Thursday 14th March 2019
9:00 – 12:30

Perishables Track Summary:

The transport of perishable products is essential in the air cargo's business and perishable volumes are growing faster than the general air cargo market. Innovations in quality, packaging and efficient logistic planning through supply chain collaboration are key drivers of industry growth. This half day track will provide the attendees with the opportunity to learn and share with industry experts about existing and new best practices to protect the quality and integrity of these sensitive shipments.
