# Lufthansa Innovation Hub

June 19th 2018

# Overview

→ GmbH since January 2015

→ Team:

End of 2014: 8 employees

Today: 21 employees

→ Mix of externals and internals:

Combination of entrepreneurial know-how with years of Lufthansa experience and airline expertise

What's happening in travel & mobility tech And why is it relevant to Lufthansa?

# Technological progress is changing daily life

2005 | \$99

Conclave Pope Benedict XVI.

2013 | \$99

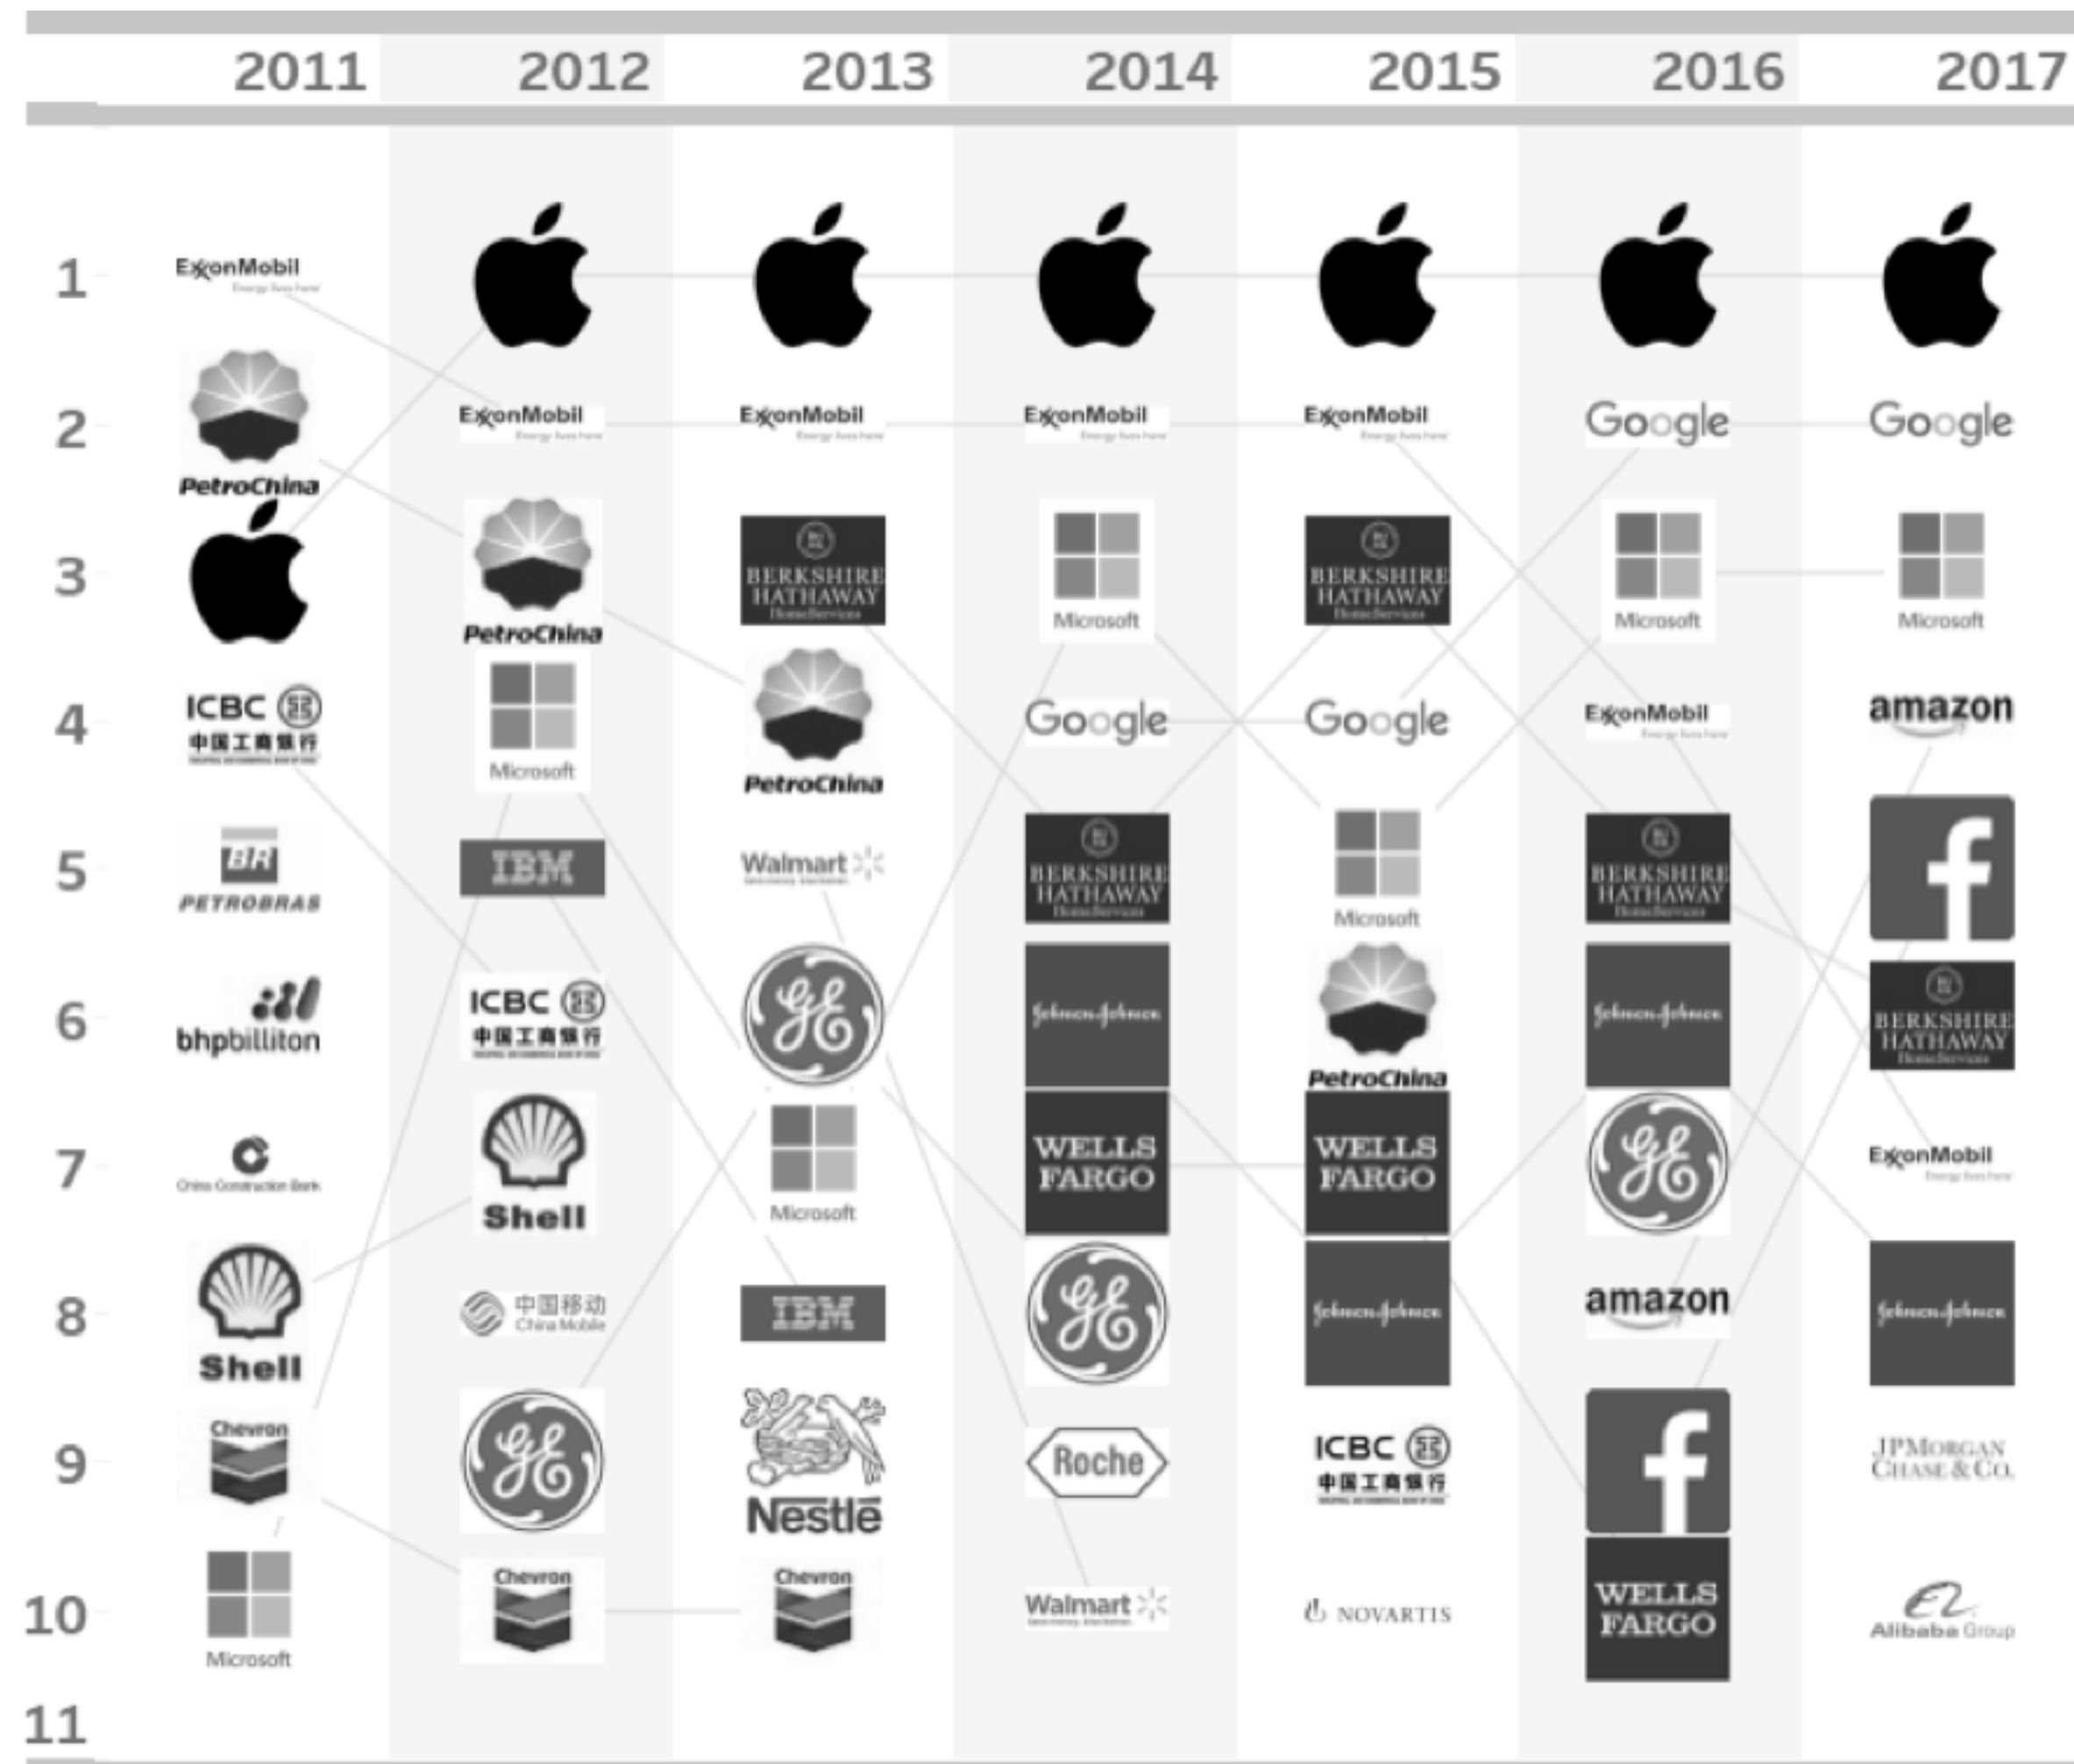

Conclave Pope Francis

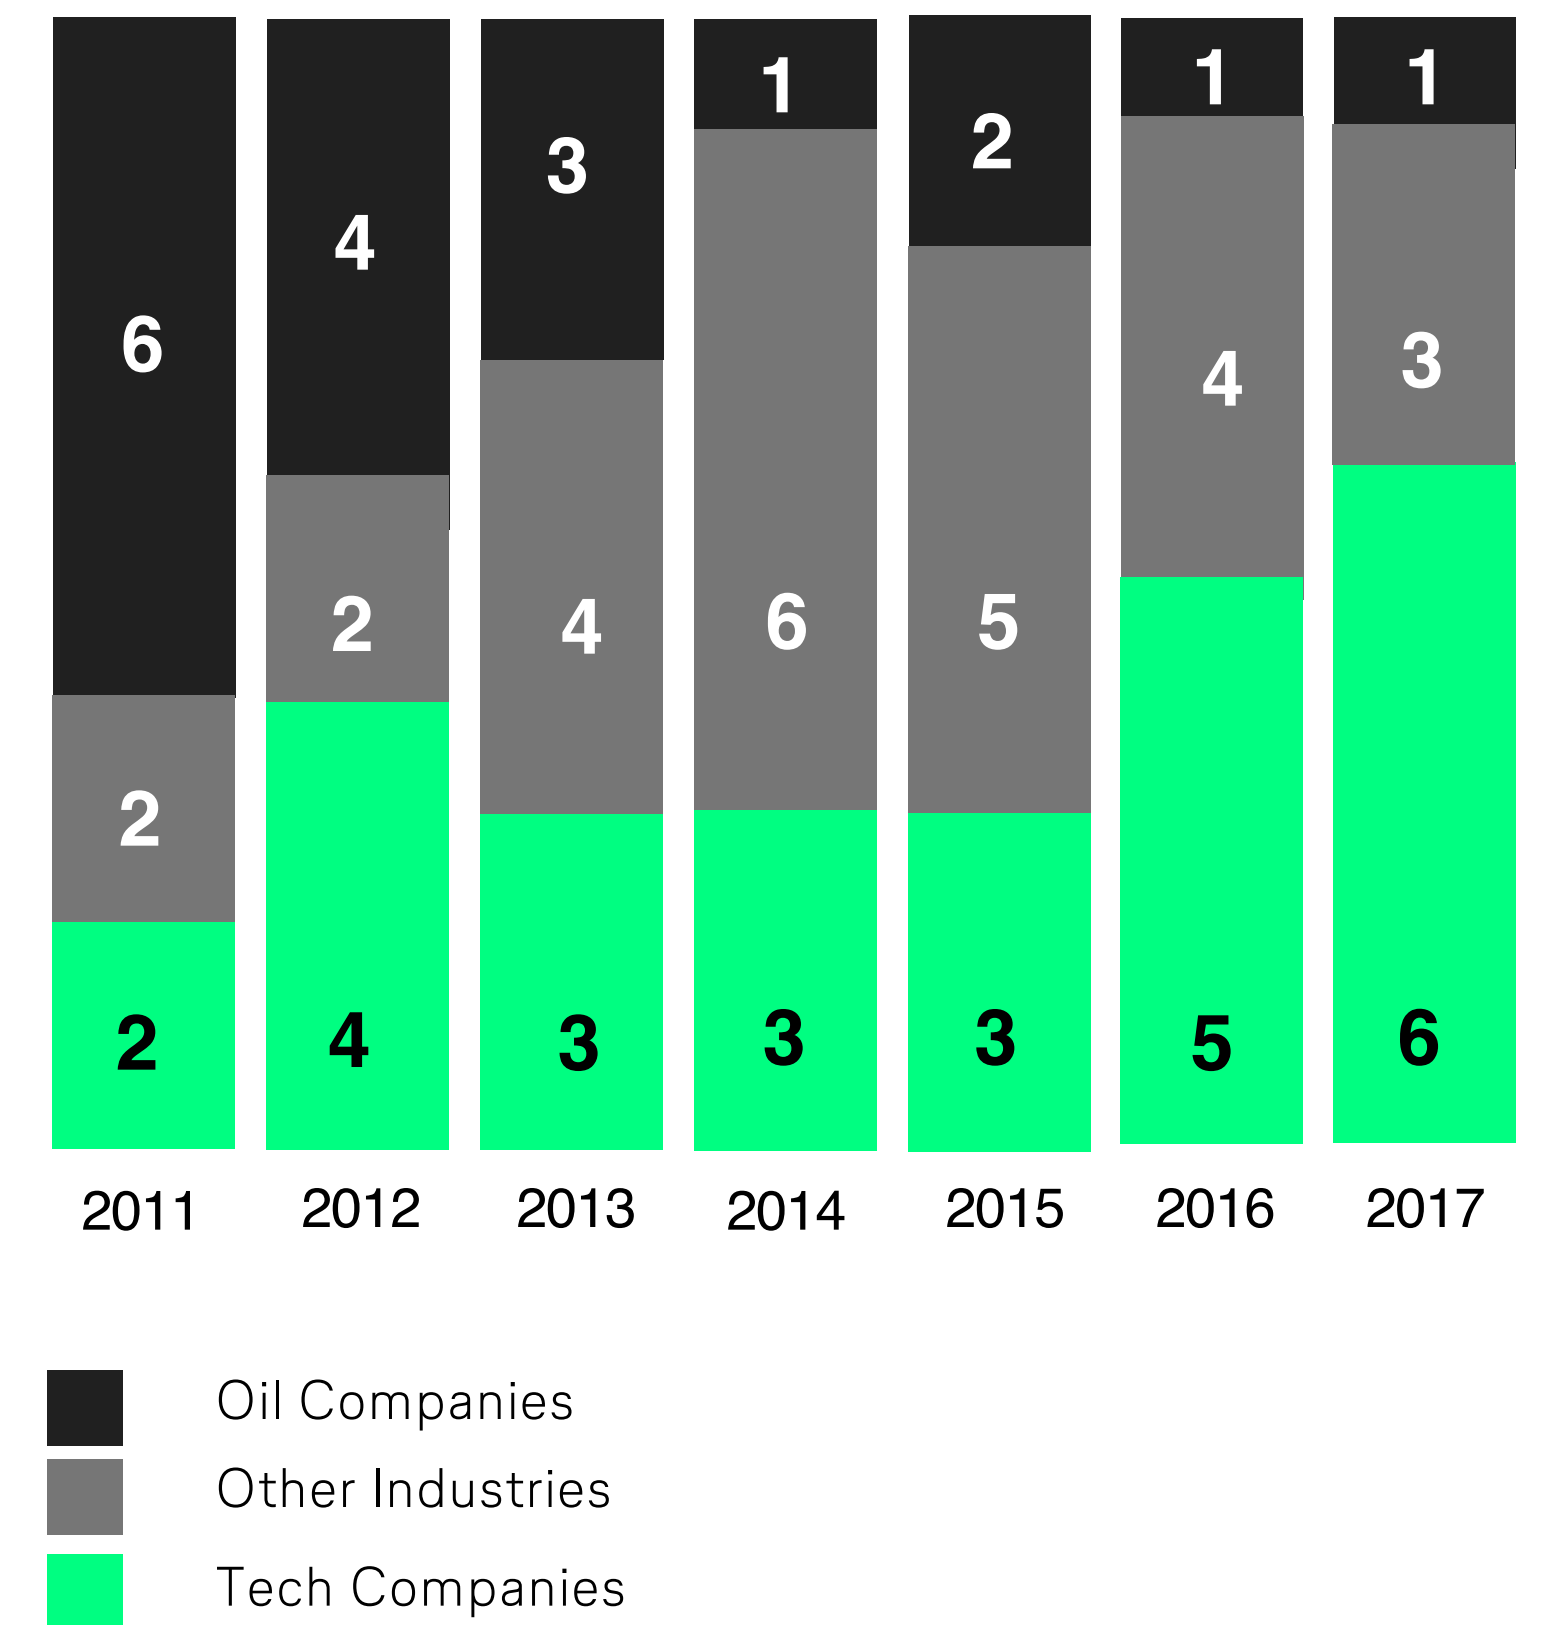

# Today's economy is tech-dominated!

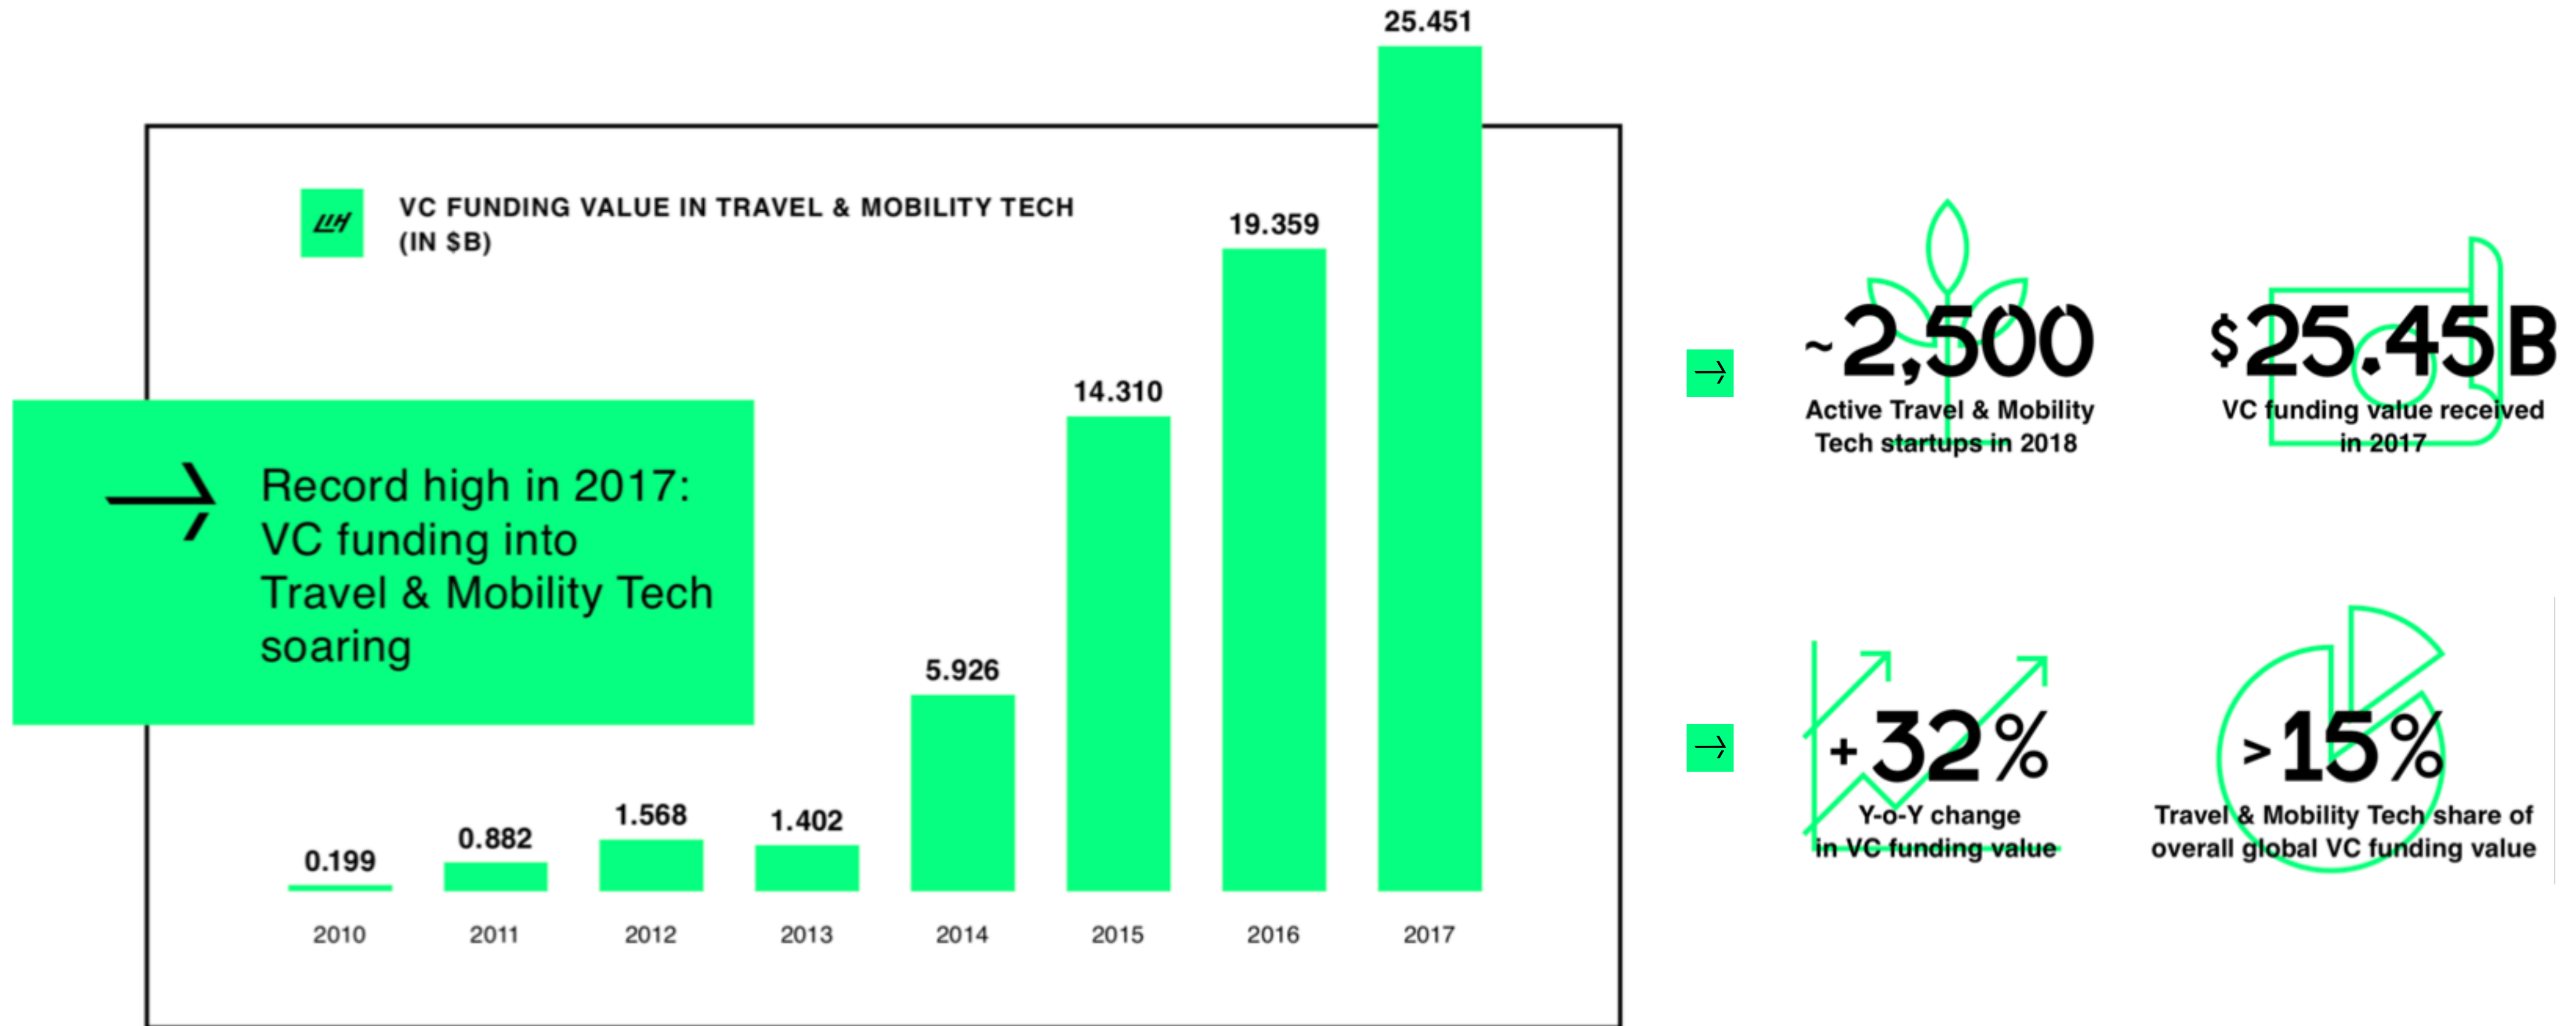

→ 2011-2017: Largest Companies by Market Cap

→ Top-10 largest companies by market cap grouped by industry affiliation

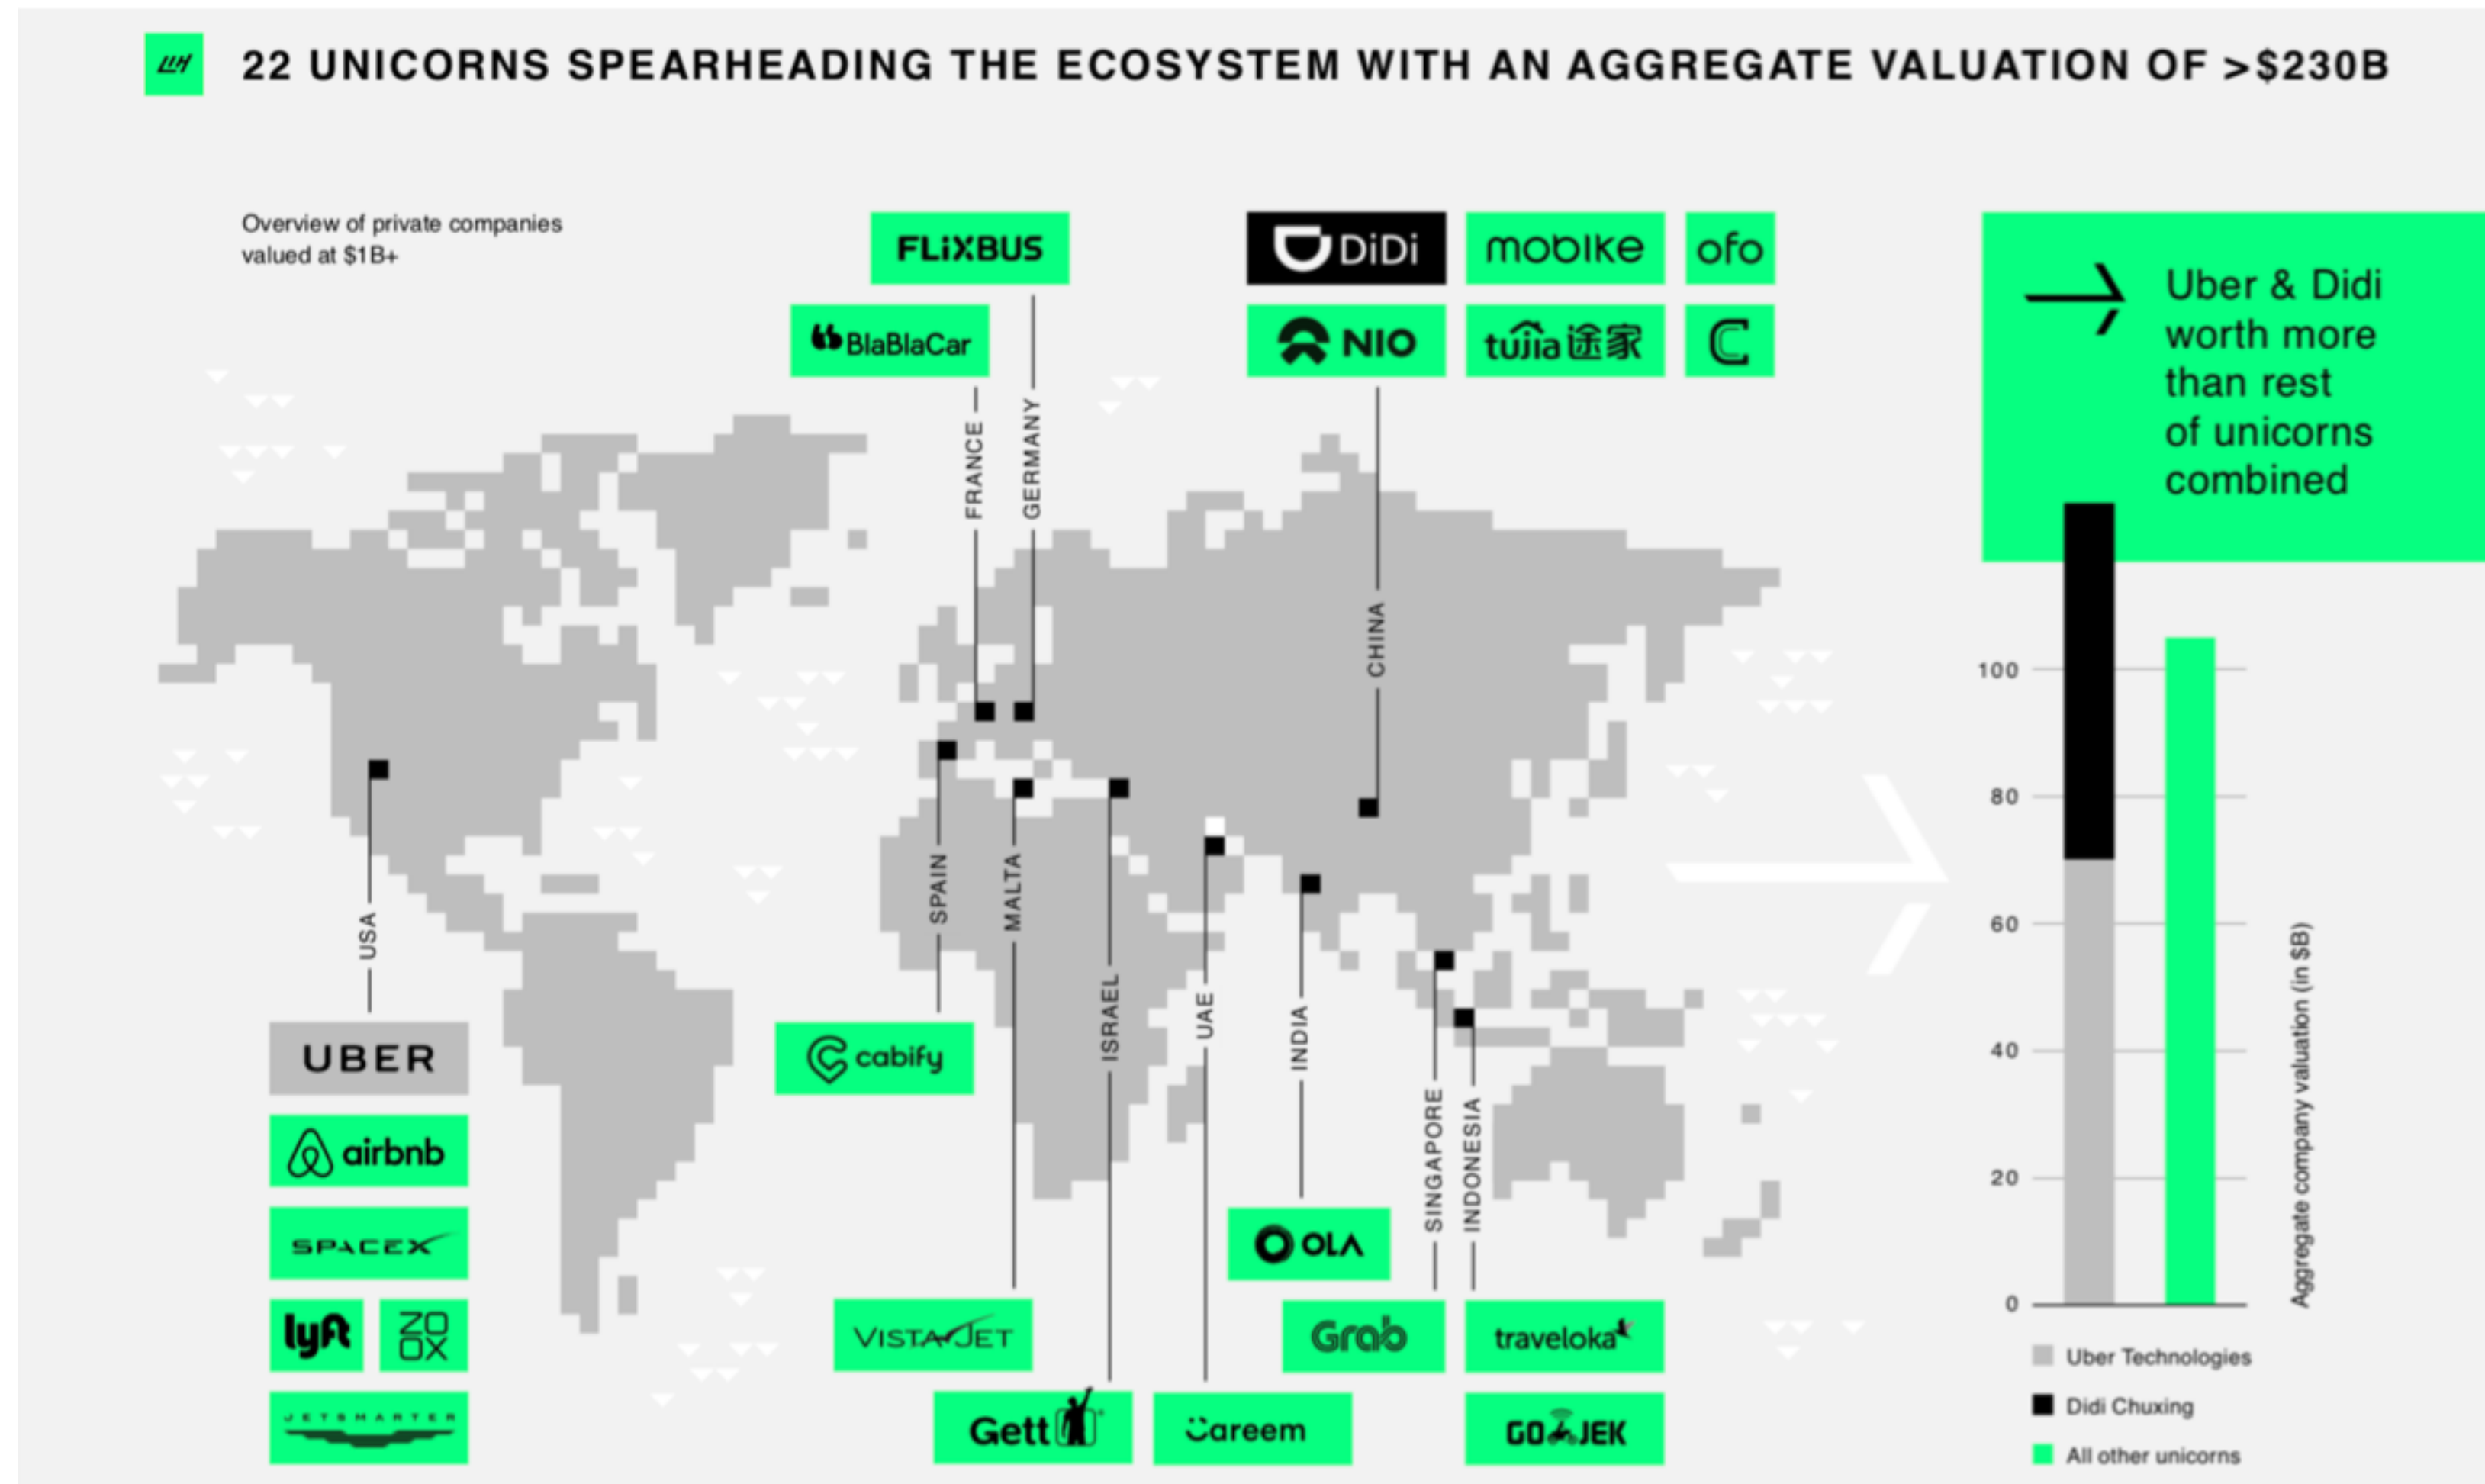

# The speed of innovation within Travel & Mobility Tech is skyrocketing

Note: 8-Year graph based on available data on disclosed funding rounds  
 Source: LIH analysis in cooperation with Pitchbook (as of Feb 15, 2018)

# Forming a few of today's most valuable private companies in the world

Source: LIH analysis in cooperation with Pitchbook (as of Feb 15, 2018)

WHAT'S THE ROLE OF THE LIH IN  
THIS CONTEXT?

# Our Mission

Our mission is to quickly explore **new digital opportunities** for Lufthansa Group and convert them into businesses.

# Strategic fields of action

## **Build**

Develop and build our own digital products & services.

## **Partner**

Foster selected partnerships between digital players and Lufthansa Group.

## **Invest**

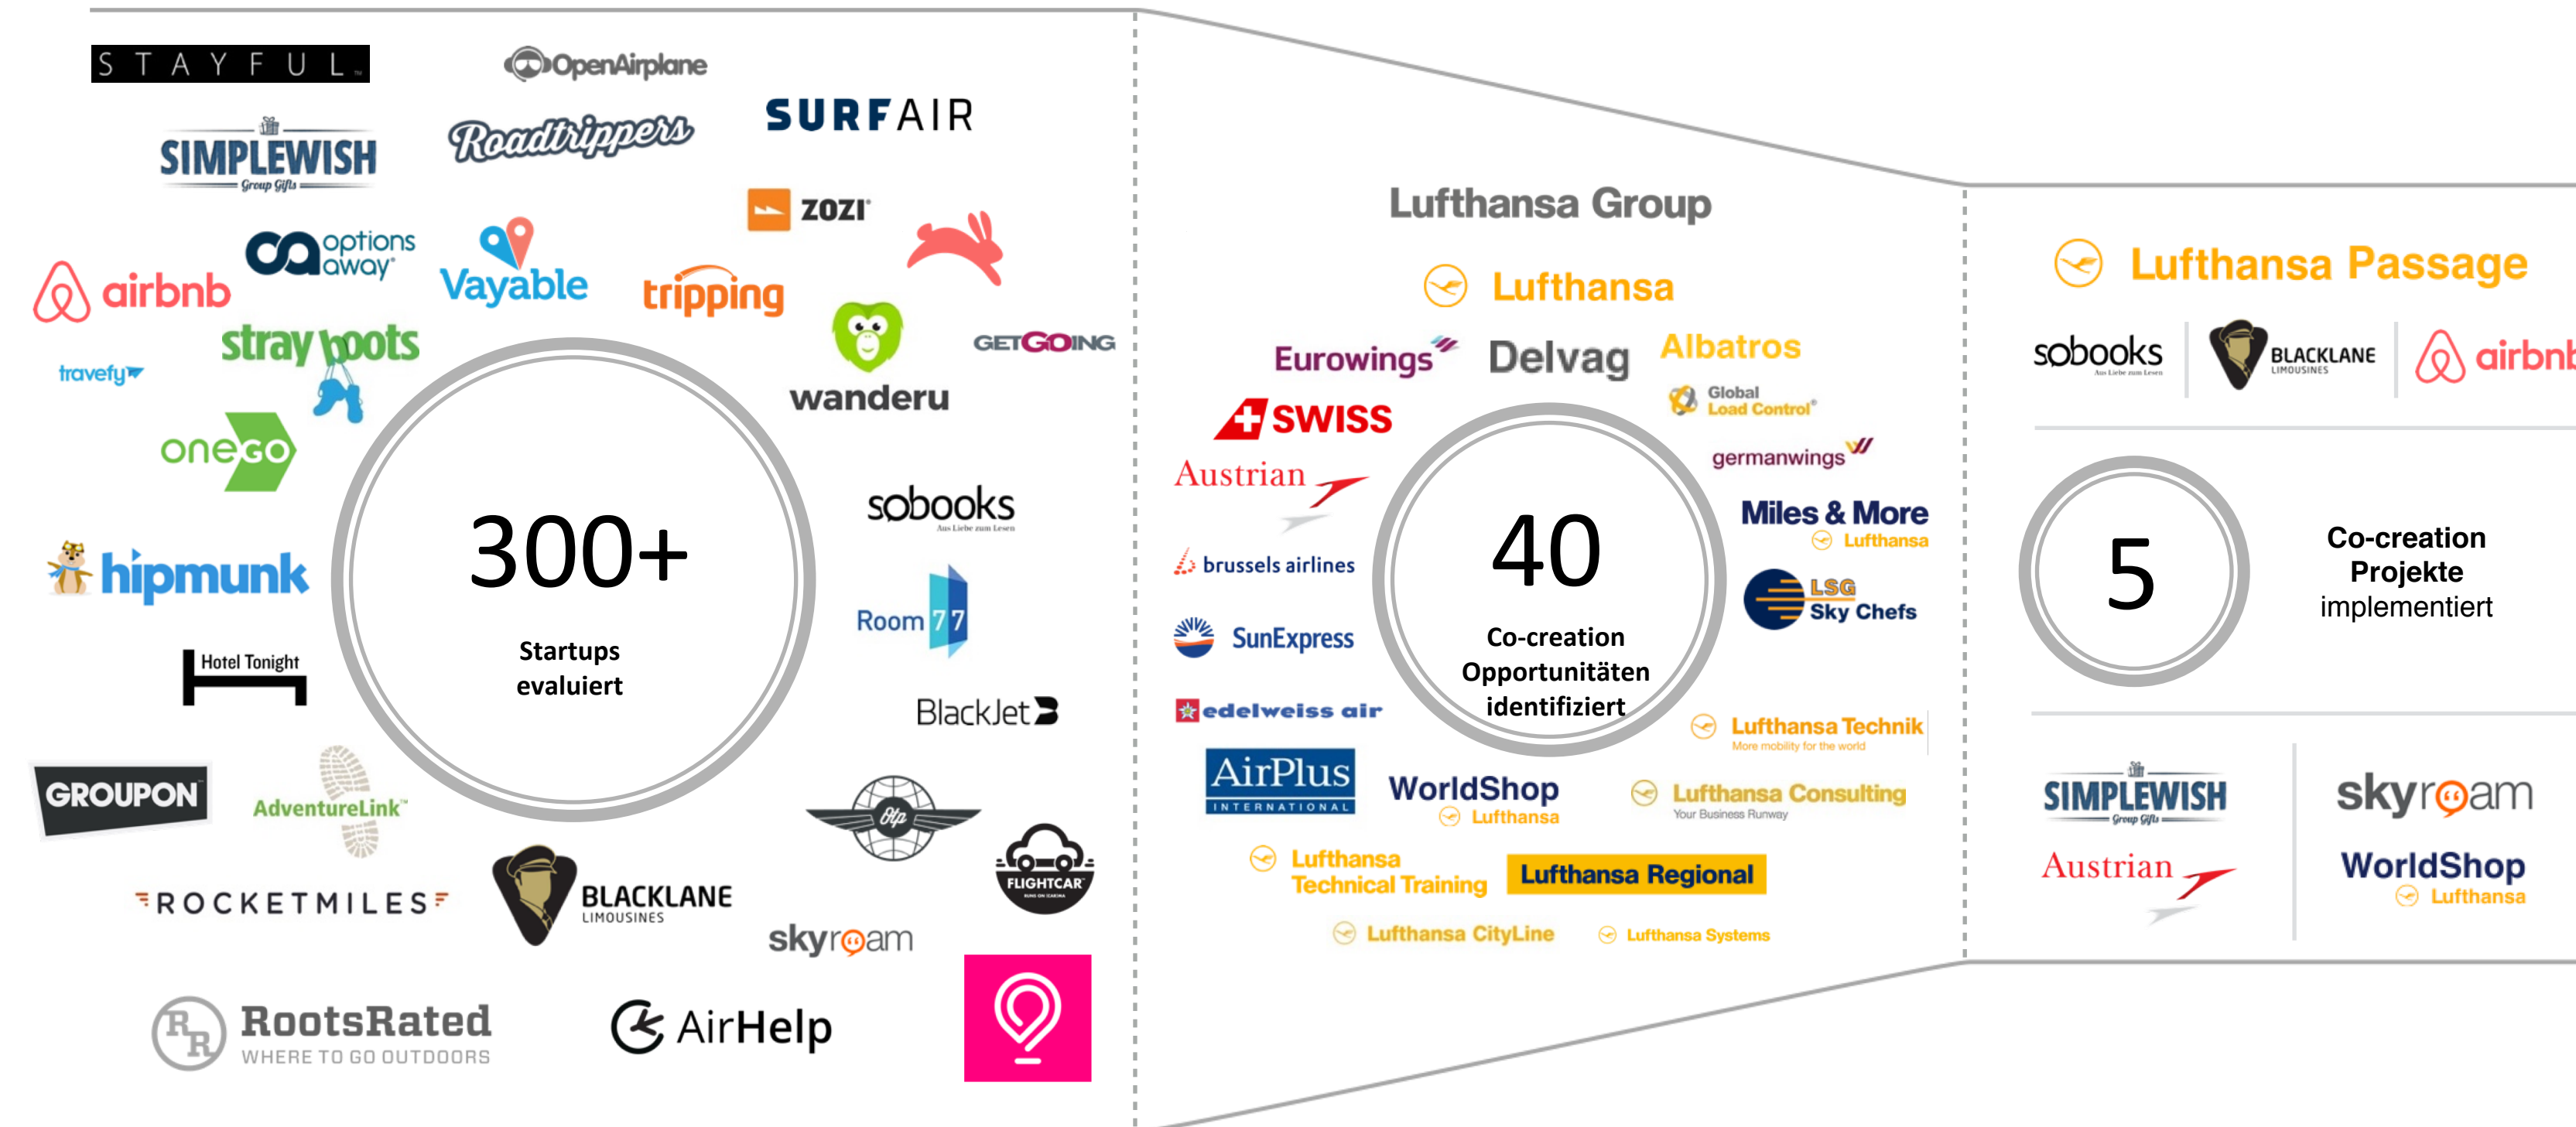

Educate and support Lufthansa Group at strategic venture capital investments in startups.

# Partner: LH initiates collaborations with Travel & Mobility Tech startups

→ Strong focus in 2014/2015

# Build: LH validates business model innovations

→ Strong focus since 2015

**We entirely focus on customer needs.**  
(starting point = painpoints of the traveler)

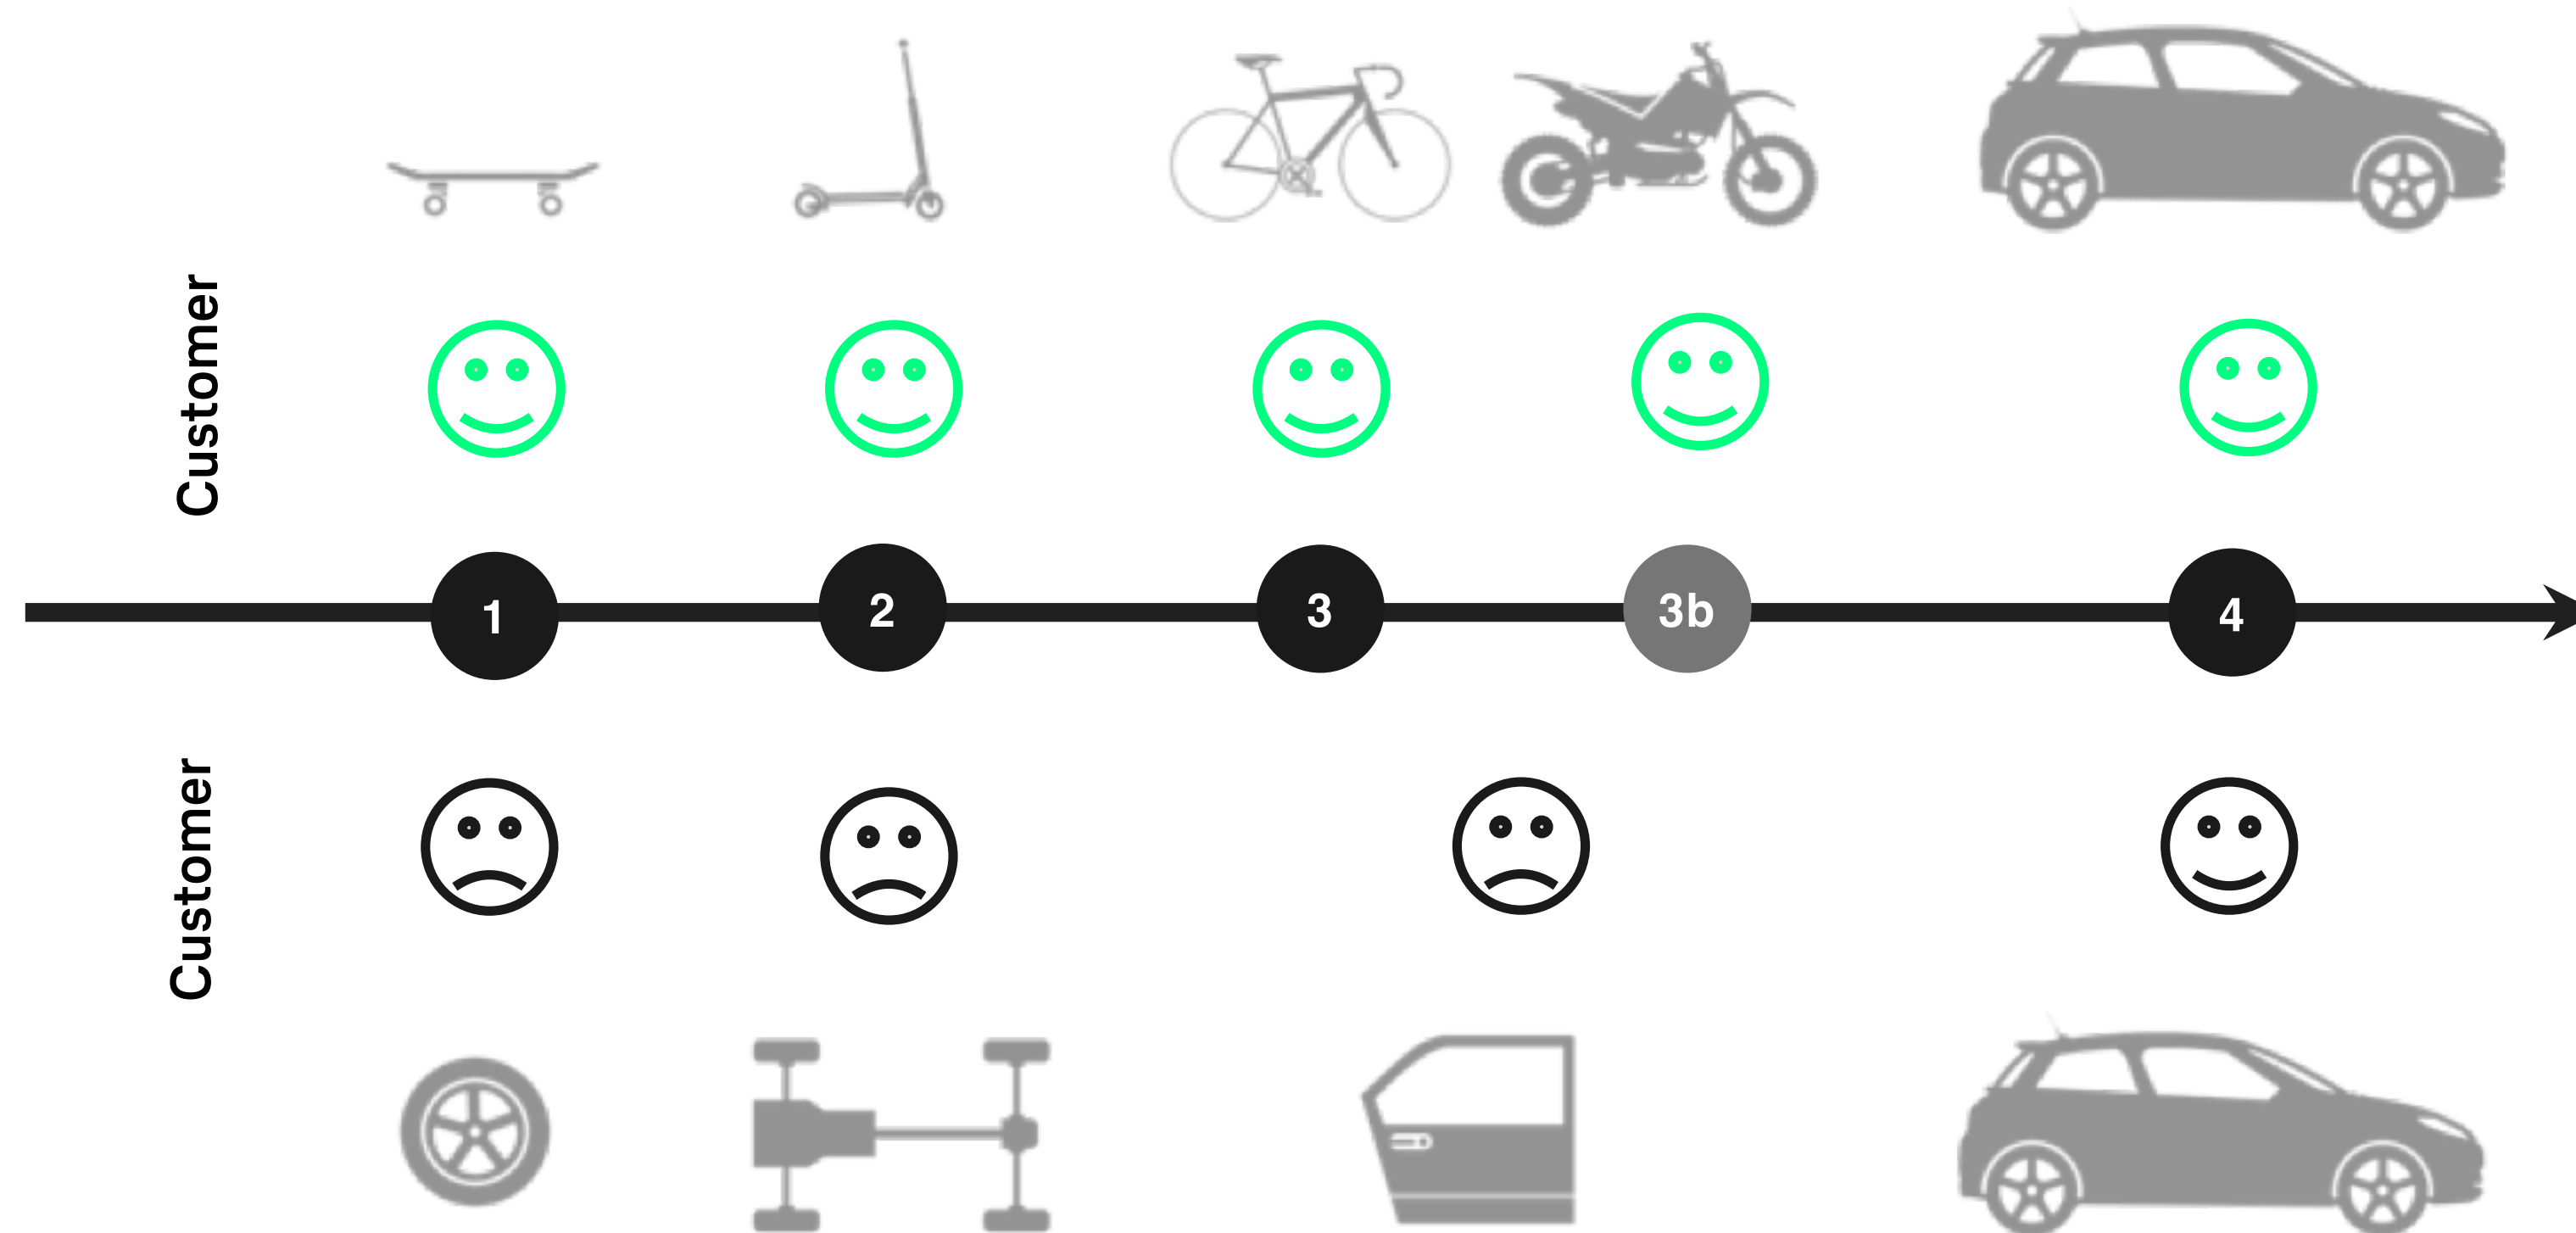

**We quickly act using prototypes**  
(Fail fast)

**We use validated data to improve products**  
(Data beats opinion)

- Value hypothesis
- Growth hypothesis

# Every product starts as a “Minimum Viable Product”

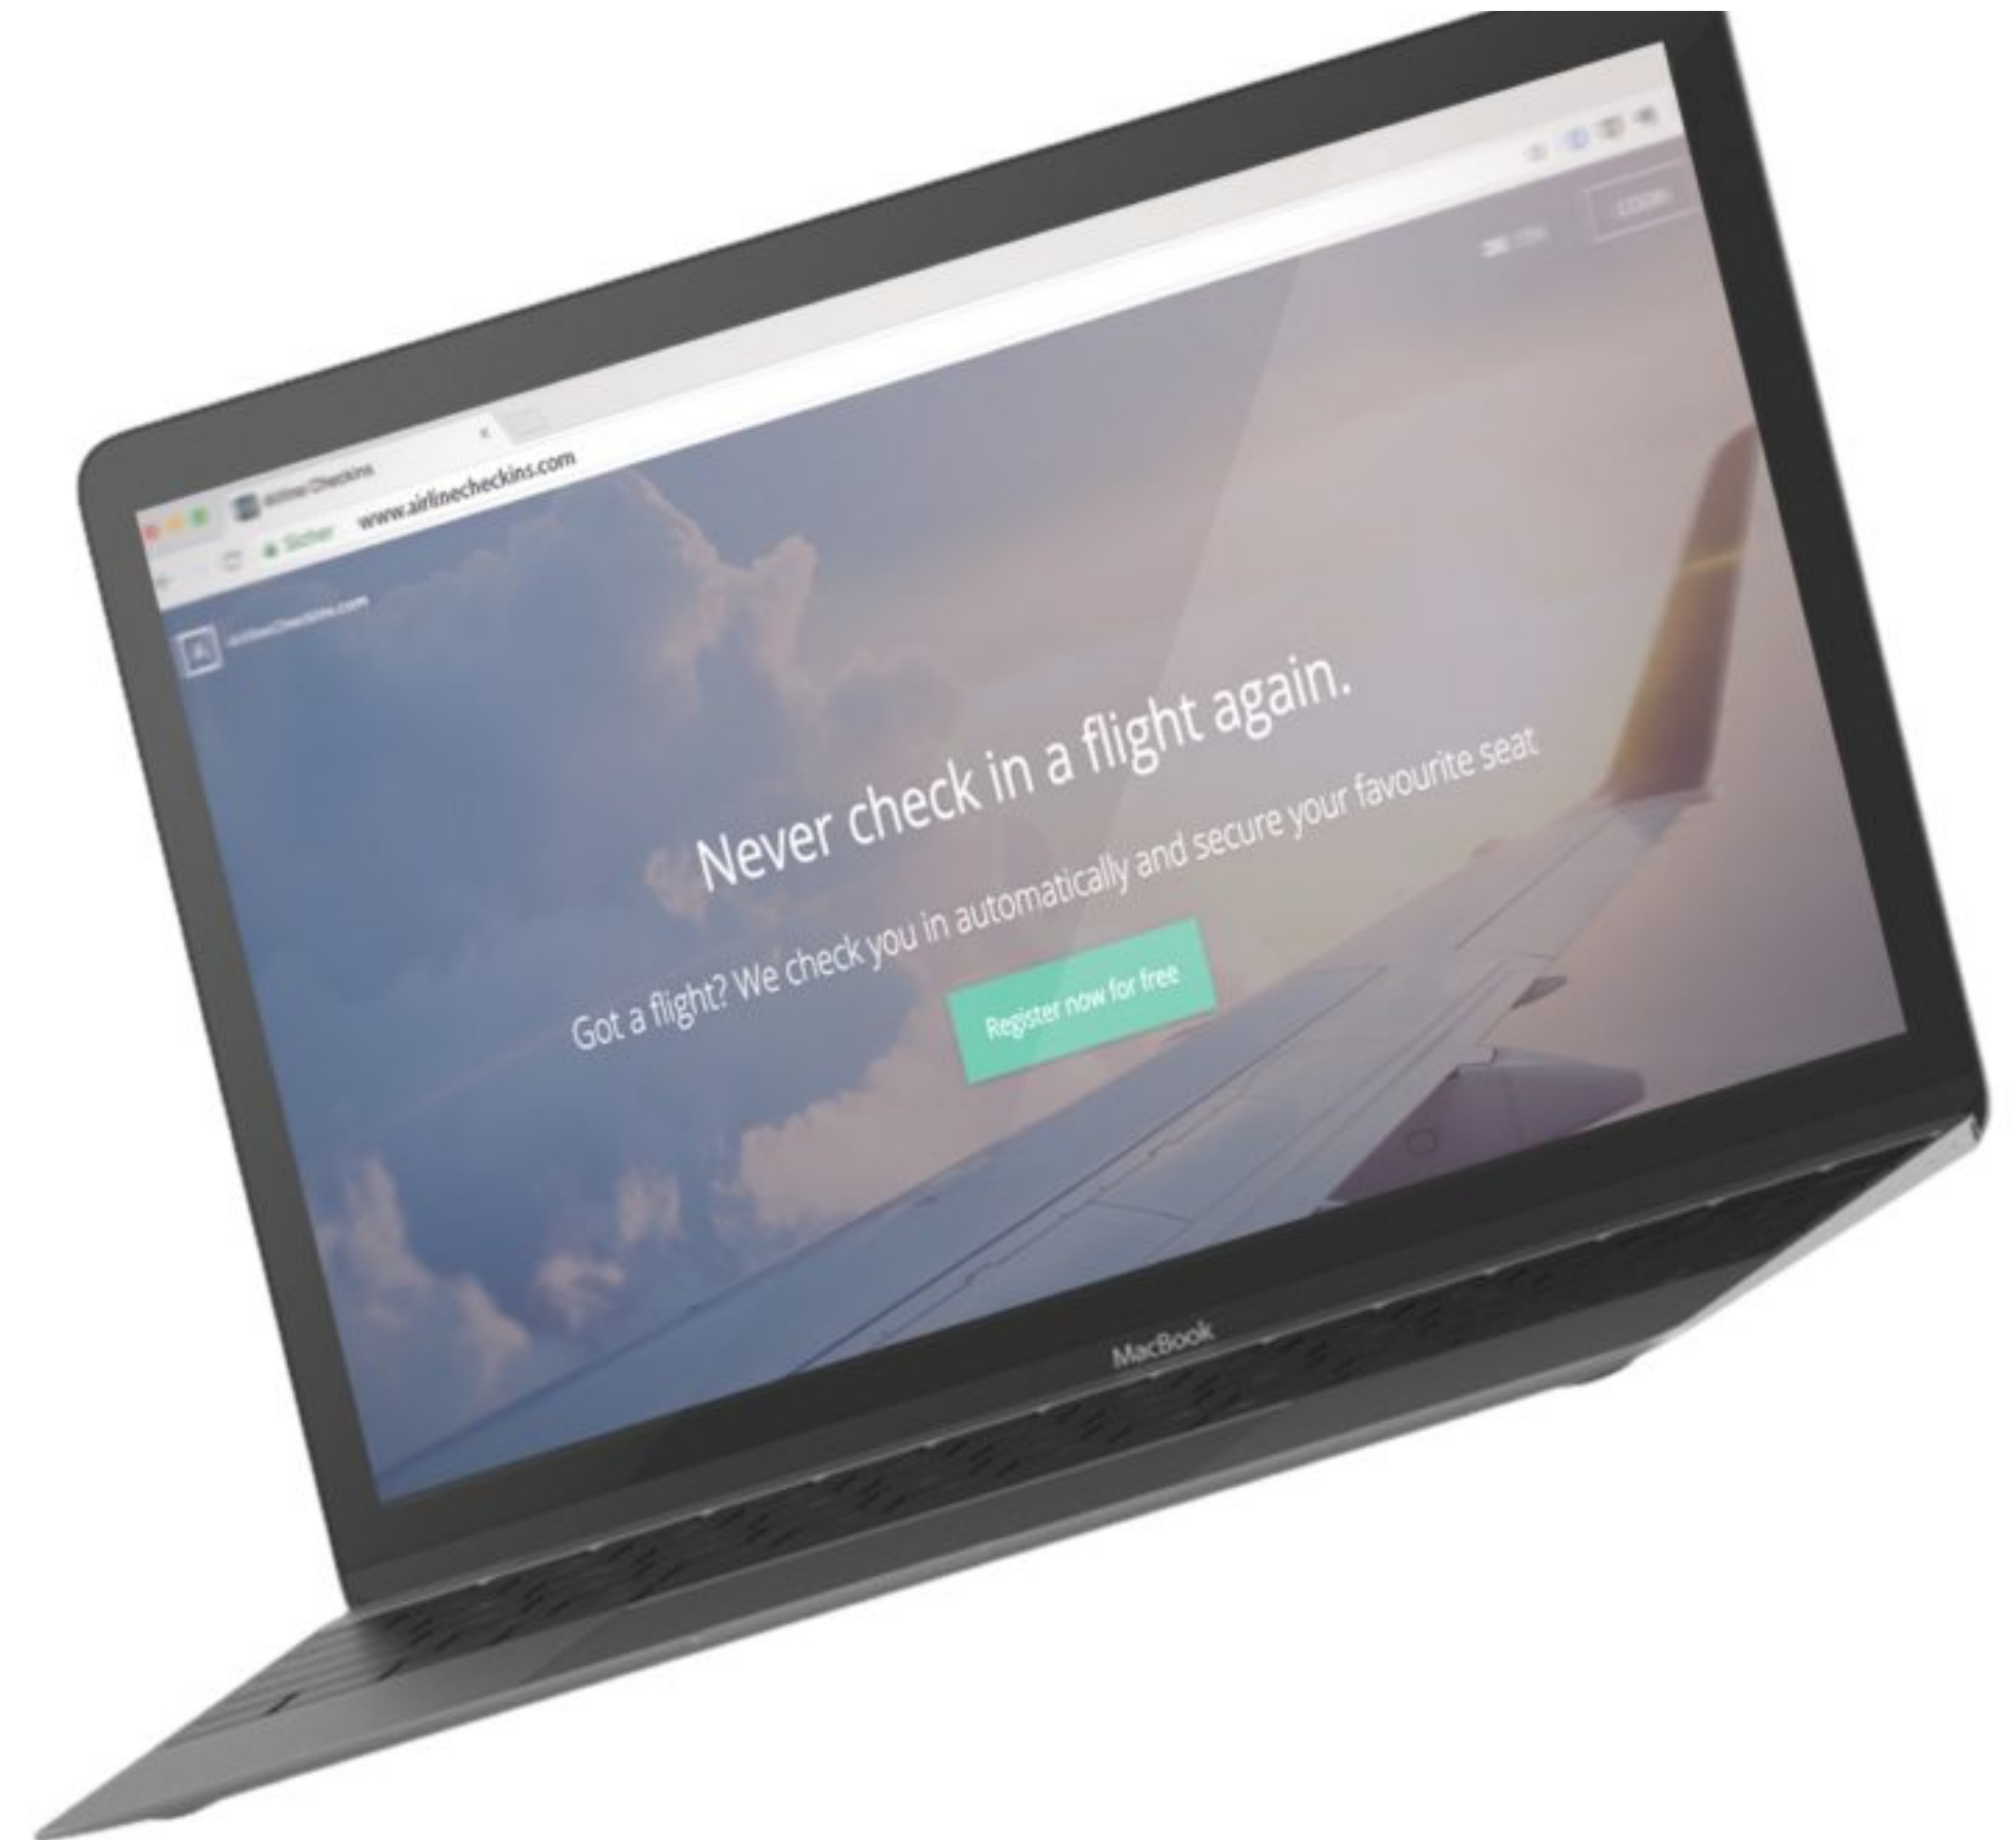

# PRODUCT EXAMPLES

# AirlineCheckins.com

Automatic check-in assistant for more than 200 airlines worldwide

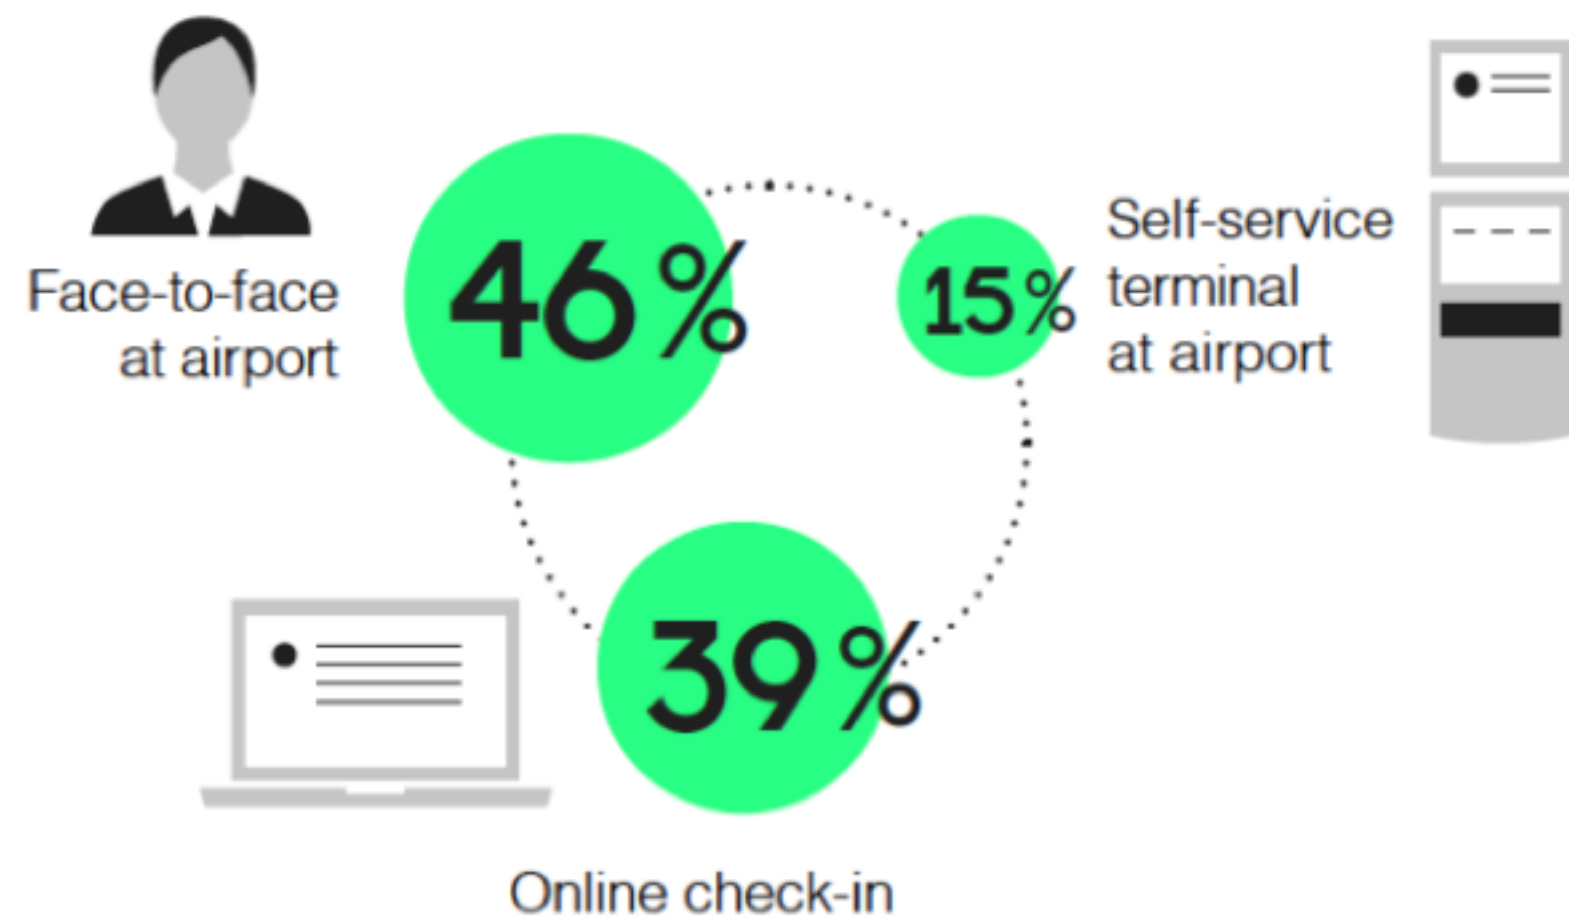

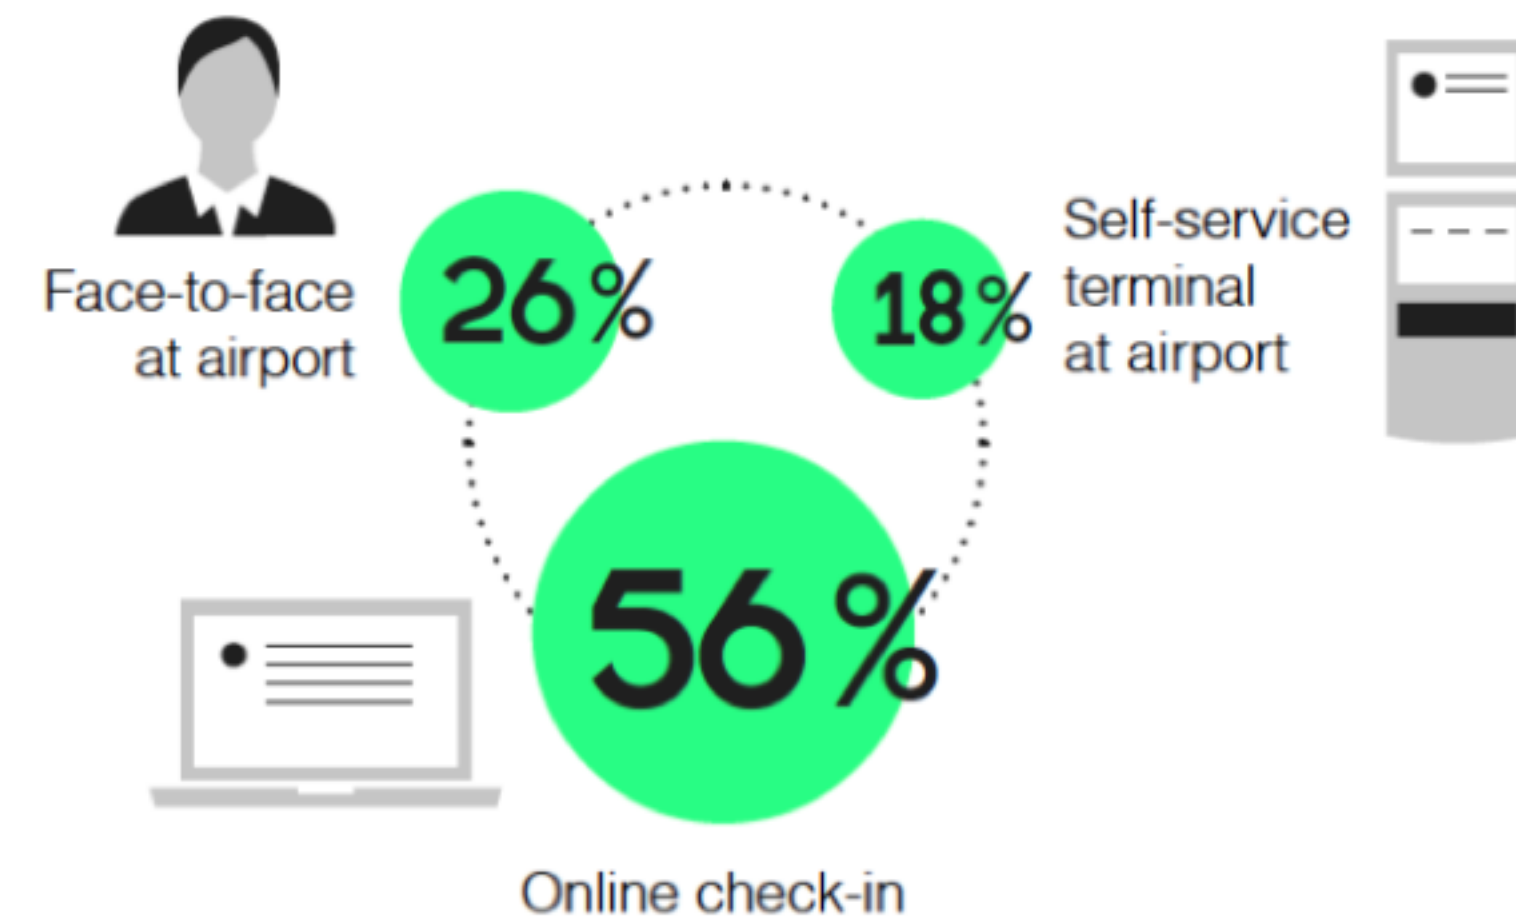

# The current state of airline online check-in

## HOW PASSENGERS CHECK-IN TODAY

## HOW PASSENGERS ARE EXPECTED TO CHECK-IN IN 2020

**ONLINE TO BECOME THE MOST DOMINANT CHECK-IN CHANNEL WITHIN NEXT 2 YEARS**

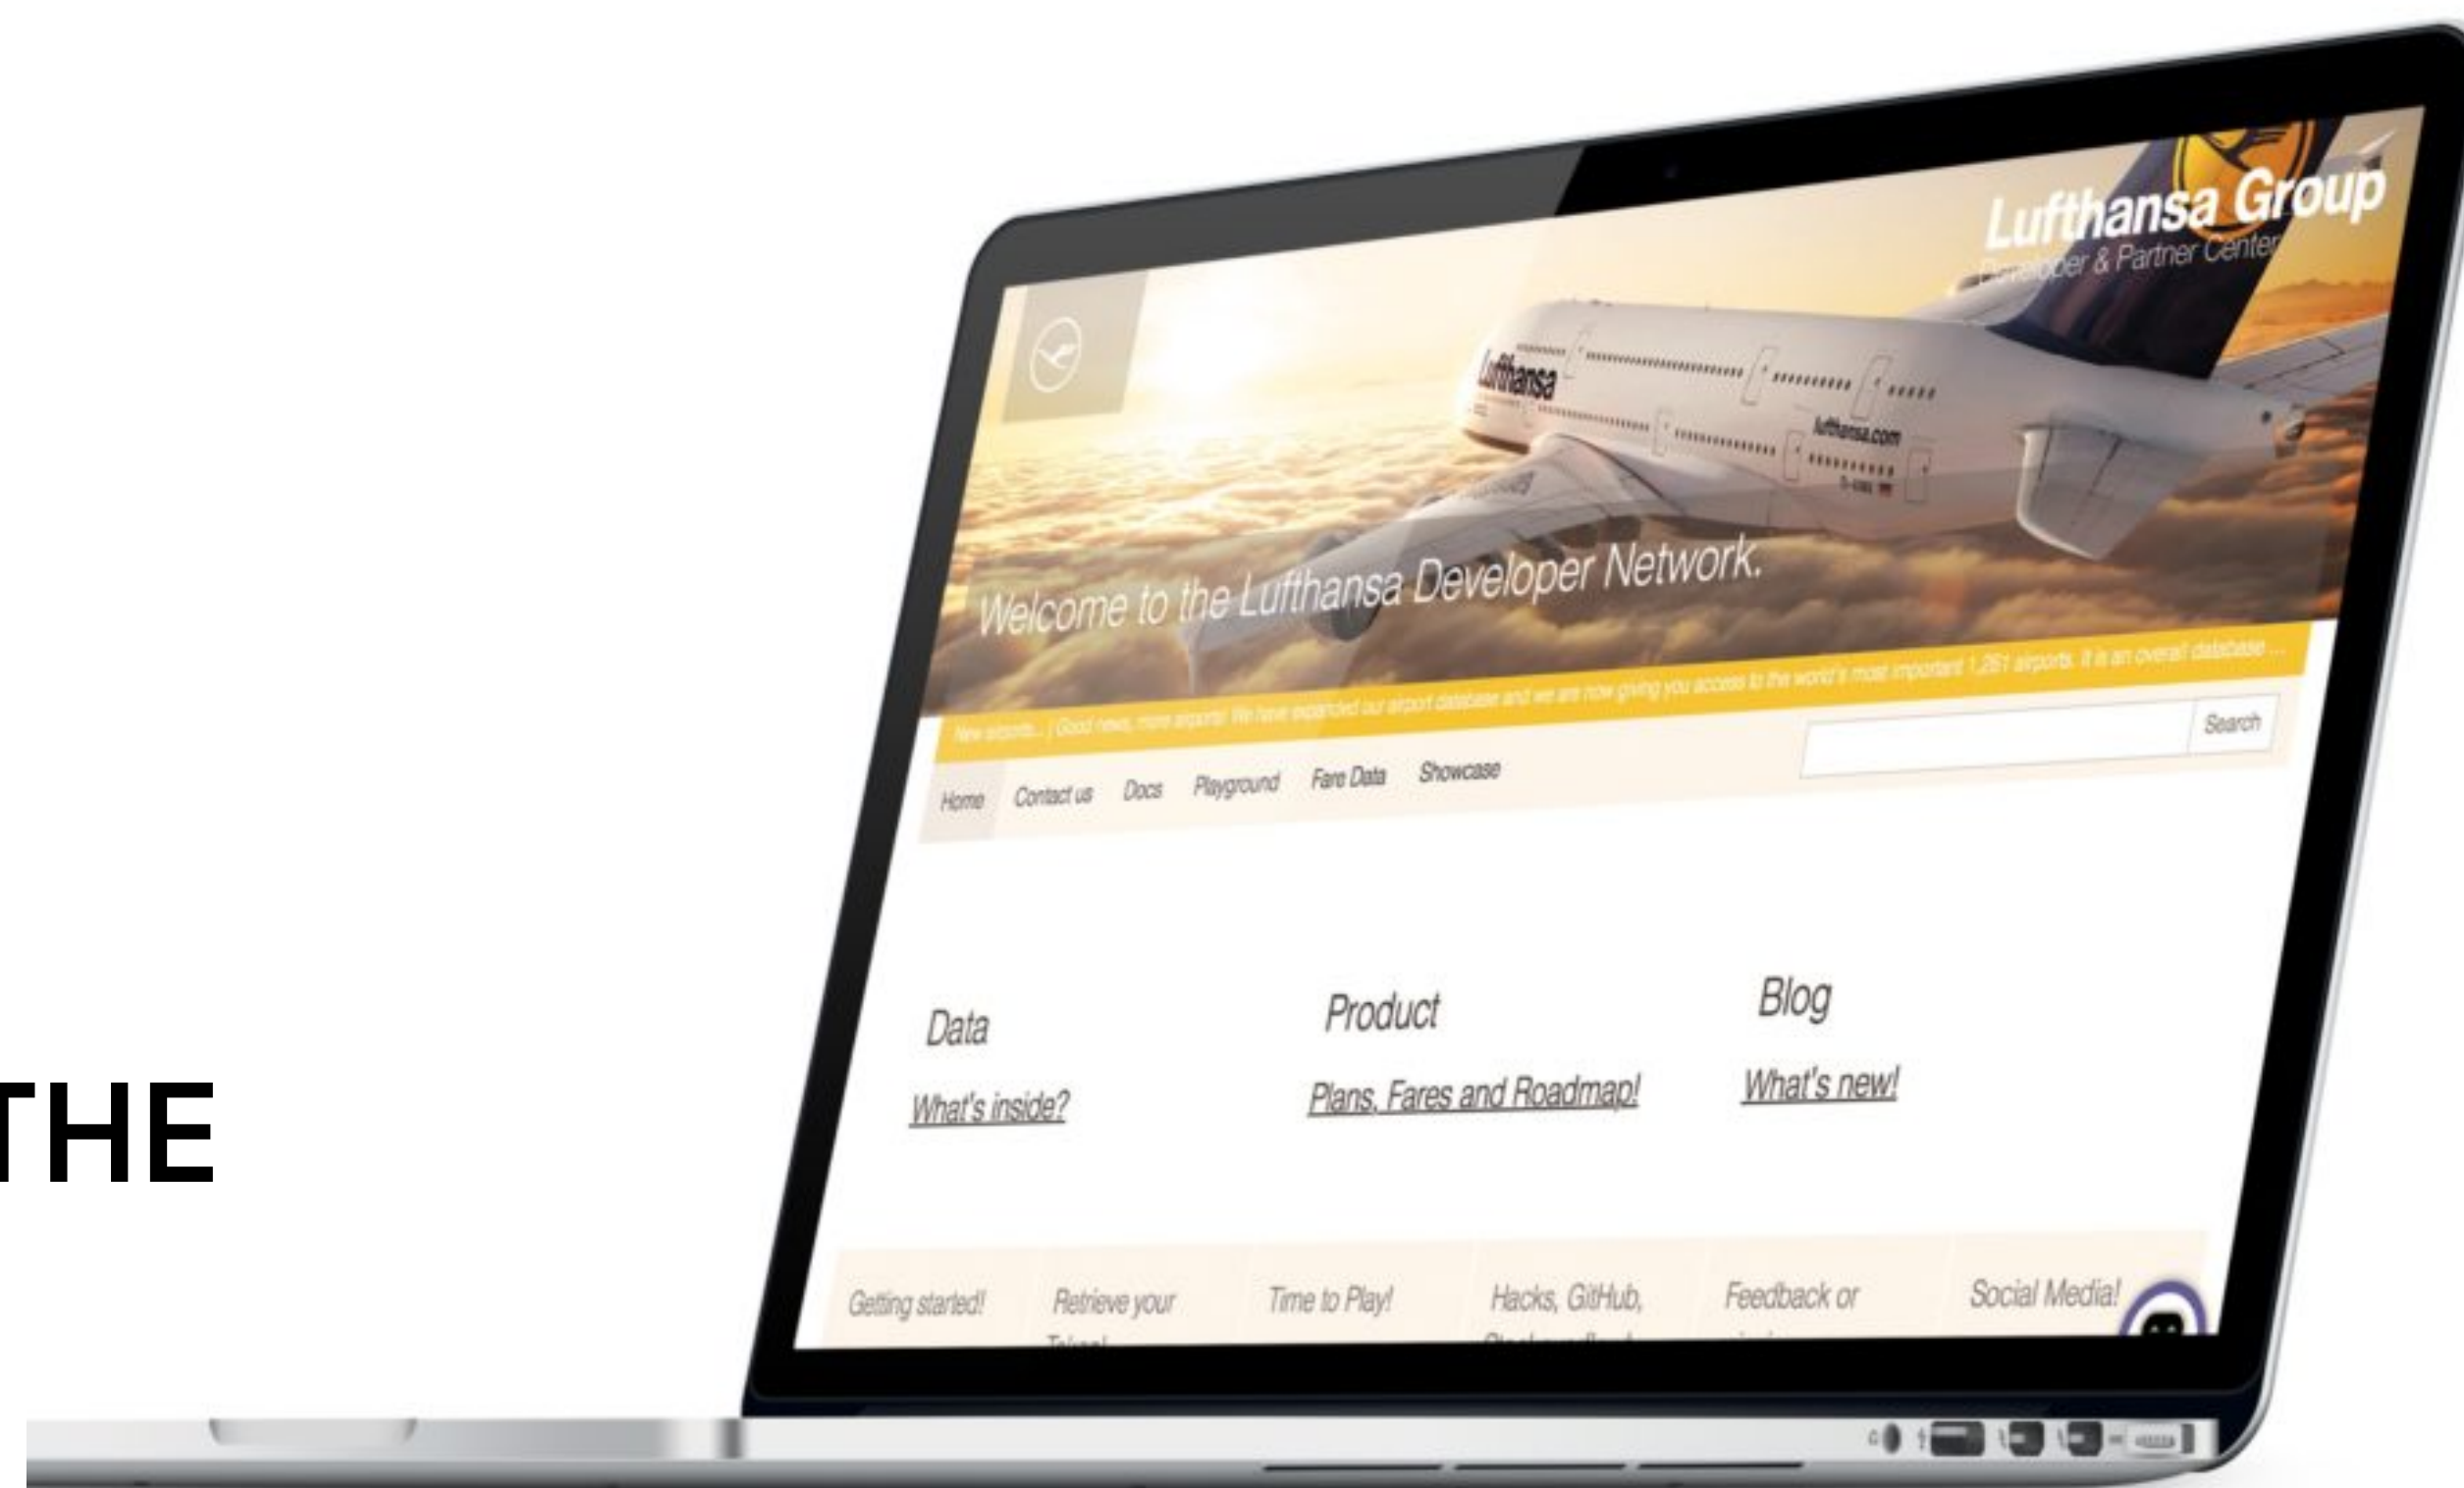

# Lufthansa Open API – developer.Lufthansa.com

Programming interface opening up  
the Lufthansa data world to  
external and internal developers

**LATEST NEWS BY TODAY**

**BOOKING CAPABILITY VIA THE  
OPEN API AVAILABLE!**

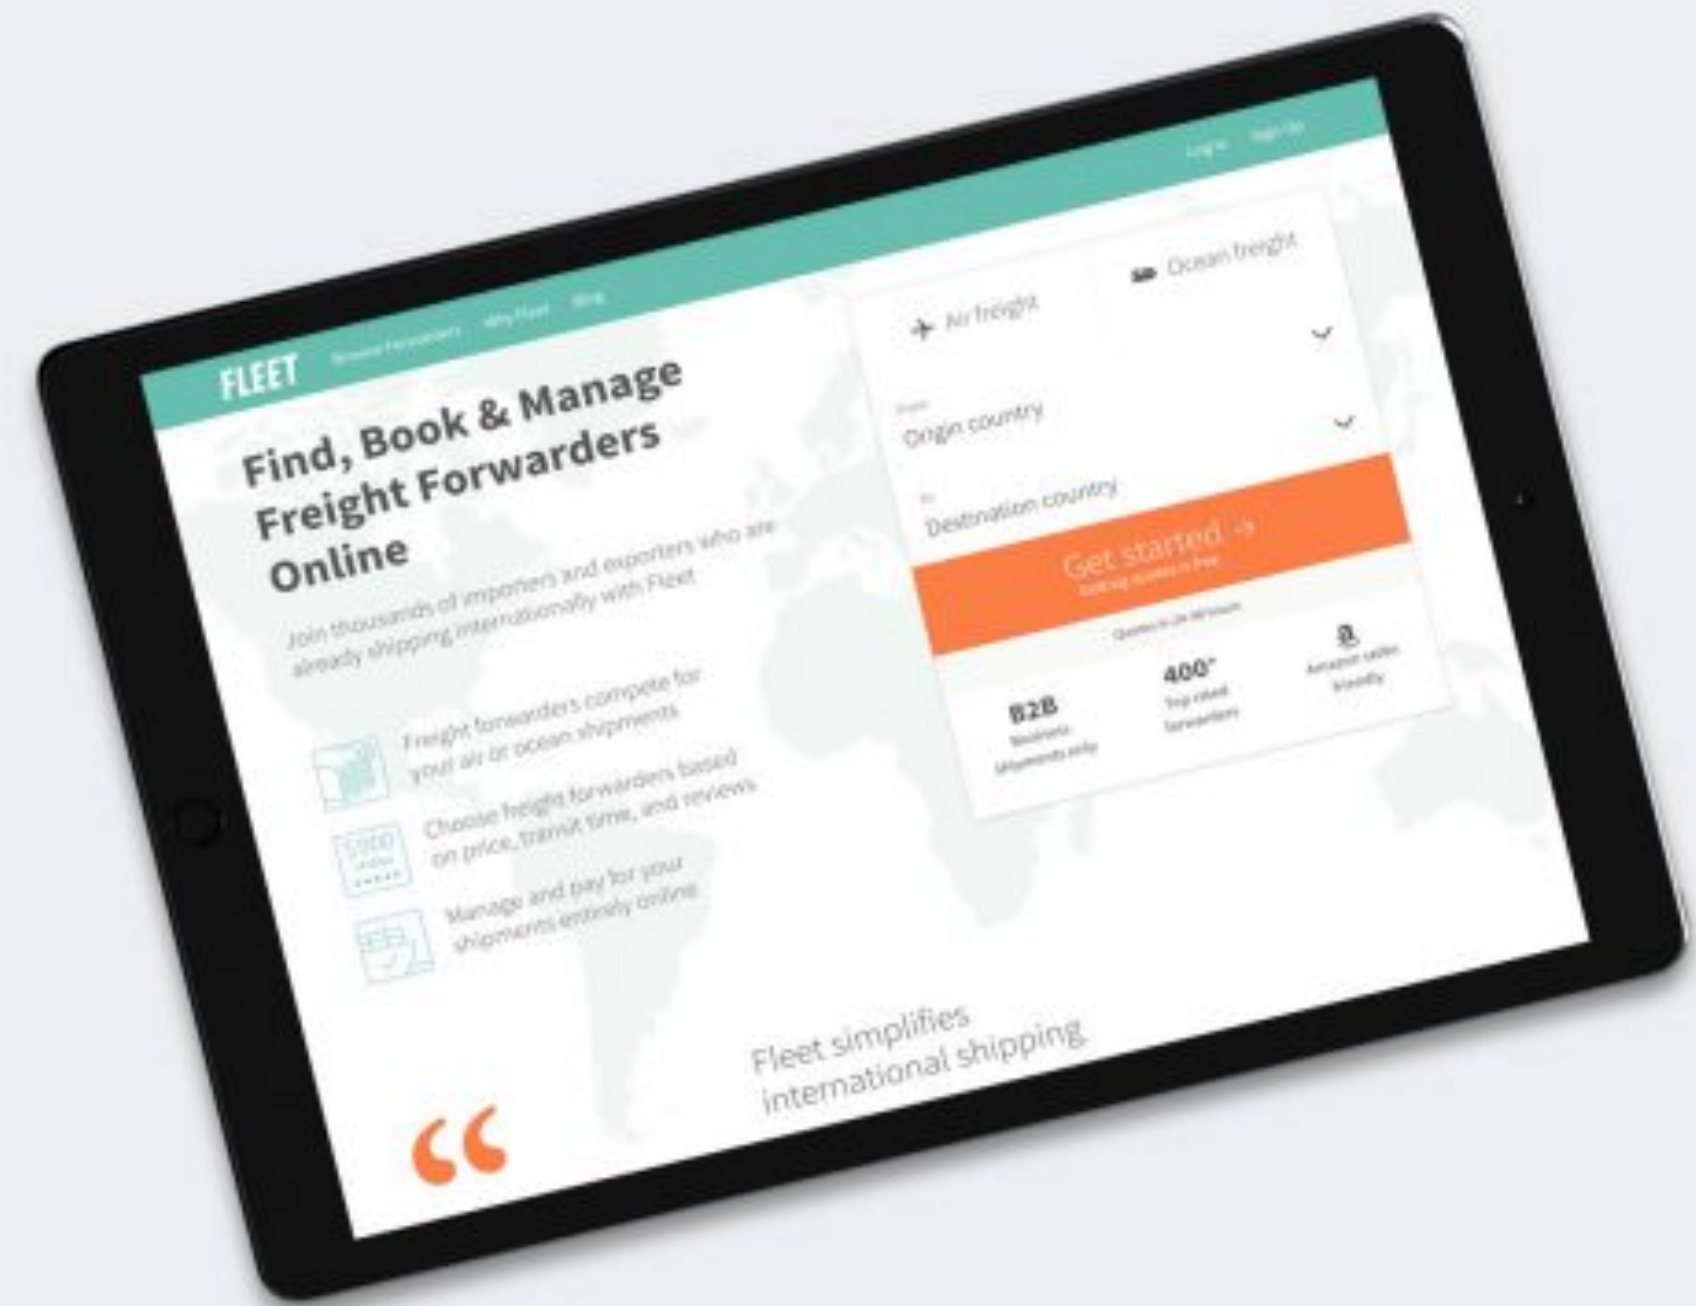

# Investment Fleet Logistics

First ever startup investment by Lufthansa Cargo

The LfH supported throughout the whole process – from screening the Cargo Tech market to the closing of the investment

Lufthansa  
Innovation Hub

We design the  
happy journey of  
tomorrow

## IATA Hackathons - Innovation in Action

- **Ursula Silling,**  
CEO, XXL Solutions & India Hackathon Jury Member
- **Juan Oliver**  
Manager, FDS Business Intelligence Projects

# AIR HACKATHON

Airline Industry Retailing

NDC  Hackathon

- Challenge: **Personalization**
- Winner Team: **RMS**

**AIR** HACKATHON  
Airline Industry Retailing 

- Challenge: **Ancillaries Cross-Sell**
- Incuation Phase

NDC  Hackathon

# India

23-25 FEBRUARY 2018  
IBS SOFTWARE OFFICES, KOCHI, INDIA

After 28 hours on non-stop coding...

Winners of the IATA NDC Hackathon “DATA Corporate Prize” held in Kochi, India on February 2018:

## Revenue Management Systems

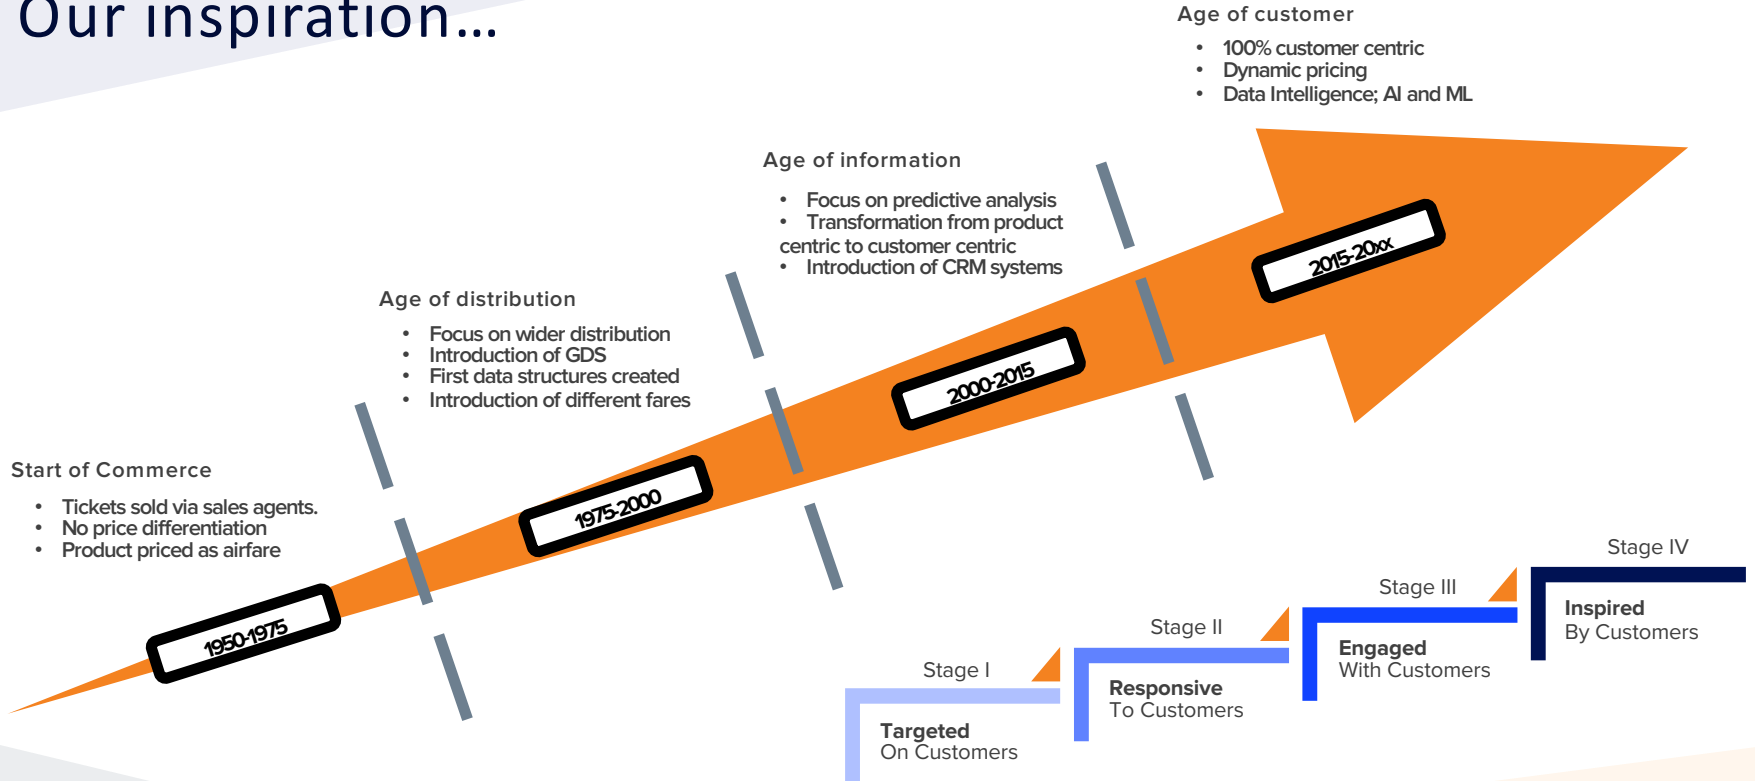

Travis Lewis

Fabian Widyadri

Michael Peters

# Our inspiration...

# Our inspiration...

# The idea pitch

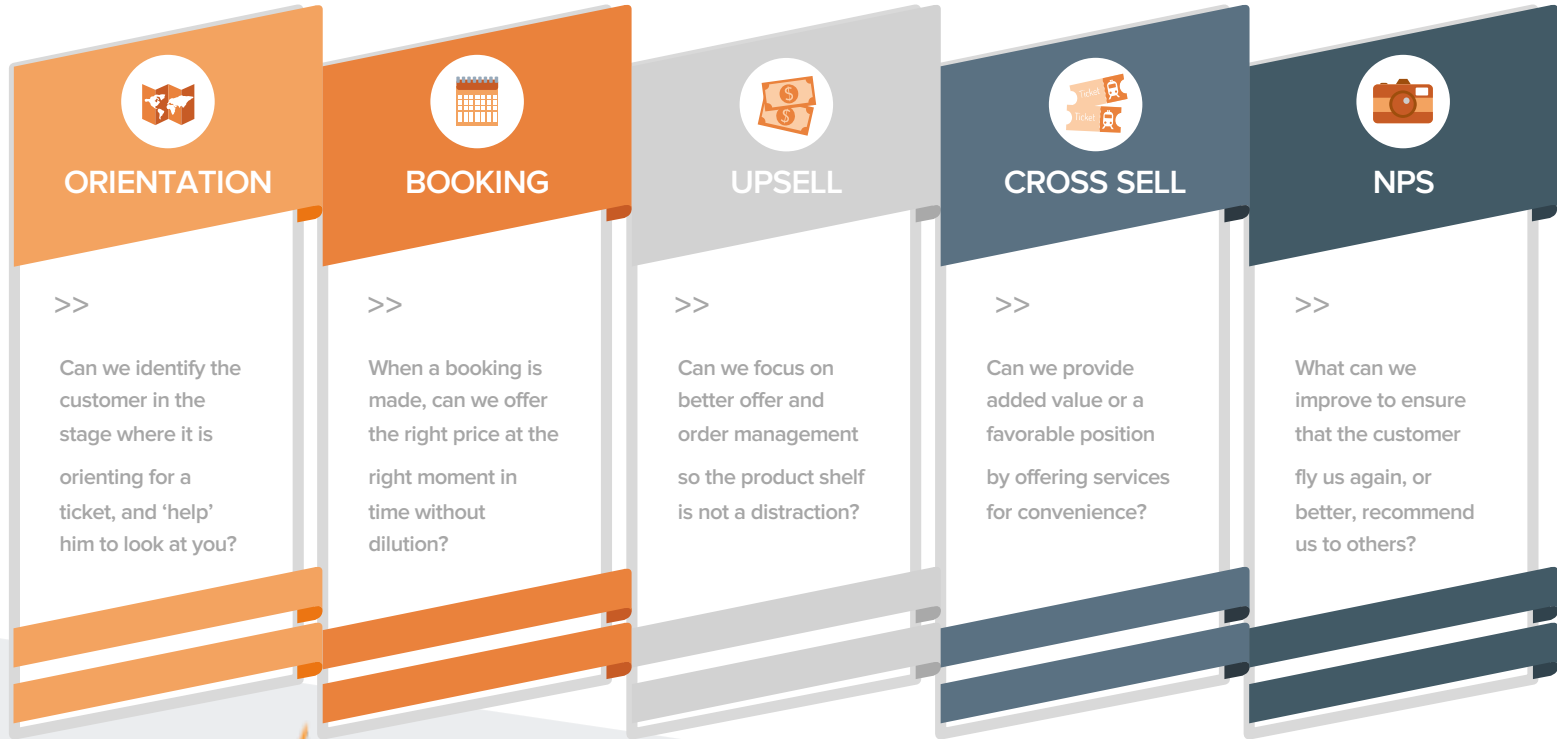

Airlines using NDC can improve their **sales conversion** by having a better process around **customer profile recognition**. Our challenge is to identify the **customer profile**, their **willingness-to-pay** and offer interests by help of **micro-segmentation**.

By help of **AI** we can identify the customer profile, **optimize the product shelf** by bundling the base offer, upsell offer and cross-sell offer in the most effective manner with the ultimate goal to **improve the conversion** of the customer throughout **the sales funnel**.

Our process will establish a **active feedback** port with the **revenue management system** which can recommend flight re-optimization by help of actual **demand insights** versus demand forecast (using only historical bookings).

# Optimizing the airline commercial paradigm

# Why join an IATA Hackathon?

## Knowledge Mining

The 'Next-Gen' of RM evolves around commerce. NDC will likely play an important role in that. We need to tiptoe the

knowledge pool and get exposure in the field

## Time Management

A sense of urgency created by time and competition creates an environment which steers for creativity impossible to recreate in a true business environment

## Be innovative

A hackathon is all about innovation. Validate our ideas, compiling data to put decisions in the right context, determine scalability, and so on

## Networking

Understand the 'state of the technology' and meet with the industry innovators which are involved with the marketing,

practices and concepts development of NDC

## Breaking routines

Sometimes, we can be a little full of ourselves that we forget to share with and learn from others. Hackathons is a place

where we can realize our strengths and weaknesses

## Having fun

Get a positive vibe from an environment where people are passionate to innovate, disrupt the status quo, pass

boundaries and are highly ambitious

# Some impressions

## Corporate Executives

Frequent business and first class travelers

## Quality vacationers

See travel as part of the holiday experience

## Corporate Troopers

Fit a corporate travel policy which defines travel behavior

## Schedule Optimizers

Must fit a specific time schedule without flexibility

## Travel seekers

Love to travel and seek out new experiences

## Reluctant travelers

Do not enjoy travel and have it as convenient as possible

## Mile Accumulators

Go out of their way to take flights that result in tier status

## Tour Takers

Want everything arranged for them

## Frugal flyers

Seek out the best value for money experience

## AirShopperRQ API variables

# Finding the right accuracy...

End of  
Hackathon

Relevant Data  
Sources

Change in ML  
methods

Highest  
Accuracy Score

Not always  
improvement

Our determined  
sweet spot

After the NDC Hackathon, the first challenge was to test the data on real airline data. In iterations of 2 weeks, we test over a dozen

of airlines and measure our classification accuracy. The regression accuracy is related to the success of our ability to match the correct classification profile on a Shopping Request. We are still in a experience of big data shifts.

**Thank You!**

# How Airlines can harness and leverage data

---

**Rodrigo Ramos**

Managing Director, Sabre Iceland  
Product Head of Intelligence Exchange

20 June 2018

# Key challenges for airlines to leverage data

---

The PSS is not designed for custom business process and sense and respond actions

Complexity of bringing together disparate, data sets to achieve digital transformation

A customer-centric business requires non-core systems to have customer data

There is a huge need for airlines to leverage more data and a DWH is not enough

---

12% of enterprise data is typically utilized for analysis

29% of the IT budget is now generated by business unit investment rather than IT

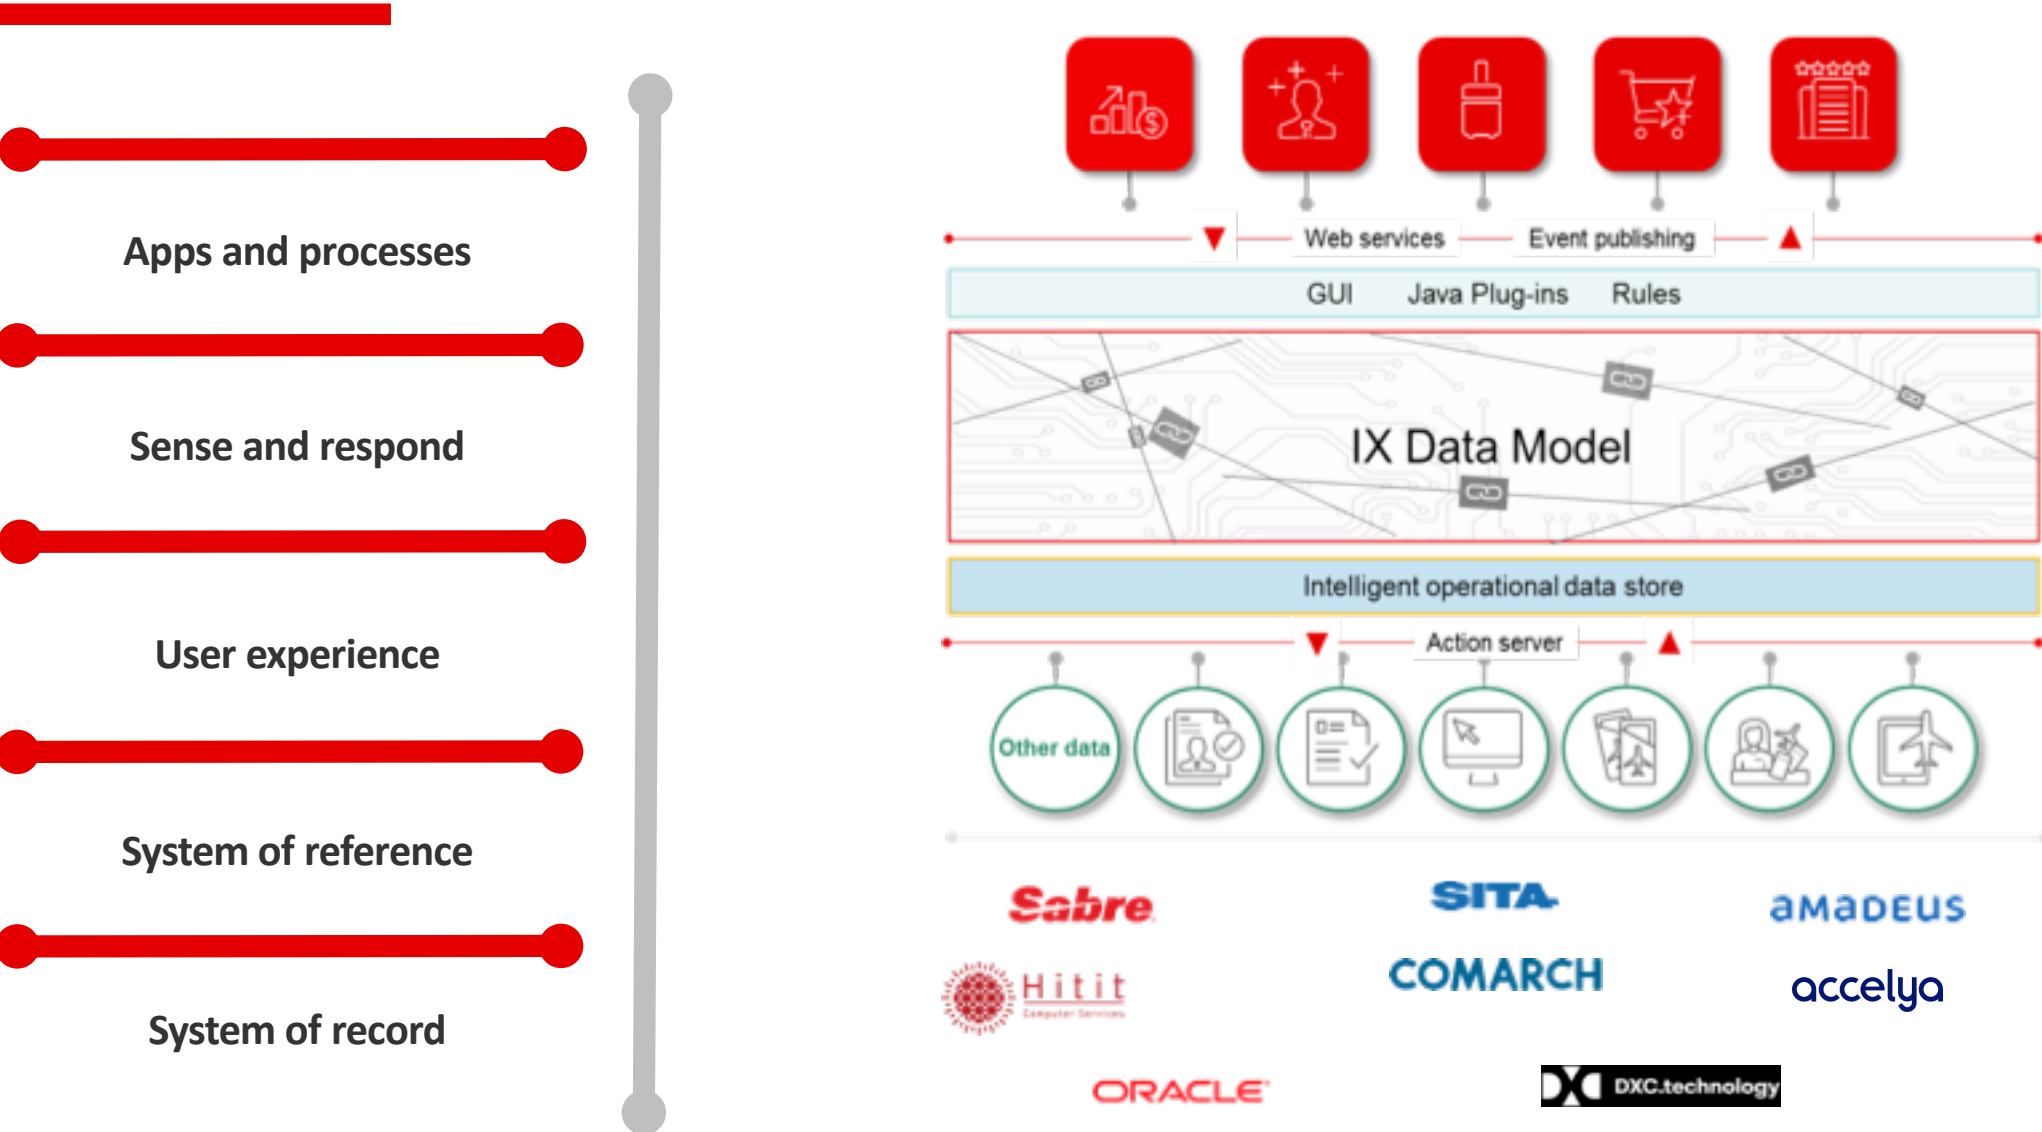

“IT application development time is highly correlated with IT’s impact on business performance...”

Forrester Research

“The speed... to convert mass amounts of customer data into insights, and insight into action is now a critical differentiator.”

# Intelligence Exchange: the open airline enterprise agility platform

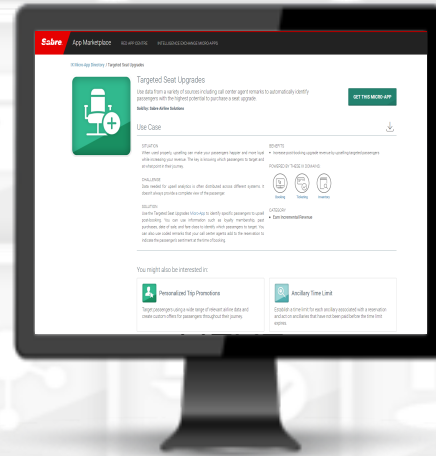

# Intelligence Exchange **MICRO-APPS**

An ecosystem of  
**micro-apps** built on  
the **Intelligence  
Exchange Platform**

<https://vimeo.com/274572139/50f82f670e>

# What is a Micro-App?

Business process templates

75% standard / 25% configurable

Take action across enterprise systems

Deploy fast to save time and money

[marketplace.sabre.com/IX](https://marketplace.sabre.com/IX)

# Solve **PERVASIVE BUSINESS CHALLENGES** across the customer journey

Personalized Trip Promotions

Top Tier Auto Upgrades

Earn incremental revenue

Enable customer centricity

Fare Error Detector

Real Time Flight Analysis

Prevent revenue leakage

Streamline airline operations

**Last Minute Upgrades** checks for upgrades and automatically notifies qualified customers based on tier or other criteria.

On the day of departure, WorldWide Air identifies that they have unsold seats in a particular cabin.

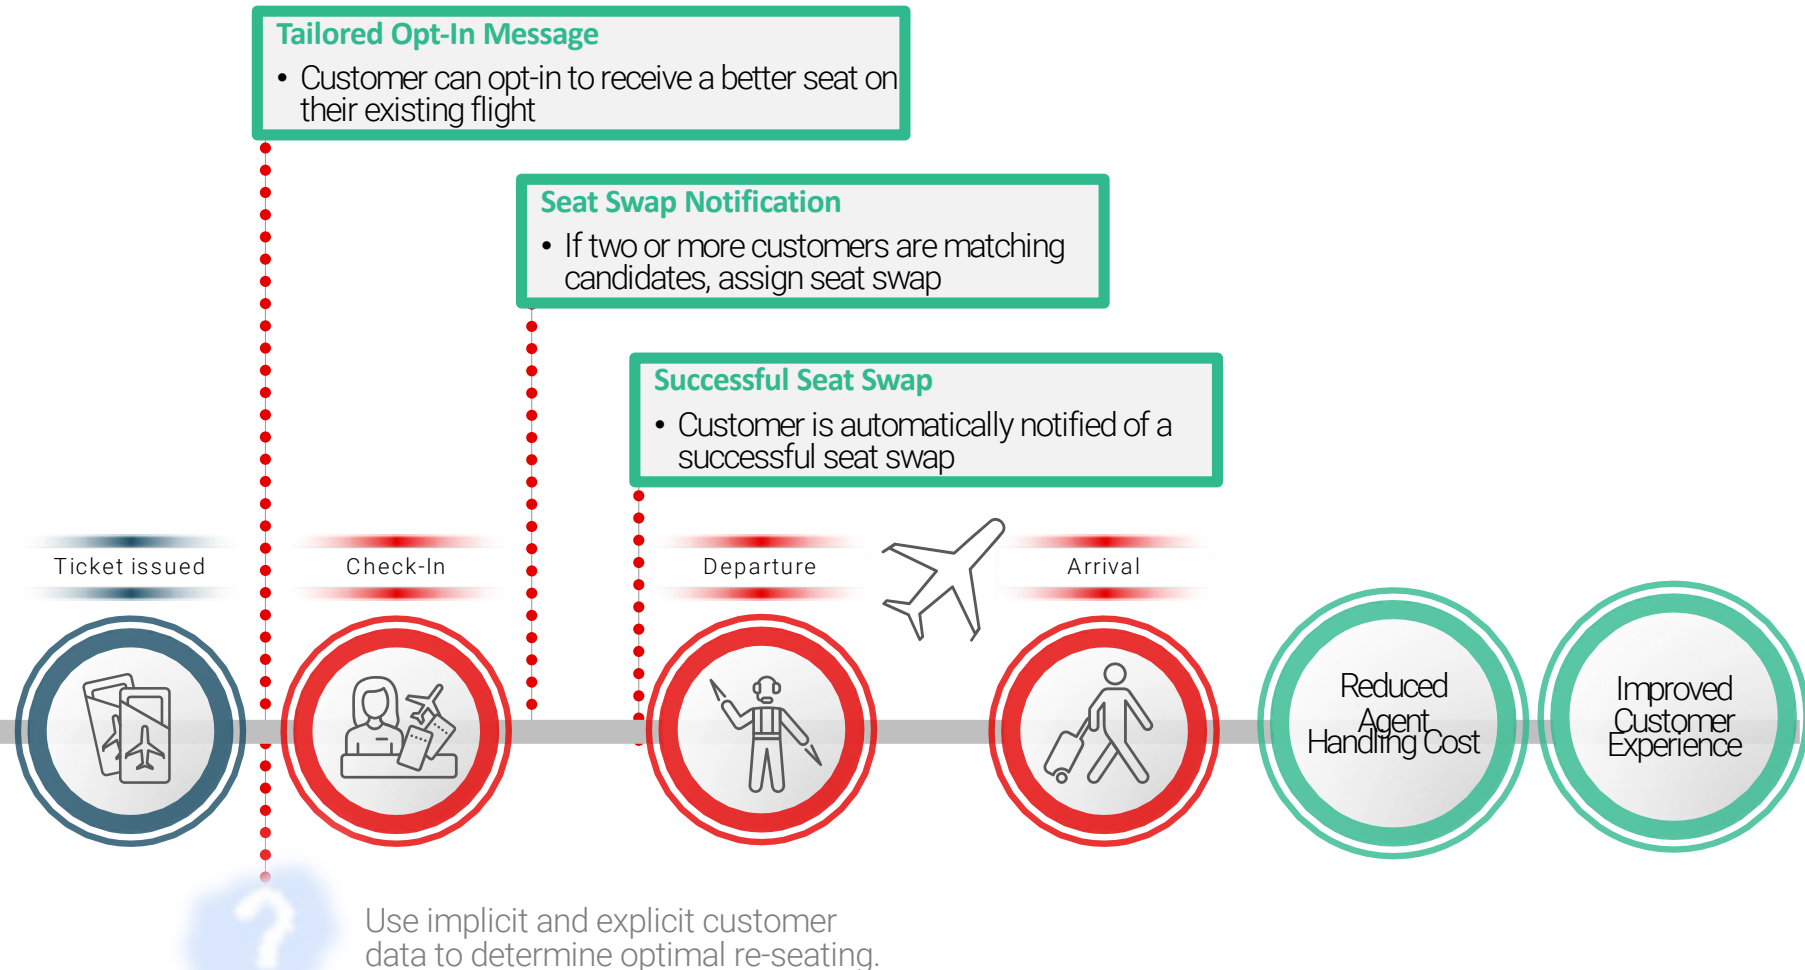

In order to fill that cabin, WWA decides to offer promotions to qualifying customers to encourage upgrades.

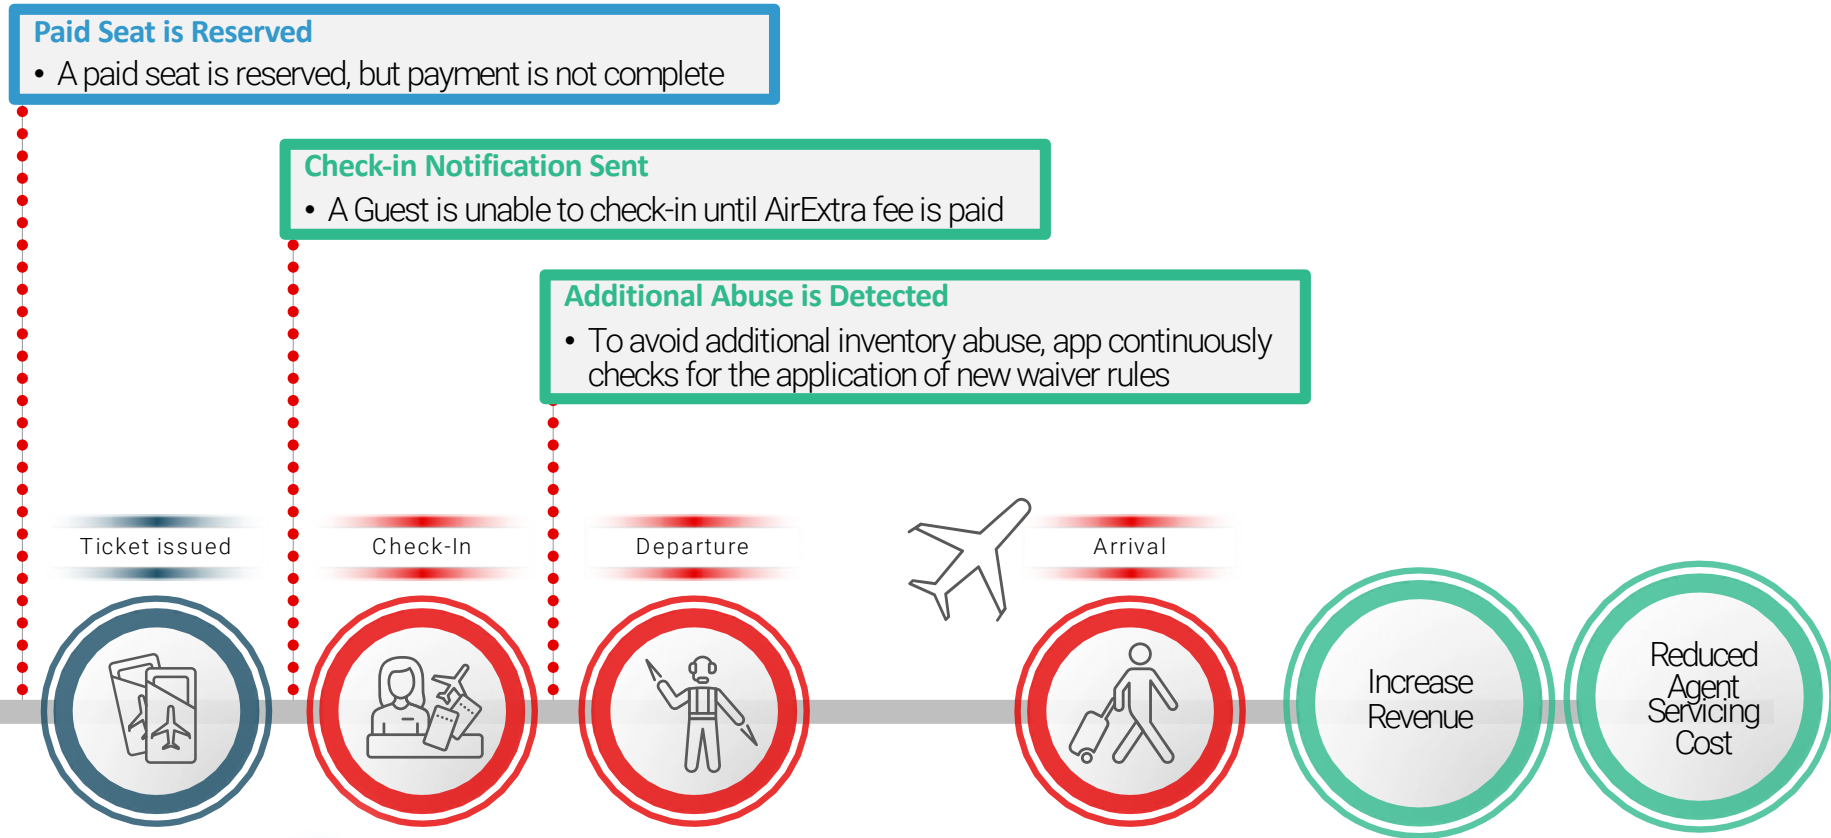

Based on rules in the Micro-App, promotions are sent to customers and front-line agents.

# Imagine if... you could automatically manage **seat swaps** in real-time based on customer data

# Imagine if... you could automatically manage **ancillary integrity** to increase incremental revenue

Should AirExtra fee be waived based on customer data or airline rules?

# Sabre Intelligence Exchange Customer Spotlight

Sabre Intelligence Exchange will continue to support engagement with our customers and drive performance for our business.

Shane Tackett

Vice President, Revenue and Ecommerce

## Goal

- A seamless experience for their elites, where they can either be automatically upgraded to the existing first class product, or to the new premium class product
- Manage all the logic of upgrading elite members with flexible rules around multiple flight, value, and profile attributes
- Continuously evaluate new bookings across the same criteria

## Solution

- Implemented Sabre Intelligence Exchange in 2016
- Partnered with Sabre to develop Elite seat upgrade app
- App was completed at a low cost and on-time by leveraging the IX platform

## Results

- The most flexible and user-friendly elite upgrade process in North America
- Added optionality upgrade options based on tier status, date and time, and inventory
- Improved retention of premium tier customers

The Alaska logo, featuring the word "Alaska" in a stylized, blue, cursive font with a registered trademark symbol (®) to the right. The logo is positioned on the right side of the slide, partially overlapping a background graphic of a globe made of colored dots.

# Differentiating the customer experience through seamless upgrades

**At Booking**  
Upgrade to Premium or Cabin

**3 Days before Departure**  
Upgrade to Premium or Cabin

**During Check-in**  
Prioritize Upgrade List (re-check-in)

**5 Days before Departure**  
Upgrade to Premium or Cabin

**1 Day before Departure**  
Upgrade to Premium or Cabin

# How Intelligence Exchange Solves The Problem?

---

Identify

Prioritize

Execute

Clear expectations to Elite members on upgrade availability

---

Incremental Revenue • Customer Experience • IT Cost Savings

---

# POC - Fast time to market

---

1 Programmer  
3 Days  
200 Lines of Code
