

Jean-Paul CAMOUS

CEO & Founder INNOVATIVE ARCHITECTURE D. C.

Having spent more than 35 years with Air France & KLM in development activities and CIO office as Development manager and then Chief Domains Architect, JP has co-founded CONZTANZ in 2013 with ambition to do things differently / to change the current model... To free up IT and therefore innovation in the AIR sector in order to invent the passenger experience of tomorrow. As EVP R&D, he has created the first independent AIR TRAVEL Data Agility Platform helping Airlines, Airports and Governments to provide Hyper-personalized and frictionless Travel Experience, maximize revenue opportunities & streamline API-PNR security project.

In parallel, he has founded IADC, an Independent Consulting “petite compagnie” enhancing Airline and Airport business strategy with innovative approach and cost-effective solutions in following domains.

#airlines – GDS, PSS, Loyalty ...

#airports – DCS and solutions around, Flight “rotation”, Disruption, Fluidity, multimodality ...

#ndc – Integration, Offer & Order Management, Ancillary enhancements, ...

#travel – Customer eXperience, predictive analysis, B2C & B2B customer baggage management,
