Users of the IATA Live Animals Regulations (LAR) are asked to note the following amendment to the 45th Edition effective January 1st, 2019.

The addendum III consists of inserted/amended Live Animal Regulations information in the following chapters:

- **LAR Chapter 3, Section 3.2 Specific Airline Variations**
  - CV - Cargolux
  - SV - Saudia–Saudi Arabian Airlines

- **LAR Chapter 8 – Container requirement 2**
  - The weight limit for smaller size ponies and horses in section 5 Exceptions was included

- **LAR Chapter 8 – Container requirement 67**
  - The asterisk for Bumblebees was removed and the Note was amended.

To help identify the insertion, change or amendment to the existing text, where appropriate, these have been highlighted in blue and/or red in PDF or grey in hardcopy:

- **Inserted text is underlined in blue**;
- **Deleted text is strike in red**.

**LAR CHAPTER 3, SECTION 3.2 SPECIFIC AIRLINE VARIATIONS**

**CV — CARGOLUX**

CV-01 to CV-04 – remain the same

CV-05 **Not used** Any lion body parts including skulls, skeletons, skins, teeth and claws are not accepted for carriage

CV-06 and CV-09 – remain the same
SV—SAUDIA—SAUDI ARABIAN AIRLINES

SV-01 to SV-05 – remain the same

SV-06 Air waybill must be endorsed “carrier not responsible for injury, sickness, or death of animal(s) from natural causes”. Not used

SV-07 and SV-08 – remain the same

LAR CHAPTER 8 – CONTAINER REQUIREMENTS 2

CONTAINER REQUIREMENT 2

[...]

5. EXCEPTIONS
There may be exceptions to the general container requirements for smaller size ponies and horses each weighing 400kg (880 lb) or less. Such exceptions must be in full compliance with the stocking densities found in LAR Chapter 8.2.3 “Stocking density for horses in relation to floor area”. Such exceptions must be approved in advance with the carrier.

Examples of the exceptions currently applied by certain carriers are:

- A horse container without partitions for the transportation of polo horses or Icelandic horses can be used as long as the floor space is adequate for the number of animals as given in the LAR Chapter 8 on stocking density. For such shipments, it is essential that sufficient space is given to all the animals so that they can move in order to balance and maintain a good foothold.

- Weaned pony foals and pony yearlings of all breeds, and mini horses may be shipped individually or in small groups of not more than 4 animals in a suitably designed and compartmentalised container. They must wear halters.

Note:
See State Variation: CAG-02.
CONTAINER REQUIREMENT 67

The illustrations shown in this Container Requirement are examples only. Containers that conform to the principle of written guidelines for the species but look slightly different will still meet the IATA standards.

Applicable to:
Bumblebees (Bombus spp)*

Note:
Bees are considered venomous as some people may have life-threatening reactions if stung. Employees suffering from a bee sting allergy should be alerted to the presence of bees and kept from handling such consignments, if necessary.
