CMP 713 - Processing Dashboard View per Billing Category

This document aims to provide guidance and principles for Members to benefit from the new designed SIS feature implemented in Release 1.11: "Processing Dashboard View per Billing Category".

This new feature allows Members to segregate user's permissions to view processing dashboard for each of the Billing categories separately: "Passenger", "Cargo", "Miscellaneous" and "UATP".

At time of deployment of Release 1.11, existing Member users who had 'View' permission of Processing Dashboard got automatically the new 'View' permissions for each of the four billing categories so "Passenger", "Cargo", "Miscellaneous" and "UATP".

Access to 'Processing Dashboard'

A Member Super User can grant any user access to view Processing Dashboard for one (or more) Billing categories through following steps:

- Navigate to 'Profile and User Management' >> 'Manage User Permissions' >> 'Assign Permission To User'
- 2. Enter the user's email address in 'User Name' field
- Select the permissions that need to be granted to the user from 'Permission List For Selected User' >> 'Reports' >> ' Processing Dashboard'
