

Go beyond financial efficiency

A new generation of IATA BSPlink helps you continuously improve back-office operations and costs.

Automate, streamline and continuously improve

BSPlink helps tens of thousands of travel agents around the world be efficient, with online, automated administration of financial transactions with airlines. A new generation of BSPlink now offers additional capabilities that boost travel agents' efficiency programs, helping you to further automate and streamline your back-office functions. Our three plans: Efficient, Streamlined and Lean, give you many more features tailored to organizations who want to do even more.

Efficient

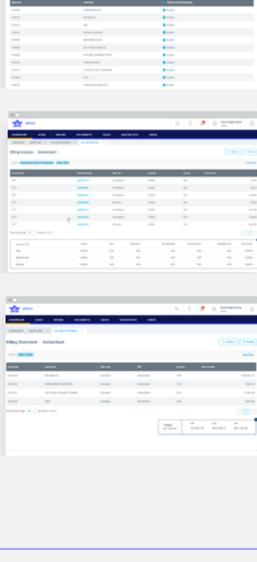

- Access all the essential features of BSPlink's digital platform simply.

Streamlined

- View all ADMs, ACMs and refunds in one place.
- Manage ACM issue and refund requests en masse.
- Start tracking your performance with company dashboards.

Lean

- Access all your BSP countries and branches with a single sign-on (SSO).
- View the consolidated data of all your BSP countries and branches.
- Improve performance analysis with additional dashboards.
- Easily access all your records for up to 2 years.

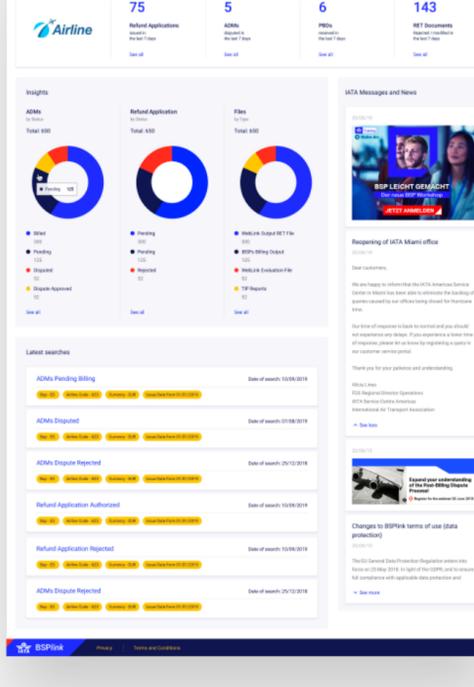

The new generation of BSPlink enables you to:

- 01 Manage payments with airlines worldwide in a single process.
- 02 Automate recovery of incentive data through file transfer.
- 03 Automate and speed up management of ACMs or refunds.
- 04 Gain valuable input for your treasury management process.

Plus, there's a completely revised interface:

- Work in the language of your choice: English, French, Spanish, Portuguese and German.
- Customize what you see on screen with drag-and-drop modular tables.
- Save time when looking for documents with auto-complete search function.
- See at a glance when new types of report become available.

Choose the plan that's right for you

Select from our three plans below to meet your organization's streamlining objective. New capabilities will be available progressively from end 2020 through early 2021.

	Efficient	Streamlined	Lean
