A man wearing a baseball cap and a grey t-shirt is sitting at a round wooden conference table in a meeting room. He is looking towards a large screen in the background. The screen displays the text "Commercial break in progress." The room has a modern, professional feel with recessed ceiling lights and a large window in the background.

A robust safety culture cannot develop without meaningful leadership support and commitment to a Safety Improvement Agenda.

Leadership plays a crucial role in shaping safety culture by influencing behaviour and establishing a unified purpose and direction.

Skilled, empowered, and motivated individuals form the core of every organization or association.

History has shown that organizations and associations have the power to influence safety outcomes, with both positive and negative impacts
