Sustainability in Air Transportation

Marie Owens-Thomsen
Chief Economist
ICAO CAAF/3 Outcome

- 5% emissions reduction in international aviation by 2030
- Strive to produce SAF "everywhere"
- Ensure that all airlines can claim SAF purchases against environmental obligations
- Necessary for achieving this outcome: a **SAF registry and accounting system**

SAF

2023 estimated share of SAF in total jet fuel consumption:
• 0.2% or 0.5 Mt
  • HEFA

2050 minimum estimated demand for SAF:
• 500 Mt (x1000 2023 output)
  • HEFA - Hydroprocessed Esters and Fatty Acids
  • ATJ – Alcohol to Jet
  • FT – Fischer Tropsch
  • PTL – Power to Liquid

Source: IATA Sustainability & Economics, Chemistry Europe - Wiley

• According to IMF latest World Economic Outlook, world economic growth will slow from 3.5 percent in 2022 to 3 percent this year and to 2.9 percent next year, a 0.1 percentage point downgrade for 2024 from July.
• This is in spite of
  • war-disrupted energy and food markets, and
  • unprecedented monetary tightening to combat decades-high inflation.
Implications:

1. The feedstock informs the pathway

2. One feedstock may align with several different SAF production pathways; therefore, identifying relevant regional value chains becomes about:

   a) Identifying all local viable feedstocks

   b) Assessing which pathway(s) this grouping of feedstocks align with

   c) Identifying the most relevant production pathway(s) for the region, based on this combination of feedstock

   d) Considering if a given SAF pathway will derive higher yields from a given feedstock, relative to another pathway using the same feedstock.
Use of revenue by oil & gas industry, 2018-2022

2022: USD 20 bn = less than 3% of capital budget, and around 1% of total clean energy investment globally

Investment in oil and gas, USD billion

- USD 800 billion in oil and gas investments in 2023
- Estimated top of the range investment needs per year in air transportation's energy transition = USD 150 billion
- **One fifth or 19%** of oil and gas investments need to be redirected.
