	Page
Foreword	ix
Summary of Changes	x
Introduction	xiii
The Objectives of the Manual	xiii
The Benefits of Implementation	xiv
Amendment Procedures	xiv
Description of the Contents—the Chapters	xv
Appendices to the SSIM	xvi
Attachments to the SSIM	xviii
Chapter 1—Definitions	1
1.1 Definitions	1
Chapter 2—Information Required for Standard Schedules	9
2.1 Data Requirements	9
2.2 Data Representation	9
2.3 Data Elements and Data Element Identifiers	11
2.4 Data Element Listings	13
2.5 Glossary Introduction	19
2.6 Data Element Glossary	20
Chapter 3—Standard Print Layouts for Schedules Information	111
3.1 General	111
3.2 Description	111
3.3 Data Elements Required	112
3.4 Code Sharing Flights	112
3.5 Plane Change	112
3.6 Examples (for demonstration only)	113
Chapter 4—Standard Schedules Message Procedure	115
4.1 Introduction	117
4.2 Principles and Rules	117
4.3 Message Standards	118
4.4 SSM Action Sub-Messages	120
4.5 Technical Message Specification	122

4.6	SSM Sub-Message Definition	128
4.7	Additional Message Examples	168
Chapter 5—Ad Hoc Schedules Message Procedure		173
5.1	Introduction	175
5.2	Principles and Rules	175
5.3	Message Standards	176
5.4	ASM Action Sub-Messages	177
5.5	Technical Specification	180
5.6	Technical Message Specification	180
5.7	SSM Sub-Message Definition	185
5.8	Additional Message Examples	224
Chapter 6—Airport Coordination Procedures		229
6.1	Introduction	235
6.2	Principles and Rules	235
6.3	Standard Procedures and Messages	239
6.4	Message Standards	239
6.5	Message Specifications	250
6.6	Action Codes	279
6.7	Incorrectly Formatted Messages	291
6.8	Slot Allocation Procedures	292
6.9	Use of Special Reference—//BLOCK or //SWAP	332
6.10	SMA Procedures	335
6.11	SAQ Procedures	344
6.12	SIR Procedures	349
6.13	Waitlist Procedures	356
Chapter 7—Presentation and Transfer of a Schedule Data Set		375
7.1	General	375
7.2	Principles for the Transfer of Computerized Schedules	375
7.3	Computerized Schedules Constraints	376
7.4	Record Organisation	376
7.5	Record Composition	377
7.6	Application	383
Chapter 8—Presentation, Application, and Transfer of Minimum Connecting Time (MCT) Data		385
8.1	General	385
8.2	Establishing MCTs	386
8.3	Practice for the Submission of MCTs	386
8.4	Principles for the Transmission of MCT Data	386
8.5	MCT Data Elements Hierarchy Table	386
8.6	MCT Data Elements Glossary Introduction	389

8.7	MCT Data Elements Glossary	389
8.8	Presentation and Transfer of a Minimum Connecting Time Data Set	406
8.9	Application	410
8.10	Designation of MCT Coordinator in Each Carrier	415
8.11	Carrier Submission Example Template	416
8.12	MCT Transmission Format	416
Appendix A—IATA Aircraft Types		417
	Aircraft Type Codes	417
	Aircraft Group Codes	417
	Aircraft Type Publication Override	417
	Surface Equipment	418
	General Aviation	418
	ICAO Codes	418
	Category	418
	Aircraft Body	419
	Revisions	419
	IATA Aircraft Types Encoding List	420
	Decoding List	442
Appendix B—Meal Service Codes		457
Appendix C—Service Types		459
Appendix D—Passenger Terminal Indicators		461
	Introduction	461
	Assignment Principles	461
	Revisions	462
	List of Passenger Terminals	463
Appendix E—Reject Reason		481
Appendix F—UTC—Local Time Comparisons and ISO Two Letter Country Codes		485
	General	485
	How To Use Appendix F Country Listing Showing UTC—Local Time Comparisons	485
	Amendment Procedure	486
	Country Listing Showing UTC—Local Time Comparisons	487
	Decoding	501
Appendix G—Traffic Restriction Codes Table		505
Appendix H—Explanatory Notes on SSIM Applications		509
	General	509
	Contents	509
	AD HOC Schedules Messages in the Operations Control Environment	511

Aircraft Seating Description	512
Clearances/Movement Advices for Flights Partly Out of Scheduling Season	515
Commercial Agreements Between Two or More Airlines	515
Daylight Saving Time	523
Default	525
Duplicate Flight Legs	525
Electronic Ticketing Information	529
Fictitious Points	531
Legs/Segments	532
Minimum Connecting Time	534
Partnership Specification	534
Plane Change without Aircraft Change	537
Time Mode	538
Traffic Restriction Code D, E and G	543
Traffic Restriction Code Qualifiers 710-712	546
Train Stations at Multi-Terminal Airports	549
Withdrawal of AD HOC Schedule Changes	549
Appendix I—Region Codes	553
1. Schengen Agreement Countries (Region Code SCH)	553
2. IATA Traffic Conference Areas (TC)	554
Appendix J—Information Codes for Use in the Airport Coordination Process	569
Additional Information Codes	569
Coordinator Reason Codes (SAL/SAQ/SCR)	569
Coordinator Reason Codes (SHL)	570
Appendix K—General Aviation Slot Clearance Request	571
General	571
GCR Message Principles	571
Message Use/Flows	572
Examples of Bilaterally Agreed Message Formats:	577
GIR (General Aviation Information Request/Reply) Message	579
Translation of ICAO Aircraft and Airports into IATA Format for Standard Chapter Six Messages	581
Appendix X—IATA XML Standards	583
Standard Schemas	583
Implementation Guides	583
Slot Coordination XML Standards	583
Schedules XML Work Group (SchedX)	586

Attachment 1—SISC/74 Participants	587
Section I—Airline Members	587
Section II—Non-Airline Observers	591
Attachment 2—Participants in IATA Slot Conferences	595
Section I—Airlines	595
Section II—Airport Coordinators and Facilitators	640
Section III—Non Airline Contacts	658
Attachment 3—MCT Coordinator Contacts	661
