

IATA CYBERSECURITY SUMMIT

Geneva, Switzerland
28-29 October 2026

SYNOPSIS

IATA CYBERSECURITY SUMMIT

Strengthening Cyber Resilience Across the Global Aviation Ecosystem

OVERVIEW

The **IATA Cybersecurity Summit** brings together aviation and cybersecurity professionals from around the world to exchange insights on emerging threats, evolving trends, and practical approaches to strengthening cyber resilience across the aviation ecosystem.

Through expert presentations, panel discussions, and networking opportunities, participants will gain valuable insights from real-world case studies, practical implementation experiences, operational lessons learned, and technical perspectives that contribute to advancing cybersecurity across the industry.

SUMMIT OBJECTIVES

- Strengthen cyber resilience across aviation
- Share emerging threat intelligence and industry insights
- Foster collaboration between airlines and industry partners
- Promote alignment on standards and regulatory expectations
- Support cybersecurity maturity and capability development
- Translate industry dialogue into practical outcomes

KEY THEMES

Evolving Threats & Threat Intelligence

Emerging threats, attack trends, threat intelligence, and proactive defense.

Cyber Resilience, Incident Response & Recovery

Preparedness, response, recovery, and lessons learned.

AI, Automation & Cybersecurity Innovation

AI, machine learning, automation, and advanced cyber defense capabilities.

Securing Aviation Technologies & Digital Infrastructure

Cloud, IAM, OT, airport systems, aircraft-connected systems, and critical technologies.

Cybersecurity Operations & Practical Implementations

Threat hunting, vulnerability management, security monitoring, and implementation experiences.

Policy, Regulation & Industry Collaboration

Regulatory developments, cybersecurity standards, policy, and industry cooperation.

... and more!

CONTRIBUTE TO THE PROGRAM

We are currently developing the program for the inaugural IATA Cybersecurity Summit 2026. We invite the aviation cybersecurity community to propose topics, share case studies, present lessons learned, and contribute practical implementation experiences and technical insights.

For more information or to discuss potential contributions, please contact:
avcysec@iata.org.
