Traveling with electronic devices?
Here’s three steps to help you fly safely:

1. It is best to pack lithium-powered devices and accessories into your carry-on bag.

2. Electronic cigarettes, power banks and spare batteries MUST be kept in your carry-on bag.

3. If you must pack your tablet, mobile or laptop in your checked luggage, be sure they are completely turned off (not in “hibernate” or “sleep” modes).

If in doubt, contact your airline.
