

easyJet switches to flydocs with ten-year digitisation deal

Press release

Staffordshire, UK – 9 February 2022

flydocs, the global leader and partner of choice in digital aviation records and data management, today announced the signing of a comprehensive deal with easyJet to digitise the records and asset management of its entire aircraft fleet.

Under the ten-year deal, the European airline will utilise flydocs' AMOS integration, a tailored software package, and digital records migration to further modernise their operations and support aircraft transitions.

John Bowell, Chief Commercial Officer at flydocs, commented: "Our focus for this year has been to truly cement our place as the partner of choice for digital records management in the industry, and this latest announcement proves that the hard work of the entire flydocs team is truly paying off. The first step of our partnership involved supporting their aircraft transitions, and we continue to provide a range of other in-demand flydocs services.

We're absolutely delighted to welcome an airline of easyJet's calibre to become our latest partner, and are committed to helping them stay at the forefront of technology advancements in aircraft maintenance."

Swaran Sidhu, Head of Fleet Technical Management at easyJet, said: "At easyJet we remain focused on finding ways to be ever more innovative and data-driven in our operation, and we are already seeing benefits from our operation resilience processes, predictive maintenance and maintenance planning. We are delighted to now be working with industry leaders flydocs, whose innovative approach to digitisation of aircraft maintenance records will support us and our fleet of over 300 aircraft across Europe, and further reinforce our efforts to this commitment."

About flydocs

flydocs is a leading asset management solution provider with the aviation industry's most comprehensive solution for creating value out of aircraft maintenance data. We offer the tools and expertise that allow all industry stakeholders to drive sustainable innovation to help build the future of the commercial aviation asset lifecycle.

Recognised as a global leader in digital records management, we were founded in 2007 and are 100% owned by Lufthansa Technik. With over 280 employees in multiple locations spread across the globe, we are trusted by over 75 airlines, lessors and MROs to deliver measurable long-term operational and cost efficiencies.

About easyJet

easyJet is Europe's leading airline offering a unique and winning combination of the best route network connecting Europe's primary airports, with great value fares and friendly service. easyJet flies on more of Europe's most popular routes than any other airline and carried more than 96 million passengers in 2019 – more than 16 million travelling for business. The airline has over 300 aircraft on nearly 1000 routes to more than 150 airports across 35 countries. Over 300 million Europeans live within one hour's drive of an easyJet airport.

easyJet aims to be a good corporate citizen, employing people on local contracts in eight countries across Europe in full compliance with national laws and recognising their trade unions. The airline supports several local charities and has a corporate partnership with UNICEF which has raised over £14m for the most vulnerable children since it was established in 2012.

The airline takes sustainability seriously and is committed to reaching net-zero carbon emissions flying by 2050. Together with its partners, including Airbus, Rolls-Royce, Cranfield Aerospace Solutions and Wright Electric, easyJet is working to accelerate the development of zero-emission aircraft technology. In the meantime, the airline is offsetting the carbon emissions from the fuel used for all its flights, at no additional cost to its customers, and only supports projects that are certified by Gold Standard or the Verified Carbon Standard, internationally recognised certification schemes. In addition, easyJet continues to renew its fleet, operate efficiently, and aims to fill most of its seats. Since 2000, over a 20-year period, the airline reduced its carbon emissions per passenger, per kilometre by over one-third, and aims to bring this down further.

Innovation is in easyJet's DNA – since launching over 25 years ago, easyJet changed the way people fly to the present day where the airline leads the industry in digital, web, engineering and operational innovations to make travel more easy and affordable for its passengers. The airline was named as Britain's Most Admired Company of 2020 in the transport sector, retaining the leading position for a second year running. Britain's Most Admired Companies study is the longest-running annual survey of corporate reputation in the UK.
