FOREWORD

Cargo shipments don't move by themselves. People, following clear processes, working in a range of different companies make them move. Airlines rely on a multitude of partners within the supply chain to ensure the shipments arrive in the required conditions-ready for carriage.

To achieve this, all stakeholders must understand and adhere to operational procedures. These may involve the handling of Unit Load Devices (ULDs), managing time-sensitive or perishable goods, or identifying and processing dangerous goods. Beyond handling, shipments must also be accurately billed and paid for.

The air cargo supply chain is made up of diverse professionals, each bringing specialized expertise and practical experience. The Cargo Agency Program, through its Conference members, provides a structured framework to manage these business relationships effectively.

IATA publishes the Cargo Agent's Handbook to communicate to all participants or interested parties the Cargo Agency Conference decisions governing industry procedures. The handbook equally includes relevant industry regulatory developments and information.

Governance Structure

The IATA Cargo Procedures Conferences consists of the Cargo Agency Conference (CAC) and the Cargo Services Conference (CSC). This handbook focuses mainly on Cargo Agency Conference decisions. For more information on the Cargo Services Conference, you can refer to <https://www.iata.org/en/about/corporate-structure/csc/>.

Cargo Agency Conference Structure

The Cargo Agency Programme regulates Member airlines' working relationships with their appointed agents or intermediaries. It provides agents with industry recognition of their financial and professional competence and give airlines a worldwide distribution network of approved agents to sell their products. The Cargo Agency Conference (CAC) works at strengthening industry capabilities, promoting industry reputation and enhancing commercial success for both airlines and agent participants.

CARGO AGENCY CONFERENCE (CAC) IATA's Cargo Agency Programme facilitates Member airlines' working relationships with their appointed sales agents and intermediaries. Affording benefits to both airlines and agents, the program provides agents with industry recognition of their financial and professional competence and airlines with a worldwide distribution network of approved agents to distribute their product. The Cargo Agency Conference works at strengthening industry capabilities, promoting industry reputation and enhancing the commercial success for both airline, intermediary and agent participants.

CASS-Cargo Agency Conference Management Group (CCMG) The CCMG provides support and guidance in relation to the strategies determined by the Cargo Agency Conference (CAC). It formulates cargo industry policies and monitors industry developments and priority issues and develops relevant industry solutions in response. The CCMG also prioritises, assigns and monitors the activities of the various standing Conferences subgroups.

IATA/FIATA CONSULTATIVE COUNCIL (IFCC) The IATA/FIATA Consultative Council (IFCC) was constituted to initiate, consider and make recommendations to the Cargo Agency Conference (CAC) and Cargo Services Conference (CSC) on issues affecting the Carrier/Agent relationship. The IFCC reviews all proposals, including those submitted by mail vote, made to the CAC to introduce new, or to amend existing, provisions of the Cargo Agency Rules. The IFCC's actions are expressed as recommendations.

REGIONAL AIR CARGO PROGRAMME JOINT COUNCILS IATA has established Air Cargo Programmes in certain areas/countries: Latin-America, Canada and Europe. These Air Cargo Programmes are collaborative in nature with airlines and cargo agents (referred to as intermediaries). They are supported by Joint Councils. A Joint Council is responsible for developing, managing and marketing an Air Cargo Programme. It determines the objective criteria pertaining to financial standing, standards of staff competence, experience and knowledge of air cargo products, suitability of premises, suitability of cargo handling & processing equipment and products and services, for registration of intermediaries in the applicable area/country. The Joint Council has representation from both airlines and intermediaries as outlined in the relevant Resolution.

GENERAL ASSEMBLY/EXECUTIVE COUNCIL A Cargo General Assembly or A Cargo Executive Council is established in certain areas. Their functions & responsibilities are outlined in the applicable Resolutions.

LOCAL CONSULTATIVE COUNCIL The Local Consultative Council (LCC) assists in the development and maintenance of the Cargo Agency Programme, the Air Cargo Programmes and the Cargo Accounts Settlement System (CASS). Such council may provide advice and recommendations to Conference and/or Air Cargo Programme Joint Councils, on the changing needs of specific markets and proposed enhancements or modifications to the programmes and the CASS.

Note: For more information on the Cargo Agency Conference, you can contact the IATA Customer Service Center via the Customer Portal – <http://www.iata.org/cs>

It is important that the management and operational staff of every IATA Cargo Agent be familiar with the contents of this handbook. This handbook can be consulted at any time via IATA's website - <https://www.iata.org/en/services/cargo-agency-program/cargo-agent-handbooks/>

□	Addition of a new item
△	Change to an item

To ascertain the exact words deleted, added or rearranged, the text of the amending Resolution should be consulted.

INTENTIONALLY OMITTED sometimes appears in place of a paragraph or subparagraph. This usually means that the provision in question has been deleted. Renumbering of subsequent provisions is thus avoided thereby easing the problems of consequential cross-referencing amendments in other Resolutions. Where there is a parallel Resolution for another Area, the advantages of uniform paragraph numbering are thus preserved.

Some of the Resolutions included in this handbook have not been declared effective at the time of issue, and therefore appear in grey shaded background. These Resolutions will be declared effective once the necessary Government approvals have been granted. Thereafter, an appropriate declaration of effectiveness memorandum will be distributed to Cargo Agents.

Note: To meet the new requirements of [Resolution 811d, Attachment 'A'](#), which mandate the Cargo Agency Commissioner to maintain an information website, the reader's attention is drawn to that website: www.cac.aero

Dialogue between IATA and the air cargo agency sector of the industry has been conducted on an international level for several years through a Consultative Council composed of representatives of members of IATA and FIATA (the International Federation of Freight Forwarders Associations). Those consultations have resulted in problems being solved, procedures being simplified and innovations being agreed by the Conference, as well as in communications being improved between allied branches of the same industry.

All Member airlines of IATA participate in its Trade Association activities and are accordingly bound by the Resolutions of the Cargo Agency Conference and the Cargo Services Conference. In this handbook, those resolutions are identified respectively by the initials 'CAC' or 'CSC' in the headline. Resolutions of the Tariff Co-ordinating Conferences (TCC) bind those Members having elected to participate in the TCC activities. They can be identified from the IATA membership list towards the end of the handbook.

Agency Administrator

MECHANICS OF THE IATA CARGO AGENCY PROGRAMME

The insertion of a name on the IATA Cargo Agency List is the result of a careful system of vetting and monitoring, created by the IATA Airlines, in order that they may all have access to industry-accredited intermediaries of reliable. The overall framework within which that industry accreditation process takes place is known as the IATA Cargo Agency Programme.

The programme is contained essentially in a series of Resolutions, reproduced in this handbook, which have been adopted by the Cargo Agency Conference (CAConf) and revised in the light of operating experience. The CAConf consists of senior commercial managers nominated by IATA Member Airlines. In the normal run of things it meets every March, but special CAConf meetings can be called at any time to consider urgent matters.

Resolutions of CAConf require the unanimous vote of the Conference to secure adoption; thereafter, the adopted Resolutions are filed with the concerned government authorities for scrutiny and approval, after which they can be declared effective.

For convenience sake, the airlines have divided the IATA world into three areas:

- Area 1: the Americas;
- Area 2: Europe, Africa and the Middle East;
- Area 3: Asia East of Iran and Australasia.

The Agency Programme is similarly subdivided, with IATA offices in each area. Secretariat support for CAConf, regional programmes and other specialist groups serving CAConf is provided by IATA Distribution and Financial Services (IDFS), which thus constitutes a continuity factor for the Agency Programme.

The span of airline management resources involved in the operation of the IATA Cargo Agency Programme extends from head-office senior middle-management at the Conference, through senior regional management to district management involved in regional groups. In addition, a watching brief is kept by the airlines' top commercial managements through the activities of the Cargo Committee of IATA. Taking into account the important proportion of air cargo business which originates from the cargo agency sector of the industry, it may be readily understood why such an important segment of the airlines' management should concern itself with the IATA Agency Programme.

In parallel with the internal airline consultations associated with the above activities, there is a very important and growing programme of consultations with the air cargo agency sector of the industry. Those consultations are, for the most part, conducted with FIATA (the International Federation of Freight Forwarders Associations), the world representative body of air cargo agents. Additionally, there are specific regional consultations in some areas and, where circumstances so warrant, there are industry-wide consultations at national levels.

One prominent activity is the area of training, which over many years has successfully developed, implemented and administered professional training programmes for cargo agency personnel of a quality second to none in the industry. That activity is most adequately described elsewhere in this publication.

Equally prominent in its output and the nature of its work product is the IATA/FIATA Consultative Council which for several years has been the dialogue partner of the Cargo Agency Conference. In consequence, it has been influential in the modernizing and remoulding of the Cargo Agency Programme and has been the source of valuable practical advice in the development of the Cargo Accounts Settlement Systems.

The inter-relationship between these various bodies is as illustrated on the previous page.

An IATA Cargo Agent who encounters difficulty in interpreting or applying the regulations set out in this publication has a choice of possible sources of guidance:

- a Member Airline of IATA, preferably the national carrier of the country where the Agent is situated;
- the Agent's national trade association which has access to FIATA;
- the IATA Industry and Distribution Financial Services Division, through its regional offices in Geneva, Montreal and Singapore.

Experience has shown that most difficulties may be readily resolved through the above channels; however, where the difficulty encountered raises an important point of principle, then the IATA/FIATA consultative machinery is equipped to analyse it in detail and to seek a CACConf solution. In this connection, the CACConf provisions envisage third party presentations to the Conference on matters on the agenda and within the CACConf's purview. Details of how such may be sought can be obtained from the Agency Administrator in Geneva.

SEEKING REGISTRATION AS AN IATA CARGO AGENT/INTERMEDIARY

Cargo Agency Rules have been established in order to regulate the standards of business practice between the IATA registered Cargo Agent/Intermediary and Members. These rules set forth the rights and obligations of both parties and the procedures applicable to organizations seeking IATA Cargo Agency registration.

Any person or organization wishing to seek registration as an IATA Cargo Agent/Intermediary may do so by submitting an application in the form of written answers to a questionnaire. This questionnaire has been adopted by all airlines, and is part of the Cargo Agency Rules and is included later on in this handbook, or by visiting our website at URL <http://www.iata.org/customer-portal/Pages/index.aspx>

The qualifications required for the registration of an Agent/Intermediary are described in detail in these Rules. The essential requirements are:

- qualified and duly trained staff, particularly with regard to the acceptance/handling of Dangerous Goods;
- sound financial standing;
- suitable working premises and cargo handling facilities; and active promotion and sale of international air cargo transportation.

Concerning the qualifications of the staff, each applicant must have at least two persons who have completed a recent training course in applicable Dangerous Goods Regulations, as well as two persons (not necessarily the same) who have completed an industry introductory or basic training course. All courses offered by IATA Member Airlines, the IATA Training home study programmes, as well as certain Governmental Organizations, are accepted courses. A number of third-party training courses have also been approved and applicants should refer to the IATA Cargo Agency Administration for further information in this respect.

In addition, effective 1 October, 2004, all IATA Agent/Intermediary owned branch locations where air cargo is made ready for carriage need to be registered, with each location required to employ a minimum of two full-time competent persons, qualified to provide prescribed services and handling functions. As well, a minimum one such competent person, who also holds certification with respect to Dangerous Goods Acceptance is to be present at all places where air cargo is made ready for carriage whenever such places are open for business.

Refinements to the above as well as other criteria may be applicable in certain countries or areas, as established by local IATA groups, in accordance with the Rules of any regional programme. These are notified to applicants in the countries concerned.

Each complete application is investigated to determine whether or not an applicant qualifies for registration. All Members have a 30-day period in which to file evidence with the Agency Administrator indicating why any application should not be approved.

A newly-registered IATA Cargo Agent/Intermediary executes a Cargo Agency Agreement after which Members may appoint the Agent/Intermediary to represent them in the country of registration.

PROGRAMME FEES

The types of fees described and applicable in the Canadian Air Cargo Programme are published in the IATA Customer Portal. A list of these fees and other services can be downloaded from the below link:

IATA NUMERIC CODE

Upon accreditation of an Agent, the Agency Administrator shall assign a numeric code. Such assignment shall continue only so long as the assignee remains an IATA Cargo Agent and shall be withdrawn by the Agency Administrator should the IATA accreditation be terminated.

The assigned numeric code remains the property of IATA at all times. It shall not be shared, lent, leased, sold or otherwise transferred by the assignee to any other person. Failure on the part of the assignee to respect this exclusivity of usage requirement shall constitute valid grounds for the Agency Administrator to withdraw the assignee code and cause the Cargo Agency Commissioner to review the IATA Cargo Agent's IATA accreditation.

In lieu of a Review Engagement Report, if the IATA Cargo Intermediary provides a current credit report from an independent credit review agency, a Notice to Reader or Compilation Report will be acceptable.

3. Financial Reviews Methodology

3.1.1 Financial Reviews will be carried out by IATA, applying the following criteria;

3.1.1.1 A minimum paid-up share capital of CAD35,000—for limited companies or an equivalent amount in the capital account for unincorporated firms will be required (e.g. partnerships/sole proprietors);

3.1.1.2 Solvency—defined as the excess of total tangible assets over total liabilities (intangible assets, such as goodwill, will be excluded);

3.1.1.3 If a balance sheet does not comply with section [3.1.1.1](#) and [3.1.1.2](#), then corrective action (e.g. by cash injection, in the form of share capital or a subordinated loan) must be taken within a period of time prescribed by IATA. Such corrective action may be in addition to the provision or retention of a financial security;

3.1.1.4 Profitability—trading profit (i.e. on ordinary activities) before taxation. However, a loss in a particular year will be treated as an exemption when a 3-year aggregate record of profitability can be demonstrated;

3.1.1.5 Current ratio—as long as the current assets are equal to or more than liabilities.

3.1.2 If the evaluation results in a negative assessment, an IATA Cargo Intermediary or Applicant will be required to provide a financial security in the amount of not less than CAD25,000 or an amount equal to the amount at risk calculated as per section 4, whichever is higher. The financial security will be returned to the IATA Cargo Intermediary or Applicant in accordance with section 4.1.2.

3.1.3 An IATA Cargo Intermediary or Applicant who cannot provide financial statements will be required to provide a financial security for an amount of not less than CAD25,000 or an amount equal to amount at risk calculated as per section 4, whichever is higher. The financial security will be returned to the IATA Cargo Intermediary or Applicant in accordance with section 4.1.2.

4. Financial Security

4.1.1 For the purposes of calculating the amount of financial security the following definitions apply:

4.1.1.1 Days' Sales at Risk is the number of days from the beginning of the IATA Cargo Intermediary or Applicant's Reporting Period to the Remittance Date in respect of that Reporting Period, plus a Grace Period as below:

Days' Sales at Risk = Reporting Period 15d + Remittance Period 30d + Grace Period 5d = 50 days.

4.1.1.2 Amount at Risk is calculated by dividing the Days' Sales at Risk by 365 days, and applying that portion to the amount of sales that the IATA Cargo Intermediary or Applicant made in the previous 12 months' period as applicable:

$$\text{Amount at Risk} = \frac{50}{365} \times 12 \text{ months' CASS cash turnover}$$

4.1.1.3 The wording used for the Financial Security provided must comply with IATA requirements.

4.1.2 If the IATA Cargo Intermediary or Applicant's activity in CASS reflects 12 months of good standing (maximum 2 CASS payment related irregularities in 12 months) the financial security will no longer be required and will be returned to the IATA Cargo Intermediary or Applicant.

5. Disputes

5.1.1 The Parties agree to use their best endeavours to fully and finally settle any dispute or claim arising under or with respect to the Canadian Local Financial Criteria concerning the scope, meaning, construction or effect of any provisions herein contained. Such informal dispute resolution shall commence at the latest within seven (7) working days of written notice being received by either Party from the other Party that such dispute exists.

5.1.2 In the event that the Parties do not reach a settlement of such dispute within thirty (30) working days of the commencement of such dispute resolution negotiations, either Party may refer this matter to the Ombudsman, subject to the procedures for referring matters to the Ombudsman set forth in [Resolution 811e](#) of the Cargo Agent's Handbook.

CHANGES WITHIN AN AGENCY REQUIRING IATA APPROVAL

Under the terms of the Cargo Agency Rules, Agents are required to notify the Agency Administrator of any proposed change in the ownership, legal status, name or address of their agency and such changes are subject to the provisions of Section 5 of the Cargo Agency Rules.

CHANGES OF OWNERSHIP AND/OR LEGAL STATUS

Agents are reminded that they shall not assign any of their rights or obligations under their Cargo Agency Agreement without the consent of Members. Therefore, if a change of ownership and/or legal status is proposed, notice of such change must be given to IATA at least 30 days prior to its effective date.

CHANGES OF NAME AND/OR ADDRESS

If an IATA Cargo Agent wishes to change its name or address, prior notice has to be given to the Agency Administrator in order that an application for approval of the change may be properly processed and all Members thereby advised.

The consequences of overlooking the requirements for giving prior notice could be detrimental to the continuation of an Agency's status as an IATA Cargo Agent and the importance of advising IATA of any change ahead of time cannot be overstressed.

AIR CARGO SECURITY AND ASSET PROTECTION

INTRODUCTION

The following high-level guidelines have been prepared to assist cargo agents in protecting their own cargo handling organisation against losses from theft, fraud, etc., as well as safeguarding the interests of the shippers and the airlines. Effective security measures for cargo must be maintained through the supply chain in accordance with government regulations. Further information is available in the IATA Security Manual.

THE SHIPPER

Where a shipper is validated as a Known Shipper/Consignor under a State national aviation security programme, both the shipper and, where relevant, the Regulated Agent conducting the validation must discharge their responsibilities properly and in accordance with that programme. Cargo must be packed to ensure safe carriage with ordinary care in handling and in such a manner that will not cause injury or damage to any persons, cargo or property. Each package (including those containing valuable cargo for which additional security precautions should be taken) should be legibly and durably marked with the name and full street address of the shipper and consignee matching the details on the Air Waybill or alternatively, referencing all component parts of the consignment. Packages must be packed in such a manner that the contents cannot be removed or tampered with without leaving visible evidence. Many shippers look upon previously used cartons and boxes as a source of potential packaging economy. If this practice is followed, the labels used for previous shipment must be removed thus avoiding possible misrouting and expensive claims against the airlines and loss of customer goodwill.

THE AGENT/FORWARDER

Great care should be exercised over the control of both documents and goods if losses are to be avoided. Of particular importance is the recently adopted [Resolution 833a](#), Security Measures for Intended Consolidated Consignments, included in this Handbook.

Premises

Premises should be designed and equipped to deter and prevent unlawful or unauthorized access and to minimize the risk of theft, the following protective measures are recommended:

- Access should be controlled in a manner which deters and prevents unauthorized access to areas in which cargo received from a Known Shipper/Consignor, or cargo which has been security screened by a Regulated Agent, is stored;
- Such controls must also prevent unauthorized interference with this cargo;
- All doors should be equipped with adequate locks. dead bolts should be installed;

- Other possible access points to the premises, such as windows, sky lights, ventilators, basement windows, etc., should be properly secured;
- intrusion detection and alarm system should be considered;
- Closed-circuit television cameras have a tremendous effect and should be encouraged.

Safekeeping of Valuables

All valuables that are negotiable and are not immediately needed should be held in a bank, security deposit or a safe of sufficient size and weight. If used and where circumstances permit, the safe should be bolted to the floor and located so that it is illuminated for easy observation by night patrols. Additional security measures are as follows:

- Never create the impression that valuables are kept in the agency when the office is closed. Refrain from advising strangers the extent of your business;
- Ensure personnel have clear instructions regarding the securing of doors and activating of alarm systems when the premises are not manned;
- Ensure adequate control of all keys belonging to the premises and make certain that the locking devices do not have serial numbers exposed to normal view;
- In the case of combination locks or electronic keypads, the combination must be kept secure and where possible, changed periodically.

Control of Vehicles

Cargo seals should be used regularly to ascertain whether or not freight in a box type vehicle or container has been tampered with en route. Careful attention should be paid to the way in which seals are used. The following protective measures are recommended:

- Doors and shutters of vans or containers should be constructed so that they cannot be taken off without breaking the seal;
- Each seal should be identified with an individual number;
- Unused seals should be kept under lock and key and their eventual use recorded against the signature of the user;
- The seals on each van or container should be recorded against the vehicle;
- The seals on each vehicle arriving at a depot should be recorded so that any change of seals en route is discovered.

The collection and delivery of air freight consignments is usually controlled by documents which should not be left unsecured in unmanned offices.

The cause of many losses often remains unidentified due to the lack of control over clear signatures being either given or obtained at each stage of movement from the shipper through to the airline and on to the consignee. A control copy of every document should be retained and the signature obtained on the original should be checked against the control document to ensure that no

unauthorized alterations have been made and that no goods remain undelivered.

Assistance and Regulations from Law Enforcement Officers

In some countries, national and/or local police forces have loss prevention specialists who are able to offer direct advice in respect of securing property. Where available, their assistance should be sought. Every State which has a national aviation security programme has a regulatory authority responsible for enforcement. This authority will often provide advice and guidance regarding how applicable Cargo Security Regulations must be implemented.

In the Event of a Burglary

In the event of a burglary, outlined below are some of the immediate steps that should be taken:

- Ensure that no one touches anything unless absolutely necessary, leaving everything exactly as it is;
- Telephone the police requesting a complete examination of the premises;
- Provide every assistance to the police, i.e. a complete description of all stolen property, description of any suspicious persons who were on the premises prior to the burglary;
- Inform all concerned of the burglary by telephone, or other appropriate means.

THE AIRLINES

Each IATA Member Airline has a Security and/or Fraud Prevention Representative who serves as a contact for all communications pertaining to this subject matter and who coordinates security and fraud prevention activities within his own company and with the Cargo Security Department of IATA. Should further advice be needed, contact the representative of the airline whose head office is the closest. In the event that further information is sought, the reader may also contact the IATA Cargo Security Department based in Geneva.

CONCLUSION

This subject matter is complex and Asset Protection requirements will vary greatly from one facility and/or location to another. The type of cargo in itself will indicate certain actions that should be taken for its protection. In any event, holding items of extraordinary value should be avoided except for the shortest possible period prior to transportation of goods between originating and receiving high value repositories and the air carrier.

Agents who are accredited as Regulated Agents under a State national aviation security programme are legally required to discharge their responsibilities properly and in accordance with that programme. The IATA Cargo Services Conference Resolutions Manual incorporates Recommended Practice 1630—Cargo Security; Attachment 'A' provides a Security Declaration Form. Attachment 'B' offers a set of guidelines for the

implementation of Cargo Security procedures. As well, Cargo Agency Conference [Resolution 833a](#)—Security Measures for Intended Consolidated Consignments, outlines further responsibilities of the IATA Cargo Agent in regards to security.

AIR CARGO AUTOMATION

BACKGROUND

The implementation of computer systems by airlines, agents and customs will continue to increase rapidly over the next few years. Some of these partners invest in automated equipment for the first time. Many will buy their second- or third-generation systems in the light of updated technology and experience. In some countries the introduction and use of computers has been much more rapid than in others. In many locations, cargo community systems have been developed which include many common interface functions.

Computerised systems are developed and implemented to meet the commercial and economic objectives of a company. However, in the air cargo industry, no company can act in isolation since the movement of every shipment is of interest to many different parties. Just as the goods physically move from hand to hand, so too is the information concerning those goods.

Within one company, a computer will help to calculate, control, track, collate and provide information. However, in exchanging data and information with another party in the transportation chain, the company will normally continue to receive and process paper documents. These include House Air Waybills, Commercial Invoices, Export/Import Permits, Delivery Notes, Manifests etc.

The thrust of automation in the next few years will be to link all parties together so that electronic information will replace paper as the primary source of consignment information. This is more so today as Customs Administrations start to institute new rules calling for the advance electronic transmission of cargo data prior to flight arrival.

THE OBJECTIVE

The objective of automation is two-fold. Firstly, to satisfy customer requirements and eliminate delays to the movement of cargo throughout the transportation cycle. Any reduction in total handling time will have a beneficial effect on present costs. Secondly, the introduction of airline reservations, tracking and automated air waybill issuance at the agents premises will allow the traditional air cargo agents to narrow the gap between their services and those of the integrated carriers and provide a seamless service.

This objective is achievable in many locations. The technology is available and research and implementation in many locations has been undertaken. However, in some areas, this is still a new idea which needs not only the advanced technology of computers and switching systems, but also calls for new relationships and new organisations to bring it about.

THE CARGO COMMUNITY SYSTEM

A cargo community is generally considered to consist of some or all of the following:

- Airlines, scheduled and non-scheduled;
- Air freight forwarders and agents;
- Customs brokers;
- Customs authorities;
- Ground handling companies;
- Other government agencies;
- Airport authorities.

In general terms, the role of a cargo community system (CCS) is to improve communications, through the use of computers, in the movement of goods. It is implicit that discussion and consultation are necessary to achieve progress to meet the changing needs of a cargo community.

Its ultimate objective is movement of goods from shipper to consignee as quickly as possible. Other objectives of a CCS system include economies in individual processes by using shared data, faster ground handling and reduced dwell times thereby enhancing the value of the air cargo product. It should also lead to handling of increased volumes of cargo while reducing storage space requirements, increasing terminal throughput and avoiding additional investment in buildings and land. In short, increased efficiency, improved productivity and reduced costs are the benefits which accrue to all participants in the trading community.

There are presently many CCS's in operation worldwide, offering airline/forwarder/customs connectivity and new services to the air cargo industry.

It is essential that organisational issues be resolved early in the planning process of a CCS. This ensures that all points of view are considered before development becomes so advanced that it is difficult to change.

Implementation of CCSs is often locally arranged. However, such local agreements often have far-reaching international ramifications. Since Members of IATA operate international services, their interests are, by necessity, international. Many freight forwarding agencies are also international organisations or have close overseas connections. On the other hand, airport authorities and, more significantly, customs authorities have only national or even local interests. This results in a need to deal with authorities which can be as different and individual as their national interests demand.

From an airline point of view, it is essential to take a network or international perspective, and try to achieve simplification and standardisation on a world-wide basis. The information exchange can be simplified by the use of standard messages, avoiding costly 'black-box' interfaces for individual locations where such links are thought to be necessary.

Many airlines are in a unique position in the development of cargo community systems. As operators of worldwide networks, and having developed automated systems for the control of air freight with connections to other

community systems, they have had to develop standard interfaces. As a result, they are able to bring a global perspective to such developments.

THE ENVIRONMENT FOR DEVELOPMENT

To achieve the objectives of a community system, the following requirements need to be met:

1. An understanding among all participants, at all management levels, that the development of interface communications requires all participants to have a standard EDI language of data elements and messages.
2. The development of community or local system projects needs the cooperation of all participants, and an investment of time, personnel and finances to achieve practical, cost-effective systems.

STANDARDISATION OF DATA ELEMENTS AND MESSAGES

A message is a structured block of information which is passed from one computer to another. A computer can be programmed to automatically structure, send and receive a message to or from another computer. This is why it is important that all parties—agents, airlines, customs and others—agree on the use of standard data elements and message formats; standardised data elements and messages are the life-blood of EDI (electronic data interchange).

Airline standard data elements and messages are published in the IATA Cargo-IMP Manual, under the authority of the Cargo Services Conference. Wherever possible, standards are also coordinated with others in the international trading community through their representative agencies such as the UN/ECE, the World Customs Organisation (WCO) and FIATA, through the IATA/FIATA Consultative Council.

There are currently two standards for messages used in community systems that have received the endorsement of agents, airlines and customs. New community system developments will be based on these standards. These are the airlines' Cargo-IMP messages and the UN/EDIFACT standards. IATA and its Member airlines are working within the UN/EDIFACT message development structure to achieve the results the industry needs and to maintain and publish the Cargo-Fact manual.

INFORMATION EXCHANGE

Agents and airlines use their systems to communicate between origin and destination. In the transportation of cargo, it is also often necessary to exchange consignment information between different parties, e.g.:

- export agent—airline—import agent;
- airline—airline;
- airline—handling company;
- airline—customs;
- export/import broker (agent)—customs;
- agent—agent.

Since all of these parties have different computers, systems and procedures, there is an obvious challenge in making electronic information exchange work in practice.

THE INFORMATION FLOW

The information contained on the air waybill is needed by all participants in the carriage of the goods and by customs in order to release the goods. The air waybill data therefore becomes the foundation on which a cargo community system is developed—the means through which this information is communicated to all who need it.

If the original air waybill data is captured electronically, for example in an agent's computer, it should be easily and quickly accessible to anyone else who needs it. It is suggested that IATA [Resolution 600a](#) (The Air Waybill), Recommended Practice 1600r (Air Waybill—Validation of Data Format), the Cargo-IMP Manual and the Cargo-FACT Message Manual are helpful references for anyone developing systems for the automated issuance of air waybills. Other publications have been, and are being developed by IATA to further assist in this process.

Functions based on air waybill data include:

- airline space reservations;
- consignment data interfaces/exchange;
- consignment tracing/tracking;
- sales reporting; and
- internal management reports and statistics.

IATA is committed to full cooperation with all interested parties to achieve the coordinated development of cargo automation information exchange. The following areas, in particular, are considered critical:

- Standardisation of data elements and messages to meet all system interface requirements;
- Automated exchange of air waybill data;
- Electronic interface between airlines and agents;
- Electronic interface with customs authorities; and
- Development of economic, cost effective cargo community systems.

AGENT—AIRLINE INFORMATION EXCHANGE

A large proportion of all air cargo consignments are generated by cargo agents. A proportion of shipments are handled at destination by cargo agents or customs brokers. Because of this, the procedures for the movement of cargo necessarily involve the exchange of a great deal of information between agents and airlines.

Many agents are now equipped with computer systems for air cargo processing which are capable of sending and receiving messages. If this capability is exploited with connections to airlines' systems via a single, multi-access terminal a powerful communications link will be established. Many of the present telephone and paper communications could be replaced by the exchange of standard electronic messages, thus greatly improving speed and accuracy and reducing costs.

Airlines already have communications systems, both private and commercial networks and through the worldwide industry networks of SITA and, in North America, ARINC. These systems connect virtually all airlines and airports at the teletype message level and, in many instances, at the higher level of data transfer. For our purposes, the gap in the cargo communication chain is local—the ability to link agents with the airline communications network. This link can be provided by a cargo community system.

One of the first functions of a cargo community system is the exchange of information on reservations, status and air waybill data of benefit to both agents and airlines. For example:

AGENTS will benefit from:

- Direct message level access into all (participating) airlines' systems;
- A single connection to multiple airlines;
- Uniform message procedures for all airlines;
- Minimum costs through a community system;
- Reduction in telephone calls to airlines;
- Simplified or reduced documentation;
- Possibilities for pre-release of consignments by customs; and
- Improved customer service.

AIRLINES will achieve:

- A single gateway through which airline messages exchanged with outside parties can be routed;
- A controlled method of allowing access to airlines' computer systems to prevent unauthorised access to information;
- A simple method for allowing authorised users to obtain status data and make reservations;
- Timely and efficient receipt of air waybill data without the necessity to re-key the data;
- A link with CASS and/or other airlines' systems where available;
- A reduction in telephone calls; and
- Simplified documentation.

BAR CODING APPLICATIONS

A key to efficient flow of information, and to maximization of EDI benefits, is automatic data capture and shipment identification through bar coding. To help facilitate wider use of bar coding within the air cargo industry IATA has, in coordination with FIATA, developed a 'universal' bar coded label standard. This standard defines the dimensions, layout and data content and format for cargo labels—which can be applied by airlines and forwarders alike. It thereby provides significant efficiencies and cost savings through standardization of equipment, paper stock and handling procedures. The specification is published under [Resolution 606](#). Guidelines for the use of the bar coded label are published in the Bar Coded Label Handbook.

INTERFACE WITH CUSTOMS

Because of the large volume of air freight, many airlines have already realised that they need to make maximum use of computerised control systems. This is essential in order to minimise the number of documents which have to be produced, handled and stored.

Customs authorities in many countries have taken the initiative in developing automated systems for their control and processing functions. Customs requirements are frequently the same, yet the procedures for complying with them are just as frequently unique to each country. This led to initiation of a Joint Project of IATA and the Customs Cooperation Council as early as 1983.

Customs authorities' automation efforts have brought them to recognise the value of standardisation. As a result, the CCC/IATA Project was established and has resulted in:

- Signature of a Memorandum of Understanding between the two organisations;
- Adoption of a Recommendation in the CCC regarding the interchange of data between customs authorities and air carriers;
- Adoption of a Resolution by the IATA Cargo Services Conference regarding interchange of data between air carriers and customs authorities.

The United States Customs and Border Protection Agency's for the Advance Presentation of Electronic Cargo Information came into force in 2004. Canada and India have similar legislation effective in 2006. Member countries of the World Customs Organization (WCO) have committed to the implementation of the WCO Data Model where possible. Cargo Automation and IATA's e-freight initiative will play a major role in ensuring that airline members and their forwarder/intermediary partners meet these requirements.

INTERFACE WITH POSTAL ADMINISTRATIONS

A large amount of mail is transported by air. Just as the Customs authorities have realised the benefit of the automated exchange of standard messages, so too have many of the Postal administrations. The Members of IATA and the Universal Postal Union (UPU) have been working cooperatively in this regard with the following results:

- Signature of a Memorandum of Understanding between the two organisations;
- Adoption of a Resolution by the IATA Cargo Services Conference regarding interchange of data between air carriers and postal administrations;
- Adoption of a Resolution by the IATA Cargo Services Conference regarding interchange of data between air carriers and customs authorities.

The Joint Postal Administrations/Airlines Electronic Data Interchange Manual, which includes EDIFACT messages for use in system to system exchange of airmail information.

IATA DANGEROUS GOODS REGULATIONS

The international transport of dangerous goods by air has been regulated since 1956. In 1984 the International Civil Aviation Organization assumed this responsibility under Annex 18 to the Chicago Convention on International Civil Aviation and its accompanying Technical Instructions for the Safe Transport of Dangerous Goods by Air. The ICAO requirements are now mandatory for all 190 ICAO member countries.

IATA continues to publish the Dangerous Goods Regulations in order to provide the user with a single document that includes full details of the regulatory requirements of ICAO and the airlines' operational requirements. These include a complete list of operator variations, a prescribed form for the Shipper's Declaration, and full details on packaging specifications and testing. The Dangerous Goods Regulations, officially recognised by ICAO as the field document for the transport of dangerous goods by air, are fully compliant with (and in some cases are more restrictive than) the ICAO Annex 18 and the Technical Instructions for the Safe Transport of Dangerous Goods by Air.

The responsibilities of Cargo Agents and Freight Forwarders are spelled out in the IATA Dangerous Goods Regulations (DGR). DGR Reference 1.3.3.6 states that before a consignment is offered to an airline for shipment, the shipper, freight forwarder and cargo agent must:

- ensure the dangerous goods are in full compliance with the Regulations;
- segregate dangerous goods contained in Consolidations from goods which are not subject to the Regulations and offer them separately;
- ensure that dangerous goods are not loaded in a unit load device, other than those permitted under DGR 9.1.1.1; and
- for all consignments, check documents and the exterior of packages for indications of hidden hazards.

This last requirement is to prevent undeclared dangerous goods from being carried by air, since they are the cause of the majority of dangerous goods incidents and accidents reported to the authorities. The common Air Waybill descriptions that often conceal dangerous goods are listed in DGR 2.2. Such items as Household Goods, Laboratory Testing Equipment, Company Material, Samples for Testing, Medical Supplies and many others. Markings on the outside of packages often give a clue as to possible dangerous goods hidden inside.

The IATA Regulations spell out in simple terms how dangerous goods are defined and classified into nine hazard classes, including Explosives, Compressed gases, Flammable liquids and solids, Oxidizing materials, Toxic substances, Radioactive materials, Corrosives and those materials which do not readily fall into these classes.

Over 3,000 articles and substances are listed showing their UN numbers, proper shipping names, hazard classes, subsidiary risks, hazard labels, packing groups,

packing instructions and quantities permitted on passenger and cargo aircraft.

The List does not cover every individual substance as this would be clearly impossible, particularly as a considerable number of new chemicals are developed and offered for transportation each year. To cover this, a number of generic (not otherwise specified) entries are included in the List. For example, if a substance is not specifically listed by name, the shipper must determine its hazard class, and may then use a 'n.o.s.' designation such as 'Flammable Liquids, n.o.s.'. N.o.s. entries are also included covering substances having more than one class hazard such as 'Flammable liquid, Toxic, n.o.s.'.

The Regulations detail the shipping documentation requirements including instructions on the completion of the Air Waybill and the Shipper's Declaration. It is important to note that only persons who have undertaken appropriate dangerous goods training may sign the Shipper's Declaration for Dangerous Goods.

Each dangerous goods package must carry the correct 'Hazard Class Label(s)' and it is of interest that these labels are also used for all other modes of transportation. Other package markings are required as specifically stated in the Regulations.

Apart from other hazardous shipments, radioactive materials are regularly offered for air transportation and the basic rules, which have been adopted by all transport modes, including the air mode, emanate from the International Atomic Energy Agency. In addition, the special conditions which apply to the air mode such as pressurization, rapid temperature changes, vibration, separation distance requirements, etc., have all been covered in the IATA Regulations. A list of UN Specification Packaging Suppliers is provided to assist shippers and agents to locate sources of such packagings worldwide. Governmental competent authorities are listed, where users of the Regulations can obtain assistance in classification and other aspects of shipping dangerous goods by air.

The International Civil Aviation Organisation and IATA (in DGR 9.5.4) require that sufficient notices, prominently displayed, are provided at cargo acceptance points, giving information about the transport of dangerous goods. This is intended to promote awareness of dangerous goods in the shipping community. 'Have you declared it?' posters may also be obtained from IATA offices.

Third-party organisations offering IATA accredited, industry-recognised, dangerous goods training, meeting the requirements of [Resolutions 801, 803, 805, 807, 809, 813 and 813zz](#) are also listed.

These IATA Dangerous Goods Regulations are a 'must' for all concerned in the transportation of dangerous goods by air, including carriers, agents, forwarders, consolidators, governments, shippers and manufacturers. It is important that the current edition should always be used, since many revisions and additions appear in each new annual issue.

The Regulations are printed in Chinese, English, French, German, Japanese, Russian and Spanish and may be obtained by contacting the IATA On-line Store <https://www.iata.org/en/publications/dgr>.

DANGEROUS GOODS IN ELECTRONIC FORMAT (eDGR)

The eDGR is a single user application of the IATA Dangerous Goods Regulations available on both CD-ROM and USB key. The eDGR contains all information currently available in the printed book and in addition has search, sort and report features.

The eDGR allows you to:

- Search the entire textual content of the IATA DGR manual. View the search results in a familiar web style. The search can also be triggered from the index and from a text selection for even faster results;

- Search the list of dangerous goods (Table 4.2), sort the table and produce detailed report that set out all of the requirements applicable to an entry, with full hyperlink and print support;

- Create bookmarks (also commonly known as "favourites") to frequently visited sections and to sections of particular relevance to your needs. UN Number Reports can now be bookmarked as well;

- Customize your IATA DGR software by activating bookmarks as navigation tabs. Enable direct and immediate access to content areas that you refer to most by adding them to the main navigation tabs, including UN Number reports.

IATA LIVE ANIMALS REGULATIONS

The public at large is concerned about animal welfare. Airlines, shippers and intermediaries involved in the transportation of live animals have a vital interest in the animals reaching their destinations safely and in good health.

IATA began to review the conditions of safe and humane animal transportation in 1967 and established the Live Animals Board to develop international standards. The IATA Live Animals Regulations (LAR) was first published in 1969 as an industry guideline for air transport. Because recommended practices were not always complied with by parties involved in transporting animals, IATA members agreed to adopt the LAR as an industry standard under CSC [Resolution 620](#) in 1974.

While IATA encourages all parties to comply with the LAR, it realises the important role of governments in the implementation of IATA standards on a global basis. Through IATA's lobbying efforts, many countries, including member states of the European Union and the United States of America, have adopted either part or the whole of the LAR as the law for animal transportation. In addition, pursuant to the United Nations conservation initiative, the Parties to the Convention on International Trade in Endangered Species (CITES) have resolved to encourage all Parties to implement IATA standards for the export and import of endangered species. In June of 2007 the Convention in international trade of endangered species of wild fauna and flora have accepted the Perishable Cargo Regulations (PCR) manual and the Live Animals Regulations (LAR) manual as the standard of use for CITES protected species when transporting live specimens. This recognition applies to the 172 countries that are party to the Convention and to all stakeholders involved in the transportation logistics thereof.

The Live Animals & Perishables Board meet to review and update the LAR. Officials from the UK, US, France, New Zealand and Canada are regular observers at the Board meetings.

The LAR is published annually on October 1st in English, French and Spanish.

To ensure that animals, passengers and planes always travel in safe, healthy and humane conditions, all persons who ship, accept, handle or load animals must be familiar and competent with the specific requirements of the IATA Live Animals Regulations. An increasing number of countries have adopted or accepted these regulations as part of their national legislation. Shippers are warned that shipping live animals in violation of the Regulations may constitute a breach of the applicable law and may be subject to legal penalties.

LIVE ANIMALS REGULATIONS CD

In addition to a hard copy manual, the IATA Live Animal Regulations is also available on CD-ROM.

The CD allows you to:

- find brand new live animal classification information combined with container construction requirements;
- obtain airline cargo contact information relating to sales, cargo operational aspects such as warehouse delivery information;
- view airline offered services in relation to live animal transportation from dedicated web pages;
- obtain an instant report tailored to single animal species and share it with your clients;
- instantly view operator and country variations on file with IATA;
- follow links to regulatory agencies that give further information about live animal transportation, such as for example the EU, without leaving the CD user interface.

PERISHABLE CARGO REGULATIONS MANUAL (PCR)

The purpose of the Perishable Cargo Regulations Manual (PCR) is to provide guidance to parties involved in the bringing to the market of “Perishable” goods, with an emphasis on the air mode.

In the 28th Cargo Services Conference it was decided by IATA member airlines to use the Perishable Cargo Regulations Manual as the standard applicable for the acceptance, packing and handling of perishable goods. This has been captured in the Cargo Services Conference [Resolution 622](#) and is applicable to all IATA member airlines. In June of 2007 the Convention in international trade of endangered species of wild fauna and flora have accepted the Perishable Cargo Regulations (PCR) manual and the Live Animals Regulations (LAR) manual as the standard of use for CITES protected species when transporting live specimens. This recognition applies to the 172 countries that are party to the Convention and to all stakeholders involved in the transportation logistics thereof.

The scope of this manual has to do with the monitoring of safety aspects throughout the distribution chain in order to safeguard and preserve the inherent qualities of the goods being shipped. It is a reference manual for all parties involved in the packaging, handling and acceptance of perishables and provides producers, growers, transporters, agents and manufacturers alike with criteria and procedures to fully exploit the benefits and advantages offered by air transport. Clinical or bio-medical shipments have an intimate need for a temperature controlled environment and are therefore also part of this manual. Endangered and from trade protected Flora are further detailed in the dedicated CITES chapter.

Product “marketability and traceability”, HACCP and Codex-alimentarius related principles will provide guidance towards import, transit or export activities. Traffic flow improvement, customer service and the various facts of the different interfaces and environments involved are further detailed in this manual. The content thereof is based on the experience of a number of major airlines, shippers, agents and scientific data supplied by research institutions that work closely with IATA.

The most current edition (7th) of the Perishable Cargo Regulations, features a new chapter on air transport logistics for temperature sensitive health care products. It aims at informing users of global regulatory requirements in terms of cold chain management and good distribution practices. Freight forwarders and carriers alike will discover new active and passive packagings as well as draft standard operating procedures forms for use when dealing with pharmaceutical companies. The PCR is updated by the IATA Live Animal and Perishables Board and is published in English.

PERISHABLE CARGO MANUAL CD

In line with nowadays customer expectations, IATA produces a Perishable Cargo Manual CD that is updated annually.

The CD allows you to:

- find brand new perishable classification information;
- obtain airline cargo contact information relating to sales, cargo operational aspects such warehouse delivery information and airline offered services in relation to perishables from dedicated web pages;
- obtain a perishable report tailored to single commodities and share it with your clients;
- instantly view operator and country variations on file with IATA;
- follow links to regulatory agencies that give further information about perishables without leaving the CD user interface.

UNIT LOAD DEVICE (ULD)

ULD are a key component in improving the efficiency of cargo and baggage handling at airports. Within the air cargo industry, the ubiquitous ULD now reaches deep into the supply chain—in some cases right from shipper to consignee—literally being the link that keeps the whole air cargo supply chain together.

As the air transport industry refines its service to its passengers and air cargo customers, it becomes ever more imperative to ensure that ULD perform their intended function of streamlining aircraft receipt and dispatch. To be able to do this, ULD must be designed and manufactured to exacting specifications and maintained in an airworthy condition. For this reason IATA established the ULD Technical Panel (ULDP) and publishes the ULD Technical Manual which contains vital information regarding specifications and handling of ULD.

Incorrect specification, design and handling of ULD can result in situations where the ULD and its load can cause delays and even severe damage—to the aircraft, the cargo, the ULD, and the ground handling equipment. In these situations there is also an increased exposure of staff to injury. In many air cargo routings it is necessary for the ULD to be interlined between different aircraft and/or airlines. The ULD Technical Manual addresses these considerations with recommended practices to ensure the smoothest possible operation.

To facilitate the application of common standards for the handling of ULD, the ULDP participated in the development of ULD audit points for inclusion into the IATA Safety Audit Ground Operations (ISAGO) programme which applies to ground handling agents. In addition, the ULDP is proceeding with the promotion of the ULD Care Charter which is to be released within the coming months in which progressive members of the greater air transport industry can indicate their support for, and commitment to, an improved operating environment for ULD.

ULD are a valuable commodity, for this reason any time that a ULD is interlined the ULD owner needs to be able to track the location of the ULD to ensure that the ULD can be accounted for at all times. To manage this tracking process a considerable number of IATA member airlines have formed the Interline ULD User Group (IULDUG) that manages this logistical issue through the use of specifically developed system that traces the use of the members' ULD across the different sectors of the air cargo supply chain.

Both the ULDP and IULDUG are supported by members of the IATA Strategic Partnership Programme—particularly those involved as suppliers to the ULD industry. Important as this participation is to the groups, participation is also sought and encouraged from the broader airport, ground handling, and surface transport sector.

THE CARGO ACCOUNTS SETTLEMENT SYSTEMS—CASSlink

www.iata.org/customer-portal/Pages/index.aspx

<http://www.iata.org/services/finance/Pages/cass.aspx>

INTRODUCTION

IATA has established and operated Cargo Accounts Settlement Systems for over 30 years ago with the objective of simplifying the reporting of cargo sales and settling of accounts between cargo intermediaries and carriers.

The system has evolved since then and now operates through an advanced global web-enabled platform known as CASSlink with common operational features providing airlines with a truly global solution for the billing and settlement of their sales revenues. Today IATA runs **92 operations** worldwide, 84 Export and 8 Import, covering:

- **84 countries** around the globe
- settlements in excess of US\$ 25 billion
- **More than 18 million** UTP's processed (AWB's and correction notices)

With the help of CASSlink, IATA's Cargo Distribution effort aims to expand its CASS network to a significant number of additional cargo markets enabling carriers' full coverage of our service.

ADVANTAGES OF CASS

CASS yields a two-fold solution as it replaces airlines traditional paper based invoicing in one-side and agents' traditional clerical functions of receiving and manually controlling those invoices on the other. Upon the implementation of a CASS operation an IATA "Settlement Office" is established locally ensuring **carriers and agents** an array of benefits:

- streamlined invoicing and collection of sales revenues processes performed by IATA's neutral settlement office;
- invoices are produced and distributed electronically to all parties eliminating any risk of loss or fail to deliver;
- agents pay one amount covering payment to all carriers; carriers receive one amount covering payment from all agents;
- enhancement of financial control and improvement of cash flow as the CASS rate of success in collecting funds is virtually 100%;
- risk of default is greatly reduced as irregularities are handled centrally by the CASS office;
- unbiased management of disputes leading to a more transparent practice and smoother process;
- cost is shared on an equitable basis among all participating carriers.

TRADITIONAL SETTLEMENT OF ACCOUNTS

Export airfreight normally reaches airlines via cargo agents. Agents collect freight charges from shippers for payment over to carriers. Certain carriers require that agents report sales made on their behalf in certain markets. Other carriers may produce invoices to their agents for those sales. Agents work with many carriers and carriers accept consignments from many agents. Each carrier receives a report from, or prepares an invoice to, each agent individually.

These redundant reports and invoices must be checked and consolidated and payments have to be made individually. This traditional administrative approach towards cargo billing is costly and represents a major burden on both airlines and agents alike.

CASS EFFICIENT OPERATION

With today's technology CASSlink has simplified the billing-settlement cycle turning it into a dynamic process. Once an operation is set to go "live" the IATA local office enables the system with local parameters such as airlines and agents' full name and addresses, current exchange rates and etc. Airlines generate electronic records of all AWB's issued by their agents in a pre-specified format called "billing file". The carrier then uploads billing files into CASSlink on specific dates following an agreed processing schedule (although there is trend to encourage daily uploading of Processing schedules determine deadlines for billing file submission by the airlines, processing of those files by the settlement office and distribution of electronic output to both airlines and agents).

Once billing files are processed the system generates an output comprised of invoices and billing statements. Each agent receives an invoice in respect of each carrier it works with, and a statement indicating the total amount due to all carriers. Each carrier receives the reciprocal set of accounting documents. Because this output is electronically stored in a web-enabled system both airline and agent may grant access to people of various departments (sales, operations and finance) while its access requires a simple Internet connection.

An additional feature of CASSlink is the overnight processing of all files received enabling agents to preview billed items on a daily basis.

Agents and carriers further benefit from this dynamic system specially when a dispute arises between them, as CASSlink facilitates the handling of on-line corrections.

CASS MODES

Although almost all CASS operations are relate to Export freight only, Import & Terminal Charges (ITC) and Domestic billing services are offered in some countries CASS ITC is operational in Brazil, Germany, Great Britain, Hong Kong, Italy, Japan, Morocco and United Arab Emirates. The CASS ITC participation rules were reviewed in 2017 for a new model endorsed by CACof to facilitate billing between Delivering Companies (Ground Handling Agents and self-handling Airlines) with their customers. The new CASS ITC model will be implemented in current and new operations, starting 01 October 2017.

CASS IMPLEMENTATION

In principle any country can host a CASS operation as long as there are airlines and freight forwarders willing to support and bear the cost of running it. Traditionally, IATA would expect airlines to manifest interest for any given market whereas today there's a growing need to expand the CASS network. Therefore, new operations are now being more actively sought.

Upon the identification of a potential country, IATA will conduct an assessment of the local market to define its size in terms of players, sales volumes and number of AWB's issued there. Meetings with national associations of forwarders and civil aviation authority are encouraged in order to ensure wider industry support. Based on these findings a business case is prepared and presented to the airlines locally, which must confirm participation. After that, this report is presented to the CASS Policy Group represented by twelve carrier members for its final and official endorsement.

IATA normally establishes or has established an office prior to a CASS implementation. But in order to be cost efficient some operations are run as an extension of a larger one. CASS-Nordic, for example, manages four countries from a Sweden-based IATA office.

AIRLINE AND AGENT PARTICIPATION

Airlines and their GSSA's may choose whether or not to join any given operation. Yet each airline participation is so vital for an operation's success that IATA will seek to maximize the number of participants. Accredited agents on the other hand are incorporated automatically whenever an operation is set to go live. Non-IATA agents may join CASS by simply signing an "associate agreement" with IATA.

COST OF PARTICIPATION

For information regarding costs of participation, please contact IATA via the customer portal www.iata.org/cs.

AIR CARGO CLAIMS PROCEDURES

Uniform principles and practices for the handling of air cargo claims must be observed whenever claims between carriers and Intermediaries or their customers pertaining to loss, or damage, or delay to shipments, etc. are processed.

The Warsaw Convention and in some countries the Montreal Convention and its pertaining Protocols and the Conditions of Contract (IATA [Resolution 600b](#) paragraph 10.1 to 10.1.3—on the reverse side of the AWB) stipulate time limits in regard to the lodging of claims.

Damage—Visible damage has to be registered upon delivery in the delivery receipt, or immediately after discovery of the damage to the goods in writing, holding the carrier liable within fourteen (14) days from receipt of the goods. Furthermore, the carrier (or its handling agent in charge) upon request at the time of delivery has to issue a Cargo Damage Report (CDR).

Delay of Goods—A complaint must be submitted in writing within twenty-one (21) days of the receipt of the goods.

Non-delivery of Goods—A complaint must be submitted in writing within one hundred and twenty (120) days from the date of the issue of the AWB.

The claimed damage(s) has to be substantiated and suitably evidenced by documents such as AWB copy, Cargo Damage Report and invoices, which must be submitted to the airline within a reasonable period of time.

Any rights to damages against a carrier shall expire unless an action is brought within two years from the date of arrival at the destination, or from the date on which the aircraft ought to have arrived, or from the date on which the transportation stopped.

In some countries or for certain airlines it may be mandatory, or at least advisable, to effect all submissions by registered and confirmed mail.

The above are guidelines only and it is recommended that further information be sought from the airline(s) involved in respect of any claim.

RESOLUTION 600*

THE CONSIGNMENT

CSC(40)600

Expiry: Indefinite
Type: AA

RESOLVED that, in respect of any consignment:

DEFINITION

1. As used in Conference Resolutions, the term “consignment” means one or more pieces of goods, accepted by the carrier from one shipper at one time and at one address, receipted for in one lot and moving on one shipment record or air waybill to one consignee at one destination address.

USE OF A SHIPMENT RECORD or AIR WAYBILL

2. For international carriage a shipment record as defined in [Resolution 600f](#) shall be used for each consignment, unless an air waybill in accordance with [Resolution 600a](#) is used due to applicable international treaties, national law, or as bilaterally agreed between the carrier and the shipper.

3. The consent of the shipper may need to be obtained for the use of shipment record on certain routes governed by Montreal Protocol 4 to the Warsaw Convention.

4. When a shipment record is used, the shipper may request and shall receive a receipt for the cargo (or cargo receipt) in accordance with [Resolution 600g](#).

5. No carrier shall create a shipment record (or execute the air waybill) or carry any part of a consignment until the complete consignment has been received.

TRANSFER OF TITLE OF PROPERTY

6. No Member shall execute for a shipper and/or consignee—as a service incidental to the transportation of goods—any document intended for the sole purpose of effecting transfer of title of such goods.

* This Resolution is in the hands of all IATA Cargo Agents.

ACCEPTANCE OF CONSIGNMENT

7. The shipper shall be required to address legibly and durably each component part of the consignment showing the same consignee's name, address and country. These shall be the same as entered into the shipment record or as on the air waybill. Alternatively this information may be shown on one or more component parts provided that all other parts of the consignment are cross-referenced.

8. No Member shall make any additions, deletions or changes to transportation documents other than to an air carrier's shipment record or air waybill.

9. If a consignment consists in part of articles subject to the IATA Dangerous Goods Regulations, such articles must be offered separately and must be clearly indicated in the shipment record or on the air waybill in accordance with [Resolution 600a](#).

TRACING OF CONSIGNMENTS

10. No Member shall trace or provide forwarding, delivery or other information for the consignment or any part thereof pertaining to circumstances occurring after delivery to the consignee named in the shipment record or on the air waybill, except in response to an enquiry initiated by a Government agency or in connection with a written claim for concealed loss or damage.

RELEASE OF CONSIGNMENT

11. No Member shall accept requests or instructions from a Shipper or Agent to obtain, prior to release of a consignment to the consignee, proof of payment for the goods or acceptance of a draft(s) or similar document(s).

RESOLUTION 600a*

△ CSC(46)600a*

Expiry: Indefinite
Type: B

RESOLVED that:

1. For international transportation of cargo, IATA Members shall use a shipment record as defined in [Resolution 600f](#), unless an air waybill as set forth in Attachments 'A' and 'B' hereto is required due to applicable international treaties, national law (including origin, destination or transfer point local regulations), or as agreed bilaterally by the parties.

2. The air waybill is a document which shall be either an air waybill referred to as an "airline air waybill", with preprinted issuing carrier identification, or an air waybill referred to as a "neutral air waybill" without preprinted identification of the issuing carrier in any form and used by other than an air carrier.

3. The issuing carrier is either:

3.1 in the case of an "airline air waybill", the carrier whose form is used; or

3.2 in the case of a "neutral air waybill", the carrier whose name, three-digit IATA airline code number, and air waybill serial number has been printed onto the document by the issuing agent or forwarder.

4. Neutral air waybills shall not be used except when completed by a computer system.

5. Proposals to amend the air waybill may be submitted to the Secretary, Cargo Services Conference at any time. Such proposals shall be circulated to all members of the Cargo Operations and Technology Board (COTB) for consideration and agreement.

6. If agreed, such proposals shall be circulated to all Members by Notice of Amendment in accordance with the procedures detailed in [Resolution 601](#).

7. Amendments agreed to [Attachment 'A'](#) need not be put into effect until the time of next printing of the air waybill but in no event later than 18 months after the declaration of effectiveness of these amendments.

8. Air waybill completion examples in The Air Cargo Tariff and Rules (TACT), published separately shall be developed by the Secretariat in accordance with the procedures in [Attachment 'B'](#) hereto and current tariff rules.

* This Resolution is in the hands of all IATA Cargo Agents.

RESOLUTION 600a

Attachment ‘B’

COMPLETION, DISTRIBUTION AND TRANSMISSION OF THE AIR WAYBILL

1. GENERAL

1.1 The air waybill is a document which shall be either an air waybill referred to as an “airline air waybill”, with preprinted issuing carrier identification, or an air waybill referred to as a “neutral air waybill” without preprinted identification of the issuing carrier in any form and used by other than an air carrier.

1.2 The issuing carrier or its agent shall ensure that, upon execution of the air waybill, all necessary entries are made.

1.2.1 Any amendments (including additions) to information shown or required on the air waybill, made by any participating carrier subsequent to initial issue, must be made on all remaining copies of the air waybill and must properly identify the carrier making such amendments. Identification of the carrier must be placed as closely as possible to the item(s) amended without obliterating any other information. Such identification shall include the official IATA airline name or designator and the IATA location identifier of the airport or city to show the place where the amendments are made. Amendments to the air waybill amounts shall be in accordance with [Resolution 612](#).

1.3 When a consignment is returned because of non-delivery, the new air waybill for the returning carriage shall have:

1.3.1 the original air waybill number inserted in the “Accounting Information” box;

1.3.2 all charges which should have been, but were not collected from the original consignee, inserted in the “Other Charges” box and the total inserted in the “Total Other Charges Due Carrier” box of the “Collect” column.

1.4 The issuing carrier shall not insert or permit insertion on the air waybill of any instruction that charges shown as to be collected from the consignee are to be collected from any person other than from the consignee; provided that this shall not prevent payment of such charges by such other person on behalf of the consignee to the collecting carrier.

1.5 In the case of a neutral air waybill, the party completing it on behalf of the issuing carrier shall first ensure that its use has been authorised by the issuing carrier.

2. COMPLETION OF THE AIR WAYBILL

UNWEIGHTED MODULUS 7 APPLICATION ILLUSTRATION

The check digit shall be determined by using the unweighted Modulus 7 system, which divides the first seven digits of the serial number by seven and uses the remainder for verification and as the eighth digit.

The following example illustrates how to apply the unweighted Modulus 7 system to generate the check digit:

- 1) Assume the first seven digits of the serial number are ‘1234567’;
- 2) Divided 1234567 by 7;

$$\begin{array}{r}
 \begin{array}{ccccccc}
 & 1 & 7 & 6 & 3 & 6 & 6 \\
 7 \overline{) 1234567} & & & & & & \\
 \underline{7} & & & & & & \\
 53 & & & & & & \\
 \underline{49} & & & & & & \\
 44 & & & & & & \\
 \underline{42} & & & & & & \\
 25 & & & & & & \\
 \underline{21} & & & & & & \\
 46 & & & & & & \\
 \underline{42} & & & & & & \\
 47 & & & & & & \\
 \underline{42} & & & & & & \\
 5 & & & & & &
 \end{array}
 \end{array}
 \longrightarrow \text{Remainder}$$

- 3) Since ‘5’ is the remainder, therefore, ‘5’ will be assigned as the eighth digit, which is the check digit in the serial number.
- 4) The complete serial number shall read as ‘12345675’.

RESOLUTION 606*

BAR CODED LABEL

CBPP(08)606

Expiry: Indefinite
Type: B

RESOLVED that:

Section 1—General

1.1 For the carriage of cargo, identification label(s) in the form of a bar coded label may be used and attached to each package, adjacent to the consignee's name and address where space permits. In certain cases, more than one label may be required, such as when shipments have labels applied by different parties, e.g. shippers, forwarders, airlines, or when the amount of optional information does not fit onto the label stock in use.

1.2 For purposes of this Resolution, a bar coded label is one containing bar code(s). The label may be printed automatically on demand, or preprinted.

1.3 A bar code may be primary or secondary. A primary bar code is one which contains the master air waybill and piece number. Secondary bar codes contain other information and may also be included on the same, or separate, label(s).

1.4 Bar coded labels shall contain the following mandatory information:

1.4.1 airline name;

1.4.2 air waybill number;

1.4.3 destination;

1.4.4 primary bar code.

1.5 Bar coded labels may contain optional information; for example:

1.5.1 airline insignia;

1.5.2 transfer points;

1.5.3 piece number;

1.5.4 weight of this piece;

1.5.5 total number of pieces;

1.5.6 total weight of this shipment;

1.5.7 handling information;

1.5.8 house waybill number;

1.5.9 house waybill piece number;

1.5.10 origin;

1.5.11 total number of house waybill pieces;

1.5.12 total weight of house waybill pieces;

1.5.13 product name;

1.5.14 other information;

1.5.15 secondary bar code.

1.6 Bar coded label quality should be of a type with equal or better characteristics than commonly used in preprinted cargo labels. These specific characteristics include:

1.6.1 adhesion holding power;

1.6.2 service temperature range;

1.6.3 moisture resistance.

Section 2—Technical Specifications

2.1 The layout and minimum dimensions of bar code labels are defined in [Attachments 'C' and 'D'](#) of this Resolution.

2.2 Bar coded information shall be in accordance with [Recommended Practice 1600t](#) and as shown in [Attachments 'A' and 'B'](#) of this Resolution.

2.3 Notwithstanding the provisions of this Resolution, carriers and their customers who use the bar coded labels of different dimensions may continue to use them, provided the data encoding requirements specified in [Attachments 'A' and 'B'](#) of this Resolution are met.

Section 3—Completion

3.1 The circled numbers to the right of the titles below, correspond with the numbers in the boxes of the specimen label illustrated in [Attachment 'C'](#) of this Resolution.

3.2 Completion of the mandatory boxes on the labels shall be as shown below:

3.2.1 Airline Name 1

The airline name.

3.2.2 Air Waybill Number 2

* This Resolution is in the hands of all IATA Cargo Agents.

3.2.4 Primary Bar Code ⁵

The primary bar code contains all data elements described in [Attachment 'A'](#) of this Resolution. Whenever more than one bar code is printed on a label containing the primary bar code, the primary code must appear first.

3.3 When used, completion of the optional information on the labels shall be as follows:

3.3.1 Airline Insignia ¹

The airline insignia.

3.3.2 Transfer Points ⁶

The IATA three-letter code of the airport(s) of transfer. When the airport code is unknown or the city (cities) is (are) served by more than one airport the IATA three-letter city code may be used.

3.3.3 Piece Number ⁶

The air waybill piece number.

3.3.4 Weight of this Piece ⁴

The weight of the specific package to which the label is attached, together with the unit of weight (K or L).

3.3.5 Total No. of Pieces ⁴

The total number of pieces comprising the shipment.

3.3.6 Total Weight of this Shipment ⁶

The total weight of the shipment, together with the unit of weight (K or L).

3.3.7 Handling Information ⁶

Any information which pertains to the handling of the shipment.

3.3.8 HWB No. ⁶

The house waybill (HWB) number.

3.3.9 HWB Piece No. ⁶

The house waybill (HWB) piece number.

3.3.10 Origin ⁶

The IATA three-letter code of the airport of origin. When the airport code is unknown or the city is served by more than one airport the IATA three-letter city code may be used.

3.3.11 Total No. of HWB Pieces ⁶

The total number of pieces comprising the shipment being shipped under this house waybill.

3.3.12 Total Weight of HWB Pieces ⁶

The total weight of pieces represented by the house waybills, together with the unit of weight (K or L).

3.3.13 Product Name ⁶

The marketing name associated with the type of freight movement.

3.3.14 Other Information ⁶

Information which may be added at the user's discretion.

3.3.15 Secondary Bar Code ⁵

The secondary bar code(s) is printed in box 6 of [Attachment 'C'](#) of this Resolution whenever a primary bar code is included on the label; otherwise it may be printed in box 5. The secondary bar code(s) contains data elements identified in [Attachment 'B'](#) of this Resolution.

RESOLUTION 606

Attachment 'A'

Primary Bar Code (Air Waybill/Piece Number Information)

A primary bar code, of sixteen continuous numeric characters, in which the encoded data shall comprise the following fields:

- = the three-digit numeric airline prefix;
- = the eight-digit numeric air waybill number;
- = a single digit separator (shall always be zero);
- = a four-digit numeric unique piece number, indicating each individual piece in a multi-piece shipment. If this field is not used, it shall comprise four zeros;

Note: The bar code may have human readable translation of all digits in the field.

Examples:

- a) air waybill 777-12345675, piece number 3:
7771234567500003
- b) air waybill 777-76543213, piece number 122:
777654321300122
- c) air waybill 777-32176546, pieces field not used:
7773217654600000

The primary bar code shall be printed on the cargo label as indicated in [Attachments 'C' and 'D'](#). There should be no box around the bar code in order to maximise reading efficiency.

The bar code shall be printed in Code 128 with a minimum width of the narrow bar (x dimension) of 0.5 mm (0.02 in). The bar code shall be printed vertically (picket fence) with a minimum bar height of 21.6 mm (0.85 in).

The bar code includes the following top and bottom quiet zones:

The side quiet zones shall be as specified in [Recommended Practice 1600t](#).

The optical characteristics of the bar code shall be such as to be readable:

- = using a contact scanner (wand reader);
- = at a distance of up to 1.80 m (6 ft) using a non-contact scanner;
- = using a fixed scanner on a conveyor moving at speeds of approximately 1.80 metres per second (6 feet per second) and a depth of field ranging from 12.7 to 803 mm (½ to 32 in).

RESOLUTION 606

Attachment ‘B’

Secondary Bar Code

Where more than one secondary bar code is printed on a label, the bar code containing the house waybill number shall be printed as the first of these secondary bar codes.

The secondary bar codes can be variable in length, depending on the fields used. One-character field identifiers will be used as specified below. Printing characteristics of the secondary bar code, including narrow bar dimensions, quiet zones and optical characteristics, shall be the same as specified for the primary bar code. The industry standard (AIM) check digit will be the last character in the bar coded string of data.

Symbology

The secondary bar code shall be printed using CODE 128 and using the standard described in [Recommended Practice 1600t](#).

Specifications

Field Identifier

The field identifier shall consist of a single alpha character as defined below:

Field	Identifier	Format (Cargo-IMP Standard)
Destination	D	aaa
Total No. of Pieces	P	n[...4]
Transfer Points	C	aaa
Weight of this Piece	W	n[...7]p
Total Weight of this Shipment	T	n[...7]p
Handling Information	B	t[...38]

Bar Code Format

The format shall consist of the field identifier immediately followed by the field data. The field delimiter immediately

follows. This sequence is repeated until all data is encoded. The industry standard (AIM) check digit will be the last character in the bar coded string of data. As with the primary bar code, the check digit will not be printed in human-readable format. There is no continuation character. If the amount of data to be coded is too great to fit on the label in one secondary bar code, then another bar code must be used. Each bar code will contain complete information for the data fields specified by the field identifier.

Examples:

- HWB No.: CHZH8-1234567
- Destination: ABY, Number of HWB Pieces: 99.

This data will not fit onto a 4 in (102 mm) label, so two bar codes are used. The data strings are formatted as follows:

Bar Code No. 1
HCHZH81234567
Bar Code No. 2
DABY+S0099

Bar Code Examples:

Example Number One:

Example Number Two:

* Encoding of carrier-/customer-specific information must be the last data encoded.

CSC(21)606a

Expiry: Indefinite

Section 1—General

1.1 For the carriage of cargo, unless a bar coded label in accordance with [Resolution 606](#) is used, identification label(s) in the form of a non-bar coded label shall be used and attached to each package, adjacent to the consignee's name and address where space permits.

In certain cases, more than one label may be required, such as when shipments have labels applied by different parties, e.g. shippers, forwarders, airlines, or when the amount of optional information does not fit onto the label stock in use. For example, a forwarder may add a label containing house waybill information, and a second label, containing air waybill information, may be subsequently added on shipment consolidation.

1.2 For the purposes of this Resolution, a non-bar coded label is one which does not contain bar codes. The label may be preprinted and completed manually, but in some cases may be printed automatically on demand.

- 1.6.3** moisture resistance.

2.2 The dimensions of the label and information entered shall be as follows:

2.2.1 the minimum dimensions of individual boxes shall be 76 mm in width and 20 mm in height;

2.2.2 where two boxes are shown horizontally alongside each other, they may be less than 76 mm but at least 38 mm in width;

1.9 REMITTANCE DELAYED BY OFFICIAL GOVERNMENT ACTION

Notwithstanding any other provisions contained herein, an Agent shall not be sent a notice of irregularity or declared in default with respect to all or any part of a remittance to the extent that the Agent is unable to make full settlement because of official Government action which directly prevents such settlement; provided that the Agent demonstrates that the amount due has been made available for remittance at a recognised bank but cannot be remitted owing to such official Government action.

1.10 DEFAULT AS PASSENGER AGENT

If an IATA Cargo Agent in a specific country is also approved as Passenger Sales Agent under the Passenger Sales Agency Rules applicable in that country, and

1.14.1(a)(iv) if, in its opinion, the economic situation so warrants, the Economic Watch Panel may decide by unanimous vote of the members present to change with immediate effect the reporting/remitting frequencies and/or the remittance date; provided that the revised frequencies and/or date shall remain within the allowable margins set forth in the relevant provisions of this Section and shall be immediately notified to all Members by the Agency Administrator;

2.2 REPORTING PERIOD, REPORTING DATE AND SUBMISSION DATE

The Cargo Agency Conference shall set the length of the reporting periods applicable to each CASS-Export. There shall be two reporting periods per month, unless the Cargo Agency Conference establishes a greater frequency. 2.6.10.1 notwithstanding the provisions of [Subparagraphs 2.6.4](#) and [2.6.5](#) of this Paragraph, the Cargo Agency Conference may decide to sanction instances of failures to comply with procedures and instructions, which generate additional cost to airlines and instances of overdue remittances by the levy of a general charge. The levels of such charge shall be determined from time to time by the Cargo Agency Conference and notified by ISS Management to all Agents in the CASS area;

2.6.10.2 Settlement Office charges shall be in the amount debited to ISS Management by the Settlement Office as a result of the Agent's failure to remit as prescribed, increased, if applicable, by an amount to compensate for any extra costs incurred by ISS Management in relation to such failure;

2.12.1(a)(iii) a meeting of the Economic Watch Panel may be called at any time on a 72-hour notice to conduct such reappraisal at the documented request of one of its members or of any Member having deposited stocks of its Air Waybills with Agents/Intermediaries in the country. CARGO INTERMEDIARY AGREEMENT

RESOLVED that, the following form of Cargo Intermediary Agreement is adopted for use by participants in the Canadian Air Cargo Programme, with an implementation date to be announced by the Agency Administrator:

CANADIAN AIR CARGO PROGRAMME—FORM OF INTERMEDIARY AGREEMENT

AN AGREEMENT made this _____ day of _____ 20____

BETWEEN each IATA Member airline ('the Carrier'), represented by the Director General of IATA ('the Director General') acting for and on behalf of the Carrier,

AND _____ ('the Agent' in part I, 'the Forwarder' in part II, and 'the Intermediary' in part III of this Agreement), having its principal office at _____ with respect to the promotion of global logistic services, the sale of international air cargo transportation ('airfreight') within Canada and the handling and delivery to the Carrier of cargo consignments in Canada and at the following airport(s) situated immediately adjacent to Canada:

WHEREAS:

The commercial environment in which both cargo agents and freight forwarders operate in Canada is one that requires an agreement form reflecting an increased role for freight forwarders;

The parties recognise the need for an agreement that reflects the characteristics of the Canadian air cargo market;

The Carrier and the Intermediary (sometimes jointly called 'the Parties') undertake to give a high priority to applying electronic commerce in accordance with IATA standards and procedures. Such electronic commerce will facilitate the identification of consignments, and the tracking, tracing and settlement requirements of the parties and accelerate the introduction of necessary procedures with other competent entities to the benefit of the mutual customers;

The Director General has provided the Parties with a copy of the CACP Handbook (herein after called 'the Handbook'). It contains the rules, regulations, IATA Conference Resolutions, instructions and procedures applicable to the Parties' actions under the present Agreement. Amendments to the Handbook shall be provided to the Parties. The date of effect of such amendments shall be determined by the Cargo Agency Conference or the Joint Council, as applicable, but not earlier than 30 days after their dispatch from IATA. The amendments shall be deemed to be incorporated herein. The provisions of the Resolutions contained in the Handbook are binding upon the Parties and each current release of the Handbook shall be incorporated by reference into this Agreement and forms an integral part of this Agreement;

The Parties acknowledge that they have received a copy of the current edition of the Handbook and have acquainted themselves with the contents thereof;

This Agreement does not prevent either of the Parties from using other distribution channels or methods, either with carriers or intermediaries or with shippers directly and does not purport to impose exclusivity of dealings on the Parties.

WHEREBY IT IS AGREED AS FOLLOWS:

Definitions of Terms used in this Agreement

Air Waybill: the document of carriage as defined in [Resolution 823](#). For the purposes of this agreement, references to Air Waybill shall also include electronic shipment record.

Canadian Air Cargo Programme Directory ('the Directory'): is the official list of all Intermediary's participating in the CACP.

Canadian Air Cargo Programme Joint Council ('Joint Council'): is the body composed of airline and airfreight forwarder nominees, charged with the overall responsibility for running the CACP, pursuant to IATA CAC [Resolution 803](#).

Canadian Air Cargo Programme Operations Handbook ('the Handbook'): the manual published under the auspices of the CACP by the Joint Council. It contains the rules, regulations, IATA Conference Resolutions, instructions and procedures applicable to the parties' actions under the present agreement and is revised and reissued as required.

Agent: in the context of this agreement, an Intermediary who acts on behalf of a carrier and is a registered IATA cargo agent whose name is entered in the directory.

Forwarder: in the context of this agreement, an Intermediary which issues air waybills on a principal to principal basis, in accordance with Part 2 of this agreement and which reflects its CACP registered company name in both the Shipper and Agent boxes on the air waybill. Such designation within the CACP does not imply compliance with national government licensing requirements.

Intermediary: in the context of this Agreement, a generic term for both Agent and/or Forwarder.

PART I. AGENCY RELATIONSHIP

Purpose of this Part I of the Agreement

The purpose of this Part I of the Agreement is to set out the contractual terms, which are specific to the Carrier/ Agent relationship. The provisions of this Agreement shall apply to all Air Waybills completed by the Intermediary in its capacity as agent for the Carrier ('Agent').

RESOLUTION 821

IATA CARGO OFFICE NUMERIC CODE

CAC1(MV C082)821 (amended) Expiry: Indefinite
CAC2(MV C082)821 (amended) Type: B
CAC3(MV C082)821 (amended)

RESOLVED that:

1. AUTHORITY TO ASSIGN NUMERIC CODES

1.1 the assignment of IATA Cargo Office numeric code designators ('the numeric code') to Members, non-IATA air carriers and to IATA Cargo Agents or Forwarders shall be carried out by the Agency Administrator who shall periodically publish a list to Members of numeric codes so assigned and the name of the assignees;

1.2 blocks of IATA numeric codes shall be set aside by the Agency Administrator for use by the Cargo Network Services Corporation (CNS). CNS shall control assignment of such numeric codes to appointed agents listed by it in the United States of America. CNS shall report to the Agency Administrator the numeric codes so assigned. The limitations and duties with respect to the use and protection of the numeric code described in this subparagraph shall be identical to those specified elsewhere in this Resolution.

2. AGENT-FORWARDER ASSIGNMENT

2.1 upon accreditation of an agent by IATA, the Agency Administrator shall assign that IATA Cargo Agent a numeric code. The assignment of additional numeric codes, for use by an IATA Cargo Agent's fully-owned and fully-controlled field offices where Air Waybills are executed, shall be in accordance with Cargo Agency Conference policy;

2.2 such assignment shall continue only so long as the assignee remains an IATA Cargo Agent and shall be withdrawn by the Agency Administrator should the IATA accreditation of the assignee be discontinued, suspended or cancelled, whether by IATA or by the assignee. The assigned numeric code remains the property of IATA at all times. It shall not be shared, lent, leased, sold or otherwise transferred by the assignee to any other person, whether an individual or a corporation. Failure on the part of the assignee to respect this exclusivity of usage requirement shall constitute valid grounds for the Agency Administrator to withdraw the assigned code and cause the Cargo Agency Commissioner to review the IATA Cargo Agent's IATA accreditation.

3. AIRLINE ASSIGNMENT

An air carrier wishing to obtain numeric codes for its own cargo sales offices shall apply in writing to the Agency Administrator. The air carrier shall use the numeric codes so assigned solely for its own fully-owned and

fully-controlled cargo sales offices and shall not share, lend, lease, sell or otherwise transfer them, or allow them to be used, by any other person, whether an individual or a corporation.

4. RESCISSION

upon this Resolution being declared effective, the following Resolution shall be rescinded:

DEFINITIONS OF TERMS USED IN CARGO AGENCY CONFERENCE RESOLUTIONS

- △ CAC1(MV C109, CAC/51, CAC/52)823 (except USA) (amended)

 CAC3(MV C109, CAC/51, CAC/52)823 (amended)
- Expiry: Indefinite
 Type: B

WHEREAS the Cargo Agency Conference has agreed definitions for terms and expressions commonly used in Resolutions of the Conference, and

WHEREAS the Conference wishes to consolidate such definitions in a single Resolution, it is

RESOLVED that the definitions of terms and expressions used in Resolutions of the Cargo Agency Conference are as follows:

- △ **'AGENCY ADMINISTRATOR'** means the IATA official designated by the Director General from time to time as the holder of that office, or their authorised representative, responsible for the management of the IATA Agency Programmes in accordance with the Members' rules and resolutions and with autonomy to act in extraordinary circumstances.

- △ **'AGENCY COMMISSIONER'** (sometimes called 'the Commissioner', 'the Ombudsman') means the person designated under a procedure involving the Director General of IATA and the Chairperson of the Airfreight Institute of FIATA, as the holder of that office, or their authorised representative as provided for in [Resolution 811d](#), and who exercises jurisdiction over matters prescribed by the Cargo Agency Conference and as described in [Resolution 811e](#) (Conduct of Review by Agency Commissioner).

It also includes Intermediaries who conduct transactions in accordance with Part 1 of the Cargo Intermediary Agreement—Australia and the Latin American Air Cargo Programme. While the legal status of a cargo agent

'BILLING PERIOD' means the period as described in [Resolution 801r subparagraph 2.3.3](#). The precise time span covered will be determined in each case by the date of the accountable transactions that each CASS Airline wishes to include in that billing.

'BRANCH OFFICE LOCATION' means a registered Agent's place of business where cargo is made ready for carriage and which is entered on the Agency List as a Branch Office Location which is the same entity as its Head Office Location, with the Head Office having full legal and financial responsibility of the administration, staff, liability maintenance and operations expense of the Branch Office.

CARGO ACCOUNTS SETTLEMENT SYSTEM-EXPORT (hereinafter called 'CASS-Export') means the method of accounting and settling accounts between CASS-Export Airlines on the one hand, and their Agents and Associates on the other hand,

1. CARGO AGENCY CONFERENCE

1.1 The Conference is responsible for, amongst other things, setting CASS technical standards, together with corresponding changes to Standard forms used in the operation of the CASS. These are published in the CASS Technical Specifications Handbook, Attachment A, which constitutes part hereof;

1.2 amendments to the CASS Technical Specifications Handbook shall be subject to agreement by the Conference, however, should the C-CMG recommend action be taken on a particular amendment(s) between Conferences, ISS Management shall publish the proposed amendment(s) in writing to all Members. If no protest is received from any Member within 45 days of the publication of the amendment(s), the amendment(s) will be deemed endorsed and the CASS Technical Specifications Handbook will be amended accordingly. In the event of a protest, the reasons therefore shall be given in writing and the protested amendment will be reconsidered at the next meeting of the C-CMG with a view to overcoming the reasons for disagreement. In the event of continuing disagreement, the matter shall be referred to the Conference for final action.

2. FEASIBILITY STUDY—IMPLEMENTATION OF A CASS

The Head Office of any Member, or group of Members, may request ISS Management to initiate a feasibility study, respecting CASS implementation.

3. PARTICIPATION BY MEMBERS

3.1 Participation by IATA Members in any CASS is voluntary. IATA Members may join at the inception of a CASS or may join at a later date by paying the applicable joining fee set by ISS Management;

3.2 participation in any CASS shall be dependent on the Member continuing to pay the appropriate charges for those services that have been provided to the Member in connection with the operation of that CASS;

3.3 a Member's participation shall be dependent on it continuing to meet financial criteria established by the Conference, if any;

3.4 upon joining a CASS, a Member must sign a Counter-indemnity Agreement with IATA as prescribed in [Appendix 'C'](#) to this Resolution. Where a current signed counter-indemnity is in place, the changes specified in [Appendix 'C'](#) are deemed to be incorporated therein;

3.5 once a Member has joined a CASS, it automatically becomes a Billing Participant as defined in [Resolution 823](#) "Definitions of Terms Used in Cargo Agency Resolutions,"

3.6 where a negative settlement occurs as a result of monthly CASS billings, monies due to IATA should be

remitted by the Member by the published applicable remittance date;

3.7 A Member cannot participate in a CASS either directly or indirectly through a GSSA without a proper IATA Air Carrier Designator and Prefix (Numeric) Code;

3.8 IATA must not consider that it is prohibited from doing business with the Member or that doing so would pose an undue risk to IATA under applicable legal or regulatory requirements;

3.9 a Member must have the ability to provide IATA with the data required to comply with applicable legal and regulatory requirements, including the documentation demonstrating the identity of the Air Waybill(s) represented by an individual transaction, including the counterparties to that transaction;

3.10 a Member must have the ability to prevent any transactions which are not for the issuance of Air Waybills, or which are not issued by the relevant Member, from being submitted to CASS.

4. PARTICIPATION BY AGENTS/ INTERMEDIARIES/FORWARDERS

Where a CASS has been adopted for a given country/area, then:

4.1 effective from the date of implementation, all Agents/Intermediaries/Forwarders in that country/area shall be governed by the provisions of [Section 2](#) of Resolution 801r (except for countries where [Resolution 805zz](#) has been implemented in which case [Resolution 801re](#) applies) with respect to transactions made on behalf of CASS Airlines.

4.2 where a CASS is implemented, the Agency Administrator shall so advise all Agents affected.

4.3 nothing in these procedures shall preclude a CASS Airline and an Agent or Intermediary from making alternative arrangements on a bilateral basis outside of CASS.

4.4 IATA must not consider that it is prohibited from doing business with the Agent/Intermediary/Forwarder or that doing so would pose an undue risk to IATA under applicable legal or regulatory requirements.

5. CASS ASSOCIATES

5.1 The Cargo Agency Conference may decide that charges due on consignments tendered by persons other than Agents are to be collected in a particular CASS in accordance with the provisions implemented thereof. If such an agreement is effective, then a person other than an Agent may become a CASS Associate and participate in the CASS-Export provided that such person:

5.1.1 (except for area covered by [Resolution 805zz](#)) abides by financial obligations to settle through the system in accordance with [Resolution 801r](#) and meets the requirements specified in [Appendix 'D4'](#). If any other requirement is locally recommended, it should be submit-

ted to the Cargo Agency Conference for endorsement prior to application;

5.1.2 (for area covered by [Resolution 805zz](#)) abides by financial obligations to settle through the system in accordance with [Resolution 801re](#) and meets the requirements specified in [Appendix 'D4'](#). If any other requirements are locally recommended, they should be submitted to the Cargo Agency Conference, for adoption, prior to its application. CASS Associates who are shipping Cargo under their ownership and who are Direct Accounts of an Airline shall not be subject to the bank guarantee provision.

5.1.3 signs an agreement in the form specified in [Appendix 'D'](#) to this Resolution and pays the participation fees determined by ISS Management from time to time;

5.2 the Agency Administrator, after confirming the applicant meets the applicable criteria, signs the agreement on behalf of all Airlines participating in that CASS and shall then issue to the applicant a CASS Associate code number;

5.3 such number may only be used as long as the Associate continues to meet the qualifying requirements specified in [Appendix 'D4'](#) and has paid all applicable fees;

5.4 further to [Paragraphs 5.1](#) and [5.1.1](#) above, where a decision regarding Associate participation or applicable criteria is required between Conferences, a mail vote may be initiated. Providing unanimous support for the proposal is received, the proposal shall be adopted. Failure to vote will be deemed to be an abstention. Abstentions shall count as positive votes.

5.5 IATA must not consider that it is prohibited from doing business with the CASS Associate or that doing so would pose an undue risk to IATA under applicable legal or regulatory requirements.

6. PARTICIPATION BY NON-IATA AIR CARRIERS

6.1 A non-IATA air carrier (an Airline), having lodged its own Air Waybills with Agents, may request participation in a given CASS by submitting to the Agency Administrator a Form of Application and Concurrence, in which, amongst other things, they agree to be bound by the applicable Cargo Agency Resolutions. The Form is prescribed in [Appendix 'E'](#) to this Resolution;

6.2 upon acceptance by the Agency Administrator, the Airline agrees;

6.2.1 to pay the applicable joining fees set by ISS Management;

6.2.2 to contribute to the management and other costs of such CASS as set by ISS Management;

6.2.3 to meet the financial criteria established by the Conference, if any;

6.3 participation in any CASS shall be dependent on the Airline continuing to pay the appropriate charges for those

services that have been provided to the Airline in connection with the operation of that CASS;

6.4 upon joining a CASS, an Airline must sign a Counter-indemnity Agreement with IATA as prescribed in [Appendix 'C'](#) to this Resolution;

6.5 once an Airline has joined a CASS, it may elect a mode of Participation, Billing or Full, as defined in [Resolution 823](#) "Definitions of Terms Used in Cargo Agency Resolutions";

6.6 where a negative settlement occurs as a result of monthly CASS billings, monies due to IATA should be remitted by the Non-IATA Carrier by the published applicable remittance date.

6.7 A non-IATA Carrier cannot participate in a CASS either directly or indirectly through a GSSA without a proper IATA Air Carrier Designator and Prefix (Numeric) Code.

6.8 IATA must not consider that it is prohibited from doing business with the non-IATA carrier or that doing so would pose an undue risk to IATA under applicable legal or regulatory requirements;

6.9 a non-IATA carrier must have the ability to provide IATA with the data required to comply with applicable legal and regulatory requirements, including the documentation demonstrating the identity of the Air Waybill(s) represented by an individual transaction, including the counterparties to that transaction;

6.10 a non-IATA carrier must have the ability to prevent any transactions which are not for the issuance of Air Waybills, or which are not issued by the relevant non-IATA carrier, from being submitted to CASS.

7. PARTICIPATION BY GENERAL SALES AND SERVICE AGENTS (GSSAs)

For the purpose of this Paragraph, the term 'General Sales and Service Agent (GSSA)' shall also include any Person appointed by one or more air carriers to carry out accounting functions in respect of cargo sales transactions made by Agents on behalf of such carrier(s), but not performing sales reservations functions:

7.1 a General Sales and Service Agent (GSSA), appointed by air carriers which have lodged their own Air Waybills with Agents, may request participation in a given CASS by submitting a Form of Application and Concurrence to the Agency Administrator. The form, prescribed in [Appendix 'F'](#) to this Resolution, amongst other things, binds the applicant to the Cargo Agency Administration Rules;

7.2 the appointing Member or Airline shall be requested to confirm the appointment by submitting a Form of Authorisation. This form is described in [Appendix 'G'](#) to this Resolution;

7.3 upon acceptance by the Agency Administrator, the GSSA agrees;

7.3.1 to pay the applicable joining fees set by ISS Management;

7.3.2 to contribute to the management and other costs of such CASS as set by ISS Management;

7.3.3 to meet the financial criteria established by the Conference, if any;

7.5 upon joining a CASS, a GSSA must sign a Counter-indemnity Agreement with IATA, as prescribed in [Appendix 'C1'](#) to this Resolution;

7.6 once a GSSA has joined a CASS, it may elect a mode of Participation, Billing or Full, as defined in [Resolution 823](#) "Definitions of Terms Used in Cargo Agency Resolutions";

7.7 where a negative settlement occurs as a result of monthly CASS billings, monies due to IATA should be remitted by the General Sales and Service Agent by the published applicable remittance date;

7.8 A legal entity appointed by an air carrier as a GSSA for the country concerned may not apply for accreditation as an IATA Cargo Agent/Intermediary. (A General Sales and Services Agent is one to whom an airline has delegated general authority to represent it for required to provide further information or additional purposes of overseeing sales in a defined territory);

7.9 a GSSA shall not be allowed to participate (or if active, its participation shall be immediately suspended) if IATA considers that it is prohibited from doing business with the GSSA or that doing so would pose an undue risk to IATA under applicable legal or regulatory requirements or if the GSSA fails to comply with any request from IATA for documentation required to confirm the same;

7.10 a GSSA must have the ability to provide IATA with the data required to comply with applicable legal and regulatory requirements, including the documentation demonstrating the identity of the Air Waybill(s) represented by an individual transaction, including the counterparties to that transaction;

7.11 a GSSA must have the ability to prevent any transactions which are not for the issuance of Air Waybills, or which are not issued by the relevant GSSA, from being submitted to CASS.

8. IATA SETTLEMENT SYSTEM SERVICE PROVISIONS MANUAL

ISS Management, in consultation with the CPG, shall produce an IATA Settlement System Service Provisions Manual containing terms, conditions and codes of conduct of CASS operations applicable in all areas. The CPG will be responsible for the content of the Manual, however it shall at all times be in conformity with applicable IATA Resolutions.

9. LOCAL CUSTOMER SERVICES MANUAL

Wherever a CASS has been implemented, ISS Management shall produce a Local Customer Services Manual, containing local terms, conditions and codes of conduct of the local CASS operation. The Cargo Agency Conference delegates the authority for the contents of this Manual to the Local Consultative Council (LCC) for subsequent endorsement by the C-CMG. The contents of this Manual shall be in conformity with applicable IATA Resolutions and are described in [Appendix H](#).

10. VOLUNTARY TERMINATION

A Member, Airline or GSSA may withdraw from a particular CASS by giving written notice of not less than 3 months and shall be liable for its share of all costs through to the end of the notice period, except that a GSSA's participation in a CASS may be terminated when the Member appointing the GSSA has notified the Agency Administrator, in accordance with [Resolution 871](#), with not less than three calendar months' notice in writing that they have terminated their appointment of the GSSA.

11. AIRLINE SUSPENSION OF OPERATIONS

11.1 Reasons for Suspension

Where an airline participating in a CASS ("the CASS Airline") ceases all operations either temporarily or permanently, due to financial or other reasons; or where the CASS Airline becomes subject to bankruptcy, moratorium of debt, or reorganization or similar proceedings; or when the CASS Airline does not have a valid designator/prefix and accounting code assigned by IATA; or where a CASS Airline defaults on a material obligation under the CASS; or when the CASS Airline is suspended from the IATA Clearing House, BSP, or other IATA settlement system or if IATA considers that it is prohibited from doing business with the CASS Airline or that doing so would pose an undue risk to IATA under applicable legal or regulatory requirements or if the CASS Airline fails to comply with any request from IATA for documentation required to confirm the same, or when IATA otherwise determines that there are sufficient financial grounds to suspend the CASS Airline, IATA shall evaluate whether the CASS Airline should be suspended from all CASS operations and the action to be taken, based on the pertinent information available.

In the event of eligibility for suspension pursuant to one or more of the above events; or if the CASS Airline defaults on a material obligation to IATA in respect of the IATA Clearing House, BSP, or other financial arrangement for services provided by IATA; or if ISS Management determines that the integrity of the CASS is at risk, IATA may withhold funds due from the CASS to the CASS Airline in order to settle the debt or potential risk. IATA may also require the Airline to provide a centrally held security deposit, or alternative security acceptable to IATA to be held centrally, and calculated so as to cover funds at risk for a minimum of one month.

Pursuant to Resolution 851 Attachment F at [4.3.2](#), if the CASS Airline is represented by a General Sales and Service Agent (GSSA) and is suspended from CASS for any reason, the transactions processed by the GSSA on behalf of that CASS Airline shall be subject to the same conditions as applicable to that CASS Airline.

11.2 Action by ISS Management

When an Airline ceases operation, ISS Management will continue to collect monies due to such airline in accordance with the settlement office procedures.

An Agent or Associate (or in Europe, an Intermediary) would not be expected to settle any amount in respect of an air waybill of an airline that has ceased operations, where as a direct consequence of such cessation of operations, the consignment has not been transported in accordance with the original shipping instructions. In this case the normal CASS dispute procedures apply.

11.3 Lifting of Suspension

If the Airline resumes its operations or the reorganisation proceedings terminate, and the Airline continues or resumes operations, ISS Management shall lift the suspension.

12. OTHER TERMINATION

12.1(a) notwithstanding [paragraph 10](#) of this Resolution, if ISS management has reason to believe that a CASS Airline may be unable to satisfy its indebtedness to the CASS and

12.1(a)(i) such CASS Airline owes in excess of USD10,000 or equivalent for CASS related processing and management fees, and has been requested to pay the CASS on the applicable date,

12.1(a)(ii) ISS Management has notified such CASS Airline of the amount owing.

12.1(a)(iii) the amount owing remains outstanding more than five working days after the date of notification and such Member Airline has not disputed the debt,

or

12.1(b) if a CASS Airline fails to pay any amount due in relation to a CASS settlement, as provided for in [subparagraph 3.2](#) or [6.3](#) above;

12.1(c) then ISS Management may suspend or terminate such CASS Airlines' participation in all CASS.

Pursuant to the provisions of paragraphs 3, 6 and 7 of Resolution 851, a CASS participant may be suspended from CASS for not adhering to participation conditions and obligations.

15. CLOSURE OF CASS OPERATION

Should it be necessary, for whatever reason to consider closure of an operating CASS, ISS Management will consult with the CASS Airlines. In the event of closure, ISS Management will normally give notice of at least 12 months to CASS Airlines. All costs relating to the closure incurred during the period of the notice and/or arising after closure will be apportioned between the CASS Airlines in accordance with the ISS pricing formula.

16. RIGHT OF SET OFF

ISS Management shall have the right to set off any debt or claim owed by such Airline to CASS in relation to a CASS settlement, including any amount owed by the Airline to IATA for the provision of CASS processing and management fees, against any monies held or owed by IATA or any of its divisions and which are payable to that Airline. Similarly, ISS Management shall have the right to set off any debt or claim owed by an Airline to IATA or any of its divisions against any monies held or owed by IATA in any CASS.

This financial security will be released if in the 36 consecutive months following the submission of the financial security, no irregularities or defaults have been registered.
- b) CASS Associates participating in a market specifically stated in [Attachment B](#) "Table by CASS Country of CASS Associates Requirements", shall furnish a financial security as established under [section 3](#), and compliant with the additional criteria indicated in [Attachment B](#).
- c) A CASS Associate in default must pay the full outstanding amount and must place a new financial security as a condition for reinstatement, as outlined under [section 3](#). This financial security shall not be less than the minimum guarantee amount as indicated in the Global

4) CASS Airline separate requirement for financial security for CASS Associates
