

TASF

Travel Agent Service Fees

Collect your service fees on credit cards, simply and efficiently

Around the world, service fees collected by travel agencies from their customers have become the primary source of revenue for the majority of travel agents. With TASF, travel agents benefit from an electronic billing and reporting system that simplifies the service fee collection process by allowing IATA Accredited Travel Agents to charge their fees to their passenger's credit cards.

The infrastructure you already know

Convenient and fast, TASF enables travel agents to collect their fees through the existing BSP infrastructure with reporting and reconciliation procedures they already know and use. So there's no learning curve.

A streamlined process

TASF streamlines the process by using GDS terminals for authorization and processing of the service fee paid by credit card, saving time and money. There's no need for individual point of sales and staff training!

All major credit cards accepted

TASF makes life easier in every way. With all major credit cards accepted by the system, you no longer have to enter into individual negotiations with credit card vendors and benefit from better credit card rates!

It's FREE and EASY to register!

Register online with just a few clicks and start enjoying the many advantages of TASF today!
