

Enhancing Runway Safety: A predictive approach through LOSA

IATA SIRM (2024)

Nikhil Mathen

Fleet Captain Human Factors

Operations Safety

IndiGo

Runway Incursions – A growing concern

- Runway Incursion at Tokyo Haneda Airport (Jan 2' 2024).

Runway Incursions – A growing concern

- Runway Incursion at Tokyo Haneda Airport (Jan 2' 2024).
- Global increase in runway incursions.

Runway Incursions – A growing concern

- Runway Incursion at Tokyo Haneda Airport (Jan 2' 2024).
- Global increase in runway incursions.
- Large number of close call events in the U.S.

Airline Close Calls Happen Far More Often Than Previously Known

Airline Incidents Show a System Under Growing Stress

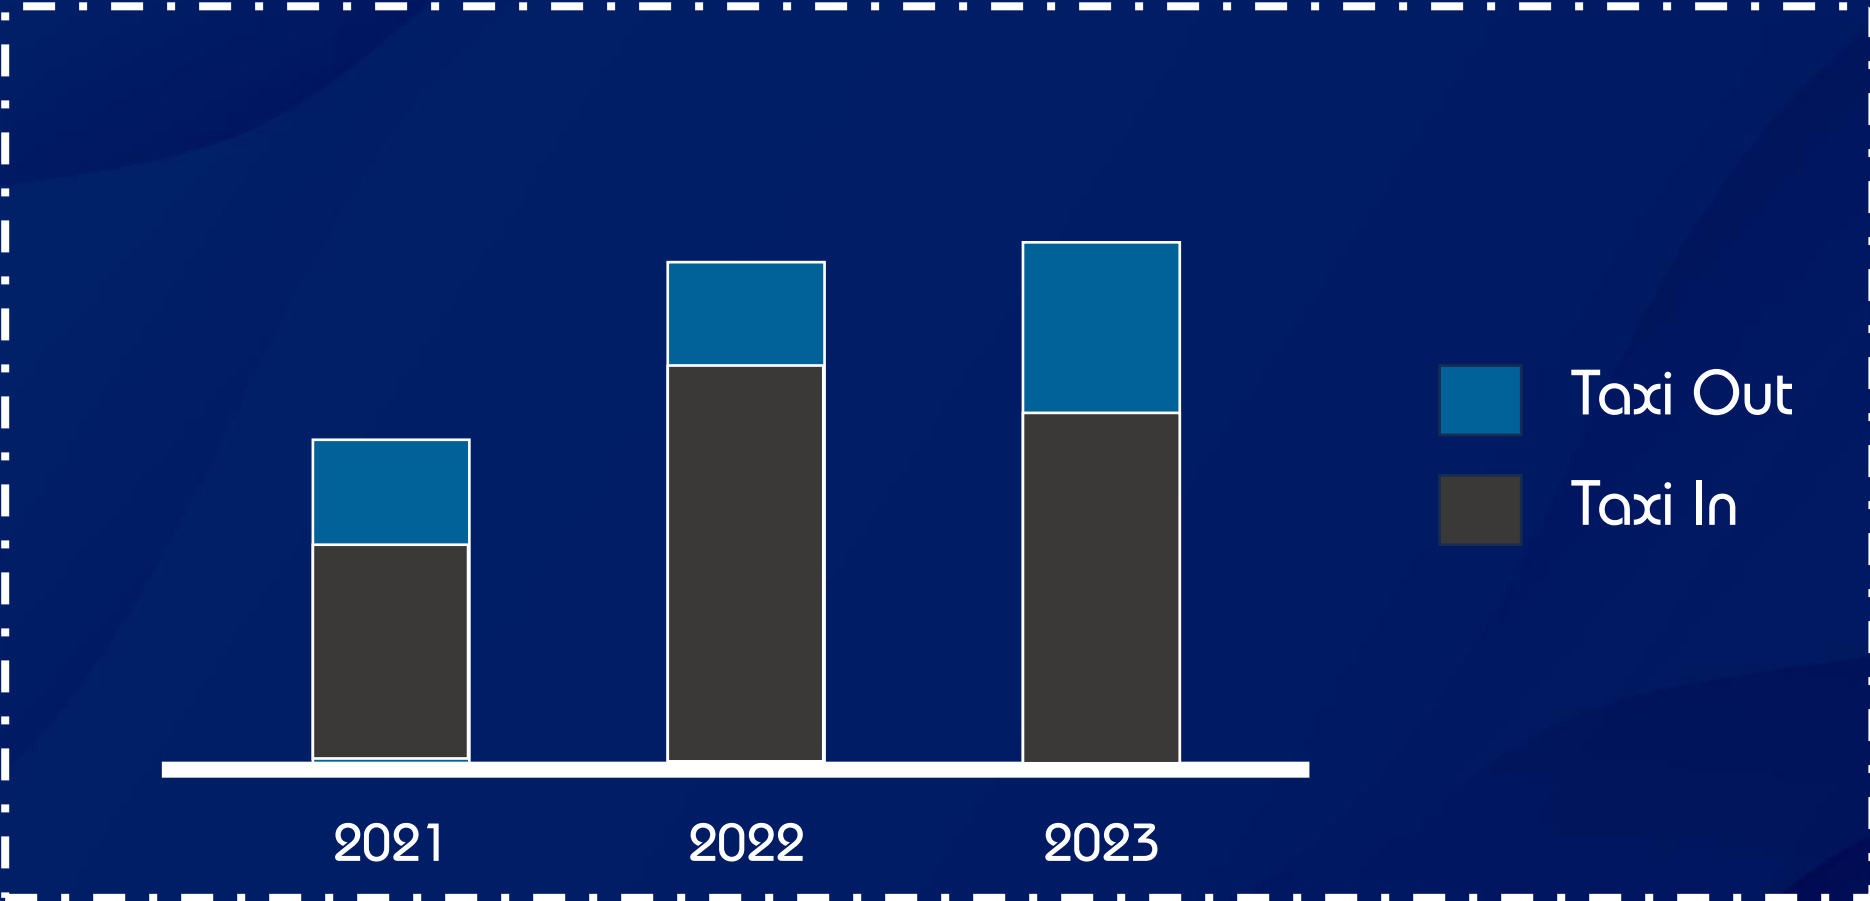

FAA Identifies 19 Serious Near Miss Incidents In 2023: The Most In 7 Years

Runway Incursions

Too infrequent to get a true picture of risk.

Taxiway Incursions

Alignment of Safety Data Training Data Taxonomies

Reactive

€g., Analysis
Accident -
Incidents

Incident Analysis
+
Reports

Reactive/Proactive

€g., Analysis
Of event
including UASs

Flight Data Analysis
(FDA)

Mandatory Occurrence
reporting

Proactive/Predictive

€g., Analysis
Of Normal Work

Line Oriented Safety
Audits (LOSA)

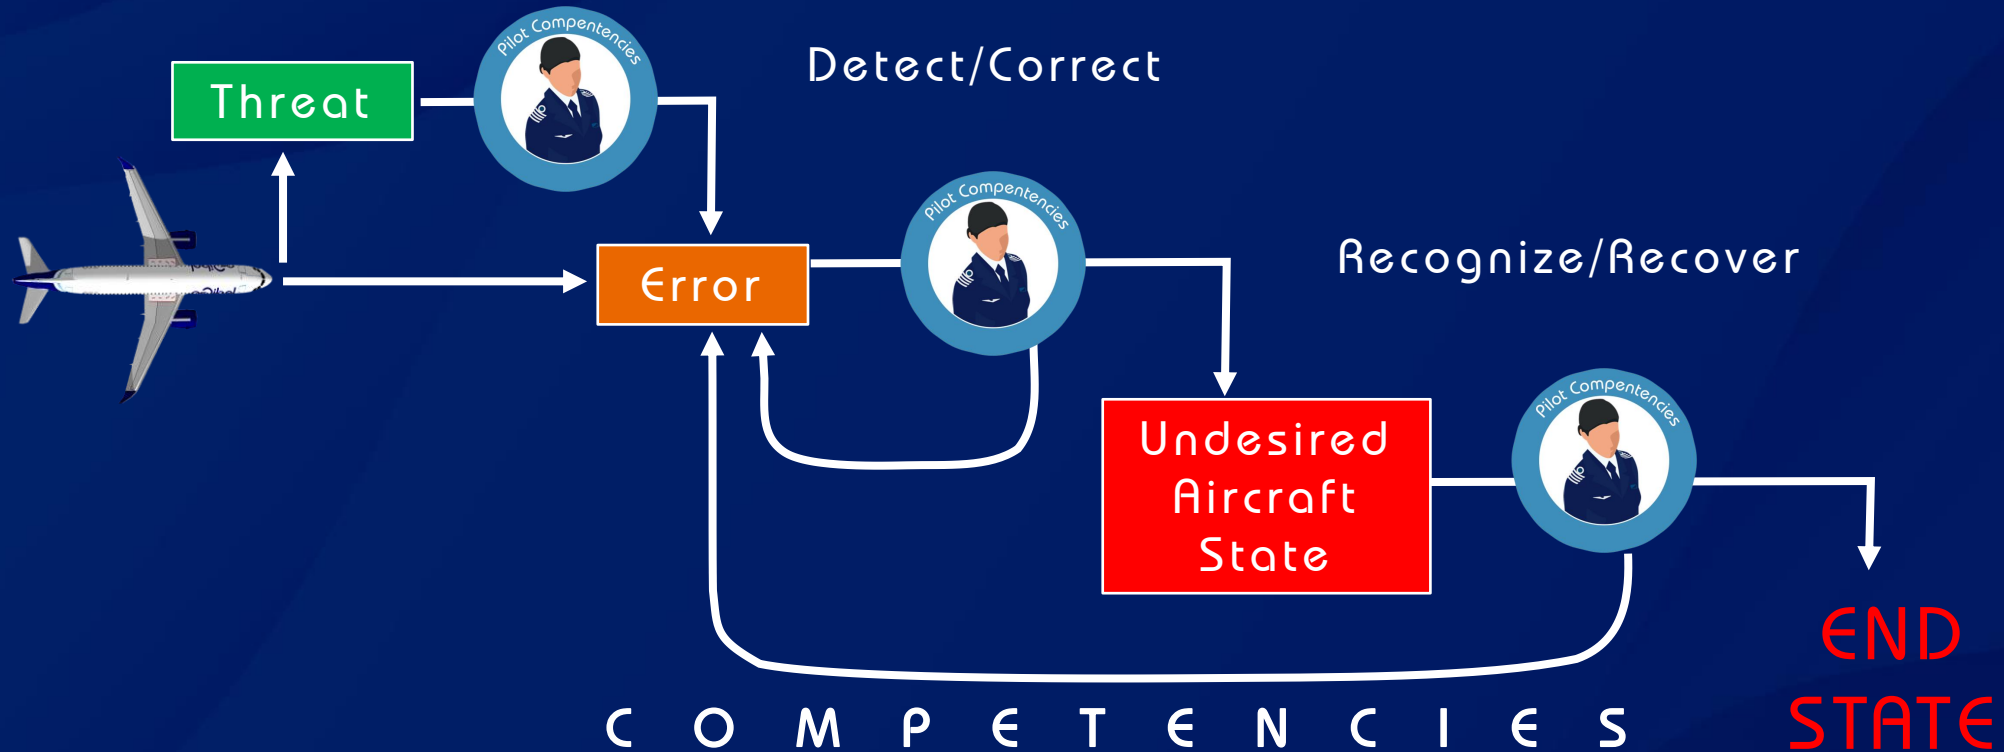

Voluntary Safety
reporting

Threat and Error Management Chain

Anticipate/Recognize and Mitigate

Application of Knowledge

Application of Procedures and Compliances with Regulation

Flight Path Management -Manual

Flight Path Management Automation

Leadership & Teamwork

Problem Solving and Decision Making

Situation Awareness and Management of Information

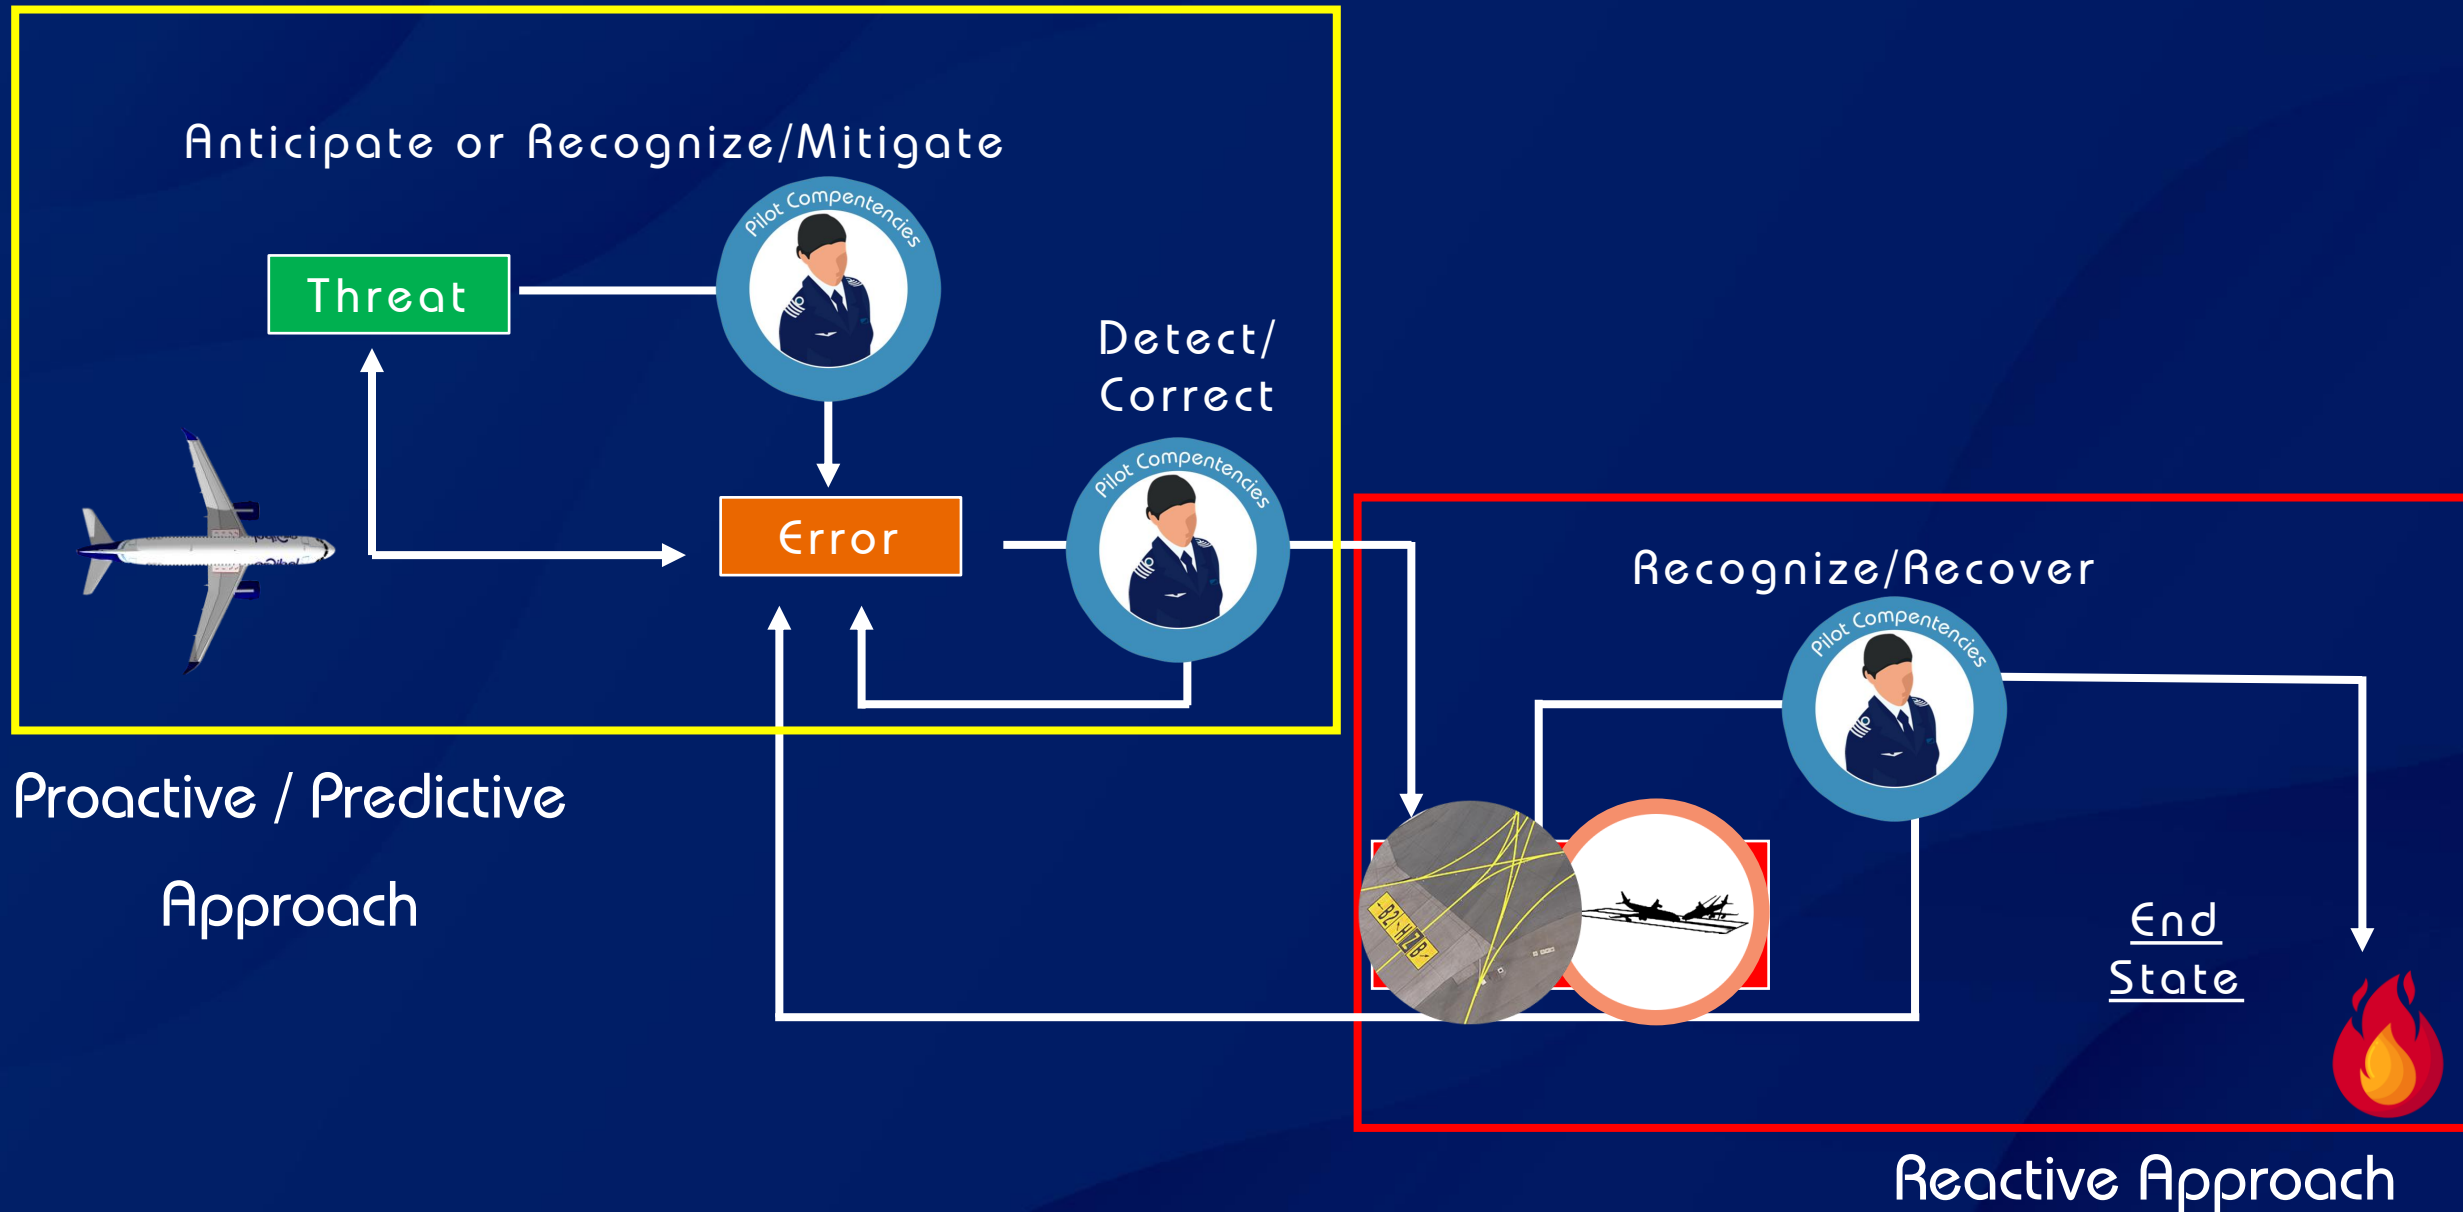

Workload Management

Communication

The Competencies are the individual and Team Counter Measures

Why do we need a LOSA Program

TEM Analysis of Runway and Taxiway Incursions

Threat

Error

Airport

- Multiple/Parallel Runways
- Faded Markings/Signage
- Confusing Markings/Taxiways

ATC

- Challenging Clearances
- Controller Error

Internal Threat

- Expectation BIAS
- Fatigue

Mismanaged Threats (Competencies)

Situational Awareness

- Checks for gross Errors
- Monitors the Environment

Workload Management

- Plans and prioritize task
- Manages Distractions

Communication

- Active listening
- Intervention

 Communication

Determining Predictive Precursors to Runway Safety – LOSA data (Taxiway Errors)

Error Prevalence during taxi – **66%** of flights had 3 or more Errors during Taxi

- Omitted 'clear left /right' call
- Fast taxi speed
- Nonessential duties performed
- Checklist Errors
- Wrong system settings

Predictive data driver:
Error Prevalence during Taxi

Workload Management

- Distraction Management
- Rushing
- Prioritizing tasks

Determining Predictive Precursors to Runway Safety – LOSA data (Understanding ATC Threat Management)

Of all Threats during Taxi were ATC related threats.

Workload Management

Communication

Predictive Data driver:
The Management of
ATC threats

Determining Predictive Precursors to Runway Safety – LOSA data (Understanding Crew Workload Management on Ground)

Top Threats
On Ground
(Prevalence)

-  ATC – 53%
-  Airport – 47%
-  Airline Ops Pressure – 52%

Positive Management

66%

Workload Management used the most

In Pre-Departure

 Airline Ops Pressure

Positive Management

76%

Workload Management used the most

Flight crew reliance on Workload management

Determining Predictive Precursors to Runway Safety – LOSA data (Understanding Crew Workload Management on Ground)

Top Threats
On
Ground

-  **ATC – 53%**
-  **Airport – 47%**
-  **Airline Ops Pressure – 52%**

Positive Management

66%

Workload Management used the most

In Pre-Departure

 **Airline Ops Pressure**

Positive Management

76%

Workload Management used the most

Are we putting the flights crew's operational resilience to the test?

Determining Predictive Precursors to Runway Safety – LOSA data (Understanding Crew Workload Management on Ground)

Top Threats
On
Ground

-  **ATC – 53%**
-  **Airport – 47%**
-  **Airline Ops Pressure – 52%**

Positive Management

66%

Workload Management used the most

In Pre-
Departure

 **Airline Ops Pressure**

Positive Management

76%

Workload Management used the most

Predictive Data driver: A measure of Airline OPS Pressure on Ground

Determining Predictive Precursors to Runway Safety – LOSA data (How are crew dealing with Airport threats?)

Of all Threats during Taxi were Airport related threats.

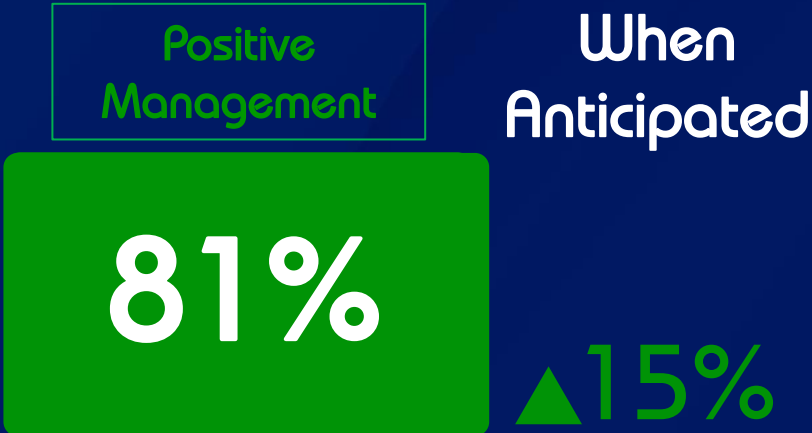

When Anticipated

Predictive Data driver: A measure of the 'Anticipation' of Airport threats.

Determining Predictive Precursors to Runway Safety – LOSA data (How are crew dealing with Airport threats?)

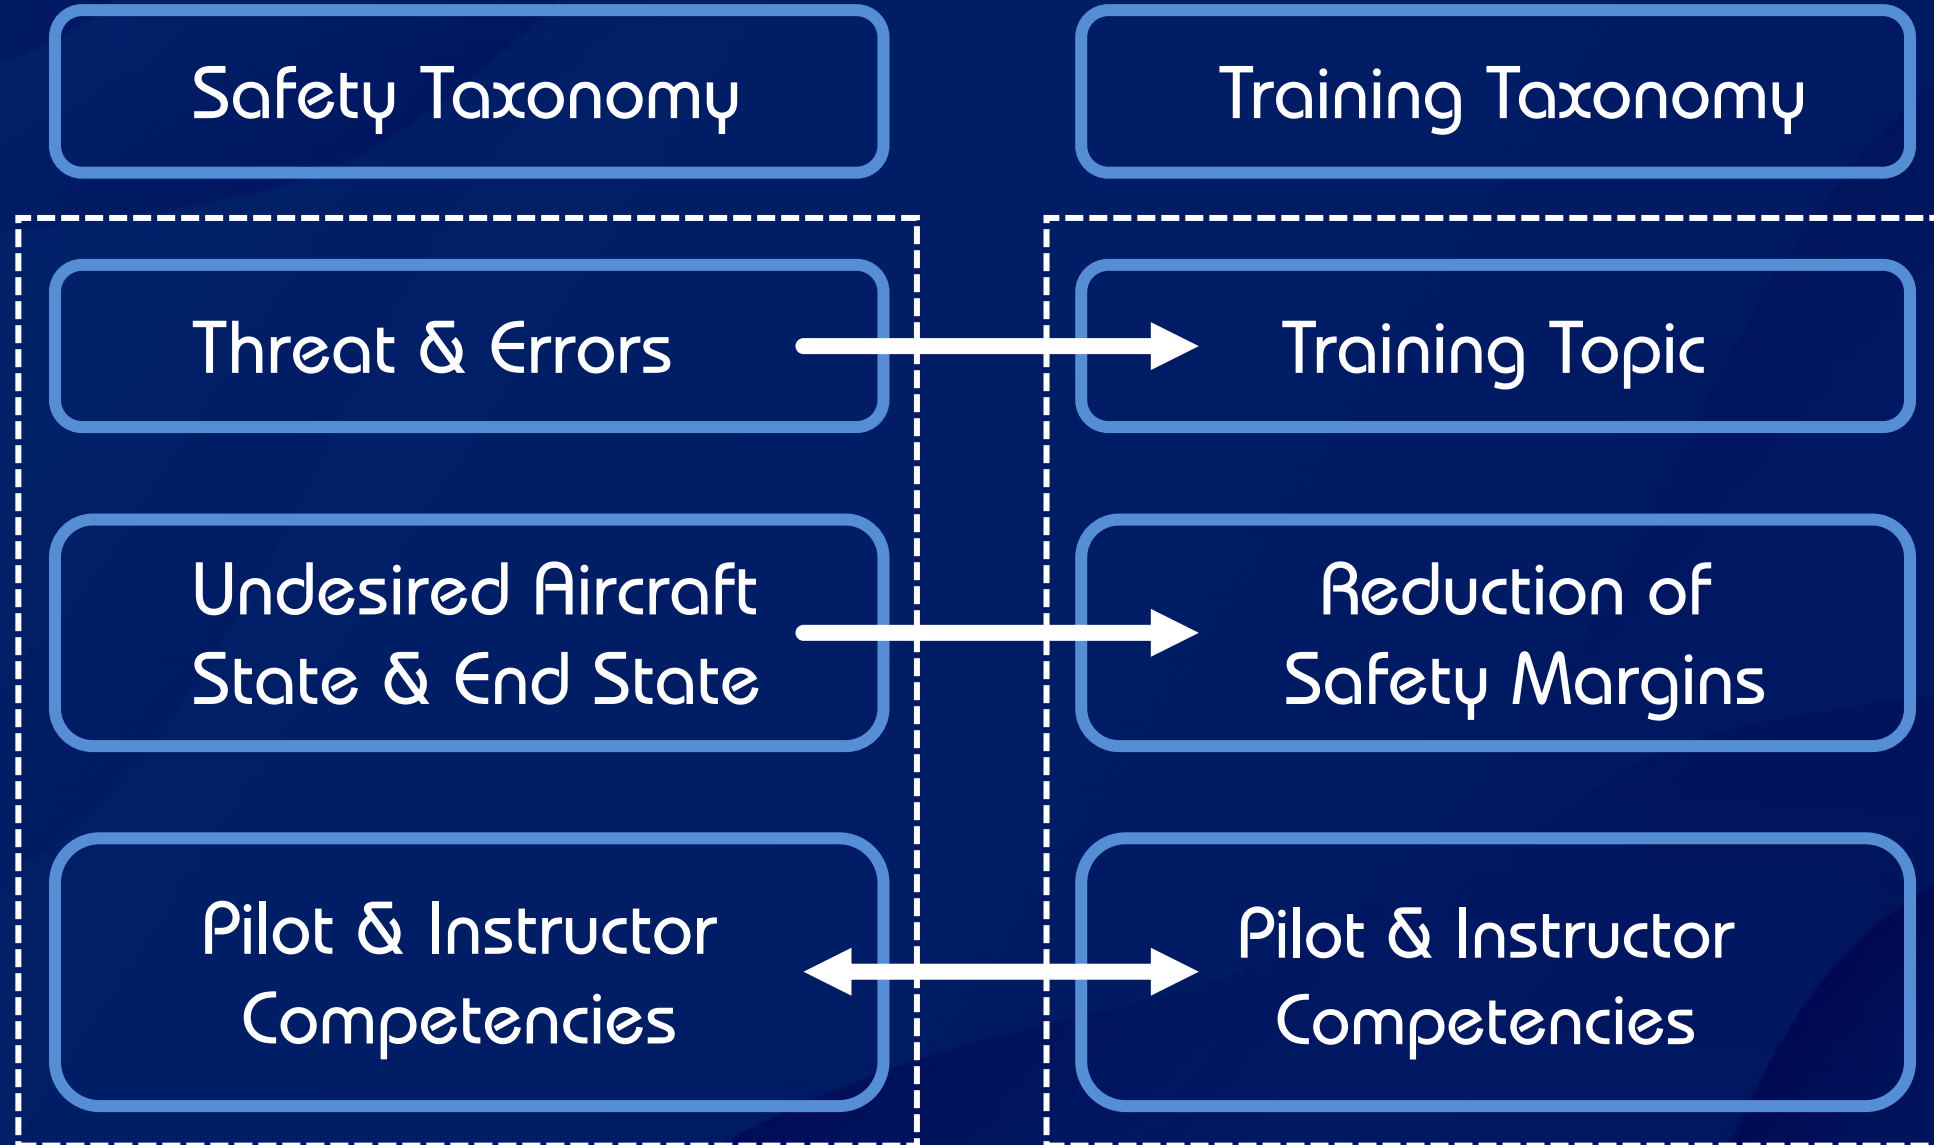

Of all Threats during Taxi were Airport related threats.

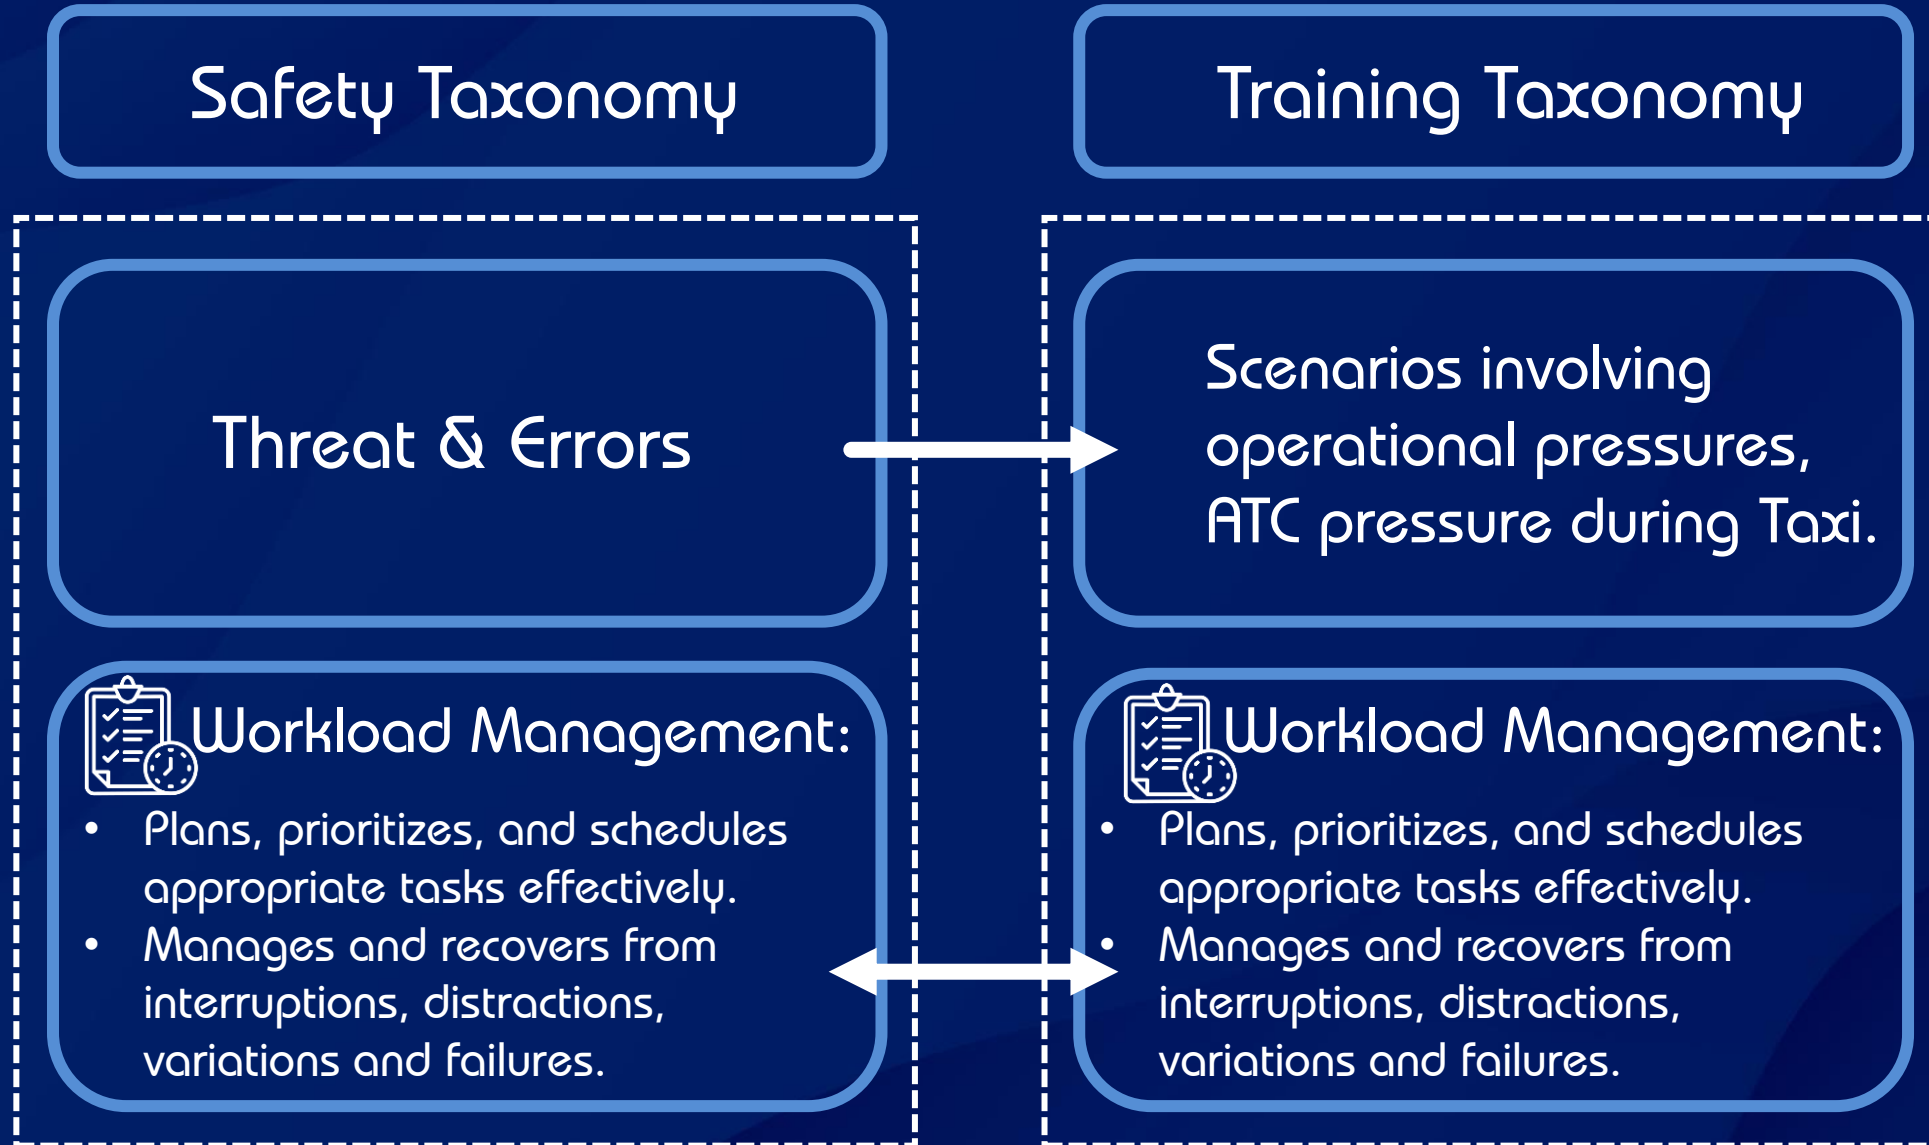

Predictive Data driver: A measure of the 'Anticipation' of Airport threats.

Alignment of Safety and Training Data Taxonomies

Alignment of Safety and Training Data Taxonomies

Conclusion

- Are we Data rich but information poor? – Invest in Learning from 'normal work'.

Conclusion

- Are we Data rich but information poor? – Invest in Learning from 'normal work'.
- Make the effort to align safety and taxonomies – TEM + CBTA is an easy solution!

Conclusion

- Are we Data rich but information poor? – Invest in Learning from 'normal work'.
- Make the effort to align safety and taxonomies – TEM + CBTA is an easy solution!
- Use Predictive Data as 'Strength of Knowledge'.

Conclusion

- Are we Data rich but information poor? – Invest in Learning from 'normal work'.
- Make the effort to align safety and taxonomies – TEM + CBTA is an easy solution!
- Use Predictive Data as 'Strength of Knowledge'.
- Risk assess Proactive and Predictive data. Risk management must evolve from a reactive to a proactive data-driven approach – Use Proactive/Predictive data in Risk Assessment.

Conclusion

- Are we Data rich but information poor? – Invest in Learning from 'normal work'.
- Make the effort to align safety and taxonomies – TEM + CBTA is an easy solution!
- Use Predictive Data as 'Strength of Knowledge'.
- Risk assess Proactive and Predictive data. Risk management must evolve from a reactive to a proactive data-driven approach – Use Proactive/Predictive data in Risk Assessment.
- Enhance industry collaboration
