IATA DGR

Data eList

Ensure you make the most of your Cargo IT system.
License IATA’s DGR Data eList.

Need to be more efficient with Dangerous Goods operations?

- SAVE TIME – up to 5 minutes or more per transaction*
- IMPROVE ACCURACY – reduce errors with data automation*

Integrate and quickly see results. Feel the difference.

The DGR Data eList is a database derived from the annually produced IATA Dangerous Goods Regulations manual - the globally accepted field reference source for companies shipping, forwarding, handling, and accepting dangerous goods for transport by air.

Content of the IATA Dangerous Goods Regulations is available in an electronic format for license to aviation stakeholders. Critical data from the current version of the DGR has been packaged into XLS, CSV or XML files for integration into various aviation systems to use the data to support the acceptance, handling and uplift of dangerous goods in air cargo.

*Based on a recent survey of existing global DGR Data eList customers.
Improve your efficiency, eliminate errors and work faster.

Obtain critical and up-to-date dangerous goods data by having access to automated listings that are recognized and accepted worldwide and provide faster, more accurate, efficient and more reliable service to your customers.

Avoid errors due to incorrect databases and manual re-keying by using the source of the list of dangerous goods in the IATA DGR.

IATA can now customize the data to meet individual customer needs.

Integrate the DGR Data eList into your system to help create and validate Safety Data Sheets, Shipper’s Declarations for Dangerous Goods, generate automated notification to the pilot-in-command, semi-automate acceptance checks and many other uses.

Follow our Member Airlines

Leading global airlines cannot be wrong when they license the DGR Data eList. It’s easy to integrate, and starts working for your organization from day 1.

Choose the best data format for you

The DGR Data eList is available in 3 standard data formats emailed to customers. It is produced annually and updated when any information changes (e.g. addenda).

Section 2.8: State and Operator Variations;
Contains over 150 records that can be provided in a variety of formats.

Section 4.2: List of Dangerous Goods;
(Blue pages) contains over 4,000 records that can be provided to you in a variety of formats including CSV, XLS, and MDB.

Section 4.4: Special Provisions;
The special provisions are referred to in Column M of the List of Dangerous Goods and the information contained therein is additional to that shown for the relevant entry and contains over 150 records that can be provided to you in a variety of formats.
