Information sharing

Air Cargo Security

Advance Cargo Information

Objective

Provide an additional layer of security, through early risk assessment in order to identify high risk cargo

IATA's role

Ensure compliance, by:

- promoting relevant industry standards
- advocating international harmonization

2017 Milestones

- UNCTAD ASYCUDAWorld (January [press release](#))
- WCO CTS (cf. October [press release](#))
- C-XML standards implemented for ACI in an increasing number of countries (Argentina, Ghana, Jamaica, Mexico, Paraguay, UAE, etc.)

Pre-Loading Advance Cargo Information

- ❑ Additional scrutiny applicable before loading
- ❑ Practical issues are still discussed at international level, while US pilot (ACAS) is ongoing
- ❑ IATA is working closely with ICAO and WCO and countries interested in developing those additional requirements to develop international standards.

TRADE FACILITATION

WORLD TRADE ORGANIZATION

Trade Facilitation Agreement (TFA)

22 February 2017

121 Parties

Resolution on Cargo Modernization

4-6 June 2017

Calls governments to implement the TFA

ACTION POINTS

1

National Committees on Trade Facilitation

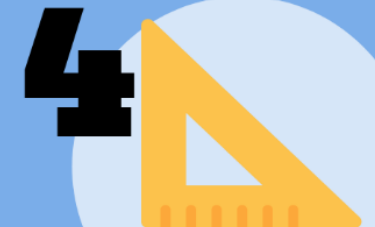

2

Assessments/Expertise

3

Digitalization

4

Measurements

EXPECTATIONS

Growth in air cargo volumes

TFA likely to boost air freight volume by 1.4 – 4.4 % (USD 100-300 billion)

IATA economics

Logistics performance

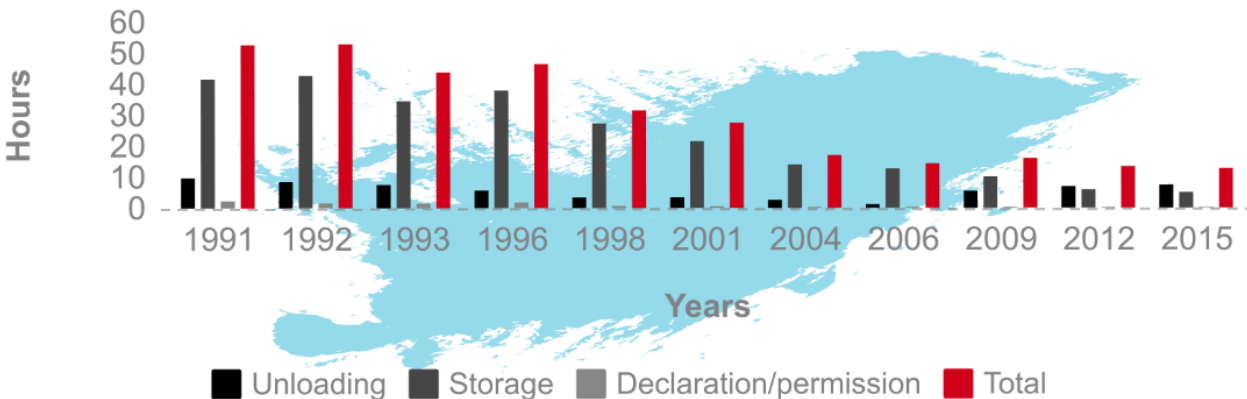

The link between logistics performance and trade in GVC products is about 50% stronger than for other goods.

WTO

Decrease in border times

JAPAN EXPERIENCE

Source: Japan Customs

Boost on eAWB

The global average level of implementation of paperless trade measures is nearly 60%

UNESCAP

Trade Facilitation
