **Open**.
5. The name of the selected file and the path of the file are displayed in the **File Name** field.
6. Click **Submit** to upload the file.

Note: All the files to be uploaded must be in a compressed format with a .zip extension.

The procedure to search the uploaded invoices is as follows:

1. Enter the details for the fields in the **Search Criteria** section.
2. Click **Search**.
3. The details are displayed in the **Search Results** section.

5.7.2.2 Downloading a File

To download a file, the steps are as follows:

1. Click **General** menu.
2. Click **File Management** submenu.
3. Click **Download File** option.
4. The **Download File** screen is displayed.

Download File

5. The results are displayed in the **Search Results** section.

6. Select the file from the list displayed.

7. Click  to download the file.

8. A message 'Do you want to open file' is displayed on the screen.

9. Click **Open** to view the file in an excel sheet.

OR

Click **Save** to download the file to be viewed later.

OR

Click **Cancel** to exit.

5.8 Managing Suspended Invoices

In this topic you will see how to

- Resubmit the Suspended Invoices
- Submit the Suspended Invoices for Bilateral Settlement

5.8.1 Resubmitting the Suspended Invoices

To resubmit the suspended invoices, the steps are as follows:

1. Click **General** menu.
2. Click **Manage Suspended Invoices** submenu.
3. The **Manage Suspended Invoices** screen is displayed.

The fields and buttons are as described in the following tables.

Fields	Description	Remarks
From Billing Year	It indicates the Billing Year that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • Current Billing Year • Previous Five Years
To Billing Year	It indicates the Billing Year that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • Current Billing Year • Previous Five Years
From Billing Month	It indicates the Billing Month that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • All • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec

Fields	Description	Remarks
To Billing Month	It indicates the Billing Month that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • All • Jan • Feb • Mar • Apr • May • Jun • Jul • Aug • Sep • Oct • Nov • Dec
From Billing Period	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • All • 1 • 2 • 3 • 4
To Billing Period	It indicates the Billing Period that contained the transaction.	Valid values are: <ul style="list-style-type: none"> • All • 1 • 2 • 3 • 4
Settlement Method Indicator	It indicates the settlement method chosen for the invoice.	Valid values are: <ul style="list-style-type: none"> • All • ICH • ACH • ICH Special Agreement
Resubmission Status	It indicates the resubmission status for the files.	Valid values are: <ul style="list-style-type: none"> • ALL • R • B
Billed Entity Code	It indicates the member name and the designator code of the Billed Member.	Type in the member code or press down-arrow key on the keyboard and select the member from the drop-down list.

Buttons	Description	Remarks
Search	Click Search to search the suspended invoices.	The results are displayed in the Search Results section.
Resubmit	Click Resubmit to resubmit the selected invoices.	The invoices are resubmitted only if the both the Billing Member and Billed Member are not suspended.

Buttons	Description	Remarks
Bilateral	Click Bilateral to submit the selected invoices for Bilateral Settlement.	A message is displayed on the screen that "Invoices marked as Bilaterally Settled Successfully."

The procedure to resubmit the suspended invoices is as follows:

1. Enter the details for the following fields in the **Search Criteria** section.

- **From Billing Year**
- **To Billing Year**
- **From Billing Month**
- **To Billing Month**
- **From Billing Period**
- **To Billing Period**
- **Settlement Method Indicator**
- **Resubmission Status**
- **Billed Entity Code**

2. Click **Search**.

3. The results are displayed in the **Search Results** section.

4. Select the invoice from the list displayed.

5. Click **Resubmit**.

6. The selected invoices are resubmitted.

Note:

1. If the member is still suspended, a message is displayed on the screen indicating that the Billing/Billed member for the selected invoice is still suspended.

2. If a member is merged and its invoices are marked with a suspension flag, the system will not allow resubmission of such invoices

5.8.2 Submitting the Suspended Invoices for Bilateral Settlement

The procedure to submit the suspended invoices for Bilateral Settlement is as follows:

1. Enter the details for the following fields in the **Search Criteria** section
 - **From Billing Year**
 - **To Billing Year**
 - **From Billing Month**
 - **To Billing Month**
 - **From Billing Period**
 - **To Billing Period**
 - **Settlement Method Indicator**
 - **Resubmission Status**
 - **Billed Entity Code**
2. Click **Search**.
3. The results are displayed in the **Search Results** section.
4. Select the invoice from the list displayed.
5. Click **Bilateral**.
6. The selected invoices are submitted for Bilateral Settlement.
Note: A message is displayed on the screen indicating that the Invoices marked as Bilaterally Settled Successfully.

The procedure to undo the bilateral marking for the invoice is as follows:

1. Select the invoice.
2. The **Bilateral** button changes to **Undo Bilateral**.
3. Click **Undo Bilateral**.

Note: A message is displayed on the screen indicating that the Bilaterally settled Invoices are reverted successfully.

The procedure to add remarks for the invoice is as follows:

1. Select the invoice from the list displayed in the **Search Results** section.
2. Click **Remarks** field for the invoice. (Scroll the horizontal scroll bar for the Search Results section).
3. The **Add Remark** screen is displayed.

4. Add the details.
5. Click **Save** to save the added Remark.
6. Click **Close** to exit.

The procedure to view the invoice is as follows:

1. Select the Invoice.
2. Click the Invoice Number fields for the invoice in the Search Results section.
3. The Invoice opens in a view mode.

5.8.3 ICH Protest and Adjustment

To access ICH Protest and Adjustment, the steps are as follows:

1. Click **General** menu.
2. Click on **ICH Protest and Adjustment** sub menu.
3. The **ICH Protest and Adjustment** screen is displayed.

5.9 Legal Archive Retrieval

Using this submenu you can:

- Search for Archived items that can be retrieved
- Download the Retrieved Invoices

5.9.1 Retrieving Legal Archive

Using this screen you can search for archived Items that can be retrieved.

To retrieve the Legal Archive, the steps are as follows:

1. Click **General** menu.
2. Click **Legal Archive Retrieval** submenu.

Two sections are displayed on the **Legal Archive - Download Retrieved Invoices** screen.

Only the jobs fired by the logged in user will be displayed on this screen.

In the upper section, the original Search Criteria (used to search the archived Items that can be retrieved) is displayed along with the job status.

In the lower section, the details of the record (selected in the Upper Section) are displayed. The list displayed consists of Invoices that have been retrieved by the system for the job.

Clicking on **Search and Retrieve** button will navigate to **Legal Archive – Search and Retrieve** screen.

The procedure to download the selected Invoices is as follows:

1. Select the Invoice to be downloaded.
2. Click  in the **Action** column.
3. The file will be downloaded.

Member Profile Module

6. Member Profile Module

6.1 Introduction to Profile Management

The Profile and User Management menu allows you to:

1. To manage Member Profile settings
2. To create users and to edit existing user details
3. To assign permissions to users
4. To view profile changes

Profile and User Management menu has following submenus:

1. **Manage Member Profile:** You can view your profile details and edit some of the details using Manage Member Profile submenu.
2. **Manage Users:** You can view and edit user details using Manage Users submenu.
3. **Create Users:** You can create new users using Create Users submenu. There is no limitation on the number of users you can create.
4. **Manage User Permissions** has following options:
 - **Manage Permission Templates:** A permission template is set of functionalities grouped together. You can create new templates and modify existing templates using Manage Permission Templates option.
 - **Assign Permissions to User:** After you have created a new user, you can assign permissions to the user using Assign Permissions to User option. The permissions are assigned as per user's role and responsibilities.
5. **View Profile Changes:** You can view the changes made to your profile by SIS, ICH, ACH members.

We will discuss about each submenu in detail.

6.2 Managing Member Profile

Manage Member Profile: You can view your profile details and edit some of the details using Manage Member Profile submenu.

You can,

- Mange the Member Details
- Manage Location Details
- Manage E-billing Services
- Manage Passenger and Miscellaneous Billing Configurations
- Manage UATP Configurations
- Manage ICH Configurations
- Manage ACH Configurations

Note: For certain types of users, only tabs 'Member Details' and 'Locations' will be accessible

6.2.1 Managing Member Details

The procedure to go to Manage Member Profile screen is as follows:

1. Click the **Profile Management** tab on the main menu, and then click the **Manage Member Profile**.
2. The **Member Profile** screen is displayed.

3. The Member Profile information is logically categorized and displayed in different sections on following tabs:

- Member Details
- Locations
- Contacts
- Passenger
- Cargo
- Miscellaneous
- UATP
- ICH
- ACH

Managing Member Details

The Member Details tab is displayed by default. This tab contains the basic information of a member.

Member Information

The following table describes the fields in the **Member Information** section:

Fields	Description	Remarks
*Member Prefix	Numeric code assigned to the member	For example 001, 002 This is a non-editable field.
*Member Designator	Alpha code assigned to the member	For example, WI, SIS This is a non-editable field.
*Member Legal Name	Legal name of the member	For example, SIS Airways This is a non-editable field.
*Member Commercial Name	Commonly used company name	For example, SIS Airways, Wings Airways This is an editable field.
Member Logo	Official logo image for the Member	This is an editable field. Member can upload new logo by clicking on the Logo image.

1. The ***Member Prefix**, ***Member Designator** and ***Member Legal Name** fields display the information provided by member to IATA/IS. This field is a non-editable field wherein member cannot make any changes.
2. Member can change ***Member Commercial Name**.
3. Membership Details.

The following table describes the fields in the **Membership Details** section:

Fields	Description	Remarks
*IS Membership Status	IS membership status depending upon whether the member has signed IS membership contract	This is a non - editable field.
*IS Entry Date	Date when the member was activated in IS	Date is displayed in DD-MM-YY This is a non - editable field.
IATA Membership	IATA Membership status of the Member	This is a non - editable field.
ICH Member	Indicates if the member is an ICH Member. The check box is selected if the member is ICH member.	This is a non - editable field. It is derived automatically based on the ICH Membership Status on the ICH tab.
ACH Member	Indicates if the member is an ACH Member. The check box is selected if the member is ACH member.	This is a non - editable field. It is derived automatically based on the ACH Membership Status on the ACH tab.

1. The **IS Membership Status** shows the current status of the member and the icon next to the text box displays the membership status history. The status and the date on which the change in the status occurred are displayed on the Status Change History screen. User can view only last five status changes.
2. If the check boxes are not selected it states that the member is not an IATA member, ICH member or ACH member.

Main Location Details

The following table describes the fields in the **Main Location Details** section:

Fields	Description	Remarks
Company Registration ID	Registration ID of the Member's Main location	–
Tax/VAT Registration #	Tax/VAT registration number of the Member's Main location.	This is the Tax/VAT registration number that is required in the legal invoice.
Add. Tax/VAT Registration #	Additional Tax/VAT Registration ID of the Member's Main location.	Any additional Tax/VAT IDs can be entered in this field.
*Address Line 1	First line of the postal address of the Member's Main location.	–
Address Line 2	Second line of the postal address of the Member's Main location.	–
Address Line 3	Third line of the postal address of the Member's Main location.	–
*City Name	City name of the Member's Main location.	–
Postal Code	Postal code of the Member's Main location.	–
*Country Name	Country name of the Member's Main location.	–
Subdivision Name	State/Province/Sub Division name of the location	<p>This is an auto-complete field. Hence you can either:</p> <ol style="list-style-type: none"> 1. Select the desired subdivision name from the drop-down list. <p>OR</p> <ol style="list-style-type: none"> 1. Enter first few characters of the desired subdivision name in the Subdivision Name text box and then select the appropriate value from the drop down list. <p>Note: The values appearing in the Subdivision Name list box are dependent on the Country Name field value.</p>

Bank Details for Bilateral Settlement

All the fields in the **Bank Details for Bilateral Settlement** section are non - editable.
The following table describes these fields.

Fields	Description	Remarks
Bank Account Name	Name of the Bank Account associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement.
Bank Account Number	Bank Account Number associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement

Fields	Description	Remarks
Bank Name	Name of the Bank associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement.
Branch Code	Branch Code of the Bank associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement.
Bank Code	Bank Code of the Bank associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement.
Currency Code	Currency code for transactions	Bank details are only applicable in case of Bilateral Settlement.
IBAN	International Bank Account Number associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement.
SWIFT	SWIFT code associated with the Member's Main location	Bank details are only applicable in case of Bilateral Settlement.

IS Contacts

IS Contacts are used for:

1. Sending notifications when a change is initiated or made on any of the fields on Member Profile.
2. Sending notifications when post dated profile updates become effective.

Contact Name	Own Profile Updates	RAWG-Chairman
Ritesh Chopade	<input type="checkbox"/>	<input type="checkbox"/>

Editing Member Details

Any changes in the fields that are editable can be effective immediately or can be effective from future period. Fields for which the change is effective immediately are as follows:

1. *Member Legal Name
2. *Member Commercial Name

Fields for which the change is post dated are listed below:

1. Company Registration ID
2. Tax/VAT Registration #
3. Additional Tax/VAT Registration #
4. *Address Line 1

5. Address Line 2
6. Address Line 3
7. *City Name
8. Postal Code
9. *Country Name
10. Subdivision Name

To edit these fields,

1. Click **Edit** link provided next to the field.
2. The **Please Specify Effective Date OR Period** screen is displayed.

The following table describes the fields on the Editing screen:

Fields	Description	Remarks
Current Value	Old or the existing value of the field	Current value is as per the field specified. Note: Current value cannot be edited.
New Value	New value to be entered in the field	This value is shown on the screen after necessary changes.
Future Period	Billing period for the new value to be applicable.	Current Billing period cannot be specified.

The procedure to edit Member Details is as follows:

1. Click **Edit** link provided next to the field which you wish to edit.
2. The Editing screen is displayed.
3. The **Current Value** field is a non - editable field. The current value for the field is displayed in this field.
4. Enter new value in the **New Value** field.
5. Enter period from which you wish to change the value in the Future Period field.
6. Click **Save**.
7. The new value will be saved and will be effective from the entered period.
8. An exclamation icon  will appear next to the **Save** button on the Member Details tab and the edited field. The icon indicates that changes or the new value will be applicable from the entered future period.
9. To view the pending details, double-click  icon.
10. For the field with existing values you must enter an effective date for the change. This is not expected when you enter the value for the first time.

6.2.2 Managing Location Details

Member can search and add new location in the member profile. Each member has one **Main Location** and multiple other locations.

To manage **Location Details**, click Locations tab.

Country Name*	Country Name	Country name of the Current member appears
Subdivision Name	Displays the State/Province/Sub Division name.	This is an auto complete field. Click the down arrow key on the keyboard to view the entire list.
UATP Location	Indicates if the particular location is a UATP location.	-
General Terms Document	Indicates the General Term Document	Should be non editable when a new location is added or existing location is viewed.
Files Specific to this Location Required	Indicates if Location specific file should be generated for that location	Should be visible and applicable ONLY for Location IDs which are numeric (and not equal to 'Main' or 'UATP').
iiNet Account ID for this Location	iiNet account ID applicable to that Location	<ul style="list-style-type: none"> Should be visible and applicable ONLY for Location IDs which are numeric (and not equal to 'Main' or 'UATP'). This is an optional field. If files specific to this Location are required and an iiNet Account ID is not defined, they will be delivered to the Main Miscellaneous iiNet Account (if defined). If an iiNet Account is not defined for the Main Location also, then FTP will not be done for that file.
Invoice Footer	The contents of the text box are printed on the invoice.	The below text will appear on all invoices unless overridden by the Invoice data supplied in IS format or by the details in the Location tab.

The procedure to add a new location is as follows:

1. To add a new location in the member profile, click the **Add Location** button next to the **View** button on the Locations tab.
2. All the fields to add a new location will be displayed.
3. Add the new **Member Legal Name** and **Member Commercial Name** in the text box.
4. Enter the new location's **Company Registration ID** in the field.
5. Enter **Tax/VAT Registration Number** or other **Additional Tax/VAT Registration Number** in the field.
6. Enter the **Location Address** in Address line 1, 2, and 3 with the city name and postal code in the respective text fields.
7. Enter the **Subdivision Name**.

8. Select the check box if the member is a **UATP Location**.
9. The **Active** check box is selected if the particular location is active.
10. Enter the required content in the **Invoice Footer** text box. The entered invoice footer will appear for this location only.
11. Click **Save** Location after all the location details are entered.

Note: Member Legal Name, Member Commercial Name, Address Line 1, City Name, Country Name are the mandatory text fields for adding new location.

Note: Fields 'Member Legal Name' and 'Active' in Location Details will be Post Dated – Period in case of new location added and saved. For the MAIN location these two fields will not be in Post Dated – Period.

Searching for an Existing Location

The procedure to search for an exiting location is as follows:

1. On the **Location** tab select the location from the **Search Existing Location** drop-down list.
2. Selected location will be displayed in the drop-down box. Click **View** to get the details of the location.
3. The details will be displayed in the **Location Details** section.

For more information about the fields in the Location Details section refer Adding a New Location.

Editing Location Details

The **Edit** hyperlink is provided next to every field on the **Location** tab.

For more information about fields on **Location** tab refer Adding a New Location.

The procedure to edit the existing location details is as follows:

1. On the **Location** tab select the location from the **Search Existing Location** drop-down list.
2. Selected location will be displayed in the drop-down box. Click **View** to get the details of the location.
3. The details will be displayed in the **Location Details** section.
4. Click **Edit** hyperlink to edit the details for the respective field.
5. After making necessary changes, click Save Location. The confirmation message will be displayed.

6.2.3 Managing Contacts

You can view, search, & delete the existing contacts. You can also edit contact assignments using Contacts tab and you can add a new contact. To manage Contacts, click **Contacts** tab.

Adding a New Contact

Member can add any number of contacts. Not every user can be a contact, and not every contact can be a user.

The following table describes the fields for adding a new contact:

Fields	Description	Remarks
Salutation	Salutation to be added before name of the member/user/contact	For example Mr., Mrs., Miss., Dr.
First Name*	First name of the contact	-
Last Name	Last Name of the contact	-

Fields	Description	Remarks
E-mail ID*	E-mail ID of the contact	<p>E-mail ID is unique for all the members, users and contacts.</p> <p>For Viewing purpose this information will be fetched from IS user.-</p> <ul style="list-style-type: none"> If entered e-mail address exists in the IS User Profile, then details will not be saved in the contact database and will be non-editable. If entered e-mail address does not exist in the IS User Profile, then system will display a pop up window. Click OK to create a new contact or click Cancel to edit the e-mail ID of the contact.
Staff ID	Staff ID of the contact	<p>Internal ID of the contact, maintained in the members system.</p> <p>Staff ID is the unique ID given to every staff member.</p>
Position/Title	Position/ Title of the contact	Position or the designation of the contact
Division	Division of the contact	-
Department	Department of the contact	The department that the contact belongs or works.
Location ID	Location ID of the location where the particular contact is located	It is a unique system generated code that identifies the location.
Address Line 1	First line of the Address	-
Address Line 2	Second line of the Address	-
Address Line 3	Third line of the Address	-
City Name	City name	-
Postal Code	Postal code of the address	-
Country Name	Country name of the contact address	-
Sub Division Name	Displays the State/Province/Sub Division name	Press the down arrow key on keyboard to view the sub division list.
Phone Number 1	Phone number 1 of the contact	
Phone Number 2	Phone number 2 of the contact	
Mobile Number	Mobile number of the contact	
Fax Number	Fax number	
SITA Address	The SITA Address (Teletype – Pre designated Point)	Provider of global information and telecommunication solutions for the air transport industry.
Active	Status for the contact	<p>For a new contact the check box is selected by default.</p> <p>Once the contact is created it cannot be deactivated.</p>

The procedure to add a new contact is as follows:

1. Click the **Contact** tab and then click the **Add New Contact**.
2. Add a valid e-mail address in the **E-mail Address** field.
3. Select the salutation from the **Salutation** drop-down list.
4. Enter first name and last name of the user in the **First Name** and the **Last Name** field.
5. Enter the staff ID in the **Staff ID** field.
6. Enter position/title, division, and the department of the user.
7. Select the location ID from the **Location ID** drop-down list.
8. Enter the address, city name, and the postal code of the user in the respective fields.
9. Select the country from the Country drop-down list.
10. Enter the sub division in the **Sub Division** field.
11. Enter the contact number of the user.
12. Enter mobile number and fax number of the user in the respective fields.
13. Enter the SITA Address in the field.
14. Check if the **Active** check box is selected, if not select the check box.
15. After entering all the details, click **Save Contact**. You will see a confirmation message.

Searching for an Existing Contact

You can search for an existing contact by entering First Name, Last Name, E-mail ID, and Staff ID. You can use one or more search parameters. The search results are displayed in a list.

The following table describes the fields on Contacts tab:

Field	Description	Remarks
First Name	First name of the contact	-
Last Name	Last Name of the contact	-
E-mail ID	E-mail ID of the contact	-
Staff ID	Staff ID of the contact	Internal ID of the contact, maintained in the members system.

- The Action column indicates the actions that can be performed on a selected contact.
- The **X** icon indicates Delete action.

The procedure to search the contact is as follows:

1. Enter the First Name, Last Name, and E-mail ID in the respective fields.
2. Click **Search**.
 - The details of the specific contact will be displayed in the Search Results section.
 - You can search for an existing contact by entering the data in any one of the fields. To search for an existing contact, mention the **Staff ID** or the **E-mail ID** of the contact.
 - By default 5 contact details are displayed in the list. To view more contacts click the next page to view the remaining contacts.

Editing Contact Details

The details of the selected contact are displayed in the lower section. These details can be edited.

The procedure to edit contact details is as follows:

1. Enter the data into one or more search criteria fields and then click Search.
2. The search results will be displayed in the list. Select the contact from the list. The details of the selected contact will be displayed.
3. Enter the new data in the respective fields.
4. Click **Save Contact**.

Refer to Adding New Contacts for field description.

Refer to Searching for an Existing Contact.

Deleting Contact

To delete a contact, search a particular contact or contacts to be deleted. A contact can only be deleted if the contact does not have any assignments. In order to delete the existing contact with assignment, either replace or remove these assignments.

Refer **Searching for an Existing Contact** to search a particular contact to delete.

The procedure to delete a contact is as follows:

1. Select the contact you wish to delete.
2. Click the **X** from the Actions column.
3. A dialog box is displayed which asks user to confirm the deletion of the selected contact.
4. Click **OK** to delete the contact.
5. If you do not wish to delete, click **Cancel**.

Note: A confirmation message is displayed after deletion.

Viewing Contact Assignments

Each contact can be assigned to a number of positions. These are called as Contact Assignments.

To view contact assignments click the **Contacts** tab and then click **View All Contact Assignments**.

The **All Contact Assignments** screen will be displayed.

The following table describes the fields on the **All Contact Assignments** screen:

Fields	Description	Remarks
Group	Member of same department	<p>Following options are available in the drop down list:</p> <ul style="list-style-type: none"> Billing category Specific Clearing house E-Invoicing Member Related Voted related <p>By default No Group option is selected. The search can be based on the contacts.</p>
Subgroup	Sub Category of the group selected	<p>Following options are available in the drop down list: ICH, CGO, E-Invoicing WG, F&F AIA Members, F&F ASG Members, IAWG UG, ACH, ICH Panel, MISC, Old IDEC SC, PAX, RAWG, SIS SC, Sampling SC, UATP.</p> <p>By default No Subgroup option is selected.</p>
Type	Contact in a category	<p>Following options are available in the drop down list:</p> <p>Information Processing</p> <p>By default No Type option is selected.</p>
Contact Name	Name of the contact	-
PAX Manager	Supervisor for Passenger	-

Fields	Description	Remarks
PAX-Refund	-	-
PAX-Interline Billing	-	-

The procedure to replace the contact assignments is as follows:

1. Select the **Group**, **Subgroup**, and the **Type** from the respective drop-down list.
2. Click **Search**. The list of contacts will be displayed.
3. It also displays the contact list and the assignments to the contact.
4. The selected check box indicates that the contact belongs to that group.

Note: By default, 10 records will be displayed in the grid. If, number of records are more than 10, to view more set of contacts use pagination control to navigate directly to a particular list of contact.

Replacing Contact Assignments

To replace the contact assignments, click **Contacts** tab. Click **Replace Contact Assignment**. The **Replace Contact Assignment** screen will be displayed:

The following table describes the fields on the **Replace the Contact Assignments** screen:

Fields	Description	Remarks
Current Contact Person	Current contact person	List of current contacts will be displayed in the drop-down list.
New Contact Person	New contact created	List of current contacts will be displayed in the drop-down list.

The procedure to replace the contact assignments is as follows:

1. Select the contact from the **Current Contact Person** drop-down list.
2. Select the contact from the **New Contact Person** drop-down list to assign the new contact assignments.
3. Click **OK** to replace the contact assignments or click **Exit** to close the window.
4. Click **Save Contacts** to save the changes made.

Note: You cannot select the same user while replacing the contact assignments.

Copying Contact Assignments

To copy the contact assignments, click **Contacts** tab. Click **Copy Contact Assignment** to copy the contact assignments. The **Copy Contact Assignments** screen will be displayed:

The following table describes the fields on **Copy Contact Assignments** screen:

Fields	Description	Remarks
Copy Contact Assignments of User	The user whose assignments will be copied and will be allocated to the new user.	Already available in the drop down. Displays the list of contact person which are available in the profile. Member can select the contact whose assignments have to be copied. Contact Assignments will be copied and the same assignments will be allocated to the new contact.
New Contact Person	New user to whom the assignments will be copied.	Displays the list of contact persons which are available for that member. Member can select the contact whose assignments have to be replaced. Contact will be assigned with new assignments.

The procedure to copy the contact assignments is as follows:

1. Select the contact to copy the assignment from the list of contact list of **Copy Contact Assignment of User**.
2. Select the new contact created from the drop down of **New Contact Person** to whom the new assignments are to be copied.
3. Click the **OK** button to copy the contact assignments or click **Exit** to delete the Copy contact assignment.

Note: The same user cannot be selected while copying the assignments.

Modifying Contact Assignments

The procedure to modify the contact assignments is as follows:

1. Click **View All Assignments**. The **All Contact Assignments** screen will be displayed.
2. Select the contact.
3. Select the check box for Contact sub type that you wish to assign.
4. Clear the check box for the Contact sub type if you wish to remove the assignment for the contact.
5. Click **Save** to save the changes.

Deactivating a Contact

The procedure to deactivate a contact is as follows:

1. To deactivate a contact, click **Contact** tab.
2. Select the contact from the list. The details of the contact will be displayed.
3. Clear Active check box.
4. Click **Save**.

6.2.4 Managing E-billing Services

The configurations for E-billing services can be viewed on E-billing tab. These services are activated by SIS Ops user. A member can partially add or edit the service only if that service is activated by SIS Ops user.

To manage E-Billing Services, click e-Billing tab.

Receipt of Files in iiNET Accounts				
	Account ID	Change Information for Reference Data Updates	Complete Reference Data	Complete Contacts Data
Passenger	<input type="text" value="A01"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Cargo	<input type="text" value="ISTE"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Miscellaneous	<input type="text" value="A02"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
UATP	<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The panel shows 4 rows, one for each Billing Category, as follows:

- a. Passenger
- b. Cargo
- c. Miscellaneous

d. UATP

The following table describes the field in the **Receipt of Files in iiNET Accounts** section:

Field	Description	Remarks
Account ID	Indicates the iiNET Account ID of the Member for each Billing Category (as defined in the Technical tab by SIS Ops).	<ul style="list-style-type: none">• The iiNET Account ID for each row (Billing Category) is shown in read only / disabled mode.• A user (either Member User or SIS Ops user) will not be able to modify or edit the iiNET Account ID.• Where an iiNET Account is not defined by SIS Ops for a Billing Category, nothing will be shown in the text box.
Change Information for Reference Data Updates	Indicates whether the member requires only the changes related information file for the iiNET account	<ul style="list-style-type: none">• The checkbox of a Billing Category will be disabled if the iiNET Account ID of the Billing Category is blank (i.e. no value is set). User cannot edit the checkbox.
Complete Reference Data	Indicates whether the member requires the complete reference data file for the iiNET account	
Complete Contacts Data	Indicates whether the member requires the complete contacts data file for the iiNET account	

The default value of checkboxes in all three file type columns is False/No

Click **Save E-Billing Configuration** button once the necessary changes are made.

6.2.5 Managing Cargo Configurations

To view the Cargo Billing configurations:

1. Click **Profile and User Management** tab and then click **Manage Member Profile**.
2. The **Member Profile** screen is displayed.
3. Click **Cargo** tab.
4. The Cargo configurations for that member are displayed.

Managing Validation and Supporting Documents

- **Validations:** Member can select the option as Reject File in error or Reject Invoice In error from the drop-down list available for rejection on validation failure.
- **Supporting Documents:** Member can mention the file format for the invoices to be submitted. Standard formats are .doc, .xls, .txt.

The following table describes the fields in the **Validation and Supporting Documents** section:

Fields	Description	Remarks
Validations		
Rejection on Validation Failure	Invoice or invoices to be rejected for validation errors.	If this option is selected it indicates whether entire file or individual invoices to be rejected in case of validation error.
Reject File In Error	File to be rejected.	If this option is selected it indicates that the entire file be rejected in case of validation error.
Reject Invoice In Error	Individual Invoice to be rejected.	If this option is selected it indicates that a single invoice is rejected in case of validation error. All the remaining invoices if validated can be sent for submission.

Fields	Description	Remarks
Online Correction Allowed		
Online Correction Allowed	Indicates if online correction is allowed.	-
Supporting Documents		
Additional File Types Accepted	Indicates the file types accepted in addition with those as specified in the Member Profile.	File Types accepted are: <ul style="list-style-type: none"> • .doc • .xls

Managing the Output Files

- It states the output format of the invoice files. The billed invoices format is IS-XML/IS-IDEDEC. This can be edited.

The following table describes the field of **Output files**.

Fields	Description	Remarks
Output Files		
Billed Invoices	It is the IS file format for billed invoices.	The billed invoices are in IS-XML/IS-IDEDEC format.
Down Converted IS Transaction to Old IDEC Format	If the Member requires IS transaction in old IDEC format.	If the check box is selected then it indicates that the member requires the IS Transactions in a down converted (to the OLD IDEC) format.

The **Edit** link next to the fields allows member to enter the new value for the editable fields.

Managing Offline Archiving Outputs

The different files formats that need to be included while downloading can be edited using **Offline Archive Outputs**.

The following table describes the fields in the **Offline Archiving Outputs** section:

Fields	Description	Remarks
As a Billed Entity	Member to whom invoices are billed.	<p>This indicates the different files that need to be included in the download format when the member is the Billed Entity.</p> <ul style="list-style-type: none"> • This provides an option to include: <ul style="list-style-type: none"> <input type="checkbox"/> Invoice PDF <input type="checkbox"/> Details Listings <input type="checkbox"/> Supporting Documents <input type="checkbox"/> Memo details <input type="checkbox"/> Digital Signature files
As a Billing Entity	Member who bills the invoices.	<p>This indicates the different files that need to be included in the download format when the member is the billing entity.</p> <ul style="list-style-type: none"> • This provides an option to include: <ul style="list-style-type: none"> <input type="checkbox"/> Invoice PDF <input type="checkbox"/> Details Listings <input type="checkbox"/> Digital Signature <input type="checkbox"/> Memos details
Invoice PDF	File generated in PDF format.	If the check box is selected to invoice PDF, the output will be in the PDF format.
Details Listings	Detail required for the invoice.	The output displays the details of the invoice for the billing and the billed entity.
Supporting Documents	Supporting documents required.	<p>Supporting documents are sent while sending the invoice supporting documents showing all the line items.</p> <p>These documents can be sent in .doc, .xls, and .jpg format.</p>
Digital Signature Files	Digital signature required.	As a billed and billing entity digital signature is required. It appears on the invoices and can be treated as valid invoice. Few countries do not process their invoices if it is not digitally signed.

As a **Billed and Billing entity**, member can select different files that are required.

To edit Offline Archiving Outputs for Billing Entity and Billed Entity, click **Edit** link for the respective field.

Refer Editing in Passenger and Miscellaneous.

Viewing Certification and Migration details

Member will view the Certification status, Certified On (Date), and Migration period. These fields are non - editable.

The following table describes the fields of **Viewing Certification and Migration Details**.

Fields	Description	Remarks
IS-IDEDEC Certification Status	IS-IDEDEC Certification status for Cargo billings.	-
IS-IDEDEC Certified On	IS-IDEDEC Certification date for Cargo billings.	Clearance period - DD-MMM-YY Where <ul style="list-style-type: none"> • DD- Day • MMM- Month • YYYY- Year This field cannot be edited.
IS-IDEDEC Migration Period	IS-IDEDEC Migration Period for Cargo billings.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none"> • PP- Period • MMM- Month • YYYY- Year This field cannot be edited.
IS-XML Certification Status	IS-XML Certification status for Cargo billings.	-
IS-XML Certified On	IS-XML Certification date for Cargo billings.	Clearance period - DD-MMM-YY Where <ul style="list-style-type: none"> • DD- Day • MMM- Month • YYYY- Year This field cannot be edited.
IS-XML Migration Period	IS-XML Migration Period for Cargo billings.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none"> • PP- Period • MMM- Month • YYYY- Year This field cannot be edited.
IS-WEB Migration Period	IS-WEB Migration Period for Cargo billings.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none"> • PP- Period • MMM- Month • YYYY- Year This field cannot be edited.

IS Contacts

To manage Miscellaneous Billings, click Miscellaneous tab.

The screenshot shows the SIS Air Member Profile page with the 'Miscellaneous' tab selected. The page contains several sections for managing member settings:

- Validations:** Includes 'Rejection on Validation Failure' with a dropdown for 'Reject File In Error'.
- Online Correction Allowed:** A checkbox for 'Online Correction Allowed'.
- Supporting Documents:** Includes 'Additional File Types Accepted' with a list of file types (txt, csv, html, rtf, pdf) and a checkbox for 'Future Billings Submissions'.
- Output Files:** Includes 'Billed Invoices' with a checkbox for 'IS-XML' and a link to 'Edit'. It also includes 'Daily Payment Updates for Receivables Invoices' and 'Daily Payment Updates for Payables Invoices'.
- CSV Listings:** Includes 'CSV listing required as a Billing Entity' and 'CSV listing required as a Billed Entity'.
- Offline Archive Outputs:** Includes 'Invoice PDF', 'Details Listings', 'Supporting Documents', and 'Digital Signature Files' with checkboxes for 'As a Billed Entity' and 'As a Billing Entity'.
- Validation on Acceptable Delay for Payables Bilateral Invoices:** Includes a checkbox for 'Enable' and a link to 'Manage Acceptable Delays'.
- Location Specific Output Files:** Includes a checkbox for 'Receive Copy of Location Specific Files at Location Main'.
- Default Location for MISC Payables Original Invoices and Credit Notes:** Includes a dropdown for 'Main-Madrid-ES' and a link to 'Edit'.
- Certification and Migration Details:** Includes 'Certification Status' (Certified), 'Certified On' (01-Jan-10), and 'Migration Period' (1900-Jan-01).
- IS Contacts:** Includes a link to 'View/Edit'.

At the bottom, there is a 'Save Miscellaneous Details' button and a 'Future Updates Pending' notification.

Managing Validation and Supporting Documents

The following table describes the fields in the **Validation and Supporting Documents** section:

Field	Description	Remarks
Validations		
Rejection on Validation Failure	Invoice or invoices to be rejected for validation errors.	If this option is selected it indicates that entire file or individual invoices to be rejected in case of validation errors.
Reject File In Error	File to be rejected.	If this option is selected it indicates that the entire file is rejected in case of validation error.
Reject Invoice In Error	Individual Invoice to be rejected.	If this option is selected it indicates that a single invoice is rejected in case of validation error. All the remaining invoices if validated can be sent for submission.
Supporting Documents		
Online Correction Allowed	Indicates if Online Correction is allowed.	-

Field	Description	Remarks
Supporting Documents	Documents to be submitted with invoice.	While sending the invoice supporting documents are sent which contain additional information. These documents can be sent in.doc and.xls format. For Passenger.doc & .xls formats can be used. For Miscellaneous; .jpg can also be used.
Future Billings Submissions		
Future Billings Submissions Allowed	Indicates if Future Billings Submissions is allowed	Applicable for both PAX and MISC

For Passenger only: Sampling and Billing Value Confirmation		
Sampling Carrier	Defines if the member is a sampling carrier.	Sampling carrier can be selected from the drop down as: <ul style="list-style-type: none"> Not A sampling Carrier Only inward Sampling Only Outward Sampling Sampling Both Ways
Not A sampling Carrier	Defines member is not a sampling carrier.	By default Not a sampling Carrier appears in the field.
Only inward Sampling	-	-
Only Outward Sampling	-	-
Sampling Both Ways	-	-
Billing Value Confirmation	Subscription for Billing value	Subscription available for Passenger only.

- Member can select the option as Reject File in error or Reject Invoice In error from the drop down available for rejection on validation failure.
- Member can select options from sampling carrier.
- Member can select Only Inward sampling, Only Outward Sampling, or sampling both ways.
- Mention the type of document that can be accepted.

Managing Value determination and Auto Billing

The **Participate in Value Determination** shows the subscription status for Value Determination and Auto Billing service. This field reflects the value entered by SIS Ops user.

The following table describes the field in the **Value Determination and Auto Billing** section:

Field	Description	Remarks
Participate In Value Determination	Indicates subscription status of Value Determination service.	This field cannot be edited and reflects the value of the Participate In Value Determination field entered by SIS Ops user. If the member has subscribed for the service, the field value will be Activated and if not subscribed the field value will be Not Activated.
Participate In Auto Billing	Indicates if the IS Member has opted for Auto billing.	If the field value is selected, it states that the member has opted for auto billing facility. If the field is not selected it indicates that the member has not opted for auto billing. This field can only be edited if Participate In Value Determination service is activated.
Invoice Number Range-Prefix	Alpha numeric prefix used for auto-billed invoice.	This field can be edited if Participate in Auto Billing service is activated. This field is mandatory if the Participate In Auto Billing service is activated.

Field	Description	Remarks
Invoice Number-From	Invoice number range for auto billing.	This field can be edited if Participate in Auto Billing service is activated. This field is mandatory if the Participate In Auto Billing service is activated.
Invoice Number Range-To	Invoice number range for auto billing.	This field can be edited if Participate in Auto Billing service is activated. This field is mandatory if the Participate In Auto Billing service is activated.
ISR File Required	Indicates if ISR file is required.	Indicates if the Auto-billing airline requires a copy of ISR file to be forwarded in case it received from ATPCO.
Currency of Listing	Indicates the currency of listing.	The drop down box shows the list of all currencies.
Cut Off Time	Cut off time for auto billing	Number of hours before Auto-billing Invoice is complete.

The **Participate In Value Determination** field shows status **Activated** if member has subscribed for the service.

If the member has not subscribed for **Participate In Value Determination** service; the following fields cannot be edited by the member:

- **Participate In Auto Billing**
- **Invoice Number Range-Prefix**
- **Invoice Number-From**
- **Invoice Number-To**
- **ISR File Required**
- **Cut Off Time (Hours)**
- **Currency Of Listing**

Managing the Output files

It states the output format of the invoice files. The billed invoices formats are IS-IDEDEC and IS-XML. These formats can be edited.

The following table describes the field of **Output files**.

Field	Description	Remark
Billed Invoices	It is the IS file format for billed invoices.	While generating the billed invoices the member can choose either or both the formats. <ul style="list-style-type: none"> • IS-IDEDEC format • IS-XML format
Addnl. Sampling Prov. Billing File (Monthly)	It is the Consolidated Provisional Billing file.	If the check box is selected then Airlines can request for a consolidated Provisional Billing File at the end of the Billing Month. Note: This is applicable to Passenger billing only and not the Miscellaneous billing.

Field	Description	Remark
BVC Details Report	Auto generated value confirmation details report.	If the check box is selected then it indicates that the member requires automatically generated file for Value Confirmation Details report. Note: This is applicable to Passenger billing only and not the Miscellaneous billing.
Down Converted IS Transaction To Old IDEC Format	Member requires IS transaction in old IDEC format.	If the check box is selected then it indicates that the member requires the IS Transactions in a down converted (to the OLD IDEC) format. Note: This is applicable to Passenger billing only and not the Miscellaneous billing.
Billing Invoices Submitted on Behalf of the member	Copy of the Invoice file.	Indicates if the member requires a copy of the invoice files submitted on its behalf to IS. Note: This is applicable to Miscellaneous billing only and not the Passenger billing.
Daily Payment Updates for Receivables Invoices	Daily Output of Payment Updates for Receivables Invoices	If this check box is selected then Daily MISC Receivables Payment Status Updates Output files will be generated for the member
Daily Payment Updates for Payables Invoices	Daily Output of Payment Updates for Payables Invoices	If this check box is selected then Daily MISC Payables Payment Status Updates Output files will be generated for the member
Daily Delivery in IS-Web	To deliver MISC Invoices/Credit Notes captured via IS-Web on a daily basis to Billing Members.	Outputs will be generated in form of Offline Archive Outputs or IS-XML data. Note: By default, both checkboxes are selected once you select the Daily Delivery in IS-Web checkbox. Select or clear the respective checkbox to get the output in the requisite format.
Daily Offline Archive Outputs	To deliver MISC Invoices/Credit Notes captured via IS-Web on a daily basis to Billing Members in form of Offline Archive Outputs.	It indicates that the Invoices/Credit Notes is required in Offline Archive format. Note: This checkbox can be selected only if Daily Delivery in IS-Web checkbox is selected.
Daily IS-XML Files	To deliver MISC Invoices/Credit Notes captured via IS-Web on a daily basis to Billing Members in the form of IS-XML files.	It indicates that the Invoices/Credit Notes is required in IS-XML format. Note: This checkbox can be selected only if Daily Delivery in IS-Web checkbox is selected.
Daily Payable Outputs For Bilateral Invoices	To deliver MISC Bilateral Invoices/Credit Notes on a daily basis to Billed Members	Outputs will be in the form of ISXML and Offline Archives (OARs) Invoices/Credit Notes delivered on a daily basis will NOT be included in the weekly output to Billed Members

Field	Description	Remark
Receive Copy of Location Specific Files at Location Main	This option is applicable for MISC only. It indicates if copy of location specific file is required at main location	This is an optional field. If checked copies of location specific files will be sent to Main location.

The **Edit** link next to the fields allows member to enter the new value for the editable fields.
Refer Editing Passenger & Miscellaneous Configurations

Managing CSV Listings

Member can opt for Miscellaneous CSV listings using these options.

The following table describes the fields in the **CSV Listings** section:

Field	Description	Remark
CSV listing required as a Billing Entity	This option is applicable for MISC only. It indicates that CSV listing is required by Billing Member	This is an optional field. If it is checked when invoice is submitted, CSV listing will be generated and included in OAR
CSV listing required as a Billed Entity	This option is applicable for MISC only. It indicates that CSV listing is required by Billed Member	This is an optional field. If it is checked when invoice is submitted, CSV listing will be generated and included in OAR

Managing Offline Archive Outputs

The different files formats that need to be included while downloading can be edited using **Offline Archive Outputs**.

The following table describes the fields in the **Offline Archiving Outputs** section:

Fields	Description	Remarks
As a Billed Entity	Member to whom invoices are billed.	This indicates the different files that need to be included in the download format when the member is the Billed Entity . This provides an option to include: <ul style="list-style-type: none"> • Invoice PDF • Details Listings • Supporting Documents • Memos details • Digital Signature files
As a Billing Entity	Member who will bill the invoices.	This indicates the different files that need to be included in the download format when the member is the billing entity. This provides an option to include: <ul style="list-style-type: none"> • Invoice PDF • Details Listings • Digital Signature • Memos details
Invoice PDF	File generated in PDF format	If the check box is selected to invoice PDF, the output will be in the PDF format
Details Listings	Detail required for the invoice	The output displays the details of the invoice for the billing and the billed entity.
Supporting Documents	Supporting documents required	Supporting documents are sent while sending the invoice supporting documents showing all the line items. These documents can be sent in.doc and.xls for Passenger and .doc, .xls, and .jpg for Miscellaneous.
Digital Signature Files	Digital signature required	As a billed and billing entity digital signature is required. It appears on the invoices and can be treated as valid invoice. Few countries do not process their invoices if it is not digitally signed.
For Passenger only		
Memo Details	Memo details required	-

As a **Billed and Billing entity**, member can select different files that are required.
To edit Offline Archiving Outputs for Billing Entity and Billed Entity, click **Edit** link for the respective field.
Refer Editing in Passenger and Miscellaneous.

Validation on Acceptable Delay for Payables Bilateral Invoices

The following table describes the fields in the **Validation on acceptable delay for payables bilateral invoices** section:

Fields	Description	Remarks
Enable	It displays the validation on payable bilateral invoices	If the check box is selected, it will verify the difference in days between the System Processing Date and the Invoice Date.
Manage Acceptable Delays	Click Manage Acceptable Delays	Clicking Manage Acceptable Delays , the following can be additionally defined (which will apply if this validation is enabled): (i) The Acceptable Delay per Billing Member (ii) A Generic Acceptable Delay which will apply for all other Billing Members In the absence of Generic or Billing Member specific records, SystemLevelAcceptableDelay days will be considered as the Acceptable Delay if this validation is enabled.

To manage acceptable delays, click **Manage Acceptable Delays**.

IS-IDEDEC Migration Period	Billing period from which Non-Sampling RM IS-IDEDEC was migrated.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none"> • PP- Period • MMM Month • YYYY- Year This field cannot be edited.
IS-XML Certification Status	Certification status for Non-Sampling RM IS-XML.	-
IS-XML Certified On	Certified date for Non-Sampling BM IS-XML.	Clearance period - DD-MMM-YY Where <ul style="list-style-type: none"> • DD- Day • MMM- Month • YY- Year This field cannot be edited.
IS-XML Migration Period	Billing period from which Non-Sampling BM IS-XML was migrated.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none"> • PP- Period • MMM- Month • YYYY- Year This field cannot be edited.

Editing Passenger & Miscellaneous Configurations

Please Specify Effective Date OR Period

Current Value:
☐

New Value:
☒

Future Period:

Save Cancel

The following table describes the fields on the **Editing** screen:

Field	Description	Remarks
Current Value	Current value of the output	This value is not editable.
New Value	New Value of the output file	The new output format that the member requires. The new value will be an output file in IS-IDEDEC or IS-XML format.
Future Period	Period from which the new value will be applicable.	It states from which period the new value should be effective. The future period should be mentioned in DD-MMM-YY format.

The procedure for editing the existing value is as follows:

1. Select the **New Value** check box for changes to be made.
2. Enter the **Future Period** for the new changes to be applicable.
3. Click **Save** to save the new value or Click **Cancel** to exit.

Default Location for MISC Payables Original Invoices and Credit Notes

The following table describes the field of **Default Location for MISC Payables Original Invoices and Credit Notes**.

Field	Description	Remark
Default Location for MISC Payables Original Invoices and Credit Notes	Default Location for MISC Payables Original Invoices and Credit Notes	Default Location for MISC Payables Original Invoices and Credit Notes will be generated for the member

To Default Location for MISC Payables Original Invoices and Credit Notes, click **Edit** link for the respective field.

Refer Editing in Passenger and Miscellaneous.

Managing UATP Billing Configurations

To view the UATP Billing configurations:

1. Click **Profile and User Management** tab and then click **Manage Member Profile**.
2. The **Member Profile** screen is displayed.
3. Click **UATP** tab.
4. The UATP configurations for that member are displayed.

The screenshot shows the 'Manage Member Profile' page for 'SIS Air'. The 'UATP' tab is selected. The page contains several sections for configuration:

- Validations:** A dropdown menu for 'Rejection on Validation Failure' with 'Reject File In Error' selected.
- Online Correction Allowed:** A checkbox for 'Online Correction Allowed'.
- Supporting Documents:** A text field for 'Additional File Types Accepted' with '.doc, .xls etc.' entered.
- Legal Services:** A section for 'Handling of UATP Invoice by ATCAN' with a 'Not Activated' status and a checkbox for 'Ignore UATP Invoices from DS Process'.
- Billing Data Output:** A section for 'Billed Invoices' with a checkbox for 'IS-XML' and a checkbox for 'Billing Invoices Submitted On Behalf of the Member'.
- Offline Archive Outputs:** A section with four sub-sections: 'Invoice PDF', 'Details Listings', 'Supporting Documents', and 'Digital Signature Files'. Each has a checkbox and an 'Edit...' link.
- Certification and Migration Details:** A section with 'Certification Status' (Not Tested), 'Certified On' (DD-MM-YY), and 'Migration Period' (YYYY-MM-PP).
- IS Contacts:** A section with 'View/Edit' links.

At the bottom, there are buttons for 'Save UATP Details', 'Future Updates Pending', and 'Subscription required to activate the optional service'.

Managing Validation and Supporting Documents

- **Validations:** Member can select the option as Reject File in error or Reject Invoice In error from the drop-down list available for rejection on validation failure.
- **Supporting Documents:** Member can mention the file format for the invoices to be submitted. Standard formats are .doc, .xls, .txt.

The following table describes the fields in the **Validation and Supporting Documents** section:

Fields	Description	Remarks
Validations		
Rejection on Validation Failure	Invoice or invoices to be rejected for validation errors.	If this option is selected it indicates whether entire file or individual invoices to be rejected in case of validation error.
Reject File In Error	File to be rejected.	If this option is selected it indicates that the entire file be rejected in case of validation error.
Reject Invoice In Error	Individual Invoice to be rejected.	If this option is selected it indicates that a single invoice is rejected in case of validation error. All the remaining invoices if validated can be sent for submission.
Online Correction Allowed		

Fields	Description	Remarks
Online Correction Allowed	Indicates if online correction is allowed.	-
Supporting Documents		
Additional File Types Accepted	Indicates the file types accepted in addition with those as specified in the Member Profile.	File Types accepted are: <ul style="list-style-type: none"> • .doc • .xls

Managing the Legal Services

The following table describes the field of **Output files**.

Fields	Description	Remarks
Legal Services		
Handling of UATP Invoice by ATCAN	It indicates if the UATP invoice is to be handled by ATCAN.	To activate this service contact SIS Ops.
Ignore UATP Invoices from DS Process	It indicates that UATP invoice will not be digitally signed.	The value is set up by the member indicating whether DS is allowed on UATP invoices.

Managing the Billing Data Output Files

- It states the output format of the invoice files. The billed invoices format is IS-XML. This can be edited.

The following table describes the field of **Output files**.

Fields	Description	Remarks
Output Files		
Billed Invoices	It is the IS file format for billed invoices.	The billed invoices are in IS-XML format.
Billing Invoices submitted on Behalf of the Member	Indicates if the invoices are to be submitted on behalf of the member.	A copy of the invoice is submitted on Behalf of the member.

The **Edit** link next to the fields allows member to enter the new value for the editable fields.

Managing Offline Archiving Outputs

The different files formats that need to be included while downloading can be edited using **Offline Archive Outputs**.

The following table describes the fields in the **Offline Archiving Outputs** section:

Fields	Description	Remarks
As a Billed Entity	Member to whom invoices are billed.	<p>This indicates the different files that need to be included in the download format when the member is the Billed Entity.</p> <ul style="list-style-type: none"> This provides an option to include: <ul style="list-style-type: none"> <input type="checkbox"/> Invoice PDF <input type="checkbox"/> Details Listings <input type="checkbox"/> Supporting Documents <input type="checkbox"/> Memo details <input type="checkbox"/> Digital Signature files
As a Billing Entity	Member who bills the invoices.	<p>This indicates the different files that need to be included in the download format when the member is the billing entity.</p> <ul style="list-style-type: none"> This provides an option to include: <ul style="list-style-type: none"> <input type="checkbox"/> Invoice PDF <input type="checkbox"/> Details Listings <input type="checkbox"/> Digital Signature <input type="checkbox"/> Memos details
Invoice PDF	File generated in PDF format.	If the check box is selected to invoice PDF, the output will be in the PDF format.
Details Listings	Detail required for the invoice.	The output displays the details of the invoice for the billing and the billed entity.
Supporting Documents	Supporting documents required.	<p>Supporting documents are sent while sending the invoice supporting documents showing all the line items.</p> <p>These documents can be sent in .doc, .xls, and .jpg format.</p>
Digital Signature Files	Digital signature required.	As a billed and billing entity digital signature is required. It appears on the invoices and can be treated as valid invoice. Few countries do not process their invoices if it is not digitally signed.

As a **Billed and Billing entity**, member can select different files that are required. To edit Offline Archiving Outputs for Billing Entity and Billed Entity, click **Edit** link for the respective field. Refer Editing in Passenger and Miscellaneous.

Viewing Certification and Migration details

Member will view the Certification status, Migration status, and Migration period. These fields are non - editable.

The following table describes the fields of **Viewing Certification and Migration Details**.

Fields	Description	Remarks
IS-XML Certification Status	IS-XML Certification status for UATP billings.	-
IS-XML Certified On	IS-XML Certification date for UATP billings.	Clearance period - DD-MMM-YY Where <ul style="list-style-type: none">• DD- Day• MMM- Month• YYYY- Year This field cannot be edited.
IS-XML Migration Period	IS-XML Migration Period for UATP billings.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none">• PP- Period• MMM- Month• YYYY- Year This field cannot be edited.
IS-WEB Migration Period	IS-WEB Migration Period for UATP billings.	Clearance period - YYYY-MMM-PP Where <ul style="list-style-type: none">• PP- Period• MMM- Month• YYYY- Year This field cannot be edited.

6.2.7 Viewing ICH Configurations

To view the ICH configurations

1. Click **Profile and User Management** tab and then click **Manage Member Profile**.
2. The **Member Profile** screen will be displayed.
3. Click **ICH** tab.
4. The ICH configurations for that member will be displayed.

The following table describes the fields on the ICH tab:

Fields	Description	Remarks
ICH Membership Status*	Membership status is displayed.	<p>Membership status can be Live, Suspended or Terminated.</p> <ul style="list-style-type: none"> • If the Membership status is changed to Live from Suspended, it will ask for Reinstatement Period (From). • If the Membership status is changed to Live from Terminated it will ask to enter the Entry Date. • If the Membership status is changed to Suspended, it will ask to enter the Suspension Period From and Suspension Defaulting Period From. • If the Membership status is changed to TERMINATED, it will ask to enter the Termination date. <p>The clock icon appearing next to the drop down shows the history of suspension periods.</p>
Zone*	ICH zone is displayed.	For Example: A
Category*	ICH member category is displayed.	<p>For Example:</p> <p>Airline Member / ICH.</p> <p>Airline Member / ICH / Subsidiary.</p> <p>Airline Member / IATA.</p> <p>Airline Member / Non –IATA.</p> <p>Airline Member / Sponsored / IATA</p> <p>Airline Member / Sponsored / Non- IATA.</p> <p>Associate Member / Non-strategic.</p> <p>Associate Member / Other.</p> <p>Associate Member / Sponsored.</p> <p>Associate Member / Strategic.</p> <p>Associate Member / Subsidiary.</p>
Is Early Call Day Applicable	It indicates whether the member is required to adhere to early call day.	If the check box is selected it means that early call day is applicable to the member.
ICH iiNet Account ID	The ICH iiNet Account ID of the Member.	-

Fields	Description	Remarks
Aggregator	Aggregator or aggregated by can be specified	<p>Example of how this will work.</p> <p>ACCA is an aggregator.</p> <p>Airline AA is aggregated by ACCA and AA is of type 1 aggregated.</p> <p>Airline BB is aggregated by ACCA and BB is of type 2 aggregated.</p> <p>In the profile of ACCA</p> <p>Field Aggregator would have value True or Yes</p> <p>Field List of Aggregated Members will contain airlines aggregated by ACCA (i.e. AA and BB).</p> <p>Field Aggregated by will be blank.</p> <p>Field Aggregated Type will be blank.</p> <p>In the profile of AA</p> <p>Field Aggregator will be blank.</p> <p>Field List of Aggregated Members will be blank.</p> <p>Field Aggregated by will ACCA</p> <p>Field Aggregated Type will be 1.</p> <p>In the profile of BB</p> <p>Field Aggregator will be blank.</p> <p>Field List of Aggregated Members will be blank.</p> <p>Field Aggregated by will ACCA.</p> <p>Field Aggregated Type will be 2.</p>
List of Aggregated Members	It is the list of Aggregator members and sponsors.	The specified Member/s should be ICH Members.
List of Sponsored Members	It is the list of Sponsored members and sponsors.	-
Aggregated By	It is the aggregated code of the carrier.	<p>The field will not be editable. This field value will be derived based on the List of the Aggregated Members of the Aggregator Member's profile.</p> <p>This field will be populated only if Aggregator is blank.</p> <p>For Example: Specified for field Aggregator.</p>
Aggregated Type	It is the aggregated type.	-
Sponsored By	It is the name of the sponsoring member.	Sponsoring member should be valid member having a valid code.

Fields	Description	Remarks
Migration (F12 Submission Permitted For The Following Billing Categories For The Member)	It is the Permission status.	Values are as follows: <ul style="list-style-type: none">• If the check box for passenger is selected the member is allowed to submit PAX Web F12.• If the check box for cargo is selected the member is allowed to submit Cargo Web F12 Files.• If the check box for Miscellaneous is selected the member is allowed to submit Miscellaneous Web F12 Files.• If the check box for UATP is selected the member is allowed to submit UATP Web F12 Files.
Comments	Any comments that have to be mentioned	This is used by the ICH team. It is a free text with upper and lower case alphabets, umbers and free space.

6.2.8 Viewing ACH Configurations

To view the ACH configurations

1. Click **Profile and User Management** tab and then click **Manage Member Profile**.
2. The **Member Profile** screen will be displayed.
3. Click **ACH** tab.
4. The ACH configurations for that member will be displayed.

The screenshot shows the SIS Air Member Profile page with the ACH tab selected. The page includes a header with the IATA logo and navigation tabs. The main content area is divided into several sections:

- Member Details:** Includes fields for ACH Membership Status (Not a member) and Category (Please Select).
- ACH clearance Invoice Submission Pattern:** A table with columns for PAX, CGO, MISC, and UATP, each with checkboxes for Period1, Period2, Period3, and Period4.
- Inter clearance Invoice Submission Pattern:** A table with columns for PAX, CGO, MISC, and UATP, each with checkboxes for Period1, Period2, Period3, and Period4.
- Comments:** A text area for adding comments.
- Exceptions (Settlement Via ICH For Dual Clearing House Members):** A table with columns for PAX, CGO, MISC, and UATP, each with a text input field.
- IS Contacts:** A link to view or edit contacts.

The following table describes the fields on the ACH tab:

Field	Description	Remarks
ACH Member ship status	Displays the member ship status of the member.	<p>For "Suspended" and "Terminated" a pop-up message is sent for confirmation.</p> <ul style="list-style-type: none"> • If the status is changed to 'Suspended', a modal pop-up screen box is displayed asking for the Suspension Set From and Suspension Applicable From. • If the status is changed to LIVE from SUSPENDED, a modal pop-up screen box is displayed asking to enter the Reinstatement Period (From). • If the status is changed to LIVE from TERMINATED, a modal pop-up screen box is displayed asking to enter the Entry Date. • If the status is changed to TERMINATED, a modal pop-up screen box is displayed asking to enter the Termination date.
Category	Category of the member.	For Example: Airline/ACH Member.
ACH clearance Invoice Submission Pattern	Periods in which the invoices can be cleared for PAX, CGO, MISC, UATP	<p>Values are as follows:</p> <ul style="list-style-type: none"> • If the check box against the PAX is selected it states the periods in which PAX invoices can be submitted for ACH clearance. • If the check box against CGO period is selected it states the periods in which CGO invoices can be submitted for ACH clearance • If the check box against MISC period is selected it states the periods in which Misc invoices can be submitted for ACH clearance. • If the check box against UATP period is selected it states the periods in which UATP invoices can be submitted for ACH clearance. • There is period 1, Period 2, Period 3, and Period 4 for ACH clearance.

Field	Description	Remarks
Inter clearance Invoice Submission Pattern	Period in which invoices can be submitted.	<p>Values are as follows:</p> <ul style="list-style-type: none"> • If the check box is selected against PAX it states that period for which PAX invoices can be submitted for Inter clearance. • If the check box is selected against CGO it states that period for which CGO invoices can be submitted for Inter clearance. • If the check box is selected against MISC it states that period for which MISC invoices can be submitted for Inter clearance. • If the check box is selected against UATP it states that period for which UATP invoices can be submitted for Inter clearance.
Comments	Any comments that have to be mentioned	This is used by the ICH team. It is a free text with upper and lower case alphabets, numbers and free space.
Exceptions (Settlement Via ICH For Dual Clearing House Members)	Member has an agreement to settle via ICH	<p>Values are as follows:</p> <ul style="list-style-type: none"> • PAX indicates the member (DUAL membership) has an agreement with other member to settle PAX via ICH instead of ACH. • CGO indicates the member (DUAL membership) has an agreement with other member to settle CGO via ICH instead of ACH. • MISC indicates the member (DUAL membership) has an agreement with other member to settle MISC via ICH instead of ACH. • UATP indicates if the member (DUAL membership) has an agreement with other member to settle UATP via ICH instead of ACH.

6.3 Managing Users

Managing Users Menu has the following functionalities:

- **Manage Users:** You can view and edit user details using Manage Users submenu.
- **Create Users:** You can create new users using Create Users submenu. There is no limitation on the number of users you can create.

6.3.1 Creating New User

To create a new user:

1. Click **Profile and User Management** tab, and then click on **Create Users**.
2. A **Create Users** screen is displayed.

The following table describes the fields on the **Create a New Account** screen.

Fields	Description	Remarks
Salutation	Salutation to be added before name of the user.	The list of salutations is available in the drop-down list. For example Mr., Mrs., Miss, Dr.
First Name*	First name of the user	-
Last Name*	Last Name of the user	-
Email Address*	Email address of the user	Email ID is the unique ID for a user in SIS. Email ID is used as login id to login to ISWEB.
Staff ID	Staff ID of the user.	Staff/Employee ID of the user
Position Title	Position/ Title of the user	Position or the designation of the user.-
Division	Division of the user	The division that the user belongs to.
Department	Department of the user	The department that the user belongs to or works.
Telephone 1	Phone number 1 of the user	-
Telephone 2	Phone number 2 of the user	-
Mobile	Mobile number of the user	-
Fax	Fax number of the user	-
SITA Address	The SITA Address (Teletype – Pre designated Point).	Provider of global information and telecommunication solutions for the air transport industry.

Fields	Description	Remarks
Secondary User	If this check box is selected then the Secondary User is created for organisation.	While creating a new user if this checkbox is checked, the user will be created as a secondary user. The email address entered while creating secondary user should exist as an active primary user of any other organization. When secondary user is created in SIS successfully, the primary user and secondary user can switch between the accounts. The member creating secondary user of another member user it should be configured in primary member's organization as a secondary member.
Location ID	ID of the location in which the particular contact is located.	ID given to a particular location.
Address 1	Address 1 of the contact	-
Address 2	Address 2 of the contact	-
Address 3	Address 3 of the contact	-
City Name	City Name.	City name of the contact mentioned in the address.
Postal Code	Postal Code of the address mentioned.	
Country Name	Country name of the user.	Country to which the user belongs.
Sub Division Name	Sub Division Name	Sub Division of the Current member appears. <ul style="list-style-type: none"> This is an auto-complete field. Click on the down arrow key on the keyboard to view the list.

Fill all the required details in the text box as the fields mentioned. The description of all the fields is stated in the table. Fields marked in * are mandatory.

The procedure to create a new user is as follows:

1. Select the **Salutation** as Mr/Mrs/Ms from the Salutation drop down list.
2. Enter the first name, last name and a valid e-mail address.
3. Enter the **Position Title**, the **Staff ID** of the user, the **Division** and the **Department** the user for whom the account is been created.
4. Enter the contact number of the user in **Telephone 1**, **Telephone 2**(alternate number), and **Mobile Number** of the user. Also enter the **Fax Number** of the user for reference in the text box.
5. Select the **Location ID** from the drop-down list and enter the address in the **Address** field (Address Line 1, Address Line 2, and Address Line 3.)
6. While entering the address enter the **City Name**, **Postal Code** of the address and the **Country** of the user.
7. Once all the details of the user are entered, click **Save User Details**.

The user profile is created after saving the details.

6.3.2 Searching Existing Users

In the **Profile and User Management** tab, click on **Manage Users**. The **Manage Users** screen is displayed.

The following table describes the fields on the **Search/Modify Account** screen.

Fields	Description	Remarks
First Name	First name of the User.	Screen is blank by default. A Valid first name in the profile has to be mentioned.
Last Name	Last Name of the User.	Screen is blank by default. A Valid Last name in the profile has to be mentioned.
Email ID	Email Id of the User.	Screen is blank by default. A Valid email address in the profile has to be mentioned.
Status	Status ID of the user.	Valid values are: <ul style="list-style-type: none"> All Active Deactivated due to Membership Change Inactive due to Password Expiry Deactivated due to Password Expiry Deactivated by SIS Ops Deactivated by User Deactivated in Customer Portal

The procedure to search for an existing user is as follows:

1. Enter the **First Name, Last Name, Email Address, Staff ID** and the **Email ID**, and then click **Search** to view the details of the specific user.
2. If only the first name or the last name is mentioned of the contact, all the contacts with similar first name and the last name are displayed.
 - User can view 5 user details after searching.
 - To view more users, user can jump to a particular page and increase the list of viewing user details

6.3.3 Editing Existing Users

Editing User Details

The procedure to edit user is as follows:

1. After searching a particular user or the list of users, select the row of a user to edit.
2. In the Actions column, click the Edit to edit the information for the user.
3. The **Modify User Account** screen is displayed.

Super User:

- This checkbox indicates whether the user whose details are displayed on the page is a super user or not
- If checked: The user is a super user
- If unchecked: The user is not a super user
- If a non Super User has been changed to a Super User, then all alerts sent by the system to super users will be sent to this user also. This includes broadcast messages sent by SIS Ops to Super Users only
- If a Super User has been changed to a non Super User, then alerts sent specifically to Super Users will not be sent this user. This includes broadcast messages sent by SIS Ops to Super Users only

Note:

This checkbox can be edited only by SIS Ops user

For certain types of users, update of 'First Name', 'Last Name' and 'Email Address' is not allowed in IS-WEB, and will be disabled. In such cases, these fields can be updated in the IATA Customer Portal only.

After entering the information click **Save User Details** to save the changes.

Is Archived:

- This checkbox will be used to mark/flag deactivated Users as 'Archived'. Such archived users will be excluded from the dropdown and autocomplete fields where users are populated.
- This checkbox will be enabled only if current status of user account being modified is inactive.

- If checked user account will be marked as 'Archived' and vice versa
- After editing the information click Save User Details to save the changes.

6.4 Switch User

Switch Users Menu has the following functionalities:

1. A dropdown 'Switch Access' will be shown to the left of logoff button for Primary User who has active secondary accounts in other organizations
2. When a primary user logs into the IS-WEB, this dropdown will populate:
 - a) Organization to which primary user account belongs
 - b) All the organizations with which user has active secondary account
3. To switch account click on the secondary account displayed in the dropdown list of this field
4. To switch back to primary account select the primary account displayed in this dropdown list field

6.5 Managing User Permissions

Manage User Permissions menu has following options:

- **Manage Permission Templates**

A permission template is set of functionalities grouped together. You can search for existing templates. You can create new templates and modify existing templates using Manage Permission Templates option.

- **Assign Permissions to User**

After you have created a new user, you can assign permissions to the user using Assign Permissions to User option. The permissions are assigned as per user's role and responsibilities.

6.6 Managing the Permission Template

6.6.1 Searching Permission Templates

To search for a Permission Template:

1. Click **Profile and User Management** tab, click **Manage User Permissions** and then click **Manage Permission Template**.
2. The **Manage Permission Template** screen is displayed.

The screenshot displays the 'Manage Permission Template' interface. At the top, there's a navigation bar with the IATA logo and user information. Below it, a breadcrumb trail shows the path: Home >> Profile and User Management >> Manage User Permissions >> Manage Permission Template. The main section is titled 'Manage Permission Template' and includes a 'Search Criteria' area with a 'Template Name' input field. Below the input field are three buttons: 'Search' (highlighted in orange), 'Add New Template', and 'Clear'. Underneath is the 'Search Results' section, which features a table with columns for 'Actions', 'Template Name', and 'Category Name'. The table is currently empty. At the bottom of the results section, it indicates 'Page 0 of 1' and 'No records to view'.

The procedure to search for an existing template is as follows:

1. In the **Template Name** field enter the name of the template that you wish to search.
2. Click **Search**.
3. The search results will be displayed in the Search Results section.
 - By default 5 contact details are displayed in the list. To View more contacts click on the **Next Page** to view another list of contact.
 - Member can jump to a particular page and increase the list of viewing contact details by mentioning the page number in the Pagination Text field.

6.6.2 Adding a New Template

You can add a new template with specific permissions. You can then assign this template to respective users.

1. To add a new template, click **Add New Template** on **Permission Template Search** screen.

The procedure to add a new template is as follows:

1. On the **Permission Template Search** screen click **Add New Template**.
2. Enter the template name in the **Template Name** field.
3. Select the check box against the permissions to be assigned to the new template.
4. Click **Save** to create a new template.

6.6.3 Editing an Existing Template

The procedure to **Edit an Existing Template** is as follows:

1. Search for the template you wish to edit. Select the template from the search result.
2. To edit the permissions of the template, select the check box against the permission to be assigned to the template. If you wish to remove the permission, clear the check box for that permission.
3. Click **Save** to save the changes.

6.6.4 Deleting Template

The procedure to delete the Existing Template is as follows:

1. Search for the desired template and then click **X** icon in the **Action** column for the template to be deleted. The row for the template will highlight.
2. A warning message window will appear for confirmation to delete.
3. Click **OK** to delete the existing template.

6.6.5 Assigning Permissions to User

To assign the permissions to user:

1. Click **Profile and User Management** tab, click **Manage User Permissions** and then click **Assign Permissions to User** option.
2. The **Assign Permission To User** screen is displayed.

Fields	Description	Remarks
User Name	Name of the User	This is an auto-complete field. Press Down Arrow key on the keyboard to view the list of users.
Template	Permission Template list	For Example: PAX Module Lead, CGO Module Lead

The procedure for assign the permission is as follows:

1. Enter the user name in the **User Name** field to which you wish to assign the permission.
2. Select the Template from the drop down list.
3. Click **Add Permission**. All the permissions of the selected template will be assigned to the user and the permissions will be displayed in Select Permission from the List
4. Click **Save** to assign the permission.

6.6.5.1 Permission Management: Best Practices

Granting and restricting user access and permissions to IS Web is one of the most important responsibilities of the SIS Member Super User.

Here are some tips to keep in mind when granting user permissions:

- Follow the Principle of Least Privilege: Give people the lowest permission levels they need to perform their assigned tasks. It is essential for proper segregation of duties that not all permissions are assigned as default to every user.
- When granting user permissions, it is recommended to use one of the standard SIS Permission Templates to ensure proper role segregation.
- Use the standard SIS Permission Templates and avoid granting unique permissions to individuals. Where possible, use the copy permission function for users with similar roles.
- It is important to set user permissions that are aligned with the hierarchy in the department. For example, in some organizations, a user who can create an invoice may not submit invoices as this may be handled by the supervisor or manager.
- It is recommended that each user have their own user account with the appropriate permissions as per their role to allow for proper segregation of duties. Sharing of user ids is not recommended.

6.6.5.2 Permission Matrix

Module	Submenu	Permission Category	Permission

6.6.6 Replacing Permissions

The procedure to **Replace Permission** is as follows:

1. Enter the name of the user in the **User Name** field to whom you wish to assign the permission.
2. Select the **Template** from the list of drop down to replace the permission to the user
3. Click **Replace Permission**. All the existing permissions will be replaced by the new template permissions.
4. Click **Save** to assign the permission.

6.6.7 Copying Permissions

You can copy permissions of one user to another. The procedure to **Copy Permission** is as follows:

1. Enter the name of the user in the **User Name** field to whom you wish to assign the permission.
2. Enter the user name in the field in the **Copy User Permissions** section.
3. Click **Copy Permission**. All the permissions of second user will be copied to the first user.
4. Click **Save** to assign the permission or click **Cancel** to exit from the screen.

6.7 Viewing Profile Changes

In this menu you can view the changes made to your profile by SIS, ICH, ACH members.

6.7.1 Viewing Profile Changes

You can view the changes made to your profile by SIS, ICH, ACH members. To view profile changes, click **Profile and User Management** menu, and then click **View Profile Changes**.

The following table describes the fields on the **View Profile Changes** screen:

Fields	Description	Remarks
Clearance Period	It is the period to be selected for Audit Trail.	There are two options: <ul style="list-style-type: none"> • Date Range (From – To) • Clearance Period • By Default the clearance period is selected.
Date	Date to be selected for Audit Trail.	Audit entries will be shown from the specific date range. You can select either Clearance Period or Date.
From Period	This indicates the audit clearance period range. If specified, the audit report will show the audit entries for the elements changed between the specified clearance periods. Here the actor will be expected to specify all of the below values for the FROM as well as TO periods <ul style="list-style-type: none"> • Clearance period • Clearance Month • Year 	It is the starting date of the clearance period. <ul style="list-style-type: none"> • Period is to be mentioned in YYYY-MM-PP format, where <ul style="list-style-type: none"> □ YYYY is the year □ MM is the month □ PP is the period • The field is active if Clearance period is selected.

Fields	Description	Remarks
To Period	<p>This indicates the audit clearance period range.</p> <p>If specified, the audit report will show the audit entries for the elements changed between the specified clearance periods.</p> <p>Here the actor will be expected to specify all of the below values for the FROM as well as TO periods</p> <ul style="list-style-type: none"> • Clearance period • Clearance Month • Year 	<p>It is the End date of the clearance period.</p> <ul style="list-style-type: none"> • Period is to be mentioned in YYYY-MM-PP format, where <ul style="list-style-type: none"> □ YYYY is the year □ MM is the month □ PP is the period • The field is active if Clearance period is selected.
From Date	<p>This indicates the audit date range. If specified, the audit report will show the audit entries for the fields that are changed between the date range.</p>	<p>You can select the date from the date picker.</p> <p>The field is active if Date is selected.</p>
To Date	<p>This indicates the audit date range. If specified, the audit report will show the audit entries for the fields that are changed between the date range.</p>	<p>End date of the clearance.</p> <ul style="list-style-type: none"> • You can select the date from the date picker. • The field is active if Date is selected.
User	User name	<p>This indicates the user who made the changes.</p> <p>If specified, the audit report will show audit entries for elements changed by the particular user.</p> <p>Archived user will not be shown in the dropdown.</p>

The procedure to **Search** is as follows

1. Enter the search criteria. The search criteria can be specified in two ways:

1. Date Range (From – To) – This indicates the audit date range. If specified, the audit report will show the audit entries for the elements changed between the date range.

OR

- i. Clearance Period (From – To) – If specified, the audit report will show the audit entries for the elements changed between the specified clearance periods.

Here you must specify all of the below values for the FROM as well as TO periods

- Clearance period
- Clearance Month
- Year

2. Enter the user name or select the user from the drop-down list.
3. You can enter either some or all of the search criteria.
4. Click **Generate Report**.
5. An Audit Trail Report will be generated.

Audit Trail Report

Audit Id	Group	Element	Action	Old Value	New Value	Additional Info	Changed By	Changed On	Change Effective Date	Change Effective Period
17544	Contacts	Active	Create		Yes		Robin Paul	04-Jun-11 0:47:27	04-Jun-11 0:47:27	MAY-2011-JUN-2011

The following table describes the fields of **Audit Trail Report**.

Fields	Description	Remarks
Audit ID	This column displays the Audit ID, assigned by IS to every audit trail entry	This is the ID assigned by IS to every audit trail entry.
Group	Displays the name of the Group to which the changed element belongs.	For example: Contacts, PAX etc.
Element	Displays the name of the changed field.	
Action	Displays the type of change.	Action can be Create, Update or Delete.
Old Value	Displays the Old Value of the changed element.	-
New Value	Displays the changed value of the changed element.	-
Additional Info	Displays the additional information.	Any information that can be to member's help after the change is been made.
Changed By	Displays the name of the user who made change.	The field value will be displayed only if the Member profile element 'Hide user names in audit trails' is set to 'No' in the particular Member's Member Profile.
Changed On	Displays the date and time of the change.	-

Fields	Description	Remarks
Change Effective Date	Displays the date when the change became effective.	In most cases, this will be same as 'Changed On' date. It will be different only in case of post dated profile changes.
Change Effective Period	Displays the clearance period when the change became effective.	-
Member Designator	Alpha Code assigned to the member.	-
Member Prefix	It is the numeric code assigned to the member.	-
Member Name	Name of the member	-

6.8 Manage Location Associations

1. User having appropriate permission will only be able to access this screen.
2. Using this screen Granting User who can be Super User or Normal User (Non Super User) can view and modify Location association of other Users and Non-User Contacts.

6.8.1 Manage Location Associations Screen

The screenshot shows the 'Manage Location Associations' screen. At the top, there's a header bar with the IATA logo and navigation tabs: Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. Below the tabs, the title 'Manage Location Associations' is displayed. The main form area contains a label '* User / Contact:' followed by a text input field. Below the input field is an orange 'View' button. The footer of the screen displays copyright information: '© 2015 International Air Transport Association. All rights reserved.' and build details: 'Build: Rel1.7.12.0 12-Oct-2015 @ 8:38PM | DB: SISCOMP'.

The following table describes the fields on the **Manage Location Associations** screen.

Field	Description	Remark
User / Connect	It is email address of Target user or Non-User Contact	It is a auto-complete field and will populate list of Target Users / Non-User Contacts. Archived user will not be shown in the dropdown.
View button	The Granting User will be taken to the 'View Location Association' screen	Audit entries will be shown from the specific date range. You can select either Clearance Period or Date.

6.8.2 View Manage Location Associations Screen

The screenshot shows the 'View Location Association' screen. At the top, there's a header with the IATA logo and a navigation bar with tabs: Passenger, Cargo, Miscellaneous, UATP, Reports, General, and Profile and User Management. Below the tabs, the screen title is 'View Location Association'. The main content area has two fields: 'User / Contact' with the value 'abc@iata.org' and 'Location Association Type' with the value 'All Location IDs'. There are two buttons: 'Modify' (orange) and 'Cancel' (grey). The footer contains the text '© 2015 International Air Transport Association. All rights reserved.' and 'Build: Rel17.12.9.12-Oct-2015 @ 5:30PM | DB: SISCMF'.

The following table describes the fields on the **View Location Association** screen.

Field	Description	Remark
User / Connect	Non editable email address of Target user or Non-User Contact	
Location Association Type	Non editable association type of the Target User / Non-User Contact	<ul style="list-style-type: none"> • If the Target User / Non-User Contact is not associated with any Locations, value 'None' will be shown • If the Target User / Non-User Contact is associated with ALL Locations, value 'All Location IDs' will be shown • If the Target User / Non-User Contact is associated with specific Locations, value 'Specific Location IDs' will be shown
Associated Location IDs	Will be shown only if the 'Location Association Type' is "Specific Location IDs"	<ul style="list-style-type: none"> • It will be a non-editable list box • It will show all the Location IDs with which the Target User / Non-User Contact is associated (whether Active or Inactive)

Field	Description	Remark
Modify button	Granting User will be taken to modification screen.	<ul style="list-style-type: none"> • If the 'Location Association Type' of the Granting User is "None" <ul style="list-style-type: none"> ▪ The Granting User will not be able to proceed further • If the 'Location Association Type' of the Granting User is "All Location IDs": <ul style="list-style-type: none"> ▪ The Granting User will be taken to the 'Modify Location Association' screen • If the 'Location Association Type' of the Granting User is "Specific Location IDs" AND the 'Location Association Type' of the Target User / Non-User Contact is "All Location IDs": <ul style="list-style-type: none"> ▪ The Granting User will not be able to proceed further • If the 'Location Association Type' of the Granting User is "Specific Location IDs" AND the 'Location Association Type' of the Target User / Non-User Contact is "Specific Location IDs": <ul style="list-style-type: none"> ▪ The Granting User will be taken to the 'Modify Location Association' screen • If the 'Location Association Type' of the Granting User is "Specific Location IDs" AND the 'Location Association Type' of the Target User / Non-User Contact is "None": <ul style="list-style-type: none"> ▪ The Granting User will be taken to the 'Modify Location Association' screen
Cancel button	Clicking on button 'Cancel' will take the Granting User to the default search screen.	

6.8.3 Modify Location Association Screen

Modify Location Association

User / Contact : abbas.sheikh@123ba.com

Location Association Type:

☐ None

☐ All Location IDs

☒ Specific Location IDs

Unassociated Location IDs:

- 1>Main-London-GB
- 2-Tirana-AL
- 3-Mexico-AU
- 4-Wien-Schwechat-AT
- 5-Diegen-DE
- 6-Sofia-BG
- 7-Bogota-CO
- 8-Zagreb-HR
- 9-Nicosia-CY
- 10-Prague-CZ
- 11-Copenhagen-DK
- 12-Santo Domingo-DO
- 13-Paris-FR
- 14-Frankfurt-DE

Associated Location IDs:

- 1-London-GB

Save Cancel

© 2015 International Air Transport Association. All rights reserved. Build: Rel17.12.0 12-Oct-2015 @ 8:38PM | DB: SISCMF

1. By default, this screen will show the existing Location Association of the Target User
2. If the 'Location Association Type' of the Target User / Non-User Contact is "None":
 - a) It can be changed to "All Location IDs"
 - b) Or, it can be changed to "Specific Location IDs". If this is done, at least one Location ID should be associated with the Target User / Non-User Contact
3. If the 'Location Association Type' of the Target User / Non-User Contact is "All Location IDs":
 - a) It can be changed to "None"
 - b) Or, it can be changed to "Specific Location IDs". If this is done, at least one Location ID should be associated with the Target User / Non-User Contact
4. If the 'Location Association Type' of the Target User / Non-User Contact is "Specific Location IDs":
 - a) It can be changed to "None"
 - b) Or, it can be changed to "All Location IDs"
5. The third section should be a group of two List Boxes showing specific Location IDs:
 - a) This group should be shown ONLY if 'Location Association Type' is set as "Specific Location IDs"
 - b) The List Box on the Left Hand Side:
 - i. Should be labeled 'Unassociated Location IDs'
 - ii. Should show Location IDs of that Member (Active or Inactive) with which the Target User / Non-User Contact is NOT associated

- iii. This List Box may be empty if the Target User / Non-User Contact is already associated with all Active and Inactive Location IDs of the Member
 - c) The List Box on the Right Hand Side:
 - i. Should be labeled 'Associated Location IDs'
 - ii. Should show Location IDs of that Member (Active or Inactive) with which the Target User / Non-User Contact is associated
 - d) Between these two List Boxes, four Move Buttons will allow users to move locations between the list boxes.

The following table describes the fields on the **Modify Location Association** screen.

Field	Description	Remark
Cancel button	Any changes made to the Location Associations of the Target User / Non-User Contact will be aborted	
Save button	System will save the changes made to the Location Association of the Target User / Non-User Contact
