

MARINA BAY SANDS – SINGAPORE

12 – 14 March 2019

accelya

The need to achieve greater levels of Commercial and Operational Optimization and Benefit driven Business Insight has never been greater within air cargo. With the role of technology shifting from being a driver of cost efficiency to being a fundamental enabler of innovation and disruption, a data driven digital approach to the logistics chain has to play an increasingly transformative role in the global air cargo ecosystem.

We invite you to join Accelya at the Digital Cargo Track on 13th March from 9:00am – 12:30pm when we will explore the impact of data driven technologies on the global air cargo ecosystem. Get our vision of the future from Accelya’s Chief Technology Officer, Brian Collins, speaking about opportunities in a world of data driven logistics.”
